1.0 APPLICATION SUMMARY

Applicant: William Sullivan Potomac Land

Company

FLU Category: R-4

Service Area: Urban

Site Acreage: 8.56

Community

Plan Area:

None

Overlay: None

Introduction Summary:

The request is to rezone an 8.56-acre property located at 2705 Bloomingdale Avenue in Valrico from AS-1 (Agricultural, Single-Family) to Planned Development. The proposal is for a maximum of 18 single-family homes with a minimum lot size of 6000 square feet with a maximum density of 2.1 dwelling units to the acre.

Development Standards:		
	Current AS-1 Zoning	Proposed PD
Density / Intensity	1 dwelling unit per acre	2.1 dwelling units per acre
Lot Size / Lot Width	Minimum 43,560 sf / 150'	Minimum 6,000 sf / 50'
Setbacks/Buffering and Screening	50' Front 50' Rear 15' Sides	20' Front 20' Rear (Side Facing Garage: 10') 5' sides (Corner Lots & Lots Abutting PD Boundary: 10')
Height	50'	35'

Additional Information:	
	LDC Part 6.02.01 Access
PD Variation(s):	 Variation to waive connectivity on eastern project boundary. Variation to waive connectivity on southern project boundary. LDC Part 6.06.03 Scenic Roadways Variation to waive 15-foot bufferyard requirement.
Waiver(s) to the Land Development Code:	None requested.

APPLICATION NUMBER: MM 21-0744

2.0 LAND USE MAP SET AND SUMMARY DATA

2.1 Vicinity Map

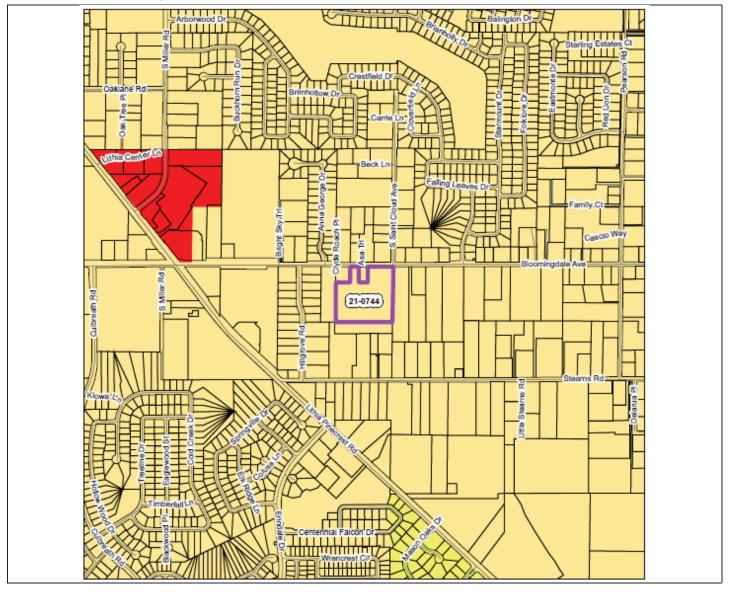

Context of Surrounding Area:

The subject site is located off Bloomingdale Avenue approximately 1,800 feet to the east of the intersection of Lithia Pinecrest Road and Bloomingdale Avenue. The surrounding area includes mostly residential, with a retail uses such as a Publix shopping center towards the Pinecrest Road and Bloomingdale Avenue intersection:

- To the north and northeast across Bloomindale Avenue is property zoned ASC-1 (min. lot size of one acre) and developed with single-family homes.
- Directly east and south of the subject site is AS-1 zoned property (min. lot size of one acre) and developed with single-family homes.
- To the west of the subject property is property that was rezoned from AS-1 to RSC-3 property (min. lot size of 14,520 sq. ft.) on May 23, 2006. This area is developed with single-family homes. Further west is PD 00-0836 approved for 71,890 sq. ft. of CG uses and 7,850 sq. ft. for office, and professional service including financial institutions with drive-through facilities.
- To the northwest is RSC-6 (min. lot size of 7,000 sq. ft.) and developed with single-family homes.

2.0 LAND USE MAP SET AND SUMMARY DATA

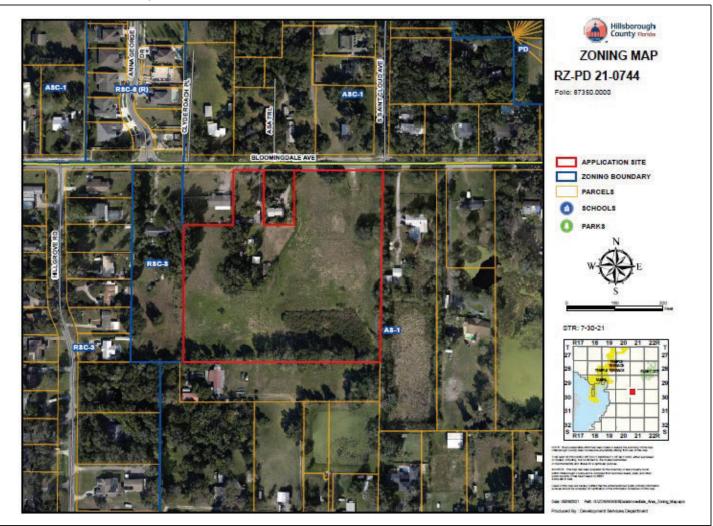

2.2 Future Land Use Map

Subject Site Future Land Use Category:	R-4
Maximum Density/F.A.R.:	4 dwelling units per acre / 0.25 F.A.R.
Typical Uses:	Residential, suburban commercial, offices, and multi-purpose.

North	ASC-1	Minimum 1 acre	Single-family home	Single-family homes	
South	AS-1	Minimum 1 acre	Single-family home	Single-family homes	
East	AS-1	Minimum 1 acre	Single-family home	Single-family homes	
West	RSC-3	Minimum 14,520 sq. ft.	Single-family home	Single-family homes	

2.0 LAND USE MAP SET AND SUMMARY DATA

2.3 Proposed Site Plan (partial provided below for size and orientation purposes. See Section 8.0 for full site plan)

There are environmentally sensitive lands in the amount of 0.956 acres of the property. The wetland lines and areas are depicted on the plan to show the limits of the wetlands and other surface waters delineated in accordance with Chapter 62-840 F.A.C. depict 0.956 acre of wetlands. Because the site is located within the Urban Service Area, it is to meet the Minimum Density per Policy 1.2 of the Future Land Use element. Due to wetlands on the site, the request may meet the exception to minimum density as outlined in Policy 1.3. Also shown on the plan are proposed retention ponds located in the southeastern portion of the subject site surrounding the wetland area. The minimum 6,000-square-feet lots are located on the northern portion of the subject property. Overall, the density is approximately 2.1 dwelling units per acre.

5.0 IMPLEMENTATION RECOMMENDATIONS

5.1 Compatibility

The subject property is located on approximately 8.56 acres at 2705 Bloomingdale Avenue, located southwest of the Bloomingdale Avenue and South St. Cloud Avenue intersection. The property is not located within the limits of a Community Plan and is located within the Urban Service Area. The applicant requests 18 single-family residential units on the 18.56-acre subject property with 6,000-square-foot lots. The applicant is proposing a maximum building height of 35 feet. The AS-1 and ASC-1 zoning located to the north, east and south of the subject property allows a building height up to 50 feet.

The applicant proposes additional screening along portions of the PD boundaries consisting of 10-foot wide Landscape/Drainage Easement and Vertical Screening with 3" caliper trees, 10' high, every 40' on center, on the northern, eastern and western boundary adjacent to lots in the PD excluding the Western 100' wide section adjacent to Bloomingdale Ave.

An 8-inch water main exists (adjacent to the site) and is located within the south Right-of-Way of Bloomingdale Avenue. A 16-inch wastewater force main exists approximately 45 feet from the site and is located within the north and is located in the Right-of-Way of Bloomingdale Avenue. The subject property contains wetland areas, which have been delineated; however, surveys have not been received or approved by EPC. Knowledge of the actual extent of the wetland and OSW are necessary in order to verify the avoidance of wetland impacts pursuant to Chapter 1-11.

Per Policy 1.2 (FLUE), the site must satisfy minimum density requirements. The maximum allowable density on the subject site is 34 dwelling units. However, in this case the request would meet the minimum density exception due to the wetlands on site and the likelihood of development having an adverse impact on environmental features.

APPLICATION NUMBER: MM 21-0744

ZHM HEARING DATE: January 18, 2022
BOCC LUM MEETING DATE: March 8, 2022

Given that Bloomingdale Ave. is a substandard collector roadway, the applicant's Engineer of Record submitted a Design Exception for a Substandard Road request for Bloomingdale Ave. to determine the specific improvements that would be required by the County Engineer. Based on factors presented within the Design Exception request, the County Engineer found the Roadway Design Exception approvable. The applicant also submitted an Administrative Variance for access (driveway) spacing, which the County Engineer found approvable.

Case Reviewer: Timothy Lampkin, AICP

Variations Requested:

- 1. The applicant requests a variation of Section 6.06.03 Scenic Roadways to waive the 15-foot bufferyard required in the Suburban Scenic Roadways along Bloomingdale Road. The applicant is providing a 32.5 ft. right-of-way preservation for the portion of the proposed PD located on Bloomingdale Road. However, this 32.5 ft. right-of-way preservation area must be left vacant for future roadway expansion.
- 2. The applicant has also requested two variations of Section 6.02.01.A. of the LDC. Staff reviewed the requests and believes the wavier to connectivity along the eastern project boundary is supportable.
- 3. Staff has reviewed the applicant's justification for a variation to connectivity along the southern project boundary and finds it is not supportable. County Engineering staff did not find sufficient reason to support the request to waive southern connectivity. Additional information regarding the rationale for objection may be found in the transportation review's Rationale for Objection.

The site will comply with and conform to all other applicable policies and regulations, including but not limited to, the Hillsborough County Land Development Code, Site Development and Technical Manuals. The hearing master's recommendation for this application is required to include a finding on whether the requested variations meet the criteria for approval, per LDC Section 5.03.06.C.6.

5.2 Recommendation

The proposed project with the proposed development standards, existing scale and restrictions may be found to be compatible with nearby development patterns. The proposed development satisfies the intent of the Goals, Objectives and Policies of the Future Land Use Element of the Unincorporated Hillsborough County Comprehensive Plan and finds the proposed Major Modification consistent with the Future of Hillsborough Comprehensive Plan for Unincorporated Hillsborough County.

However, staff finds the request <u>not</u> supportable as the proposed site design does not illustrate connectivity along the southern project boundary and the requested variation of Section 6.02.01 to waiver connectivity on the southern project boundary was not found approvable.

5.0 IMPLEMENTATION RECOMMENDATIONS

5.1 Compatibility

The subject property is located on approximately 8.56 acres at 2705 Bloomingdale Avenue, located southwest of the Bloomingdale Avenue and South St. Cloud Avenue intersection. The property is not located within the limits of a Community Plan and is located within the Urban Service Area. The applicant requests 18 single-family residential units on the 18.56-acre subject property with 6,000-square-foot lots. The applicant is proposing a maximum building height of 35 feet. The AS-1 and ASC-1 zoning located to the north, east and south of the subject property allows a building height up to 50 feet.

The applicant proposes additional screening along portions of the PD boundaries consisting of 10-foot wide Landscape/Drainage Easement and Vertical Screening with 3" caliper trees, 10' high, every 40' on center, on the northern, eastern and western boundary adjacent to lots in the PD excluding the Western 100' wide section adjacent to Bloomingdale Ave.

An 8-inch water main exists (adjacent to the site) and is located within the south Right-of-Way of Bloomingdale Avenue. A 16-inch wastewater force main exists approximately 45 feet from the site and is located within the north and is located in the Right-of-Way of Bloomingdale Avenue. The subject property contains wetland areas, which have been delineated; however, surveys have not been received or approved by EPC. Knowledge of the actual extent of the wetland and OSW are necessary in order to verify the avoidance of wetland impacts pursuant to Chapter 1-11.

Per Policy 1.2 (FLUE), the site must satisfy minimum density requirements. The maximum allowable density on the subject site is 34 dwelling units. However, in this case the request would meet the minimum density exception due to the wetlands on site and the likelihood of development having an adverse impact on environmental features.

APPLICATION NUMBER: MM 21-0744

ZHM HEARING DATE: January 18, 2022 BOCC LUM MEETING DATE: March 8, 2022

Given that Bloomingdale Ave. is a substandard collector roadway, the applicant's Engineer of Record submitted a Design Exception for a Substandard Road request for Bloomingdale Ave. to determine the specific improvements that would be required by the County Engineer. Based on factors presented within the Design Exception request, the County Engineer found the Roadway Design Exception approvable. The applicant also submitted an Administrative Variance for access (driveway) spacing, which the County Engineer found approvable.

Case Reviewer: Timothy Lampkin, AICP

Variations Requested:

- 1. The applicant requests a variation of Section 6.06.03 Scenic Roadways to waive the 15-foot bufferyard required in the Suburban Scenic Roadways along Bloomingdale Road. The applicant is providing a 32.5 ft. right-of-way preservation for the portion of the proposed PD located on Bloomingdale Road. However, this 32.5 ft. right-of-way preservation area must be left vacant for future roadway expansion.
- 2. The applicant has also requested two variations of Section 6.02.01.A. of the LDC. Staff reviewed the requests and believes the wavier to connectivity along the eastern project boundary is supportable.
- 3. Staff has reviewed the applicant's justification for a variation to connectivity along the southern project boundary and finds it is not supportable. County Engineering staff did not find sufficient reason to support the request to waive southern connectivity. Additional information regarding the rationale for objection may be found in the transportation review's Rationale for Objection.

The site will comply with and conform to all other applicable policies and regulations, including but not limited to, the Hillsborough County Land Development Code, Site Development and Technical Manuals. The hearing master's recommendation for this application is required to include a finding on whether the requested variations meet the criteria for approval, per LDC Section 5.03.06.C.6.

5.2 Recommendation

The proposed project with the proposed development standards, existing scale and restrictions may be found to be compatible with nearby development patterns. The proposed development satisfies the intent of the Goals, Objectives and Policies of the Future Land Use Element of the Unincorporated Hillsborough County Comprehensive Plan and finds the proposed Major Modification consistent with the Future of Hillsborough Comprehensive Plan for Unincorporated Hillsborough County.

However, staff finds the request <u>not</u> supportable as the proposed site design does not illustrate connectivity along the southern project boundary and the requested variation of Section 6.02.01 to waiver connectivity on the southern project boundary was not found approvable.

ZHM HEARING DATE: January 18, 2022

BOCC LUM MEETING DATE: March 8, 2022 Case Reviewer: Timothy Lampkin, AICP

SITE, SUBDIVISION AND BUILDING CONSTRUCTION IN ACCORDANCE WITH HILLSBOROUGH COUNTY SITE DEVELOPMENT PLAN & BUILDING REVIEW AND APPROVAL.

Approval of this re-zoning petition by Hillsborough County does not constitute a guarantee that the project will receive approvals/permits necessary for site development as proposed will be issued, nor does it imply that other required permits needed for site development or building construction are being waived or otherwise approved. The project will be required to comply with the Site Development Plan Review approval process in addition to obtain all necessary building permits for on-site structures.

9.0 FULL TRANSPORTATION REPORT (see following pages)

B. HEARING SUMMARY

This case was heard by the Hillsborough County Land Use Hearing Officer on January 18, 2022. Mr. Brian Grady of the Hillsborough County Development Services Department introduced the petition.

Applicant

Mr. Sean Cashen spoke on behalf of the applicant. He displayed an aerial view of the subject property and described the surrounding area, land use, and zoning. He stated the applicant is requesting to rezone the subject property to PD to allow 6,000-square-foot lots, 50-feet-wide, 18 units, which is 2.1 units per acre. He displayed a topographic map and stated the subject property drains from elevation 47 in the northwest to approximate elevation 36 in the southeast. He stated at the subject property's eastern boundary the elevation is 40 to the north and 36 to the south. He stated along the southern boundary the elevation is 42 to the west then slopes to 36 in the east.

Mr. Cashen stated the subject property is in the Urban Services Area. He stated Bloomingdale is classified as a collector road. He stated the traffic analysis shows the average daily trips in that section of Bloomingdale and east of Lithia Pinecrest. He stated the maximum 18 lots will produce 170 average daily trips.

Mr. Cashen displayed a slide listing the design exceptions and variances the applicant requested. He stated the county engineer deemed approvable the applicant's administrative variance request for driveway spacing and a design exception for the substandard roadway. He stated the applicant will be constructing 1,280 feet of sidewalk, 900 feet of which is off-site. He stated the sidewalk will be continuous on the south side of Bloomingdale Avenue.

Mr. Cashen stated variance 1 and variance 2 are related to connectivity to the east and south. He stated the eastern variance was deemed approvable as a PD variance. He stated variance 2, which was connectivity to the south, was deemed not approvable. He stated variance 3 was for scenic roadway. He stated the applicant is proposing 5 feet in lieu of 15 feet.

Mr. Cashen stated the connectivity to the east and south would be stubbed out to areas that are within Flood Zone A, within the 100-year flood area. He stated these areas have existing elevations well below the 100-year elevation, which is at elevation 43.3. He referred to the topographical map displayed earlier and recalled the elevation on the eastern boundary sloped from elevation 40 to 36, and on the southern boundary sloped from 42 in the west to 36 in the east. He stated on the southern boundary, for which the variance was deemed not approvable, the elevations of some off-site areas are 1 to 7 feet lower than the base flood elevation of 43.3, which is fairly high.

