**Rezoning Application:** PD 22-0075 (Remand)

**Zoning Hearing Master Date:** January 17, 2023

**BOCC Land Use Meeting Date:** March 7, 2023

**Development Services Department** 

#### 1.0 APPLICATION SUMMARY

Applicant: Mattamy Tampa/Sarasota, LLC

FLU Category: RES-4

Service Area: Urban

Site Acreage: 18 +/-

Community Plan Area: Riverview

Overlay: None

#### **Introduction Summary:**

The applicant seeks to rezone a parcel zoned Agricultural Rural (AR) to Planned Development (PD) to allow for the development of a mixed-use project. The project is located on the north side of Boyette Road, ½ mile west of Bell Shoals Rd. in Riverview. A TECO easement runs east-west bisecting the parcel into two areas. The project will consist of 86 multifamily units (attached single-family) north of the TECO easement and up to 20,000 square feet of commercial, office, residential support uses and/or a Community Residential Home Type C south of the TECO easement, along Boyette Road. The developer intends to utilize the Mixed Use Incentive program set forth in the Comprehensive Plan to achieve a density up to 6 du/acre on the site. The site will have one access points on Boyette Rd.

Zoning:	Existing	Proposed
District(s)	AR	Planned Development
Typical General Use(s)	Single-Family Residential (Conventional/Mobile Home)	Multi-family Residential and Non-Residential
Acreage	18	18
Density/Intensity	1 unit per 5 acre (upland)	6 units per acre/0.20 FAR
Mathematical Maximum*	3 units	86 Res. Units / 20,000 sq ft

<sup>\*</sup>number represents a pre-development approximation

Existing	Proposed			
AR	PD			
5 Ac / 150'	1,620 sq ft / 18'			
50' Front 50' Rear 15' Sides	<u>Residential</u> 20' Front 10' Rear (35' east) 10' Sides (35' east)	<u>Non-Residential</u> 20' Front 20' Rear 20' Sides		
50′	35'	35′		
	5 Ac / 150' 50' Front 50' Rear 15' Sides	5 Ac / 150'  50' Front 50' Rear 15' Sides  1,620 so  Residential 20' Front 10' Rear (35' east) 10' Sides (35' east)		

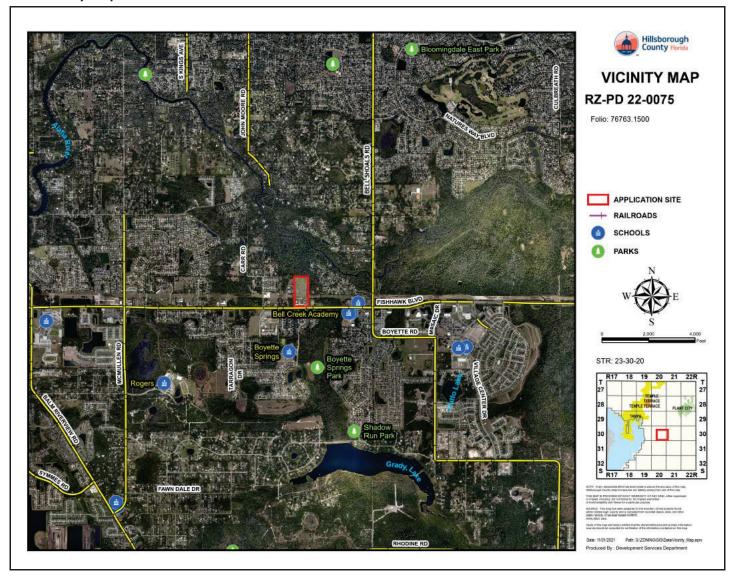

Additional Information:		
PD Variation(s)	None requested as part of this application	
Waiver(s) to the Land Development Code	To Section 6.01.01.01 Footnote 8.	
Waiver(s) to the Land Development Code	Reduce the required building setback for building height over 20 feet (west).	