Mr. Cashen stated the applicant submitted to the county a fairly detailed analysis to determine that development in the floodplain areas to the east and south was unfeasible and impractical due to the lower elevations and as part of the associated impact in the lower elevations. He stated any kind of fill placed in those areas is an immediate floodplain

impact that would have to be mitigated. He stated the applicant determined in its analysis that along the eastern and southern areas one acre of development would require approximately 2 acres of floodplain mitigation. He stated the applicant did not see that as economically viable, feasible, or sustainable and it is not advisable to encourage or promote development in some of the areas located to the south and east of the subject property. He stated the proposed development is adjacent to Bloomingdale and is at higher elevations so the applicant can excavate some areas to provide the required floodplain mitigation. He stated some of the areas located to the south and east of the subject property are prone to flooding and the applicant did not want to exacerbate that but wanted to improve the situation.

Mr. Cashen displayed an exhibit and pointed out the environmentally sensitive areas. He noted the proposed landscape buffers around the property and the 32.5 right-of-way preservation area in the north. He stated the applicant is proposing a condition to provide some retention storage in the 32.5 feet of right-of-way preservation area. He stated that would go a long way in helping the drainage along Bloomingdale and the surrounding area. He stated the area to the south is wetland and there is a wetland ditch. He stated the proposed project will have floodplain mitigation and retention ponds.

Mr. Cashen stated any kind of roadway stub-out to the south will go through either the wetland ditch, the wetland area, or will bifurcate one of the floodplain mitigation ponds, which will reduce the floodplain the applicant is trying to provide. He stated the roadway stub-out to an area to the south should not be developed and cannot feasibly be developed. He displayed a view of the subject property and pointed out the limits of the area within Flood Zone A. He pointed out the elevations on the topographical map. He displayed a map showing the connectivity points and stated the site will have connectivity to Bloomingdale and the applicant is proposing an interconnection to the west, which is a much higher area. He stated that is stubbed out from the cul-de-sac.

Mr. Cashen stated the applicant is providing 32.5 feet of right-of-way preservation for the scenic corridor. He stated there is a 15-foot requirement for landscape buffer along the scenic roadway and the applicant is proposing five feet. He stated the five feet combined with the 32.5 feet will be a total of 37.5 feet of area encumbered along the northern property boundary. He displayed a graphic representation of the 32.5-foot right-of-way preservation. He stated the applicant is proposing to put some retention along the roadway. He stated the applicant is proposing 3-inch caliper, 10-foot-tall trees, which is more than what the LDC requires. He stated the trees will be within a 5-foot landscape buffer in lieu of the 15 feet. He displayed a graphic showing the 5-foot landscape buffer vertical screening and the trees.

Mr. Cashen displayed the general site plan and stated the applicant is proposing 6,000-square-foot lots, 50-foot minimum width, and a total of 18 lots at 2.1 units per acre density. He displayed a graphic showing the other landscape buffers, which are 10-foot-wide along the eastern boundary. He displayed a concept plan showing the areas the applicant is proposing to develop the 18 lots and roadway, approximately half of the subject property to the south that is being allocated for floodplain mitigation and retention, and the existing wetlands.

Mr. Cashen stated utilities are available to the subject property on Bloomingdale Avenue. He displayed photographs showing the adjacent developments. He displayed a graphic showing the floodplain ponds and retention ponds and the existing wetland. Mr. Cashen called Mr. Bill Sullivan to the microphone.

Mr. William Sullivan stated the applicant held a community meeting on May 25. He stated is was a small attendance. He stated the applicant reached out to the adjacent neighbors and spoke with a good portion of them. He stated the neighbor who is most affected signed a petition in favor of the proposed project. He pointed out the project density is 2.1 units per acre and the average in the area of the other communities that have been built. He stated the average density of those others is about 2.3. He stated the applicant is building a sidewalk that will connect to the existing sidewalk that is adjacent to Publix and BayCare on the southern side, bringing pedestrian connectivity.

Mr. Sullivan stated he is a developer who does projects throughout Florida that are livework environments. He stated the subject property is an infill site that is totally a live-work environment. He stated he walks to work or takes his scooter to work most days for the past ten years. He stated he wants to encourage building infill sites that are pedestrian friendly.

Mr. William Molloy stated he would hand to the clerk the proposed conditions the applicant drafted.

Development Services Department

Mr. Tim Lampkin, Hillsborough County Development Services Department, presented a summary of the findings and analysis as detailed in the staff report previously submitted into the record. He noted there is a scrivener's error on the staff report in the context of the surrounding area where it says "1800 feet to the west" and should say "to the east." He noted there is also a scrivener's error on the site plan that needs to be corrected to reflect the required 30-foot wetland buffer area.

Planning Commission

Ms. Jillian Massey, Hillsborough County City-County Planning Commission, presented a summary of the findings and analysis as detailed in the Planning Commission report previously submitted into the record. She noted at the time Planning Commission staff conducted its analysis of the rezoning request, Planning Commission staff had not yet received county transportation staff's comments and did not take those comments into consideration in the report.

Proponents

The hearing officer asked whether there was anyone at the hearing in person or online to speak in support of the application. There were none.

Opponents

The hearing officer asked whether there was anyone at the hearing in person or online to speak in opposition to the application.

Mr. Hunter Wessinger stated building this type of high-density housing will worsen traffic during and after construction on a two-lane road that already backs up almost to Lithia Pinecrest every day. He stated the appeal of the neighborhood is its low density and natural beauty. He stated this type of construction will further damage the rural charm of the neighborhood. He stated a higher minimum lot size is needed. He stated he has lived in the area for almost 20 years and has watched it change. He stated the proposal will be another step toward turning the Bloomingdale community into something unrecognizable to those who have lived there most of their lives. He stated the increasing urbanization of the community and the construction of subdivisions where a person can lean out their window and shake hands with a neighbor is slowly but surely destroying their way of life. He stated the disruption of natural ecosystems in a blind pursuit of profit has devastating consequences, including displacement of wildlife and destruction of habitat. He stated leaving a small portion of the lot as wetlands is not sufficient. He stated anyone who votes in favor of the proposal is acting in direct opposition of the will of the people who live and work in the area and will be directly affected by the proposal and will forfeit any claim to actually representing their interests.

Mr Bryce Manley stated he has lived off Bloomingdale for almost 20 years. He stated he drives on Bloomingdale past the subject property multiple times a day as do thousands of other residents. He stated Bloomingdale is already super congested during the morning and evening rush hours. He stated there is bumper-to-bumper traffic for miles and a five-minute drive turns into a 20-minute drive. He stated adding more homes will create more traffic on an already crowded two-lane road. He stated three or four years ago Anna George Drive was built with the neighborhood Arbor Reserve Estates. He stated that was only a few hundred yards from Saint Cloud. He stated these homes further congested already crowded roads and he has been caught many times behind a vehicle turning onto Anna George Drive. He stated adding more lanes to Bloomingdale will not make things better because it takes over three years to complete a road. He stated he was referring to Bell Shoals expansion. He stated he lives off Bloomingdale and will be directly affected by the decision. He urged listening to the other residents who will be affected and not allowing construction of the neighborhood. He stated previous speakers talked about flooding and potential solutions, but they completely neglected and failed to address traffic.

Mr. Kevin Koudela stated he has lived on Bloomingdale Avenue for 20 years. He stated most of that time was is Buckhorn Run Estates, where most lots are 1-acre single-family homes. He stated two have been built next to him, 1-acre single-family homes, in the past five years. He stated the county purchased from other residents a property to build a retention pond, which has alleviated some of the issue but not all of it. He stated houses just south of this property still flood quite a bit and there has not yet even been a bad rain. He stated the infrastructure does not support the development that exists now. He stated traffic is frequently backed up all the way to Publix, especially when school is letting out. He stated eighteen houses is a bit ridiculous. He stated if they went with maybe five houses and a 3-acre retention pond, all five houses on one-acre lots, that might be acceptable. He stated with 18 homes there isn't enough area for the water to run off and not flood or cause other issues.

Ms. Linda Skidmore stated she lives directly south of the subject property and has lived there 37 years. She stated she has been through several floods from the middle of her yard all the way across Bloomingdale. She stated she owned a house behind where she now lives, and she sold that to the county to build a retention pond to help alleviate some flooding. She stated she is concerned about flooding. She stated the county maintains a pump but when the electricity goes out during a hurricane the pump does not work so they have to bring out a generator. She stated she is concerned about what will happen if the retention ponds on the subject property fill up. She stated the county should install a permanent generator. She stated the traffic is also atrocious. She stated going up Stearns she has to go up Hill Grove to get out onto Lithia to go south.

Development Services Department

Mr. Grady stated Development Services had nothing further.

Applicant Rebuttal

Mr. Molloy stated at 2.1 units per acre the applicant's request is well below the threshold of minimum density of 75 percent for which the comprehensive plan calls. He stated the average density in the area is 2.33 units per acre.

Mr. Molloy stated the water management district will not issue an environmental resource permit if the applicant cannot prove the development will not cause adverse impacts on surrounding properties.

The hearing officer asked Mr. Molloy to address the issue of connectivity on the southern property boundary that was not supported. Mr. Molloy stated the LDC calls for cross access in all cardinal directions. He stated the proposed project will have a connection on the north and will provide a stub-out to the west. He stated the east was deemed approvable not to provide. He stated the south is a point of contention. He stated the retention and mitigation areas are all in the southern portion of the property. He stated that was designed by engineering and is a function of high to low because that is where the water wants to go. He stated adding a road or connection through the wetland and retention area would be useless and might compromise the applicant's efforts for mitigation and retention in that area. He stated if a road is built through the ponds this could compromise the volume of the ponds and function as a sluiceway to the properties to the south.

Mr. Sullivan stated when the applicant met with residents in the area it determined the flooding issue is a problem. He stated the applicant proposes to use the 32 feet for right-of-way preservation to build ponds for the county's drainage on Bloomingdale, not for the subject property. He said the applicant is trying to block some of the water from coming down the hill. He stated the applicant is also going to be storing the 100-year flood and right now there is no storage on the subject property. He stated the applicant will be creating a large volume of storage on the subject property for the residents and protection of the area.

The hearing officer closed the hearing on rezoning 21-0744.

C. EVIDENCE SUMBITTED

Mr. William Molloy submitted into the record at the hearing a list of requirements prior to PD site plan certification and possible proposed conditions if approval, and a copy of the applicant's presentation packet.

D. FINDINGS OF FACT

- 1. The Subject Property consists of approximately 8.56 acres located at 2705 Bloomingdale Avenue, Valrico, at the southwest corner of the Bloomingdale Avenue and south Saint Cloud Avenue intersection.
- 2. The Subject Property is zoned AS-1 and is designated Res-4 on the *Future of Hillsborough Comprehensive Plan for Unincorporated Hillsborough County* Future Land Use Map.
- 3. The Subject Property is located within the Urban Services Area.
- 4. The applicant is requesting to rezone the Subject Property to Planned Development to allow development of a maximum of 18 single-family homes with a minimum lot size of 6,000 square feet and a maximum density of 2.1 dwelling units per acre.
- 5. Land uses in the surrounding area are primarily residential, with grocery and retail uses in a shopping center near the Pinecrest Road and Bloomingdale Avenue intersection.
- 6. North and northeast of the Subject Property are properties zoned ASC-1 developed with single-family homes. East and south of the Subject Property are properties zoned AS-1 developed with single-family homes. West of the Subject Property are properties zoned RSC-3 developed with single-family homes. Further west is property zoned PD 00-0836 approved for CG, office, professional, and financial institution uses. Northwest of the Subject Property are properties zoned RSC-6 developed with single-family homes.
- 7. The applicant requested approval of an administrative variance from the driveway access spacing requirement. The County Engineer found the administrative variance approvable.
- 8. The applicant requested administrative approval of a design exception for Bloomingdale Avenue to determine the specific improvements that would be required. The County Engineer found the roadway design exception approvable.
- 9. The applicant is requesting PD variations to LDC Part 6.02.01.A. access requirements to waive connectivity on the eastern and southern boundaries of the proposed project. The County Engineer found the connectivity waiver request on

- the eastern property boundary supportable but found the connectivity waiver request on the southern property boundary not supportable.
- 10. County transportation staff objects to the rezoning request. Staff found insufficient justification to waive the connectivity requirement on the southern boundary of the proposed project and does not support this waiver request. In addition, staff noted the applicant's site plan shows the required 15-foot landscaped scenic corridor buffer is placed within the area preserved for future right-of-way. Staff noted the site plan does not show where the landscaped buffer would be relocated upon widening of the roadway and the applicant did not seek a waiver of the scenic corridor buffer requirement.
- 11. The LDC at section 6.06.03.I.2.b. states, "Suburban Scenic Roadways. In suburban zones, including RES-2, RP-2, and RES-4 Comprehensive Land Use Plan classifications, a 15-foot bufferyard with four canopy trees and four understory trees per 100 linear feet shall be provided. In addition, if street trees do not exist, the developer shall provide one street tree for every 50 feet."
- 12. The applicant is requesting a PD Design variance to LDC section 6.06.03.1.2.b., to reduce the 15-foot landscape buffer to a 5-foot buffer. The applicant states the Subject Property has a 32.5-foot right-of-way preservation requirement for future expansion of Bloomingdale Avenue for a total of 37.5 feet of open space off Bloomingdale Avenue. The applicant states the variance request includes enhanced landscape in the 5-feet of extra trees and a 6-foot-high opaque fence on the lots adjacent to the landscape buffer.
- 13. The LDC at section 5.03.06.C.6. provides that non-district regulations may be varied as part of a Planned Development based on consideration of specific criteria, and the Zoning Hearing Master's recommendations shall include a finding regarding whether the requested variations meet the criteria for approval.
- 14. Findings on LDC section 5.03.06.C.6.b. criteria:
 - The variation is necessary to achieve creative, innovative, and/or mixed use development that could not be accommodated by strict adherence to current regulations. No. The applicant states it is already providing a 32.5-foot right-of-way preservation and proposes a five-foot enhanced landscape buffer including trees every 25 feet on center instead of a 15-foot bufferyard with four canopy trees and four understory trees per 100 linear feet as required by the LDC section 6.06.03.1.2.b. The applicant also proposes small shrubbery and grass in the 32.5-foot right-of-way preservation area. However, as noted by Transportation staff, LDC section 5.11.09 provides only interim uses are permitted in the preservation area and the interim uses must be relocated at the time the preserved right-of-way area is acquired by the county. Upon the future widening of Bloomingdale to 4-lanes the landscaping placed in the preservation area would have to be removed. Therefore, the applicant's proposal does not address the reduced buffer

- area, which will become more apparent with the eventual widening of Bloomingdale.
- 2) The variation is mitigated through enhanced design features that are proportionate to the degree of variation. No. The applicant states it is already providing a 32.5-foot right-of-way preservation and proposes a fivefoot enhanced landscape buffer including trees every 25 feet on center instead of a 15-foot bufferyard with four canopy trees and four understory trees per 100 linear feet as required by the LDC section 6.06.03.1.2.b. The applicant also proposes small shrubbery and grass in the 32.5-foot right-ofway preservation area. However, as noted by Transportation staff, LDC section 5.11.09 provides only interim uses are permitted in the preservation area and the interim uses must be relocated at the time the preserved rightof-way area is acquired by the county. Upon the future widening of Bloomingdale to 4-lanes the landscaping placed in the preservation area would have to be removed. Therefore, the applicant's proposal does not address the reduced buffer area, which will become more apparent with the eventual widening of Bloomingdale.
- The variation is in harmony with the purpose and intent of the Hillsborough County Land Development Code. No. The applicant's Variance Criteria Response states the intent of the LDC is "to promote good landscape design" and "the proposed 5' buffer with the additional trees and shrubs will promote good design." However, upon the future widening of Bloomingdale to 4-lanes the landscaping placed in the right-of-way preservation area would have to be removed. Therefore, the applicant's proposal does not provide a permanent scenic roadway buffer and is not in harmony with the purpose and intent of the LDC.
- 4) The variation will not substantially interfere with or injure the rights of adjacent property owners. No. The applicant's Variance Criteria Response states the "adjacent property owners are benefited by the additional landscape the applicant is proposing." However, upon the future widening of Bloomingdale to 4-lanes the landscaping placed in the right-of-way preservation area would have to be removed. Therefore, the applicant's proposal does not provide a permanent scenic roadway buffer and is not in harmony with the purpose and intent of the LDC.
- 15. County Development Services staff found the rezoning request not supportable based on transportation staff's objections.
- 16. Planning Commission staff found the rezoning request to be consistent with the comprehensive plan. However, at the time of drafting its report Planning Commission staff had not yet received comments from county transportation staff, and therefore did not consider staff's objections in analyzing the rezoning request.

E. FINDINGS OF COMPLIANCE OR NON-COMPLIANCE WITH COMPREHENSIVE PLAN

The rezoning request is not in compliance with, and does not further the intent of the Goals, Objectives, and Policies of the *Future of Hillsborough Comprehensive Plan for Unincorporated Hillsborough County*.

F. CONCLUSIONS OF LAW

A development order is consistent with the comprehensive plan if "the land uses, densities or intensities, and other aspects of development permitted by such order...are compatible with and further the objectives, policies, land uses, and densities or intensities in the comprehensive plan and if it meets all other criteria enumerated by the local government." § 163.3194(3)(a), Fla. Stat. (2020). Based on the evidence and testimony submitted in the record and at the hearing, including reports and testimony of Development Services Staff and Planning Commission staff, applicant's testimony and evidence, there is substantial competent evidence demonstrating the requested rezoning is inconsistent with the *Future of Hillsborough Comprehensive Plan for Unincorporated Hillsborough County*, and does not comply with the applicable requirements of the Hillsborough County Land Development Code.