Planning Commission Recommendation:	Development Services Recommendation:		
Consistent	Approvable, subject to proposed conditions

#### 2.0 LAND USE MAP SET AND SUMMARY DATA

#### 2.1 Vicinity Map

Case Reviewer: Israel Monsanto

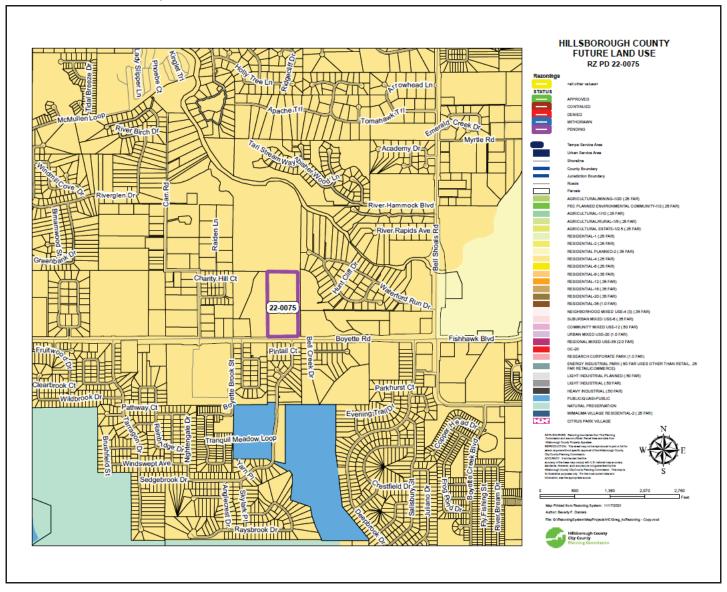

#### Context of Surrounding Area:

The project is located north of Boyette Road, between McMullen Rd. and Bells Shoals Rd. Area mostly consists of residential land. Some office uses are located to the west and east. Commercial uses are found further east, at the intersection of Boyette Rd and Bell Shoals Rd. Private schools and churches are also found in the area.

ZHM HEARING DATE: January 17, 2023 BOCC LUM MEETING DATE: March 7, 2023

#### 2.0 LAND USE MAP SET AND SUMMARY DATA

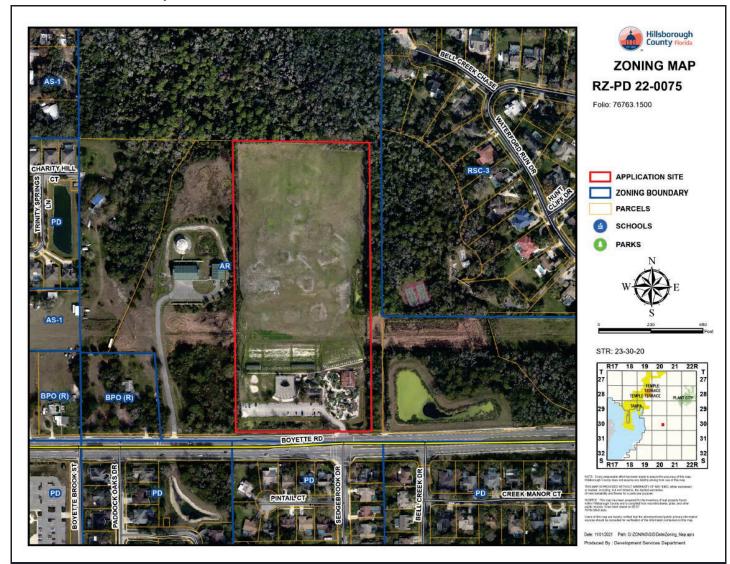

#### 2.2 Future Land Use Map

Subject Site Future Land Use Category:	Residential - 4
Maximum Density/F.A.R.:	Up to a maximum of 4.0 dwelling units per gross acre. Alternative methods for calculating density of certain uses are specified in the land development regulations. Density bonuses and credits may be considered in this category and are described in the Plan. suburban scale neighborhood commercial, office, multi-purpose or mixed use projects limited to 175,000 sq. ft. or .25 FAR, whichever is less intense. Actual square footage limit is dependent on classification of roadway intersection where project is located.
Typical Uses:	Residential, suburban scale neighborhood commercial, office uses, and multi-purpose projects.  Nonresidential uses shall meet locational criteria for specific land use. Agricultural uses may be permitted pursuant to policies in the agricultural objective areas of the Future Land Use Element.