G. SUMMARY

The applicant is requesting to rezone the Subject Property to Planned Development to allow development of the Subject Property with a maximum of 18 single-family homes with a minimum lot size of 6,000 square feet and a maximum density of 2.1 dwelling units per acre. The applicant is requesting PD variations to LDC Part 6.02.01.A. access requirements to waive connectivity on the eastern and southern boundaries of the proposed project. The applicant is requesting a PD Design variance to LDC section 6.06.03.1.2.b., to reduce the 15-foot landscape buffer to a 5-foot buffer.

H. RECOMMENDATION

Based on the foregoing Findings of Fact and Conclusions of Law, this recommendation is for **DENIAL** of the rezoning request.

Pamela Jo Hatley PhD, D Land Use Hearing Officer

Date:

Unincorporated Hillsborough County Rezoning				
Hearing Date: January 18, 2022	Petition: PD 21-0744			
Report Prepared: January 6, 2022	Southside of Bloomingdale Avenue, east of Hillgrove Road			
Summary Data:				
Comprehensive Plan Finding:	CONSISTENT			
Adopted Future Land Use:	Residential-4 (4 du/ga; 0.25 FAR)			
Service Area:	Urban			
Community Plan:	N/A			
Requested Rezoning:	Agricultural Single Family-1(AS-1) to Planned Development (PD) allowing for 18 single family dwelling units			
Parcel Size (Approx.):	8.56 +/- acres			
Street Functional Classification:	Bloomingdale Avenue – Collector Hillgrove Road – Local			
Locational Criteria:	N/A (residential development)			

Plan Hillsborough planhillsborough.org planner@plancom.org 813 - 272 - 5940 601 E Kennedy Blvd 18th floor Tampa, FL, 33602

Context

- The subject property is located on approximately 8.56 acres on the south side of Bloomingdale Avenue, east of Hillgrove Road. The site is located within the Urban Service Area and is not located within the limits of a Community Plan.
- The property's Future Land Use designation is Residential-4(RES-4), which includes typical uses of residential, suburban scale neighborhood commercial, office uses, and multi-purpose projects. Non-residential uses shall meet locational criteria for specific land use.
- The subject property is surrounded immediately by the Residential-4 (RES-4) Future Land Use category to the north, east, south, and west. Further northwest there is a presence of Office Commercial-20 (OC-20) adjacent to the Urban Service Area boundary at the intersection of Bloomingdale and Lithia Pinecrest Road.
- The subject property and the adjacent properties are currently classified as single family residential with Residential Single-Family Conventional-3 (RSC-3) to the west, Agricultural Single Family Conventional-1 (ASC-1) located to the north and Agricultural Single Family-1 (AS-1) located to the east and south.
- The applicant requests to rezone the subject property from Agricultural Single Family-1(AS-1) to a Planned Development (PD) allowing for 18 single family residential units.

Compliance with Comprehensive Plan:

The following Goals, Objectives and Policies apply to this rezoning request and are used as a basis for a consistency finding.

Future Land Use Element

Urban Service Area (USA)

Objective 1: Hillsborough County shall pro-actively direct new growth into the urban service area with the goal that at least 80% of all population growth will occur within the USA during the planning horizon of this Plan. Within the Urban Service Area, Hillsborough County will not impede agriculture. Building permit activity and other similar measures will be used to evaluate this objective.

Policy 1.2: Minimum Density: All new residential or mixed-use land use categories within the USA shall have a density of 4 du/ga or greater unless environmental features or existing development patterns do not support those densities. Within the USA and in categories allowing 4 units per acre or greater, new development or redevelopment shall occur at a density of at least 75% of the allowable density of the land use category, unless the development meets the criteria of Policy 1.3.

Policy 1.3: Within the USA and within land use categories permitting 4 du/ga or greater, new rezoning approvals for residential development of less than 75% of the allowable density of the

PD 21-0744 2

land use category will be permitted only in cases where one or more of the following criteria are found to be meet:

- Development at a density of 75% of the category or greater would not be compatible (as defined in Policy 1.4) and would adversely impact with the existing development pattern within a 1,000-foot radius of the proposed development;
- Infrastructure (Including but not limited to water, sewer, stormwater and transportation) is not planned or programmed to support development.
- Development would have an adverse impact on environmental features on the site or adjacent to the property.
- The site is located in the Coastal High Hazard Area.
- The rezoning is restricted to agricultural uses and would not permit the further subdivision for residential lots

Policy 1.4: Compatibility is defined as the characteristics of different uses or activities or design which allow them to be located near or adjacent to each other in harmony. Some elements affecting compatibility include the following: height, scale, mass and bulk of structures, pedestrian or vehicular traffic, circulation, access and parking impacts, landscaping, lighting, noise, odor and architecture. Compatibility does not mean "the same as." Rather, it refers to the sensitivity of development proposals in maintaining the character of existing development.

Neighborhood/Community Development

Objective 16: Neighborhood Protection The neighborhood is the functional unit of community development. There is a need to protect existing, neighborhoods and communities and those that will emerge in the future. To preserve, protect, and enhance neighborhoods and communities, all new development must conform to the following policies.

Policy 16.1: Established and planned neighborhoods and communities shall be protected by restricting incompatible land uses through mechanisms such as:

- a) locational criteria for the placement of non-residential uses as identified in this Plan,
- b) limiting commercial development in residential land use categories to neighborhood scale:
- c) requiring buffer areas and screening devices between unlike land uses;

Policy 16.3: Development and redevelopment shall be integrated with the adjacent land uses through:

- a) the creation of like uses: or
- b) creation of complementary uses; or
- c) mitigation of adverse impacts; and
- d) transportation/pedestrian connections

Policy 16.7: Residential neighborhoods shall be designed to include an efficient system of internal circulation and street stub-outs to connect adjacent neighborhoods together.

PD 21-0744 3

Policy 16.8: The overall density and lot sizes of new residential projects shall reflect the character of the surrounding area, recognizing the choice of lifestyles described in this Plan.

Staff Analysis of Goals Objectives and Policies:

The subject property is located on approximately 8.56 acres on the south side of Bloomingdale Avenue, east of Hillgrove Road. The site is located within the Urban Service Area and is not within the limits of a Community Plan. The application requests to rezone the subject property from Agricultural Single Family-1 (AS-1) to a Planned Development (PD) allowing for 18 single family residential units.

The subject property is located within the Urban Service Area. Per Policy 1.2 (FLUE), the site must satisfy minimum density requirements. The maximum allowable density on the subject site is 34 dwelling units. However, in this case the request would meet the minimum density exception due to the wetlands on site and the likelihood of development having an adverse impact on environmental features.

The subject property is designated Residential-4 (RES-4) on the Future Land Use Map. The intent of the RES-4 Future Land Use category is to designate areas that are suitable for low density residential, as well as suburban scale neighborhood commercial, office, multipurpose projects, and mixed- use developments when in compliance with the Goals, Objectives, and Policies of the Future Land Use Element and applicable development regulations and locational criteria for specific land uses. The proposed residential development would allow for uses that are compatible with the surrounding development pattern and satisfies the intent of Objective 16 and Policies 16.1, 16.3 and 16.8.

At the time of drafting this report, Planning Commission staff had not received transportation comments, therefore the Planning Commission staff finding did not take transportation comments into consideration for the analysis of the request.

Overall, Planning Commission staff finds the proposed use and density to be compatible with the surrounding area. The proposed development is consistent with the Residential-4 (RES-4) Future Land Use category. The request would allow for a development that is consistent with the Goals, Objectives and Policies of the Future Land Use Element of the Future of Unincorporated Hillsborough County Comprehensive Plan for Unincorporated Hillsborough County.

Recommendation

Based upon the above considerations, Planning Commission staff finds the proposed Planned Development **CONSISTENT** with the *Future of Hillsborough Comprehensive Plan for Unincorporated Hillsborough County,* subject to the conditions of the Development Services Department.

APPLICANT PROPOSED CONDITIONS

21-0744 Recommendation of Denial

Prior to PD site plan certification, the applicant shall revise the PD site plan to:

- Revise the wetland buffer from 25 ft. to 30 ft. Wetlands or other surface waters are considered Environmentally Sensitive Areas and are subject to 30-foot wide Conservation Area setbacks.
- Label the right of way preservation area as "32.5-foot Right-of-way Preservation Area Per Hillsborough County Corridor Preservation Plan";
 - o Update the site data table removing row pres. Area within 32.5 ft.
- Show the required scenic corridor buffer; and,
- Remove notations regarding "Open Space" within the preservation area."
 - Update site data open space, if included within calculation.

6.0 POSSIBLE PROPOSED CONDITIONS -IF APPROVED

Approval - Approval of the request, subject to the conditions listed below, is based on the general site plan submitted October 11, 2021

- 1. The site shall be developed as depicted on the site plan, and subject to the conditions listed below.
- 2. The project shall be limited to a maximum of 18 single-family homes with a minimum lot size of 6,000 square feet, subject to the following standards.

Minimum Front Setback: 20 feet Minimum Front Setback (Side Facing Garage): 10 feet Minimum Front Setback (with Porches): 15 feet 5 feet Minimum Side Setback: Minimum Side Setback (Corner Lot abutting PD Boundary): 10 feet Minimum Rear Setback: 20 feet 20 feet Minimum Rear Setback: Maximum Building Coverage (Per Lot): 60% Minimum Building Separation: 10 feet Minimum Lot Width 50 feet

- 3. The residential lot areas shall be developed where generally depicted on the site plan.
- 4. Building heights shall be limited to a maximum of 35 feet. An additional setback of 2 feet for every 1 foot over 20 feet in height shall be provided from required setbacks, if needed at site and development.
- 5. The developer shall provide a (5) five-foot wide suburban scenic corridor for all

property within folio 87350.0000 located along Bloomingdale Avenue. The subject property shall be subject to the buffering and screening requirements of Section 6.06.03.1.2.b of the Hillsborough County Land Development Code, unless specified herein.

- a. The (5) five-foot suburban scenic corridor buffer shall include four 3" caliper canopy trees and four 2" caliper understory trees per 100 linear feet, and a 6-foot fence with the finished side facing Bloomindale Avenue and located behind the vegetation. The fence shall be located inside the lots adjacent to the buffer. Such scenic buffer shall be provided outside of the 32.5' wide right-of-way preservation area along Bloomingdale Ave.
- 6. Wetlands or other surface waters are considered Environmentally Sensitive Areas and are subject to 30-foot wide Conservation Area setbacks. A minimum 30' setback must be maintained around these areas which shall be designated on all future plan submittals. Land alterations are restricted in these areas.
- 7. Notwithstanding anything herein these conditions or on the PD site plan to the contrary, bicycle and pedestrian access may be permitted anywhere along the PD boundaries.
- 8. The project shall be served by (and restricted to) a single access connection to Bloomingdale Ave.
- 9. In accordance with the Hillsborough County Corridor Preservation Plan, the developer shall preserve Developer shall dedicate and convey to Hillsborough County at Plat, 32.5 feet of right-of-way along its Bloomingdale Ave. frontage ("ROW Preservation"). Only those interim uses allowed by the Hillsborough County LDC shall be permitted Prior to dedication to the County, the Developer shall coordinate with Development Services to design and construct a swale/drainage system within the preserved dedicated right-of-way. The right-contemplated swale/drainage system is proffered in furtherance of-way preservation area shall be shown improving conditions on all future site plans and building setbacks shall be calculated from the future right-and along Bloomingdale Avenue and is not required as part of-way line. The 32' ROW Preservation interim uses shall allow the project's accounting for stormwater retention. The Developer shall coordinate with the County for using the ROW Preservation for stormwater retention in the Bloomingdale Avenue preservation area. or runoff.
- 10. The developer shall construct a vehicular and pedestrian stubout to its western project boundary.
- 11. If PD 21-0744 is approved, the County Engineer will approve a Design Exception (dated October 14, 2021) which was found approvable by the County Engineer (on November 1, 2021) for the Bloomingdale Ave. substandard road improvements. As Bloomingdale Ave. is a substandard collector roadway east of Lithia Pinecrest Rd., the developer will be required to make certain improvements to Bloomingdale Ave. consistent with the Design Exception. Specifically, the developer will be required to

Received
March 31, 2022
Development
Services

construct a +/- 1,300-foot-long minimum 5-foot wide sidewalk between the project's eastern boundary and the existing sidewalk terminus (located approximately 830 feet west of the project's western project boundary). No other improvements will be required along Bloomingdale Ave., except for sidewalks otherwise required along the project's frontage by Section 6.02.08 of the Hillsborough County Land Development Code (and which are included within the 1,300-foot sidewalk described above).

- 12. If PD 21-0744 is approved, the County Engineer will approve a Section 6.04.02.B. Administrative Variance (dated October 14, 2021) from the Section 6.04.07 access spacing requirements, which was found approvable by the County Engineer (on November 1, 2021). Approval of this Administrative Variance will permit the reduction of the minimum access spacing between the project driveway and St. Cloud Ave. (to the east) to +/- 140 feet and spacing between the project driveway and the closest driveway to the west (on the south side of Bloomingdale Ave.) to +/- 160 feet.
- 13. The Developer shall provide a Minimum of 5% additional floodplain mitigation storage volume, above the required floodplain mitigation volume for the development to mitigate or offset any proposed floodplain impacts as part of the development ("Surplus Mitigation Capacity"). The Surplus Mitigation Capacity shall be reserved for the benefit of the community and not in furtherance of any additional future development.
- 13.14. The construction and location of any proposed wetland impacts are not approved by this correspondence, but shall be reviewed by EPC staff under separate application pursuant to the EPC Wetlands rule detailed in Chapter 1-11, Rules of the EPC, (Chapter 1-11) to determine whether such impacts are necessary to accomplish reasonable use of the subject property.
- 14.15. Prior to the issuance of any building or land alteration permits or other development, the approved wetland / other surface water (OSW) line must be incorporated into the site plan. The wetland/ OSW line must appear on all site plans, labeled as "EPC Wetland Line", and the wetland must be labeled as "Wetland Conservation Area" pursuant to the Hillsborough County Land Development Code (LDC).
- 45.16. Final design of buildings, stormwater retention areas, and ingress/egresses are subject to change pending formal agency jurisdictional determinations of wetland and other surface water boundaries and approval by the appropriate regulatory agencies.
- 16.17. This site is located within the Hillsborough County Urban Service Area, therefore the subject property should be served by Hillsborough County Water and Wastewater Service. This does not guarantee water or wastewater service or a point of connection. Developer is responsible for submitting a utility service request at the time of development plan review and will be responsible for any on-site improvements as well as possible off-site improvements.
- 17.18. If the notes and/or graphic on the site plan are in conflict with specific zoning

Received
March 31, 2022
Development
Services

conditions and/or the Land Development Code (LDC) regulations, the more restrictive regulation shall apply, unless specifically conditioned otherwise. References to development standards of the LDC in the above stated conditions shall be interpreted as the regulations in effect at the time of preliminary site plan/plat approval.

18.19. The Development of the project shall proceed in strict accordance with the terms and conditions contained in the Development Order, the General Site Plan, the land use conditions contained herein, and all applicable rules, regulations, and ordinances of Hillsborough County.

RATIONALE FOR OBJECTION

Staff notes that not all items below are individually causes for denial. Rather, staff has listed this information in a bulleted form in order to communicate all of facts which led to staff's conclusion that the request cannot be supported.

- 1. The developer submitted two (2) Section 6.04.02.B. Administrative Variance (AV) requests, last revised November 17, 2021, requesting relief from Section 6.04.03.Q.5(c) of the Hillsborough County Land Development Code (LDC) as it relates to two access stubouts (referred by as cross access by the applicant). Staff has previously notified the applicant, and again notifies the applicant, that these requests were erroneously acted on by the County Engineer and are unnecessary and therefore out of order. The County Engineer sent an email to the applicant on January 11, 2022 indicating that the requests are out of order and rescinding the previous findings of approvability and deniability. The email has been appended to this revised staff report.
- 2. Cross access pursuant to Section 6.04.03.Q. is not required, as the project does not meet the Section 6.04.03.Q.2.b. or 6.04.03.Q.3.c. thresholds upon which vehicular and pedestrian (Q.2.b.) or pedestrian only (Q.3.c.) cross access is required, among others. The applicant appears to have been confused regarding the difference between required cross access (which may be required pursuant to Section 6.04.03.Q.) and connectivity (which is required pursuant to Section 6.02.01.A. of the LDC.
- 3. Staff notes the applicant has refiled these requests properly as PD variation requests, as further described hereinbelow.
- 4. The County Engineer has sole authority over most Section 6.04 requirements via the Section 6.04.02.B. AV process; however, the County Engineer has authority over other LDC variance process such as the Section 11.04 (Variance before the Land Use Hearing Officer) or Section 5.03.06.C.6.b. (PD variations for site design). Since the requirements from which the applicant is seeking a waiver reside within Section 6.02.01.A. of the LDC, the applicant's refiling of the requests as PD variations are appropriate. Pursuant to the LDC/DRPM, staff's responsibilities with respect to PD variations are to issue recommendations regarding such requests.