BOCC LUM MEETING DATE: March 7, 2023

Case Reviewer: Israel Monsanto

#### 5.0 IMPLEMENTATION RECOMMENDATIONS

#### Remand

This case was presented at the July 25, 2022 Zoning Hearing Master hearing. In order to build more than 57 residential units and exceed the density of 4 DU/ac in Parcel 1, the applicant proposed a mixed use project. In conversations with Planning Commission staff, the applicant had proposed and committed to a timing mechanism that would guarantee the development of all proposed uses (residential in Parcel 1 and non-residential in Parcel 2) and comply with the mixed use Objectives and Policies from the Comprehensive Plan Objective 19 and Policy 19.2 for the integration of mixed-use developments. A condition was proposed stating that prior to the issuance of any Certificate of Occupancy for 58 or more residential units, two of the nonresidential uses listed in the Group lists need be constructed with a Certificate of Occupancy issued. At the July hearing, the applicant submitted a modification to this condition to require that prior to the issuance of any building permits for 58 dwelling units or more, the road and utility infrastructure (North South Entry Road with sidewalks and pedestrian connections and utility stub outs necessary to service Parcel 2) to be constructed and Certificate of Completion issued. This modification of the condition would not require two of the non-residential uses listed in the Group lists to be constructed with a Certificate of Occupancy issued prior to the issuance of any Certificate of Occupancy for 58 or more residential units. Staff from the Planning Commission and Development Services could not amend the reports and the case remained scheduled for the BOCC Land Use Meeting. At the BOCC Land Use Hearing on October 11, 2022, the case was remanded to the Zoning Hearing Master hearing in order to allow the evaluation by staff of the proposed modification to the condition with the timing mechanism for the development of the two project Parcels.

#### 5.1 Compatibility

The property's existing use is a recreational golf course. The site is surrounded to the south, southeast, and southwest by single-family detached home sub. Further southwest is Saint Stephens Catholic Church and School. The parcel adjacent to the west contains the Hillsborough County South Central Water Pump Station. Further to the west is single-family detached housing. The adjacent parcel to the north and east is owned by the Tampa Bay Conservancy Inc. (Myron and Helen Gibbons Nature Preserve). Further to the northeast is the western boundary of a large single-family detached home subdivision with frontage directly on Bell Shoals Road. To the east, along Boyette Rd., is land owned by Hillsborough County containing a large water retention pond.

The subject property is currently developed as a golf driving range. According to the project's narrative, this property is one of the last developable sites in the area, and with its direct access onto Boyette Road, a lighted intersection, and close proximately to Bell Shoals Road, it is a prime location for a mixed-use project. Boyette Road is a 4-lane collector road and existing land uses along this corridor range from commercial uses, private educational facilities, retail uses, residential uses, and preserved areas.

The request is to rezone the subject site from Agricultural Rural (AR) to Planned Development (PD) to allow up to 86 Townhomes (single-family attached) with a density bonus within Parcel 1 (north an existing TECO easement) and up to 20,000 sq. ft. of limited Commercial Neighborhood (CN) from three distinct use categories in Parcel 2 (south of the TECO easement, along Boyette Rd.). In order achieve 86 residential units (at 6 du/ac), the applicant is utilizing Policy 19.3 which provides incentives to encourage mixed-use development by providing at least 3 uses on site which in turn will permit density/FAR up to the next land use category, where 2 uses shall be non-residential uses. The non-residential uses have been classified into 3 Groups. The applicant met with staff and is proposing a list and size of development that could be considered, where at least 2 uses shall be developed in Parcel 2, one use from either Group, where no two uses are chosen from the same group. The applicant is also committed to limiting the height to one-story and architecturally finished on all four sides with a residential like appearance for the non-residential portion of the site.

The three use Groups are proposed as follows:

**Group A – Retail – No drive-thru** 4,500 SF site down restaurant 2,500 SF coffee shop 5,000 SF Bank

ZHM HEARING DATE: January 17, 2023

BOCC LUM MEETING DATE: March 7, 2023 Case Reviewer: Israel Monsanto

4,000 SF Fitness Center

5,000 SF Brewery/Beer Garden

5,000 SF Retail limited to:

Apparel and Shoe Store

Appliance Stores, Small

**Art Supply Store** 

Bicycle Sales/repair

Book/Stationary Store, New and Used

Camera/Photography Store

Florist Shop

Furniture/home furnishings

General Business, Such as Retail Goods and Stores

Jewelry Store (Watch, clock, Jewelry Repair)

**New Stand** 

Novelty and Souvenir Shop

Optician/Optical Supplies

Locksmith

Mail and Package Services

Mail Order Office

Mail Order Pickup Facilities

Pet shop (no outdoor rec area)