- 5. Staff reviewed the requests and believes the wavier to connectivity along the eastern project boundary is supportable. Staff has reviewed the applicant's justification for a variation to connectivity along the southern project boundary and finds it is not supportable. Specifically, staff/County Engineer noted:
 - a. County Engineering staff reviewed the claims and did not find sufficient evidence/justification to support why development of the subject property (which consists largely of floodplain) is possible, while redevelopment of the parcels south of the subject PD (and similarly located within located within the floodplain)would be impossible.
 - b. The applicant indicates "Any development or access extension into these areas located south of the site would result in both a wetland impact and a floodplain impact that would require corresponding mitigation and floodplain compensation." Staff acknowledges that such floodplain mitigation would be needed, just as the applicant also must provide such mitigation in order to develop their site.
 - c. The applicant states "A roadway stubout to the south...would extend through the wetland ditch along the southern boundary..." Prior to this statement the applicant described the wetland as "A jurisdictional wetland swale..." The applicant's site plan describes it as a "Wetland Cut Ditch". Staff notes that while EPC may require mitigation, and certainly any conveyance of stormwater which the ditch is providing would have to be maintained or rerouted, development of a crossing is not impossible. While floodplain impacts and wetland mitigation may increase the cost of development and decrease the total development yield, it does not in and of itself make compliance with applicable sections of the LDC impossible.
 - d. Staff noted that the properties to the south of the subject site have not yet been developed to their highest and best use under the existing R-4 future land use designation (similar to the subject property).
 - e. It is reasonable to assume that such properties will redevelop in the future. Staff also believes that such properties are more likely to redevelop before the properties to the west (between the parcel adjacent to the subject site and Hillgrove Rd.) since they have developed to a higher density than those to the south.
 - f. A stubout to the south is needed to provide meaningful connectivity and distribute trips in a way that provides an alternative to Bloomingdale Ave. (staff notes that based on existing development patterns and parcel configurations, the western connection is likely to curve back north to tie in with Bloomingdale Ave., and therefore have minimal benefit to connectivity overall, although it will support potential redevelopment of the parcel to the project's immediate west to its highest and best use). Staff also notes that Bloomingdale Ave. (between Lithia Pinecrest Rd. and Little Rd.) is operating a Level of Service (LOS) F. While the segment of Lithia Pinecrest Rd. between Bloomingdale Rd. and CR 39 are also operating at a failing LOS, and portions of both segments are slated to be widened to 4-lanes in the future (as shown on the Hillsborough County Corridor Preservation Plan), staff notes that only funding for the Lithia Pinecrest Rd. project has been identified.
 - g. Although staff does not support the position, if vehicular access is not appropriate to the south, the applicant has failed to demonstrate why a less impactful connection such as a sidewalk stubout (which provides for bicycle and pedestrian connectivity) cannot be accommodate and was not proposed.

6. While the applicant is showing right-of-way preservation, they are also prosing to "double-dip" use of the preservation area for the purposes of landscaping, and open space. The roadway is also identified as a scenic corridor, and pursuant to Section 6.06.03.I. of the LDC, a 15-foot landscaped buffer is required. The applicant is proposing to place the scenic corridor within the right-of-way preservation area, which would mean that upon the future widening of the roadway to 4-lanes the scenic corridor would be removed. Despite this, the applicant did not seek the appropriate relief to waive the scenic corridor buffer requirement.

Pursuant to Section 5.11.09 of the LDC, only interim uses are permitted within the preservation area, and all such interim uses must be relocated at the property owner's expense at the time such property is acquired by the County. Furthermore, such relocation sites must be identified on development plans and "reserved for that purpose". There is no indication within the narrative that the proposed open space uses within the preservation area are to be considered interim, no commitment has been made to relocate such uses in the future, and no future location been identified and reserved on the PD site plan.

Given the above, staff objects to this rezoning request.

PROJECT SUMMARY AND ANALYSIS

The applicant is requesting to rezone a \pm 8.56 ac. parcel from Agricultural Single-Family - 1 (AS-1) to Planned Development (PD). The applicant is proposing up to 18 single-family detached dwelling units.

As provided for in the Development Review Procedures Manual (DRPM), the applicant submitted a letter indicating that the proposed development does not trigger the threshold whereby a transportation analysis is required to process this rezoning. Staff has prepared a comparison of the potential trips generated by development permitted under the existing and proposed zoning designations utilizing a generalized worst-case scenario. Data shown below is based upon the Institute of Transportation Engineer's Trip Generation Manual, 10th Edition.

Existing Zoning:

Land Use/Size	24 Hour Two- Way Volume	Total Peak Hour Trips	
	way volume	AM	PM
AS-1, 8 Single-Family Detached Dwelling Units (ITE Code 210)	76	6	8

Proposed Zoning:

Land Use/Size	24 Hour Two- Way Volume	Total Peak Hour Trips	
		AM	PM
PD, 18 Single-Family Detached Dwelling Units (ITE Code 210)	170	13	18

Trip Generation Difference:

Land Use/Size	24 Hour Two-	Total Peak Hour Trips	
	Way Volume	AM	PM
Difference	(+) 94	(+) 7	(+) 10

TRANSPORTATION INFRASTRUCTURE SERVING THE SITE

Bloomingdale Ave. is a 2-lane, undivided, publicly maintained, substandard collector roadway (west of Lithia Pinecrest Rd. it becomes an arterial roadway) and is characterized by +/- 20 to 22 feet of pavement in average condition along the project's frontage. The roadway lies within a variable width right-of-way along the project's frontage (between +/- 40-feet and +/- 46 feet in width, based on available data from the Hillsborough County right-of-way inventory). There are +/- 5-foot wide sidewalks along portions of Bloomindale Ave. in the vicinity of the propose project. There are +/- 4-foot wide bicycle lanes along portions of Bloomindale Ave. west of the project site.

The segment of Bloomingdale Ave. onto which the project fronts is shown on the Hillsborough County Corridor Preservation Plan as a future 4-lane roadway. As shown in the Transportation Technical Manual (TTM) Typical Section (TS) TS-6, a minimum of 110 feet of right-of-way is needed to accommodate a 4-lane divided urban collector roadway section. Staff notes that predominate acquisition patterns along a roadway are a factor in determining whether more right-of-way needs to come off of one side or the other (in order to avoid a perpetual "zig-zag" acquisition pattern, within which it would be impossible to build a road to the number of needed lanes and/or County standards). Staff notes that a 4-lane section was achieved to the west within slightly less right-of-way, and staff considers those improves to have established a future corridor alignment which demonstrates a predominate acquisition pattern which will likely carry forward as the 4-lane section continues east. Given this, it appears that an additional 32.5 feet of right-of-way will be needed south of the existing right-of-way line. The image below shows the right-of-way inventory in the vicinity of the proposed project.

While the applicant is showing preservation, they are also prosing to "double-dip" use of the preservation area for the purposes of landscaping, and open space. Pursuant to Section 5.11.09 of the LDC, only interim uses are permitted within the preservation area, and all such interim uses must be relocated at the property owner's expense at the time such property is acquired by the County. Furthermore, such relocation sites must be identified on development plans and "reserved for that purpose". There is no indication within the narrative that the proposed use of the preservation area is conserved interim, no commitment has been made to relocate such uses in the future, nor has a future location been identified and reserved.

SITE ACCESS, CONNECTIVITY, AND PD VARIATION REQUESTS

The project is proposing one (1) connection to Bloomingdale Ave., and one (1) roadway stubout to the western project boundary. This stubout is supported/required by Sections 6.02.01.A.6., 7., 9., 10., 13., 14, 15 and 16. These LDC provisions also support/require connectivity to the eastern and southern property boundaries. The applicant has filed two PD variation requests to eliminate the required connectivity to the east and south. Staff has evaluated these requests and finds that given the information presented by the applicant and based on other factors, the request for connectivity to the east is supportable; however, staff objects to the request for a waiver of connectivity to the south for the reasons provided in the "Rationale for Objection" section of this report, hereinabove.

Per Section 6.04.03.Q. of the LDC, vehicular and pedestrian cross access is not required. This topic is explained in greater detail in the "Rationale for Objection" section of this report, hereinabove.

REQUESTED ADMINISTRATIVE #1 - CROSS ACCESS - SOUTH

The applicant has submitted a Section 6.04.02.B Administrative Variance request (dated November 12, 2021) from the Section 6.04.03.Q.5.(c) LDC standard. The request was for relief from a cross access requirement along the project's southern boundary. The County Engineer emailed the applicant on January 11, 2022 indicating that this request is out of order and rescinded the previous finding of "Deniable". Accordingly, no further action on this Administrative Variance will be taken and the County considers the matter disposed of. Further information regarding this variance is contained in the "Rationale for Objection" section of this report, hereinabove.

REQUESTED ADMINISTRATIVE #2 - CROSS ACCESS - EAST

The applicant has submitted a Section 6.04.02.B Administrative Variance request (dated November 12, 2021) from the Section 6.04.03.Q.5.(c) LDC standard. The request was for relief from a cross access requirement along the project's eastern boundary. The County Engineer emailed the applicant on January 11, 2022 indicating that this request is out of order and rescinded the previous finding of "Approvable". Accordingly, no further action on this Administrative Variance will be taken and the County considers the matter disposed of. Further information regarding this variance is contained in the "Rationale for Objection" section of this report, hereinabove.

REQUESTED ADMINISTRATIVE #3 – ACCESS SPACING

The applicant is proposing project access on Bloomingdale Ave. (a current Class 6 roadway) in a location approximately 140 feet from S. St. Cloud Ave. (to the east of the proposed driveway) and approximately 160 feet from the closest residential driveway west of the proposed access (on the south side of Bloomingdale Ave.). Section 6.04.07 of the Land Development Code (LDC) requires a minimum access spacing of 245 feet for Class 6 roadways. As such, the applicant submitted a Section 6.04.02.B. Administrative Variance from the spacing requirement on October 14, 2021. For reasons stated in the variance request, the County Engineer found the request approvable on November 1, 2021. If the rezoning is approved, the County Engineer will approve the Administrative Variance.

REQUESTED DESIGN EXCEPTION

Given that Bloomingdale Ave. is a substandard collector roadway, the applicant's Engineer of Record (EOR) submitted a Design Exception request (on October 14, 2021) for Bloomingdale Ave. to determine the specific improvements that would be required by the County Engineer. Based on factors presented within the Design Exception request, the County Engineer found the Roadway Design Exception approvable (on November 1, 2021). The deviations from the TS-6 Typical Section (4-Lane Undivided, Local and Collector Rural Roadways) include:

- The developer shall be permitted to utilize the existing 10-foot to 11-foot wide travel lanes in lieu of the 12-foot wide travel lanes typically required by the Hillsborough County Transportation Technical Manual (TTM); and,
- The developer shall be permitted to maintain existing conditions, in lieu of the 8-foot wide stabilized shoulders, 5-feet of which are paved.

As a part of the above Design Exception, the applicant is proposing to construct a minimum 5-foot sidewalk between their eastern project boundary and a point approximately 830 feet west of their western project boundary (i.e. the terminus of the existing sidewalk on Bloomingdale Ave.). This represents construction of approximately 1,300 feet of sidewalk, of which approximately 900 feet is sidewalk the developer would not otherwise have to construct pursuant to Section 6.02.08 of the LDC. If PD 21-0744 is approved, the County Engineer will approve the Design Exception. No other improvements will be

required along Bloomingdale Ave., except for sidewalks otherwise required by Section 6.02.08 of the LDC, which (where within the subject site) shall be placed within the subject property within an easement (for public access and maintained purposes). Alternatively, the developer will have the option of dedicating or conveying the area to Hillsborough County.

ROADWAY LEVEL OF SERVICE (LOS) INFORMATION

image002.png

Mr. Sullivan.

You submitted a Section 6.04.02.B. Administrative Variance Request from Section 6.04.03.Q.5.(c) of the Land Development Code on October 14, 2021, as it pertains to cross access along the project's eastern and southern boundaries. I inadvertently issued a finding that the Administrative Variance is "Deniable" on November 1, 2021. You submitted revised requests on November 12, 2021, which subsequently split the variance requests into two separate requests (one for the east and one for the south). Again, I inadvertently issued a finding that the eastern Administrative Variance was "Approvable" and the southern request was "Deniable".

As James Ratliff explained to Libby Rodriguez of your team earlier, these requests are out of order. This is due to the fact that you are seeking a variance from a code requirement which does not apply. Cross access pursuant to Section 6.04.03.Q. is not required, as the project does not meet the Section 6.04.03.Q.2.b. or 6.04.03.Q.3.c. thresholds upon which vehicular and pedestrian (Q.2.b.) or pedestrian only (Q.3.c.) cross access is required, among others. Your team appears to have been confused regarding the difference between required cross access (which may be required pursuant to Section 6.04.03.Q.) and connectivity (which is required pursuant to Section 6.02.01.A. of the LDC). As James has mentioned, these requests have been properly refiled as PD variations from the appropriate sections of the LDC.

As you may know, I do not have the authority to adjudicate PD variations. As such, we have issued recommendations consistent with our previously discussed positions. Final decision authority for these variations rests with the Hillsborough County Board of County Commissioners.

Given that the requested variances are **OUT OF ORDER**, and I am rescinding my findings of approvability and deniability as it relates to the cross access variances and returning your application. Accordingly no further action on these Administrative Variances will be taken and we consider the mater disposed of. Please contact myself or James Ratliff if you have any questions.

Mike

Subject: FW: RE RZ PD 21-0744

Sean,

I have found the attached Section 6.04.02.B. Administrative Variance (AV) for the east side for PD 21-0744 APPROVABLE. The AV for the south side is NOT APPROVABLE and our recommendation is for DENIAL.

Please note that it is you (or your client's) responsibility to follow-up with my administrative assistant, Ingrid Padron (padroni@hillsboroughcounty.org or 813-307-1709) after the BOCC approves the PD zoning or PD zoning modification related to below request. This is to obtain a signed copy of the DE/AV.

If the BOCC denies the PD zoning or PD zoning modification request, staff will request that you withdraw the AV/DE. In such instance, notwithstanding the above finding of approvability, if you fail to withdraw the request, I will deny the AV/DE (since the finding was predicated on a specific development program and site configuration which was not approved).

Once I have signed the document, it is your responsibility to submit the signed AV/DE(s) together with your initial plat/site/construction plan submittal. If the project is already in preliminary review, then you must submit the signed document before the review will be allowed to progress. Staff will require resubmittal of all plat/site/construction plan submittals that do not include the appropriate signed AV/DE documentation.

Lastly, please note that it is critical to ensure you copy all related correspondence to <u>PW-CEIntake@hillsboroughcountv.org</u>

Hello Mike,

We just discussed this project. On 11/1/2021 you found their DE approvable, AV for cross access to the east approvable and the one to the south deniable. They decided to split the variances in order to separate the approvable from the deniable, see attached.

When you send your email please include the following people.

Sean,

I have reviewed the attached Section 6.04.02.B. Administrative Variances (AV) or Design Exception (DE) for PD 21-0744. I find them to be as follows:

- Design Exception for Substandard Road APPROVABLE
- Administrative Variance for Access Spacing APPROVABLE
- Administrative Variance to eliminate Cross Access Points DENIABLE
 - Adequate reasoning to not include cross access to the east and south was not provided.

Please note that it is you (or your client's) responsibility to follow-up with my administrative assistant, Ingrid Padron (padroni@hillsboroughcounty.org or 813-307-1709) after the BOCC approves the PD zoning or PD zoning modification related to below request. This is to obtain a signed copy of the DE/AV.

If the BOCC denies the PD zoning or PD zoning modification request, staff will request that you withdraw the AV/DE. In such instance, notwithstanding the above finding of approvability, if you fail to withdraw the request, I will deny the AV/DE (since the finding was predicated on a specific development program and site configuration which was not approved).

Once I have signed the document, it is your responsibility to submit the signed AV/DE(s) together with your initial plat/site/construction plan submittal. If the project is already in preliminary review, then you must submit the signed document before the review will be allowed to progress. Staff will require resubmittal of all plat/site/construction plan submittals that do not include the appropriate signed AV/DE documentation.

Sean,

I have found the attached Section 6.04.02.B. Administrative Variance (AV) for the east side for PD 21-0744 APPROVABLE. The AV for the south side is NOT APPROVABLE and our recommendation is for DENIAL.

Please note that it is you (or your client's) responsibility to follow-up with my administrative assistant, Ingrid Padron (padroni@hillsboroughcounty.org or 813-307-1709) after the BOCC approves the PD zoning or PD zoning modification related to below request. This is to obtain a signed copy of the DE/AV.

If the BOCC denies the PD zoning or PD zoning modification request, staff will request that you withdraw the AV/DE. In such instance, notwithstanding the above finding of approvability, if you fail to withdraw the request, I will deny the AV/DE (since the finding was predicated on a specific development program and site configuration which was not approved).

Once I have signed the document, it is your responsibility to submit the signed AV/DE(s) together with your initial plat/site/construction plan submittal. If the project is already in preliminary review, then you must submit the signed document before the review will be allowed to progress. Staff will require resubmittal of all plat/site/construction plan submittals that do not include the appropriate signed AV/DE documentation.

Lastly, please note that it is critical to ensure you copy all related correspondence to <u>PW-CEIntake@hillsboroughcounty.org</u>

October 14, 2021

Mr. Michael J. Williams, P.E. Hillsborough County 601 East Kennedy Blvd. Tampa, Florida 33602

Dear Mr. Williams:

RE: Design Exception for Bloomingdale Avenue - 2705 Bloomingdale (RZ- 21-0744) — FOLIO # 87350.0000

The subject property is in for rezoning review and is shown on the attached **Site Plan** and **Location Map**. This design exception is to request that the developer not be required to bring Bloomingdale Avenue up to Hillsborough County Transportation Technical Manual (TTM) standards, but to instead allow for a mitigation plan in lieu of full improvements to Typical Section TS-7.

1. EXISTING CONDITIONS – As per the Survey and visual observations, the existing subject roadway is 21 to 23 feet wide, with 11' +/- foot wide travel lanes. This pavement width would appear adequate and appropriate given the rural and residential nature of the area and posted speed limit of 35 MPH. The right-or-way width is 80 feet for this section of Bloomingdale. There is not contiguous sidewalk on the south side of Bloomingdale Avenue from this site to the west—the terminal end of the existing sidewalk is approx. 900 feet to the west of this site.

The County TS-7 Detail requires:

- 12' wide lanes; Existing Bloomingdale Avenue has 10' to 11' wide lanes.
- 96' wide right-of way; Bloomingdale Avenue has 80 feet of right-of-way.
- 5' wide sidewalk on both sides of the road; Existing Bloomingdale Avenue in the vicinity of this site has no sidewalk on the south side and intermittent sidewalk along the north side. Shoulder clear zones appear to be adequate.
- 2. PROPOSED IMPROVEMENTS The developer proposes to construct approximately 900 linear feet of offsite sidewalk from the northwest property corner west to the terminus of the existing sidewalk along the south side of Bloomingdale Avenue. See **Sidewalk Exhibit** attached.
- 3. JUSTIFICATION FOR THE REQUEST (a) The **Trip Generation Table** (attached) associated with this project is low and this is a residential area. There is a projected increase of 170 ADT with 10 AM peak Trips out and 11 PM peak trips In. (b) The proposed improvements enhance safety as compared to the existing condition. (c) It is well-documented that constructing more narrow travel lanes is another speed-reduction strategy. Therefore, widening the travel lanes would be counter-intuitive to maintaining safe speeds in this residential area, and as such, only the sidewalk improvements are

October 14, 2021 Page **2** of **6**

recommended. (d) There is not sufficient right-of-way to bring the roadway completely up to TS-7 standards (See attached **TS-7 Detail** which depicts the required 96 feet of right-of-way; Bloomingdale Avenue has 80 feet of Right-of-Way per Survey.

Enclosed for your review are the following:

- 1. Site Plan;
- 2. Location Map & Vicinity Map;
- 3. Trip Generation Table;
- 4. Aerial Plan;
- 5. Sidewalk Exhibit;
- 6. TS-7 Detail;
- 7. Site Survey

October 14, 2021

Mr. Michael J. Williams, P.E. Hillsborough County 601 East Kennedy Blvd. Tampa, FL 33602

Dear Mr. Williams:

RE: Administrative Variance for Driveway Spacing - 2705 Bloomingdale (RZ- 21-0744) – FOLIO # 87350.0000

Please accept this letter as a formal request for your approval of an administrative variance to Section 6.04.03.07 of the Hillsborough County Land Development Code (LDC), which states:

"Sec. 6.04.07. - Table: Minimum Spacing – CLASS 4 - New and existing roadways primarily in areas without extensive development or extensive subdivided properties. These corridors will be distinguished by nonrestrictive median treatments or highways with two-way left turn lanes. - >45 mph 660 ft≤45 mph 330 ft."

The subject property is in for review, as is shown on the attached **Site Plan** and **Location Map**. This variance is to request that the developer not be required to meet LDC driveway spacing.

The LDC allows for relief of certain standards of Section 6.04 Access Management, subject to providing the following information and justifications.

1. Site Information: *FOLIO* # 87350.0000

2. Associated Application Numbers: RZ- 21-0744

- 3. Type of Request: Administrative variance to Section 6.04.07
- 4. Section of the LDC from which the variance is being sought, as well as any associated zoning conditions which require said improvements: *Relief from LDC Section 6.04.07 is sought*.
- 5. Description of what the LDC/zoning conditions require: *The posted speed on this link of Bloomingdale Avenue is 40 mph*, and *Section 6.04.07 requires the proposed driveway to be 330*

feet from the other driveways/intersections. However, the driveway is proposed to be about 195 feet from the existing driveway to a single-family home on the east, and approximately 160 feet from the existing driveway to a single-family home on the west. (See exhibit.)

- 6. Description of existing roadway conditions (e.g. Pavement width, lane width, condition, number of lanes, bicycles/sidewalk facilities): Bloomingdale Avenue has an approximately 80 foot right-of-way and two approximately 11 foot lanes. The pavement condition appears to be below average. There is sidewalk on the south side of the roadway.
- 7. Justification for request and any information you would like considered such as cost/benefit analysis, land use plans, policies, and local traffic circulation/operation of the site and adjacent areas. Justification must address Section 6.04.02B.3 criteria (a) and (b) if applicable (c). In the consideration of the variance request, the issuing authority shall determine to the best of its ability whether the following circumstances are met:
 - a. There is an unreasonable burden on the applicant. *Due to the size and configuration of the site, the parcel cannot physically meet 330 foot spacing on Bloomingdale Avenue.*
 - b. The variance would not be detrimental to the public health, safety, and welfare. The variance is not expected to be detrimental to the public, health, safety, and welfare because this is a relatively small subdivision (See attached trip generation). It is also important to note that the adjacent driveways are for single family homes with PM peak hour trip generation of approximately 1 trip end each.
 - c. Without the variance, reasonable access cannot be provided. In the evaluation of the variance request, the issuing authority shall give valid consideration to the land use plans, policies, and local traffic circulation/operation of the site and adjacent areas. Due to the size and configuration of the site, it is physically impossible to meet LDC minimum spacing standards. Thus, without the variance, reasonable access cannot be provided.
- 8. Documentation/other attachments: *Attached are site plan, location map, spacing exhibit, and trip generation table.*

AGENCY COMMENT SHEET

REZONING				
HEARING DATE: 7/26/2021	COMMENT DATE: 5/20/2021			
PETITION NO.: 21-0744	PROPERTY ADDRESS: 2705 Bloomingdale Ave, Valrico, FL 33596			
EPC REVIEWER: Chris Stiens	Valico, 12 00000			
CONTACT INFORMATION: (813)627-2600 X1225	FOLIO: #0873500000			
EMAIL: stiensc@epchc.org	STR: 7-30S-21E			

REQUESTED ZONING: AS-1 to PD

FINDINGS				
WETLANDS PRESENT	YES			
SITE INSPECTION DATE	3/12/2021			
WETLAND LINE VALIDITY	Not valid, need surveys			
WETLANDS VERIFICATION (AERIAL PHOTO,	EPC files and aerial review			
SOILS SURVEY, EPC FILES)				

The EPC Wetlands Division has reviewed the proposed rezoning. In the site plan's current configuration, a resubmittal is not necessary. If the zoning proposal changes and/or the site plans are altered, EPC staff will need to review the zoning again. This project as submitted is conceptually justified to move forward through the zoning review process as long as the following conditions are included:

- The construction and location of any proposed wetland impacts are not approved by this correspondence, but shall be reviewed by EPC staff under separate application pursuant to the EPC Wetlands rule detailed in Chapter 1-11, Rules of the EPC, (Chapter 1-11) to determine whether such impacts are necessary to accomplish reasonable use of the subject property.
- Prior to the issuance of any building or land alteration permits or other development, the
 approved wetland / other surface water (OSW) line must be incorporated into the site plan. The
 wetland/ OSW line must appear on all site plans, labeled as "EPC Wetland Line", and the wetland
 must be labeled as "Wetland Conservation Area" pursuant to the Hillsborough County Land
 Development Code (LDC).
- Final design of buildings, stormwater retention areas, and ingress/egresses are subject to change
 pending formal agency jurisdictional determinations of wetland and other surface water
 boundaries and approval by the appropriate regulatory agencies.

INFORMATIONAL COMMENTS:

The following specific comments are made for informational purposes only and to provide guidance as to the EPC review process. However, future EPC staff review is not limited to the following, regardless of the obviousness of the concern as raised by the general site plan and EPC staff may identify other legitimate concerns at any time prior to final project approval.

- The subject property contains wetland areas, which have been delineated; however, surveys have not been received or approved by EPC. Knowledge of the actual extent of the wetland and OSW are necessary in order to verify the avoidance of wetland impacts pursuant to Chapter 1-11. Prior to the issuance of any building or land alteration permits or other development, the wetlands/OSWs must be field delineated in their entirety by EPC staff or Southwest Florida Water Management District staff (SWFWMD) and the wetland line surveyed. The surveys must be submitted for review and formal approval by EPC staff.
- Chapter 1-11, prohibits wetland impacts unless they are necessary for reasonable use of the property. Staff of the EPC recommends that this requirement be taken into account during the earliest stages of site design so that wetland impacts are avoided or minimized to the greatest extent possible. The size, location, and configuration of the wetlands may result in requirements to reduce or reconfigure the improvements depicted on the plan.
- The Hillsborough County Land Development Code (LDC) defines wetlands and other surface
 waters as Environmentally Sensitive Areas. Pursuant to the LDC, wetlands and other surface waters
 are further defined as Conservation Areas or Preservation Areas and these areas must be designated
 as such on all development plans and plats. A minimum setback must be maintained around the
 Conservation/Preservation Area and the setback line must also be shown on all future plan
 submittals.
- Any activity interfering with the integrity of wetland(s) or other surface water(s), such as clearing, excavating, draining or filling, without written authorization from the Executive Director of the EPC or authorized agent, pursuant to Section 1-11.07, would be a violation of Section 17 of the Environmental Protection Act of Hillsborough County, Chapter 84-446, and of Chapter 1-11.

Page 117 MR. GRADY: The next item is agenda item 1 2 D-2, Rezoning-PD 21-0744. The applicant's William Sullivan, Potomac Land Company. The request is to rezone from AS-1 to a Planned Development. 4 Timothy Lampkin will provide staff 5 6 recommendation after presentation by the applicant. 7 HEARING MASTER HATLEY: All right. 8 Applicant. 9 MR. CASHEN: Good evening. Sean Cashen, 13825 Icot Boulevard, Clearwater, Florida 33760. 10 We have a PowerPoint presentation. There we go. 11 12 Thank you. 13 That's an aerial view of the property, 14 8.56 acres. It's south of Bloomingdale. You see 15 the Publix and the BayCare Health hub to the east. 16 Next slide, please. 17 That is the location map. There is property 18 south of Bloomingdale and east of Lithia Pinecrest. 19 Next slide, please. Future Land Use Map. This 20 site is R-4 as well as the surrounding area. 21 slide, please. 22 The zoning map. Our site is zoned AS-1. 23 AS-1 is to the south and the east. You have a 24 mixture of RSC-3, ASC-1 around the property, and 25 some PDs that are further out. We are requesting

Page 118 to rezone to a PD, which will be 6,000-square-foot 1 2 lots, 50 feet wide; 18 units, which is 2.1 units to the acre. Next slide, please. 4 There is the site and the topographic map. 5 The site drains from elevation 47 to the northwest to approximate elevation 36 to the southeast. 6 Along the eastern boundary, I just want to 8 point out that you have elevation 40 to the north and elevation 36 to the south. And along the southern boundary, you have elevation 42 to the 10 11 west and then that slopes to 36 to the east. 12 that'll be important for some further slides that 13 we will present. Next slide, please. 14 We are in the Urban Service Area. 15 slide, please. The classification of the roadway 16 Bloomingdale is a collector road. Next slide. 17 Traffic analysis. That just shows the 18 average daily trips in that section of Bloomingdale. It's a little bit less on the 19 20 section of Bloomingdale. It's east of Lithia 21 Pinecrest. Just for informational purposes, our 22 maximum 18 lots will produce a 170 average daily 23 trips. Next slide, please. 24 This slide shows the various design

exceptions and variances that we requested for the

Page 119 property. The first one is the administrative 1 variance for driveway spacing. That was deemed approvable by Mike Williams. The next is a design exception which was for 4 5 substandard roadway. That was also deemed approvable by Mike Williams, and as part of that 6 agreement, we will be constructing 1280 feet of sidewalk, 900 of which is off-site. There it is in green, the off-site sidewalk. 9 You know, that shows the sidewalk that we 10 will be proposing to construct off-site so it's a 11 12 continuous sidewalk on the south side of 13 Bloomingdale Avenue. Going down the list of the previous slide --14 15 well, you just jumped ahead a little bit. There's 16 the driveway spacing. Can we go back two slides, 17 please. Okay. Back to the -- yes. 18 The next two variances, which is Variance 1 19 and 2, have to do with connectivity to the east and 20 the south. The eastern variance was deemed 21 approvable as a PD variance. 22 The Variance 2, which was the -- the 23 connectivity to the south, that was not deemed 24 approvable. Variance 3 was a scenic roadway. I'll

go into that a little bit later. We are proposing

Page 120

5 feet in lieu of 15 feet. Regarding these two
right here specifically.

So the connectivity or access to the east and south, I just want to point out that they would be accesses stubbed out to areas that are within the flood zone, Flood Zone A, within the 100-year flood.

And these areas have existing elevations well below the 100-year elevation, which is at elevation 433. And if you recall the topo map that was a previous slide, along the eastern boundary, it sloped from elevation 40 to 36. Along the southern boundary, it sloped from 42 to the west to 36 to the east.

So along the southern boundary, specifically, since that was deemed not approvable, the elevations of some of the existing areas that are off-site are 1 to 7 feet lower than that base flood elevation of 433, which is fairly high.

We did submit to the County a fairly detailed analysis to determine that development in these floodplain areas to the east and the south was -- was unfeasible and impractical due to the lower elevations and as part of the associated floodplain impact that you would have within these

Page 121

lower elevations.

Any kind of fill placed within those areas is an immediate floodplain impact that would have to be mitigated for. In our analysis, we determined that along the east and the southern areas that any -- the 1 acre of development would require approximately 2 acres of floodplain mitigation.

We just don't see that as economically viable, feasible, sustainable. And we don't think it's advisable that the County would encourage or promote development in some of these areas that are located off-site to the south and east specifically.

As far as our development, we -- this development is adjacent to Bloomingdale and is at higher elevations. So we have an opportunity to excavate out some areas to provide the required floodplain mitigation.

We do understand that the areas that are located off-site to the south and the east are prone to flooding. Again, we don't want to exacerbate that situation. We want to improve that situation.

25 All right. We're moving ahead with some of

Page 122

these. This right here, this exhibit shows the environmentally sensitive areas. It does show the proposed landscape buffers that we have around the property. It details the 32 1/2 right-of-way preservation area to the north.

We do have a condition that we are proposing where we would like to provide some retention storage in that 32 1/2 feet to preserve for right-of-way. We think that would go a long way in helping the drainage along Bloomingdale and the surrounding area as well.

You can see the area to the south is existing wetland area. There's a wetland ditch, and we have floodplain mitigation and retention ponds.

Any kind of roadway stub-out to the south is going to be going through either the wetland ditch, the wetland area, or it's going to bifurcate one of the floodplain mitigation ponds, which is going to greatly reduce the floodplain that we are trying to provide.

And, again, we think it's a roadway stub-out to an area to the south that shouldn't be developed and just cannot feasibly be developed. Can you go to the previous slide, please. That one right

1 there.

21

22

23

24

25

So I just want to point out, there's our site. Just to give you an idea as far as the surrounding area, the area to the south, they -- at the western end, 1200 feet, that's the -- the limits of the area within Flood Zone A and along the eastern side is 1800 feet.

Basically to Lithia Pinecrest. So from Lithia Pinecrest north to our site, that is Flood Zone A. That is a flood zone area. Okay. Next slide, please.

That, we talked about. Again, there's the topo -- topographic map that shows our site and some of the elevations, and you can see some of these lower elevations to the south that vary from 42 to 40 and then to 38 as you go from the west to the east. Next slide, please.

Connectivity map. So we have connectivity to Bloomingdale, and we are proposing a interconnection to the west, which is a much higher area, and that's stubbed out from the cul-de-sac.

Next slide, please.

Scenic corridor variance. As I mentioned, as stated there, we are providing 32 1/2 feet of right-of-way preservation. There is a 15-foot

Page 124 requirement for landscape buffer along the scenic 1 2 roadway. We are proposing 5 feet, which in combination with 32 1/2 will be a total of 37 1/24 feet of area encumbered along the northern property 6 boundary. Next slide, please. This slide shows a graphic representation of 8 that 32 1/2-foot right-of-way preservation again. We are proposing to put some retention in there 10 along the roadway. 11 There you see the trees that we are 12 proposing, which will be 3-inch caliper, 13 10-foot-tall trees, which is above what Code is 14 requiring. And that will be within 5-foot 15 landscape buffer in lieu of the 15 feet. Next 16 slide, please. 17 That shows the 5-foot landscape buffer 18 vertical screening. So that's just a graphic of 19 that showing some of the 3-inch caliper, 20 10-foot-high trees. Next slide, please. 21 There's the general site plan. And, again, 22 we are proposing 6,000-square-foot lots, 50-foot 23 minimum width, and total of 18 lots at 2.1 units 24 per acre density. Next slide. 25 That's just a blowup of some of that site

Page 125 1 data. Next slide, please. That is a representation of the -- some of the other landscape buffers, the 10-foot-wide buffers along 4 the eastern, northern -- well, eastern boundary. 5 Actually, northern property boundary as well. Next 6 slide, please. Concept plan that shows the areas we are 8 proposing to develop the 18 lots of roadway, and again, approximately half of the area to the south is being allocated for floodplain mitigation and 10 retention and also the existing wetland. 11 12 slide, please. 13 Utilities are utilities out on Bloomingdale 14 Avenue. Next slide, please. This just shows some 15 of the adjacent developments. You'll see the 16 Buckhorn to the northeast, 2.6 and 2.8 units to the 17 acre. 18 We have Hill Grove to the west, which is 19 1.5 units to the acre. Arbor Reserve, which is 20 located to the northwest, 2.68 units to the acre. 21 And, again, you have the Publix and the BayCare, 22 which is a little bit further to the east. Next 23 slide.