**Sporting Goods Store** 

5,000 – 10,000 SF Specialty Food Store to include:

Bakery, Candies, & Nuts, Dairy, Delicatessens, Meat Seafood and Produce

#### Group B - Office - No drive-thru

10,000 SF limited to:

Urgent Care (no 24 hour operation)

Outpatient Surgical Center (no 24 hour operation)

**Employment Services** 

Government Office

Health Practitioner's Office

Medical Offices or Clinics with scheduled or Emergency Services by Physicians (No 24 hr use)

**Professional Office** 

**Professional Services** 

#### Group C - Residence Support - No drive-thru

10,000 SF limited to:

Day Care (child / pet)

Community Residential Home/Memory Care (maximum 125 beds)

No drive thru facilities will be permitted to prevent intense uses from developing on site.

A waiver to the additional 2-foot setback for every foot above 20-feet in height, per LDC Section 6.01.01. endnote 8 is being requested only on the west side of the site. The 2:1 requirement is to address potential compatibility issues however, the adjacent use is TBW water facility. There is a 5-foot buffer proposed along the western PD boundary. The eastern boundary will maintain the "2:1" requirement although the closest single- family development is located 500 feet to the east with heavy vegetation functioning as a buffer between both uses. The LDC requires a 5-foot buffer with a Type A screening between the proposed residential use and the adjacent AR zoning along the east/north. With the required 5-foot buffer and building height of 35-feet, an additional 30-foot setback is required (35'- 20'= 15' X 2 = 30' + 5' buffer). The total required setback is 35 feet. Furthermore, the applicant is committed to include a 6-foot fence with a10-foot buffer / type B screening.

ZHM HEARING DATE: January 17, 2023

BOCC LUM MEETING DATE: March 7, 2023 Case Reviewer: Israel Monsanto

Commercial development standards will be of the Commercial Neighborhood (CN) standards, single story structures.

As part of this remand, the condition pertaining to the timing mechanism for the development of the Parcel 1 (residential) will require that prior to the issuance of any building permits for 58 dwelling units or more, the road and utility infrastructure (North South Entry Road with sidewalks and pedestrian connections and utility stub outs necessary to service Parcel 2) will need to be constructed and Certificate of Completion issued.

The new condition will still require that Parcel 2 be developed with two non-residential uses from two different use Groups. Each use will have a minimum of 2,500 square feet of building space.

Additionally, the applicant commits that in order to demonstrate that Parcel 2 will have adequate land area to accommodate two non-residential uses and related parking, open space, etc., if Parcel 2 is developed in more than one phase, a Preliminary Site Development Plan (PSDP) will be required to be submitted for site development review and approval. The PSDP will need to include the use proposed as Phase 1 along with the most intense use from a different Group list as Phase 2. For instance, if a developer proposes a use from Group A as Phase 1, the PSDP shall include a the most intense use remaining in Group B or C (10K sq ft Medical / Health Practitioner's Office). If a developer proposes a use from Group B as Phase 1, the PSDP shall include the most intense use remaining in Group A or C (4,500 sq ft Sit Down Restaurant).

Planning Commission and Development Services staff have reviewed the change in the conditions and has found them acceptable. The condition will still ensure that the project be developed with three different uses and be reviewed in accordance with site development regulations established by the Land Development Code.

The applicant also proposes to provide landscaping and native species vegetation along the floodplain compensation slope areas, subject to review and approval by the County Stormwater review section.