Executive Reporting Service

are proposing, and again, approximately

There's another exhibit which shows what we

24

	Page 126
1	50 percent actually 47.3 percent of that area to
2	the south is being allocated for floodplain
3	mitigation and retention and also that wetland
4	existing area. Next slide.
5	That's another graphic that shows the
6	floodplain ponds and the retention ponds separated
7	out from that existing wetland. Those in total are
8	about 25 percent of the site. Next slide. Okay.
9	That concludes my portion of the
10	presentation. Thank you very much, and Bill
11	Sullivan would like to come up and say a few words.
12	Thank you.
13	HEARING MASTER HATLEY: Thank you.
14	You have about just a little over two
15	minutes.
16	MR. SULLIVAN: William Sullivan, Potomac
17	Land Company, 13 26336 (unintelligible) we
18	have that in the record.
19	I just wanted to say we had a community
20	meeting in May 25th. We had we've mapped out
21	who all showed up to it. It was a small
22	attendance. Next slide, please.
23	We also additionally reached out to all of
24	the adjacent neighbors as much as we could. We've
25	spoken with the ones in blue, which is, you know, a

Page 127 good portion of them; and then we have the guy 1 who's most affected who's surrounded by us on two sides, he signed a petition in favor of the -- of 4 the project. 5 If you could go back a few slides, I'd like 6 to just -- keep going. Keep going back. Keep going back. That one right there. I'd just like 8 to point out that our project has a density of 2.1, and the average in the area of these other communities have been built. 10 11 The average density for those are about 2.3. We are building a sidewalk that will connect to the 12 13 existing sidewalk that is also adjacent to Publix 14 and BayCare on the southern side bringing 15 connectivity as well not only in -- in, you know, 16 vehicular kind for the other directions, but 17 pedestrian connectivity. 18 I'm a firm believer -- as a developer, I do 19 projects all throughout Florida that are live-work 20 environments, and this is an infill site that is a 21 totally live-work environment. 22 I walk to work most days moving my office to 23 where I can actually go up the hill and be to the 24 office, but I've -- I've walked and took my scooter

Executive Reporting Service

to work for the last ten years. I want to

Page 128 encourage us to build sites that are -- you know, 1 infill sites that are pedestrian friendly. Thank you. 4 HEARING MASTER HATLEY: Thank you, sir. And 5 please sign in with the clerk too. 6 Twenty-two seconds. 7 MR. MOLLOY: Yes, ma'am. And I'll be very 8 brief. William Molloy, 325 South Boulevard, Tampa, Florida. 9 10 Just for the record at this point, I'm going to hand the clerk proposed conditions which we've 11 12 drafted because we're on the naughty list. And any 13 other comments, I'll try and address on rebuttal. 14 Thank you. 15 HEARING MASTER HATLEY: Thank you. 16 All right. We'll hear from Development Services. 17 18 MR. LAMPKIN: Hello. Can you hear me? 19 calling in on my phone. My audio was not --20 HEARING MASTER HATLEY: Yes. 21 MR. LAMPKIN: Okay. Perfect. Tim Lampkin, 22 Development Services. 23 And this -- the request is to rezone 24 8 1/2-acre property located at 2705 Bloomingdale Avenue in Valrico from AS-1 -- hold on. Now I'm 25

1 having an issue with the screen. Okay. Sorry.

2 Just one second. Okay. I got it manually.

The property is 8 1/2 acres in size. The existing zoning is AS-1, and the proposal is to go to Planned Development. As shown in the map, it's located approximately 800 feet to the east of the intersection of Lithia Pinecrest Road and Bloomingdale Avenue.

On page 2 of the staff report in the context surrounding area, there's a scrivener's error where it says 1800 feet to the west, and it's actually to the east.

It's located within the Urban Service Area, and the applicant's requesting this to allow 18 single-family homes with a minimum lot size of 6,000 square feet.

The Future Land Use is Residential-4 which allows up to four dwelling units per acre. Typical uses to include residential. As you can see here, it's surrounded in a sea of Residential-4 on all sides until you get to the Bloomingdale and Lithia Pinecrest intersection.

The surrounding zoning districts include

Agricultural Single-Family, which is located to the immediate east, and then there's Single-Family

Page 130 located to the west, and there's Agricultural 1 Single-Family AS-1 also located to the south of the property. 4 The proposed zoning -- another scrivener's 5 error in the staff report, it says 25-foot 6 wetlands, which would initially be -- so the applicant needs to amend the site plan which they 8 show the correct approximate 30 feet wetland buffer in the site plan as shown in the presentation. The scrivener's error that also needs to be 10 corrected to reflect the required 30-foot wetland 11 12 buffer area. 13 The applicant's proposing a 32 1/2-foot 14 right-of-way preservation area, which is required, 15 and they also are requesting a number of 16 variations. They're requesting variation to part 17 6.02.01 regarding scenic roadways. 18 This is a variation the way the 15-foot 19 buffer yard requirement to 5 feet and be in 20 compliance with the buffer yard requirements for 21 the plantings, which they slightly exceed that 22 because they're proposing to provide the 23 required -- overstoring, understorage reason 24 they're also proposing a 6-foot-high fence behind 25 that vegetation all outside of the 32 1/2-foot

1 right-of-way preservation area.

There is a design exception for substandard road, what's not approvable, and administrative variance for driveway spacing which was found approvable.

The LDC part 6.02.01 access, there's a variation to waive connectivity onto the eastern property, which was found -- project boundary, a stub-out which was found approvable and a then variation to waive connectivity on the southern project boundary which was not found approvable.

And, again, here is the variances. Staff finds the request is not supportable as the proposed site design does not illustrate connectivity along the southern project boundary, and their requested variation of Section 6.02.01 to waiver the connectivity on the southern project boundary is not approvable.

And that concludes staff's presentation, unless you have any questions.

21 HEARING MASTER HATLEY: No questions for 22 you. Thank you.

MR. LAMPKIN: Thank you.

24 HEARING MASTER HATLEY: All right. We'll

hear from Planning Commission.

5

6

8

10

11

12

13

14

15

16

17

18

19

1 MS. MASSEY: Hi. This is Jillian Massey
2 with Planning Commission staff.

The site is located in the Urban Service Area and not within the limits of a community plan. The subject property is per Policy 1.2 of the FLUE. It must satisfy the minimum density requirements. The maximum allowable density on the subject site is 34 dwelling units.

However, in this case, the request would meet the minimum density exception due to the wetlands on the site and the likelihood of development having an adverse impact on the environmental features.

The subject property is designated as

Residential-4 in the Future Land Use Map, and the

purpose is to designate these areas that are

suitable for low density residential as well as

suburban scale in neighborhood commercial, office,

multipurpose projects, and mixed-use developments

when in compliance with the Future Land Use Element

and applicable development regulations.

The proposed development would allow for uses that are compatible with the surrounding development pattern and satisfy the intent of Objective 16 and Policy 16.1, 16.3, and 16.8.

At the time of drafting this report, the Planning Commission staff had not received the transportation comments. Therefore, the Planning Commission staff find it did not take those comments into consideration for the analysis of their request.

Planning Commission finds that the proposed use and density is compatible with the surrounding area. The proposed development is consistent with the Residential-4 Future Land Use Category.

And it would allow for a development that's consistent with the goals, objectives, and policies of the Future Land Use Element of the Future of unincorporated Hillsborough County Comprehensive Plan for unincorporated Hillsborough County.

And based upon those considerations,

Planning Commission staff found that the proposed

Planned Development was consistent with the

Comprehensive Plan.

And I just wanted to note again that this analysis did not take into consideration the transportation comments that were noted previously in the testimony.

24 HEARING MASTER HATLEY: All right. Thank
25 you.

Page 134 Okay. Is there anyone here or online who 1 2 wishes to speak in support of this application? Don't hear anyone. 4 Is there anyone here or online who wishes to 5 speak in opposition to this application? 6 MR. WESSINGER: Hunter Wessinger from 4306 Honeybell Ridge Court, Valrico, Florida 33596. Building this type of high-density housing will worsen traffic both before and -- or both 9 10 during and after construction on a two-lane road 11 that already backs up almost to Lithia Pinecrest 12 every single day. 13 Major part of the appeal of the Bloomingdale-Valrico neighborhood is it's low 14 15 density and natural beauty. This type of 16 construction will further damage the rural charm of 17 our neighborhood, and we need higher minimum lot 18 sizes, not lower. I have lived in this area for almost 19 20 20 years, and I have watched it change around me. 21 This proposal will be another step towards turning 22 the Bloomingdale community into something 23 unrecognizable to those who have lived here for 24 most of their lives. 25 The increasing urbanization of our home and

	Page 135
1	the construction of subdivisions where you can lean
2	out of your window and shake hands with your
3	neighbor is slowly but surely destroying our way of
4	life.
5	The disruption of our natural ecosystem in a
6	blind pursuit of profit has devastating
7	consequences, including but not limited to the
8	displacement of local wildlife and the destruction
9	of their habitats. Leaving a small portion of the
10	lot as wetlands is not sufficient.
11	Anyone who votes in favor of this proposal
12	is acting in direct opposition of the will of the
13	people who live and work in this area and will be
14	directly affected by this proposal.
15	And it is my view that in doing so you will
16	forfeit any claim you may have to actually
17	representing our interests. Thank you.
18	HEARING MASTER HATLEY: Thank you, sir.
19	Is there anyone else who wishes to speak in
20	opposition to this application?
21	MR. MANLEY: Bryce Manley, 3023 Beaver Pond
22	Trail, Valrico, Florida.
23	And I have lived off of Bloomingdale for
24	almost 20 years. I want to thank you, Madam
25	Speaker, for your time. I don't know how many of

you, if any, drove on Bloomingdale past the proposed build site. I did, and I drive on that road every day multiple times a day as do thousands of other residents.

Bloomingdale is already super congested during both morning and evening rush hours. This results in bumper-to-bumper traffic and -- traffic for miles. My apologies. It's during these times that a routine five-minute drive turns into a 20-minute drive.

By adding more homes, you'd be creating more traffic to an already crowded two-lane road. Some of you may think that 18 homes won't add too much traffic, but I can tell you from experience it will.

Around three to four years ago, Anna George
Drive was built with the neighborhood Arbor Reserve
Estates. And that was only a few hundred yards
from St. Cloud. These homes further congested
already crowded roads. I can't tell you how many
times I've been caught behind a vehicle turning
onto Anna George Drive.

I'd also like to add that adding more lanes to Bloomingdale will not make things better since it, apparently, takes over three years to complete

1 a road. I'm referring to Bell Shoals expansion.

As a resident that lives off of Bloomingdale and will be directly affected by your decision, I urge you to listen to the other residents who will be affected and not allow the construction of this neighborhood.

I'd also like to go over a few points that the previous speakers made. They talked a lot about flooding and potential solutions that were put in place, but they completely neglected and failed to address traffic. So that was what I've addressed with you here tonight. Thank you for your time.

HEARING MASTER HATLEY: Thank you.

Is there anyone else here tonight that wishes to speak in opposition to this application?

MR. KOUDELA: Good evening. Thank you for this opportunity to speak. My name's Kevin Koudela, K-o-u-d-e-l-a. I've lived at 4802 Bloomingdale Avenue, Valrico, Florida 33596 for this April will be 20 years.

Right now, I believe most of that is

Buckhorn Run Estates, which most of the lots there

are 1-acre single-family homes. There has been two

built next to me, 1-acre, single-family homes in

1 the last five years.

Right now, the County has purchased from other residents a property to build a retention pond, which that has alleviated some of the issue but not all of it. With houses just south of this property still flood quite a bit. And we haven't really even had bad rain yet.

The infrastructure that's there now doesn't really support the development that exists now.

Traffic, that's mentioned before. A lot of times, especially when Mulrennan school was built, traffic is backed up. It's backed up almost all the way to Publix, especially when school's letting out and in the mornings also when it's being dropped off.

Eighteen houses is a bit ridiculous. If
they went with maybe five houses and a 3-acre
retention pond, all five houses on acre lots, that
may be acceptable. But as of 18 homes in that
area, there isn't enough area for actually the
water to be run off and not flood other issues or
cause other issues. Thank you for your time.

HEARING MASTER HATLEY: Thank you, sir.

Is there anyone else here who wishes to speak in opposition to this application?

MR. GRADY: Ma'am, could you leave your mask

Page 139 1 on, please. Thank you. MS. SKIDMORE: Put it on? 3 MR. GRADY: Yes. Thank you. 4 MS. SKIDMORE: My name is Linda Skidmore, 5 and I will be -- I live directly behind --6 MR. GRADY: Can you provide your address for the record, please. Thank you. 7 MS. SKIDMORE: I'm sorry? 9 MR. GRADY: Your address for the record, 10 please. MS. SKIDMORE: 2708 Stearns Road, Valrico. 11 12 MR. GRADY: Thank you. 13 MS. SKIDMORE: And I live directly to the 14 south of this proposed, and I've lived there for 15 37 years. Been through several floodings from 16 my -- middle of my yard all the way across 17 Bloomingdale. 18 And we owned a house that was in -- behind 19 where I live now that we sold to the County. They 20 tore it down about 12 years ago to build a 21 retention pond back there to help alleviate some of 22 the flooding that we've been experiencing after 23 Publix and El Nino and 50-year flood and 100-year 24 flood and all that. 25 But my concern is the flooding. I know that

Page 140 they -- at least with our retention pond behind my 1 2 house, we have the pump that the County maintains. However, when the electric goes out during the 4 hurricane, the pump doesn't work. So they have to 5 bring out a generator to pump -- to get to pump the 6 water out. So that's my main concern is if their 8 retention ponds fill up, what are they going to do with their water if it's not pumped somewhere or, 9 10 you know, alleviated from there? So I would like the County -- I don't know 11 12 if the County could do this -- to put a permanent 13 generator back there. That would help so we don't 14 have to wait for someone, you know, to bring one 15 out. 16 This year, they did bring one out before 17 hurricane happened in July and, you know, we did --18 it was utilized. However, you know -- and then 19 after the end of hurricane season, they came and 20 took it away. 21 But that's my main thing is if there was 22 some kind of a permanent generator that would help, you know, get rid of the water, so -- and also, the 23 24 traffic is atrocious. Going up Stearns, I have to 25 go up Hill Grove to get out onto Lithia to go south

	Page 141
1	on Lithia because I cannot without taking my
2	life in my hands. So thank you for your time.
3	HEARING MASTER HATLEY: Yes, ma'am. Thank
4	you.
5	Is there anyone else here who or online
6	who wishes to speak in opposition to this
7	application? Okay. Don't hear anyone else.
8	All right. So we'll go back to Development
9	Services. Anything further?
10	MR. GRADY: Nothing further, unless you have
11	questions.
12	HEARING MASTER HATLEY: All right. We'll
13	hear from the applicant then. Rebuttal.
14	MR. MOLLOY: Good evening again. William
15	Molloy, 325 South Boulevard.
16	I just want to touch on two points fairly
17	quickly here. The first one, you'll note in the
18	staff report and I'm not sure that anyone
19	highlighted it at 2.1 units to the acre here,
20	we're actually well below the threshold of minimum
21	density that the Comp Plan calls for 75 percent.
22	There's a graphic that Mr. Sullivan showed
23	in the PowerPoint presentation of the surrounding
24	areas and the relative densities that they have.
25	We did the math. That averages out to 2.33 and,

again, we're at 2.1.

So part of this application, if it's approved, is going to be approving essentially the density that doesn't meet the minimum thresholds of the Code. That'd be part one that I'd like to highlight.

The second issue as to flooding -- and I very much am hesitant to make it this simple. But if and when this project is approved, SWFWMD is not going to issue an ERP if we cannot prove beyond a doubt that we're not going to provide or cause any adverse impacts on surrounding properties.

And I think that's as much substantiation and validation of the plan we have as we can provide. Thank you. And I'm happy to answer any questions and actually, I believe Bill has a few --

HEARING MASTER HATLEY: Mr. Molloy, could you address, please -- and I believe the applicant has the burden to show consistency with the Comprehensive Plan and that the application is -- complies with the land development regulations.

So there's a matter of the waiver on -- or the connectivity on the south end that's not supported. Can you address that issue?

MR. MOLLOY: Yes, ma'am. Current Code, as

Page 143 it's been rewritten, I believe calls for cross 1 2 access, basically, in all cardinal directions. course, we have the connection to the north. 4 providing a potential stub-out to the east. 5 me. Not to the east, to the west. The east was 6 determined approvable to not provide. The south is a point of contention. 8 you'll see from the general site plan, we really stacked all of our retention and mitigation into 9 10 the southern end of the property. That was done by 11 design, by engineering. It's a function of high to 12 low really. That's where the water wants to go. 13 We felt that adding a road or a connection 14 through that, you know, essentially what's going to 15 be become a wetland -- a unified wetland, one would 16 be essentially useless and two, might actually 17 compromise the efforts we're making in mitigation 18 and retention down there. 19 If you stick a road through all those ponds, 20 not only do you compromise the volume of the ponds, 21 it could function as sluiceway to the properties to 22 the south. 23 That was essentially our justification.

but that's what we stand on.