Staff has received letters of concerns and opposition from area residents, the Tampa Bay Conservancy and Sierra Club. The letters expressed concerns with traffic generated by the proposed development, school capacity, noise, impacts to the nature preserve, increase in density, introduction of commercial uses in the area, impacts to water supply and reduction of setbacks/buffer from the natural preserve along the east. The applicant has amended the application and reduced the intensity of the non-residential uses, restricted square footage of the day care, eliminated school uses, and will maintain the required buffer/setback along the east in accordance with the Land Development Code. The project will maintain a minimum of 35 feet of building setback along the east, meeting the requirement of the Code. In addition, a 20-foot buffer, with Type B screening will be in place for the residential portion. Per LDC Sec. 6.06.06, the proposed project would require at least 5 feet of buffer between residential uses (Parcel 1) and AR zoning with Type A screening. The Type A screening requires plantings or a solid fence. The applicant proposes 20 feet of buffer with Type B screening. Existing vegetation will be allowed to remain in lieu of required landscaping and trees, subject to approval by Natural Resources. The additional landscaping (Type B) consists of a row of evergreen shade trees which are not less than ten feet high at the time of planting, a minimum of two-inch caliper, and are spaced not more than 20 feet apart. The trees are to be planted within ten feet of the property line. The solid fence will also be placed at least 10 feet from the parcel line, away from existing vegetated areas. Between Parcel 2 (non-residential uses) and the nature preserve site along the east, the applicant proposes a 30-foot buffer with Type B screening. The Code requires at least 20 feet of buffer and Type B screening. Per the submitted site plan, retention ponds will be placed along the east, adjacent to the nature preserve, and vegetation will be preserved subject to Natural Resources review and approval. As part of the site development review process, the developer is required to provide wildlife and environmental studies in accordance with the Land Development Code. The project will be conditioned requiring that water distribution system improvements will need to be completed prior to connection to the County's water system by this future development. No building permits that would create demand for water service will be issued until the completion of two County funded Capital Improvement Program projects in South County are put into operation. Stormwater design and construction will be subject to review and approval by the site development review section as established in the Land Development Code to ensure the project will capture all stormwater onsite. The proposed PD plan shows areas for future retention ponds. Comments from the School Board state that a school concurrency review will be issued PRIOR TO preliminary plat or site plan approval. The School Board also indicated that at this time, additional capacity at the middle and high school levels exists in adjacent service areas to accommodate the proposed project, and capacity exists in the Elementary School level for this area.

ZHM HEARING DATE: January 17, 2023

BOCC LUM MEETING DATE: March 7, 2023

Case Reviewer: Israel Monsanto

Although cross access to adjacent parcels is encouraged, the existing adjacent uses restricts this. The Tampa Bay Water supply facility is located to the west with its own access fenced with a 6-foot chain link fence with electrical wires to prevent trespassing. The Gibbon Nature Preserve is located to the north and east of the subject site and future development of this site is unlikely.

The is located between a water supply facility to the west and a storm water pond and recreation land/preserve to the east and to the north. Residential subdivisions surround this area to the north, northeast and south. Other residential projects are located further to the west. The site is also bisected by the 150-foot wide TECO easement creating two distinct areas for commercial use along Boyette Road and the residential component internal to the site, adjacent to the preserve. The TECO easement functions as buffer between both uses, however the site will be interconnected by vehicular and pedestrian access.

There are wetlands present on the site. The Environmental Protection Commission, EPC, reviewed the proposed Site Plan and does not object. No impacts to wetlands or setbacks are shown on the proposed Plan. The Conservation and Environmental Lands Management reviewed this rezoning petition and has no comments. Transportation staff does not object to this request and proposes conditions for site access and road improvements along Boyette Rd.

The area is a mix of mostly residential single family-detached, and low scale commercial, and office uses. Residential support uses (schools and churches) are also commonly found in the area. The proposed project scale and design would ensure that is compatible with the surrounding development pattern and land uses. Intensive uses are being eliminated from the proposed development. The project will maintain the required setbacks along the east, where the adjacent nature preserve is located, as required per the LDC. The applicant, however, will provide additional buffer and screening more than what the Code requires. The non-residential component will be limited to 1-story buildings with a residential design. Compared to the initial proposal by the applicant, the project has been scaled down, more restrictions have been proposed, and compliance with provision from the Code has been maintained. Staff from the Planning Commission has evaluated the request and has found it Consistent. Objective 19 and Policy 19.2 indicates that a mixed-use development must be integrated. Policy 16.2 requires the gradual transition between uses. The applicant's site plan shows the commercial buildings are in the southern portion of the property facing south towards Boyette Road. The proposed site plan shows an integrated design to the residential located on the northern portion of the property and a gradual transition from the natural preservation area to the north and east, consistent with policy direction. To ensure the project will be developed in accordance with the objectives and policies above, a timing mechanism for the development of the mix of uses is being proposed requiring the construction of the access road and infrastructure serving the project and the non-residential uses in Parcel 2 to be completed before more than 57 residential units can be issued building permits. Planning Commission staff also sees no compatibility issues as the adjacent use is public institutional. Lastly, a waiver to the Commercial Locational Criteria (CLC) has been requested, and Planning Commission staff recommends approval of the waiver.