Development Services did not quite see it that way,

Page 144 1 HEARING MASTER HATLEY: All right. Thank 2 you very much. I don't have any more questions for you. Yes, sir. 4 5 MR. SULLIVAN: When we met with the owners 6 in the area -- the residents in the area, we determined that the flooding issue is a problem in 8 the area. 9 And we have thrown out that we would use the 10 32 feet for right-of-way preservation that we would -- one of our conditions we're proposing is 11 12 to build ponds for the County's drainage on 13 Bloomingdale, not for our property. 14 The Bloomingdale -- those ponds would be for 15 the County's benefit, not for our benefit. 16 we're trying to block some of the water from coming 17 down the hill. 18 And then also just keep in mind, we're going 19 to be storing the 100-year flood right now. And 20 right now, the storage is not -- there's no storage 21 on this property. 22 So we will be creating a large volume of 23 storage on this property for the residents and the 24 protection of the area. Thank you. 25 HEARING MASTER HATLEY: Thank you, sir.

```

ADJOURNMENT

Pamela Jo Hatley, ZHM, adjourns the meeting.

Application No. RZ-2 - 0744

Name: White Man Malloy

Entered at Public Hearing: ZHM

Exhibit # Date: 11872

21-0744 Recommendation of Denial

Prior to PD site plan certification, the applicant shall revise the PD site plan to:

- Revise the wetland buffer from 25 ft. to 30 ft. Wetlands or other surface waters are considered Environmentally Sensitive Areas and are subject to 30-foot wide Conservation Area setbacks.
- Label the right of way preservation area as "32.5-foot Right-of-way Preservation Area Per Hillsborough County Corridor Preservation Plan";
 - Update the site data table removing row pres. Area within 32.5 ft.
- Show the required scenic corridor buffer; and,
- Remove notations regarding "Open Space" within the preservation area."
 - Update site data open space, if included within calculation.

6.0 POSSIBLE PROPOSED CONDITIONS -IF APPROVED

Approval - Approval of the request, subject to the conditions listed below, is based on the general site plan submitted October 11, 2021

- The site shall be developed as depicted on the site plan, and subject to the conditions listed below.
- The project shall be limited to a maximum of 18 single-family homes with a minimum lot size of 6,000 square feet, subject to the following standards.

Minimum Front Setback:	20 feet
Minimum Front Setback (Side Facing Garage):	10 feet
Minimum Front Setback (with Porches):	15 feet
Minimum Side Setback:	5 feet
Minimum Side Setback (Corner Lot abutting PD Boundary):	10 feet
Minimum Rear Setback:	20 feet
Minimum Rear Setback:	20 feet
Maximum Building Coverage (Per Lot):	60%
Minimum Building Separation:	10 feet
Minimum Lot Width	50 feet

- 3. The residential lot areas shall be developed where generally depicted on the site plan.
- 4. Building heights shall be limited to a maximum of 35 feet. An additional setback of 2 feet for every 1 foot over 20 feet in height shall be provided from required setbacks, if needed at site and development.
- 5. The developer shall provide a (5) five-foot wide suburban scenic corridor for all

property within folio 87350.0000 located along Bloomingdale Avenue. The subject property shall be subject to the buffering and screening requirements of Section 6.06.03.1.2.b of the Hillsborough County Land Development Code, unless specified herein.

- a. The (5) five-foot suburban scenic corridor buffer shall include four 3" caliper canopy trees and four 2" caliper understory trees per 100 linear feet, and a 6-foot fence with the finished side facing Bloomindale Avenue and located behind the vegetation. The fence shall be located inside the lots adjacent to the buffer. Such scenic buffer shall be provided outside of the 32.5' wide right-of-way preservation area along Bloomingdale Ave.
- 6. Wetlands or other surface waters are considered Environmentally Sensitive Areas and are subject to 30-foot wide Conservation Area setbacks. A minimum 30' setback must be maintained around these areas which shall be designated on all future plan submittals. Land alterations are restricted in these areas.
- Notwithstanding anything herein these conditions or on the PD site plan to the contrary, bicycle and pedestrian access may be permitted anywhere along the PD boundaries.
- 8. The project shall be served by (and restricted to) a single access connection to Bloomingdale Ave.
- 9. In accordance with the Hillsborough County Corridor Preservation Plan, the developer shall preserve 32.5 feet of right-of-way along its Bloomingdale Ave. frontage ("ROW Preservation"). Only those interim uses allowed by the Hillsborough County LDC shall be permitted within the preserved right-of-way. The right-of-way preservation area shall be shown on all future site plans and building setbacks shall be calculated from the future right-of-way line. The 32' ROW Preservation interim uses shall allow for stormwater retention. The Developer shall coordinate with the County for using the ROW Preservation for stormwater retention in the Bloomingdale Avenue preservation area.
- 10. The developer shall construct a vehicular and pedestrian stubout to its western project boundary.
- 11. If PD 21-0744 is approved, the County Engineer will approve a Design Exception (dated October 14, 2021) which was found approvable by the County Engineer (on November 1, 2021) for the Bloomingdale Ave. substandard road improvements. As Bloomingdale Ave. is a substandard collector roadway east of Lithia Pinecrest Rd., the developer will be required to make certain improvements to Bloomingdale Ave. consistent with the Design Exception. Specifically, the developer will be required to construct a +/- 1,300-foot-long minimum 5-foot wide sidewalk between the project's eastern boundary and the existing sidewalk terminus (located approximately 830 feet west of the project's western project boundary). No other improvements will be required along Bloomingdale Ave., except for sidewalks otherwise required along the project's frontage by Section 6.02.08 of the Hillsborough County Land Development Code (and which are included within the 1,300-foot sidewalk described above).

- 12. If PD 21-0744 is approved, the County Engineer will approve a Section 6.04.02.B. Administrative Variance (dated October 14, 2021) from the Section 6.04.07 access spacing requirements, which was found approvable by the County Engineer (on November 1, 2021). Approval of this Administrative Variance will permit the reduction of the minimum access spacing between the project driveway and St. Cloud Ave. (to the east) to +/- 140 feet and spacing between the project driveway and the closest driveway to the west (on the south side of Bloomingdale Ave.) to +/- 160 feet.
- 13. The construction and location of any proposed wetland impacts are not approved by this correspondence, but shall be reviewed by EPC staff under separate application pursuant to the EPC Wetlands rule detailed in Chapter 1-11, Rules of the EPC, (Chapter 1-11) to determine whether such impacts are necessary to accomplish reasonable use of the subject property.
- 14. Prior to the issuance of any building or land alteration permits or other development, the approved wetland / other surface water (OSW) line must be incorporated into the site plan. The wetland/ OSW line must appear on all site plans, labeled as "EPC Wetland Line", and the wetland must be labeled as "Wetland Conservation Area" pursuant to the Hillsborough County Land Development Code (LDC).
- 15. Final design of buildings, stormwater retention areas, and ingress/egresses are subject to change pending formal agency jurisdictional determinations of wetland and other surface water boundaries and approval by the appropriate regulatory agencies.
- This site is located within the Hillsborough County Urban Service Area, therefore the subject property should be served by Hillsborough County Water and Wastewater Service. This does not guarantee water or wastewater service or a point of connection. Developer is responsible for submitting a utility service request at the time of development plan review and will be responsible for any on-site improvements as well as possible off-site improvements.
- 17. If the notes and/or graphic on the site plan are in conflict with specific zoning conditions and/or the Land Development Code (LDC) regulations, the more restrictive regulation shall apply, unless specifically conditioned otherwise. References to development standards of the LDC in the above stated conditions shall be interpreted as the regulations in effect at the time of preliminary site plan/plat approval.
- The Development of the project shall proceed in strict accordance with the terms and conditions contained in the Development Order, the General Site Plan, the land use conditions contained herein, and all applicable rules, regulations, and ordinances of Hillsborough County.

Prior to PD site plan certification, the applicant shall revise the PD site plan to:

- Revise the wetland buffer from 25 ft. to 30 ft. Wetlands or other surface waters are considered Environmentally Sensitive Areas and are subject to 30-foot wide Conservation Area setbacks.
- Label the right of way preservation area as "32.5-foot Right-of-way Preservation Area Per Hillsborough County Corridor Preservation Plan";
 - o Update the site data table removing row pres. Area within 32.5 ft.
- Show the required scenic corridor buffer; and,
- Remove notations regarding "Open Space" within the preservation area."
 - Update site data open space, if included within calculation.

6.0 POSSIBLE PROPOSED CONDITIONS -IF APPROVED

Approval - Approval of the request, subject to the conditions listed below, is based on the general site plan submitted October 11, 2021

- 1. The site shall be developed as depicted on the site plan, and subject to the conditions listed below.
- 2. The project shall be limited to a maximum of 18 single-family homes with a minimum lot size of 6,000 square feet, subject to the following standards.

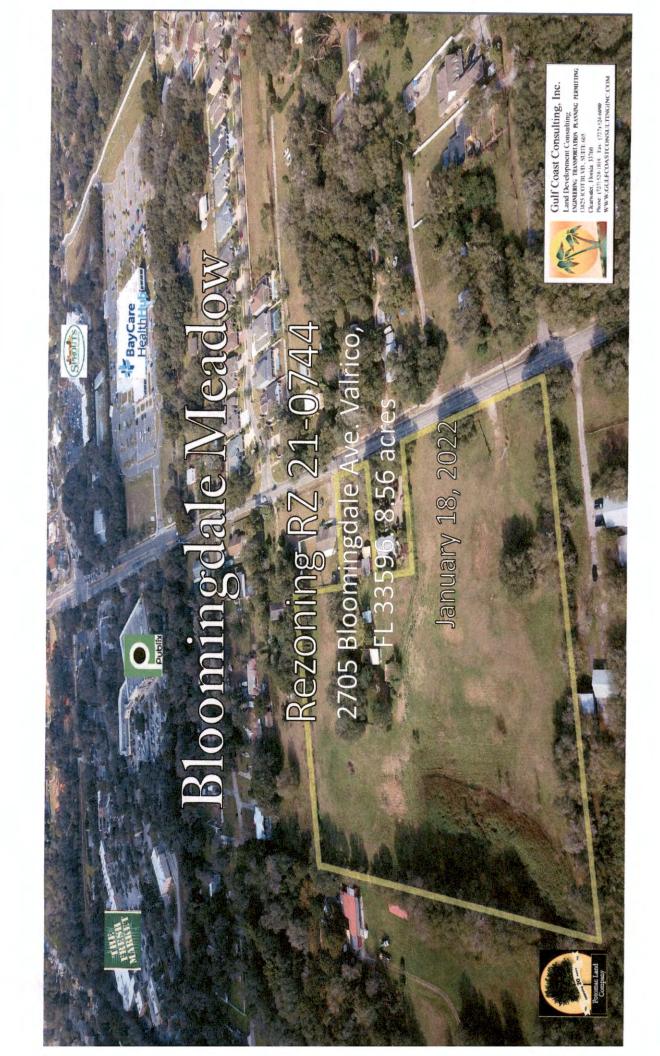

Minimum Front Setback:	20 feet
Minimum Front Setback (Side Facing Garage):	10 feet
Minimum Front Setback (with Porches):	15 feet
Minimum Side Setback:	5 feet
Minimum Side Setback (Corner Lot abutting PD Boundary):	10 feet

Subject: 21-0744 - Party of Record

Good Afternoon Marie Dela,

Thank you for contacting Hillsborough County.

Please verify these application numbers when you see the signs.

You can attend the hearings virtually or in person to present your testimony or submit this in written form at least 2 days before the hearing date by 5 pm. Your written testimony can be sent to Hearings@Hillsboroughcounty.org, or present it at the hearing. If you choose to participate in the hearings virtually, please follow the next link to register, HCFLGov.net/SpeakUp. With respect to acquiring information regarding process participation, I will be your contact for this

Also, for your convenience, please be aware that the staff reports and all application records may be viewed on our website and we have included the directions to access the information below (*PGM Store Instructions*).

PGM Store Instructions:

To review all application records on our website please turn off your Pop-Up Blocker before you log in. Click on the next link hcflgov.net/pgmstore. Click on ENTER PGM STORE. The username and password are public. Double click on Document Repository. To access the information, please enter the tracking number in the box that reads APP/Permit/Tracking #, or by address or folio #, then click Query. A blue bar will pop up with the Application number, Folio ID, Permit type & Current Status. Double click on the bar to access the documents. Scroll down the page and you will find all the documents you are looking for. The Tracking, in this case, would be 21-0744.

Please feel free to call me, if you have any questions.

External email: Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi. I live close to the property above and am very concerned they will be developing such small parcels in this area. Flooding is getting worse, traffic is horrible the way they have planned all the new turning lanes needed is rather dangerous. Some spots you are coming head on with another car while waiting to make a turn.

What can be done if anything? Help, please advise.

Subject: RE: Opposition Letter for Project number 21-0744

Good afternoon:

Thank you for contacting Hillsborough County. 21-0744 is currently scheduled to be heard at the 11/15 Rezoning Hearing Master Meeting at 6:00 p.m. at the Robert W. Saunders, Sr. Public Library, located at 1505 N. Nebraska Ave., Tampa, Florida 33602-2849.

If you wish to attend the hearing either in person or by virtual participation, please register at the following link http://hcflgov.net/SpeakUp. You can attend the hearing virtually or in person to present your testimony or submit this in written form at least 2 days before the hearing date by 5 pm. Your written testimony can be sent to Hearings@Hillsboroughcounty.org, or present it at the hearing. If you choose to participate in the hearing virtually, please follow the next link to register, HCFLGov.net/SpeakUp.

PGM Store Instructions:

For your convenience, please be aware that the staff reports and all application records may be viewed on our website. We have attached the instructions to access the PGM Store. To review all application records on our website please turn off your Pop-Up Blocker before you log in. Click on the next link https://www.hillsboroughcounty.org/pgm to enter the PGM Store. Click on ENTER PGM STORE. The username and password are public. Double click on Document Repository. To access the information, please enter the tracking number in the box that reads APP/Permit/Tracking #, or by address or folio #, then click Query. A blue bar will pop up with the Application number, Folio ID, Permit type & Current Status. Double click on the bar to access the documents. Scroll down the page and you will find all the documents you are looking for. The Tracking, in this case, would be 21-0744.

How to participate in the Rezoning Process:

The ZHM hearing officer makes a recommendation to the BOCC, which can either approve or disapprove the proposed rezoning during the public meeting.

The officer's recommendation is based on the testimony and evidence presented during the officer's public hearing or submitted in written 2 business days before the hearing. Testimony and evidence include presentations and documents provided to the hearing officer by the applicant, members of the public, and the staff. It is important for people to present testimony and evidence at this hearing since no new testimony and evidence can be presented at the BOCC meeting. The rezoning record is closed after the public hearing.

At the public hearing, people who wish to provide testimony in opposition to the rezoning request are limited to a total of 15 minutes for all opposition speakers combined. People who wish to support the rezoning request are subject to the same time limit.

Within 15 working days of the public hearing, the hearing officer will issue his recommendation to the BOCC. If you participated in the public hearing and provided your name, address, and self-addressed envelope to the clerk, you will receive a copy of the recommendation. You can have access to the recommendation on the web following the PGM Store instructions.

External email: Use caution when clicking on links and attachments from outside sources.

Dear Mr. Lampkin, Case Planner for Rezoning project number 21-0744.

This email is **Notice of Opposition to the Proposed Rezoning Project Number 21-0744 at the address of 2705 Bloomingdale Ave, Valrico Fla 33596**

As a property owner in the area, I do hereby request that the pending application mentioned here be denied for some of the following reasons:

<u>The property in question is currently zoned for AS-1 Agricultural Single Family.</u> Another cramped community is just not needed in this area. I'm not opposed to homes being built with the current zoning because anybody who has been to or near our neighborhood knows; "if you build it they will come" and for some time has been one of the most sought after locations by both individuals and families seeking residential property because of the current neighborhood and community character *as it is zoned now at AS-1*.

We have already experience excessive large volume residential growth infringing on our community with the currently active construction at our backdoors at 4600 block of Little Road called Homes by WestBay at Ridgewood Estates. *Isn't it is the goal of the Planning Commission to preserve existing neighborhoods? I moved into this area because I Choose to live this way, not live in a congested community. And the county is slowly taking all that away!*

Last but not least, the area in question in in a flood zone. The county map says minimal flooding but I have lived near this property since 2015 and almost every year this property has completely flooded the surrounding areas and the water floods out onto Bloomingdale Ave.

<u>Please DO NOT rezone this property to allow multiple homes on each acre, Single family construction Still Fits with this area and community.</u>

Respectfully,

Debbie Burnett 3446 Parrish Ridge Lane Valrico Fla 33596

I am opposed to project

RZ 21-0744, the proposed rezoning for the 18 lot subdivision on Bloomingdale Ave. in Valrico.

Our road leading to River Hills is packed with traffic at all hours, plus the road itself is in bad shape.

Give us a break. Somebody say no, PLEASE.

Subject: Bloomingdale and Pearson Zoning Applications

Importance: High

External email: Use caution when clicking on links and attachments from outside sources.

Hi Maricela,

How do I protest / petition against the zoning requests for the following:

RZ-PD 21-0744 SU-GEN 21-0915

We do not need any more housing developments in this area. Bloomingdale is not equipped for the current residents. We do not need developers adding more residential housing with traffic backups on a 2 lane residential busy road. I live at Bloomingdale and Ranch Rd and the speeding on this road is unacceptable as is the amount of cars that already travel this road daily. How do both of these zoning applications plan to address the additional residence this would bring to Bloomingdale Rd and Pearson Rd. The stop sign at Bloomingdale and Pearson backs up past the cemetery and Buckhorn Estates as it is but yet we feel two additional residential neighbors will help?? Where is the petition or protest that I can sign to oppose this development?? Why do we continue to give in to big builders when they themselves do not live in our areas and understand or care about our concerns! They are only buying land to build and make money not to protect our cherished land and larger lots.

Lastly, will the hearing be live and able to be joined via zoom or an online county portal?

Thanks,

Kim Hollingsworth Account Executive, Channel Cell 813-690-9617

Good Morning Tim and Steve,

I am following up on the email response I received from Tim on Thursday, September 30, 2021. In that email Tim referenced the upcoming hearings that will be held at the Robert Saunders Library. Is there a reason these hearings are held so far away from the actual proposed project? It seems the Bloomingdale Library would be a more suitable location as many of my neighbors that are also opposed to these projects may find it difficult to be present at the hearings.

Thank you,

Shannon Willis

To: 'lampkint@hillsboroughcounty.org' <lampkint@hillsboroughcounty.org>

Subject: FW: [EXTERNAL] RE: Project #RZ-21-0744- "Rezoning" - Proposed 18 Lot Subdivision

PROJECT INFORMATION:

Project #2 - RZ-21-0744 - "RZ - Rezoning" - Proposed 18 Lot Subdivision

Currently scheduled to be heard on November 15, 2021 @ 6pm. Land Use Hearing Officer (LUHO). Meeting location is Robert W. Saunders Public Library – 1505 North Nebraska Avenue, Tampa 33602.

3410 Pearson Road Valrico, Fl 33596

Case Planner:

Tim Lampkin- lampkint@hillsboroughcounty.org

Office # 813-564-4673

IMPORTANT NOTE:

Why are these hearings being held off North Nebraska in the 33602 zip code, so that the constituents of the properties in the 33596 area cannot easily attend? There is overwhelming support and demand by all residents to have these relocated to be held somewhere within the zipcode to which it concerns.

Please record and let it be known that due to time, day, and specifically, the hearing location has made it impossible to attend in person, but the aforementioned project has overwhelming opposition which objects to the RZ request on this property as originally requested. It has also come to our attention that the original request has now become larger than originally submitted. We are aware of these changes and oppose all said requests for alterations in the current use of the land for the purposes listed on the request that has been submitted by the representatives for the 18 Lot

Subdivision, and improvements on said properties that do NOT meet community standards which provide single family homes on large lots of 1+ acres per home.

The residents who own property in this area all have private homes on 1 acre lots. The property in question is unimproved and the said project would NOT fit the current zoning compliance. Water is frequently retained following rains on this property and thus with its overgrowth, it supports a great number of wildlife, many of which are endangered and protected, and currently the said property home. Among the many species found in our neighborhood, and specifically, within this and neighboring unimproved property include wildlife such as rabbits, various types of endangered turtles, the reddish egret, pileated woodpeckers, red-bellied woodpeckers, Osprey, Sandhill cranes, the roseate spoonbill, the red shouldered hawk, the swallowtail kite, the white ibis, tudted titmouse, cardinals, bluejays, palms warblers, wrens, black-bellied whistling ducks, various owl species, fox, coyote, butterfly, bats, racoons and snake species just to name a few of the many other wildlife that call this area home and our current properties to land use ratio help to support their existence and protections.

Proposed project is a complete overreach into a well-established neighborhood and will not maintain the current community character. There are historic homes and homesteads with large properties per homes to ensure above wildlife protections, in addition to mini-farm lands property does not maintain the characterowners have cattle, sheep, horses, chickens, roosters, pigs, goats, and others. The adjacent roads, Stearns Rd and Bloomingdale, is utilized by all neighbors for walking, biking and horseback riding. The proposed project has several other concerns than those mentioned above, among them are the neighborhood use of Stearns Rd. for walking, jogging, biking, horseback riding, and the like. The proposed improvements would not fit the community use and could pose significant risk due to additional traffic brought to this area, which cannot be currently supported by the roads and traffic, as well as a concern for additional traffic along Bloomingdale there is also concern for those who own horses and ride along Stearns Rd. As this project would encompass a large number of proposed homes per lot, which would impact both wildlife sanctuary, as well limit absorbing land and further create flooding issues that exist now.

This petition is being submitted on behalf of the community and submitted by current homeowner, William Fisher, to support our community of neighbors and help us ask the Hillsborough County Board of County Commissioners and Hillsborough County Planning and Development to STOP THE OVER DEVELOPMENT in our rural neighborhoods. These commissioners were voted into office on the promise to curb the over development into rural areas and to have more infrastructure in place before we add more homes in an already overcrowded area.

RE: Project #RZ-21-0744- "RZ'Rezoning" - Proposed 18 Lot Subdivision

Our opposition is based on the following concerns:

- 1. Proposed projects are not in compliance with current zoning.
- 2. Significant flooding conditions.
- 3. Disruption of wetland areas, endangered species (hawks, turtles and other wildlife)
- 4. Proposed projects are overreach and will be out of character for this area (large property lots per home, mini farm lands (i.e. horse country), some historic homesteads, etc.

Submitted this day - October 4th, 2021

image001.png image002.png

Good morning Shannon,

Thank you for contacting Hillsborough County. Please note the following dates:

- 21-0744 is currently scheduled to be heard at the 11/15 Rezoning Hearing Master Meeting at 6:00 p.m.
- SU 21-0915 is currently scheduled to be heard at the 10/25 Land Use Hearing Officer (LUHO) Meeting at 10 a.m.

Both meetings are at the Robert W. Saunders, Sr. Public Library, located at 1505 N. Nebraska Ave., Tampa, Florida 33602-2849.

If you wish to attend the hearing either in person or by virtual participation, please register at the following link http://hcflgov.net/SpeakUp. You can attend the hearing virtually or in person to present your testimony or submit this in written form at least 2 days before the hearing date by 5 pm. Your written testimony can be sent to Hearings@Hillsboroughcounty.org, or present it at the hearing. If you choose to participate in the hearing virtually, please follow the next link to register, HCFLGov.net/SpeakUp.

PGM Store Instructions:

For your convenience, please be aware that the staff reports and all application records may be viewed on our website. We have attached the instructions to access the PGM Store. To review all application records on our website please turn off your Pop-Up Blocker before you log in. Click on the next link https://www.hillsboroughcounty.org/pgm to enter the PGM Store. Click on ENTER PGM STORE. The username and password are public. Double click on Document Repository. To access the information, please enter the tracking number in the box that reads APP/Permit/Tracking #, or by address or folio #, then click Query. A blue bar will pop up with the Application number, Folio ID, Permit type & Current Status. Double click on the bar to access the documents. Scroll down the page and you will find all the documents you are looking for. The Tracking, in this case, would be 21-0744 (Rezoning) and 21-0915 (Special Use).

How to participate in the Rezoning Process (21-0744):

The ZHM hearing officer makes a recommendation to the BOCC, which can either approve or disapprove the proposed rezoning during the public meeting.

The officer's recommendation is based on the testimony and evidence presented during the officer's public hearing or submitted in written 2 business days before the hearing. Testimony and evidence include presentations and documents provided to the hearing officer by the applicant, members of the public, and the staff. It is important for people to present testimony and evidence at this hearing

since **no new testimony and evidence can be presented at the BOCC meeting**. The rezoning record is closed after the public hearing.

At the public hearing, people who wish to provide testimony in opposition to the rezoning request are limited to a total of 15 minutes for all opposition speakers combined. People who wish to support the rezoning request are subject to the same time limit.

Within 15 working days of the public hearing, the hearing officer will issue his recommendation to the BOCC. If you participated in the public hearing and provided your name, address, and self-addressed envelope to the clerk, you will receive a copy of the recommendation. You can have access to the recommendation on the web following the PGM Store instructions.

Case Planners

If you have any questions or need further information regarding 21-0744, please contact Tim Lampkin at <u>LampkinT&@hillsboroughcountv.org</u>, who is the planner for 21-0744.

If you have any questions or need further information regarding 21-0915, please contact Steve Beachy at Beachy @hillsboroughcounty.org, who is the planner for 21-0915.

If you have any questions regarding process participation, please let us know.

Dear Mr. Lampkin

As a resident close to the area being considered for rezoning RZ-21-0744 Proposed 18 Lot Subdivision on Bloomingdale Rd. I would like you to know I am adamantly Opposed to this rezoning. The building of that many homes in that area along Bloomingdale is outrageous. The increase of traffic that will be generated will greatly impact the already enormous traffic load and create evenmore overflow onto my road Stearns.

Please I beg that you reconsider this rezoning and stop this egregious development on a road that is already taxed to the max. Just drive down here during the morning and evening rush hours. The road cannot not handle any more developments.

Thanks for your consideration. I am greatly opposed to project RZ-21-0744 Sincerely Audrey Cull 3917 Stearns Rd Valrico, FL 813-486-6518

Hello,

I am writing in regard to the above mentioned application to rezone Pearson Rd.

I'd officially like to vote against this matter. Pearson Rd. Is residential and residents enjoy the rural setting. We do not want housing units, care centers or anything else that will change our way of life and cause more traffic to our streets and possibly neighborhood crime.

Thank you, Lissette Gonzalez

Good afternoon Mr. Lampkin,

I am contacting you concerning the project RZ-21-0744 at 2705 Bloomingdale Ave. in Valrico, FL.

I am opposed to this project as this type of community will lower the property values that we work hard to maintain. I would not be opposed to eight 1 acre lots, but not divided up into 18 lots.

That's too much. So many small lots will lead to so much additional unwanted traffic in our quit neighborhood. We moved into this neighborhood due to the high property values and the large size4s of the properties. Dividing this land up into a bunch of small lots will start to reduce the values of the neighboring properties.

Please help us keep our neighborhood the way it is, beautiful. Thank you much for your time,

Bob Lilland 3414 Pittwood Rd Valrico, FL. 33596

Please DO NOT APPROVE

RZ-21-0744

Rezone

2705 Bloomingdale Avenue

I own 4808 Bloomingdale Avenue.

The very last thing we need is 18 more homes on Bloomingdale.

The very last thing we need is 36+ more cars crowding the already overused Bloomingdale Avenue.

Please DO NOT APPROVE RZ-21-0744

Sincerely,

Anne Obenshain Morgan 4808 Bloomingdale Avenue Valrico, FL 33596

Tim,

It has been brought up to my attention by my neighbors that there is a residential subdivision (RZ-21-0744) trying to be inserted into our rural residential community. I am writing to you to voice my opinion as a resident living 1/2 mile from this property. This project requesting to be plugged into a rural residential community does not belong in our neighborhood. This will not only disturb our community but bring many issues to us residents. This project will bring more traffic to our overburdened streets (especially Bloomingdale ave) and the side streets people take as shortcuts to avoid the main backup along Bloomingdale and Lithia Pinecrest. In addition, the proposed use of this land will cause flooding along this area as the elevation of this 8 acres is lower than most of Bloomingdale Ave in this 1/2 mile stretch. During our often rain storms, this will flood this area and neighbors on Stearns road backing up to this property. Even though the developer will most likely have an onsite retention or detention pond, it will not be sufficient. In addition, this will cause more cars in this area that our one way lane roads cannot handle. This area is specifically for residential zones (approximately 1 acre lots) and agricultural zones and cannot support this type of project. As residents we will stand together to oppose this rezoning.

Thanks,

Miguel Sanchez, AIA

Dear Mr Lampkin,

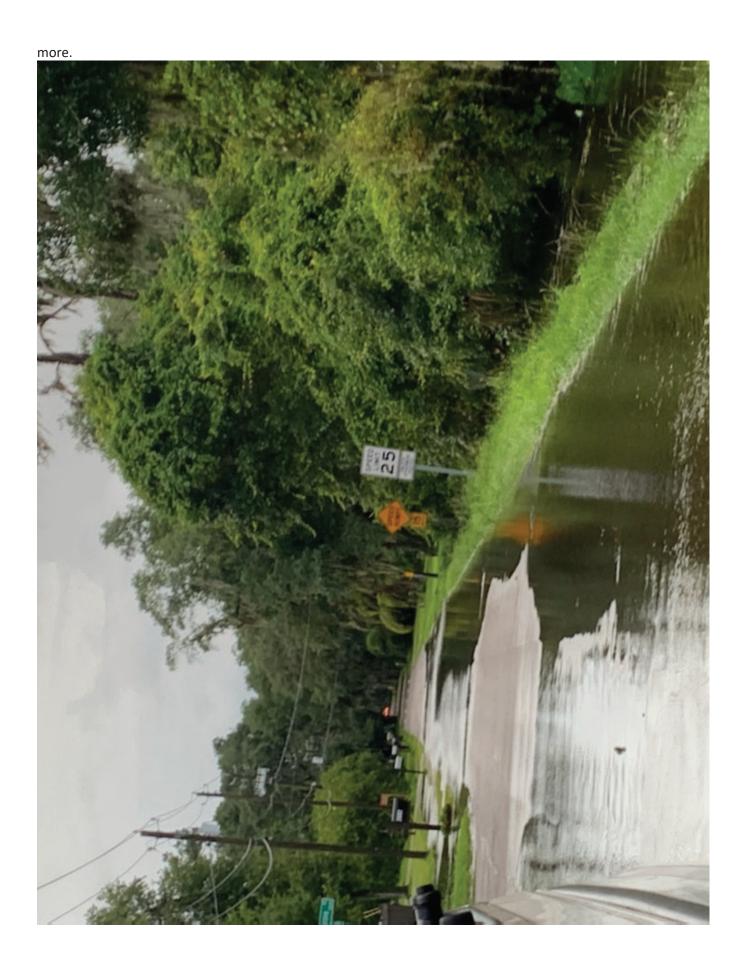

I am writing to express my objection to this project mentioned above at 2705 Bloomingdale Rd.

Our community is one of the last natural areas still remaining and my fear is this project will destroy the natural wildlife and habitats that we have left to enjoy. YES we enjoy our rural community. I have lived on Stearns Rd for 38 years and moved from the Town n County area to be in the country.

Last week on Thanksgiving I was preparing our family feast when looking out MY kitchen window I saw a lynx (after researching pictures of lynx/bobcat) walking down my driveway during midday. Over the years I have seen fox, coyotes, deer (see attached

picture), turtles, alligators, and an abundance of birds, ducks and hawks in the county pond behind my home which was built after my husband and I sold our forever home to the county to help with flooding. Pictures and I have

We have endured flooding over the last 30 years that have caused disruptions to several family lives on Stearns Rd to Bloomingdale Rd from the so called progress from Lithia Pinecrest.

I did attend the initial meeting on this project and am aware that the project managers have said they are prepared with multiple retention ponds to handle their water issues that will arise in the future but I have my doubts as I have lived thru several water occurrences over the years. The pump the county has installed behind my house is our only saving grace when these water issues happen. We NEED to have a permanent generator installed at the site of this pump so when the electric goes out due to a storm we are not at the mercy of whenever the county can bring out the portable generator that has been used in the past.

These additional homes will also add to the traffic woes we endure currently.

Thank you for your time and consideration to our objections to this project.

Linda Skidmore

PROJECT INFORMATION:

Project #2 - RZ-21-0744 - "RZ - Rezoning" - Proposed 18 Lot Subdivision

Currently scheduled to be heard on November 15, 2021 @ 6pm. Land Use Hearing Officer (LUHO). Meeting location is Robert W. Saunders Public Library – 1505 North Nebraska Avenue, Tampa 33602.

3410 Pearson Road Valrico, FI 33596

O--- Di----

Case Planner:

Tim Lampkin- lampkint@hillsboroughcounty.org

Office # 813-564-4673

IMPORTANT NOTE:

Why are these hearings being held off North Nebraska in the 33602 zip code, so that the constituents of the properties in the 33596 area cannot easily attend? There is overwhelming support and demand by all residents to have these relocated to be held somewhere within the zipcode to which it concerns.

Please record and let it be known that due to time, day, and specifically, the hearing location has made it impossible to attend in person, but the aforementioned project has overwhelming opposition which objects to the RZ request on this property as originally requested. It has also come to our attention that the original request has now become larger than originally submitted. We are aware of these changes and oppose all said requests for alterations in the current use of the land for the purposes listed on the request that has been submitted by the representatives for the 18 Lot

Subdivision, and improvements on said properties that do NOT meet community standards which provide single family homes on large lots of 1+ acres per home.

The residents who own property in this area all have private homes on 1 acre lots. The property in question is unimproved and the said project would NOT fit the current zoning compliance. Water is frequently retained following rains on this property and thus with its overgrowth, it supports a great number of wildlife, many of which are endangered and protected, and currently the said property home. Among the many species found in our neighborhood, and specifically, within this and neighboring unimproved property include wildlife such as rabbits, various types of endangered turtles, the reddish egret, pileated woodpeckers, red-bellied woodpeckers, Osprey, Sandhill cranes, the roseate spoonbill, the red shouldered hawk, the swallowtail kite, the white ibis, tudted titmouse, cardinals, bluejays, palms warblers, wrens, black-bellied whistling ducks, various owl species, fox, coyote, butterfly, bats, racoons and snake species just to name a few of the many other wildlife that call this area home and our current properties to land use ratio help to support their existence and protections.

Proposed project is a complete overreach into a well-established neighborhood and will not maintain the current community character. There are historic homes and homesteads with large properties per homes to ensure above wildlife protections, in addition to mini-farm lands property does not maintain the characterowners have cattle, sheep, horses, chickens, roosters, pigs, goats, and others. The adjacent roads, Stearns Rd and Bloomingdale, is utilized by all neighbors for walking, biking and horseback riding. The proposed project has several other concerns than those mentioned above, among them are the neighborhood use of Stearns Rd. for walking, jogging, biking, horseback riding, and the like. The proposed improvements would not fit the community use and could pose significant risk due to additional traffic brought to this area, which cannot be currently supported by the roads and traffic, as well as a concern for additional traffic along Bloomingdale there is also concern for those who own horses and ride along Stearns Rd. As this project would encompass a large number of proposed homes per lot, which would impact both wildlife sanctuary, as well limit absorbing land and further create flooding issues that exist now.

This petition is being submitted on behalf of the community and submitted by current homeowner, William Fisher, to support our community of neighbors and help us ask the Hillsborough County Board of County Commissioners and Hillsborough County Planning and Development to STOP THE OVER DEVELOPMENT in our rural neighborhoods. These commissioners were voted into office on the promise to curb the over development into rural areas and to have more infrastructure in place before we add more homes in an already overcrowded area.

RE: Project #RZ-21-0744- "RZ'Rezoning" - Proposed 18 Lot Subdivision

Our opposition is based on the following concerns:

- 1. Proposed projects are not in compliance with current zoning.
- 2. Significant flooding conditions.
- 3. Disruption of wetland areas, endangered species (hawks, turtles and other wildlife)
- 4. Proposed projects are overreach and will be out of character for this area (large property lots per home, mini farm lands (i.e. horse country), some historic homesteads, etc.

Submitted this day - October 4th, 2021

William Fisher 3455 Parrish Ridge Lane, Valrico, FL 33596