#### 5.2 Recommendation

Based on the above considerations, staff recommends approval with conditions.

ZHM HEARING DATE: January 17, 2023

BOCC LUM MEETING DATE: March 7, 2023 Case Reviewer: Israel Monsanto

#### **6.0 PROPOSED CONDITIONS**

Prior to PD Site Plan Certification, the applicant shall revise the PD General Site Plan:

 Prior to site plan certification, the applicant shall revise site plan to add a label along the project frontage on Boyette Road that states "+/-8 FEET OF ROW PRESERVATION TO BE PROVIDED ALONG BOYETTE ROAD PER HILLSBOROUGH COUNTY CORRIDOR PRESERVATION PLAN" in the Site Data Table, next to Proposed Land Use for Parcel 1: Subject to Condition 1.4

**Approval** - Approval of the request, subject to the conditions listed below, is based on the general site plan submitted December 22, 2022.

1. The project shall be limited to a Mixed-Use project with up to 86 multifamily (attached single-family) units in Parcel 1, subject to condition 1.4 and up to 20,000 sq. ft. of non-residential uses in Parcel 2. Interim agricultural or current mini-golf (golf driving range) recreational uses shall be permitted until the site is developed in accordance with the conditions contained herein.

Development of Parcel 2 shall be limited to the following:

1.1 Group A – Retail/commercial – No drive-thru

4,500 SF site down restaurant

2,500 SF coffee shop

5,000 SF Bank

4,000 SF Fitness Center

5,000 SF Brewery/Beer Garden

5,000 SF Retail limited to:

Apparel and Shoe Store

Appliance Stores, Small

Art Supply Store

Bicycle Sales/repair

Book/Stationary Store, New and Used

Camera/Photography Store

Florist Shop

Furniture/home furnishings

General Business, Such as Retail Goods and Stores

Jewelry Store (Watch, clock, Jewelry Repair)

**New Stand** 

Novelty and Souvenir Shop

Optician/Optical Supplies

Locksmith

Mail and Package Services

Mail Order Office

Mail Order Pickup Facilities

Pet shop (no outdoor rec area)

Sporting Goods Store

5,000 – 10,000 SF Specialty Food Store to include:

Bakery, Candies, & Nuts, Dairy, Delicatessens, Meat Seafood and Produce

1.2 Group B – Office - No drive-thru 10,000 SF limited to:

APPLICATION NUMBER: PD 22-0075 Remand

ZHM HEARING DATE: January 17, 2023

BOCC LUM MEETING DATE: March 7, 2023 Case Reviewer: Israel Monsanto

Urgent Care (no 24-hour operation)

Outpatient Surgical Center (no 24-hour operation)

Employment Services
Government Office

Health Practitioner's Office

Medical Offices or Clinics with scheduled or Emergency Services by Physicians (No 24 hr use)

Professional Office Professional Services

1.3 Group C – Residence Support - No drive-thru

10,000 SF limited to:

Day Care (child / pet)

Or a Community Residential Home/Memory Care (standards and maximum number of beds in accordance with LDC 6.11.28)

- 1.4 Prior to the issuance of any Certificate of Occupancy for 58 or more residential units, two of the non-residential uses listed in the Group lists above shall be constructed with a Certificate of Occupancy issued.—If Parcel 1 (Residential Tract) is developed as the first phase of development in the PD, to ensure the project will provide a mix of uses, the construction plans for Parcel 1 shall include the North South Entry Road with sidewalks and pedestrian connections and utility stub outs necessary to service Parcel 2 (the 3.82 Acre Non-Residential Tract). This infrastructure will serve both Parcel 1 and Parcel 2. Prior to the issuance of any building permits in excess of the 57th dwelling unit, the road and utility infrastructure described above shall be constructed and Certificate of Completion issued. Additionally:
  - a. The developer shall pick/develop the required two uses from different Groups.
  - b. If Parcel 2 (non-residential) is developed in more than one phase, a Preliminary Site

    Development Plan (PSDP) shall be required to be submitted for site development review and approval. The PSDP shall include the use proposed in Phase 1 along with the most intense use from the other Group lists as Phase 2 demonstrating adequate land area for maximum building footprint, minimum required parking spaces, open space, etc. for the second non-residential use. For instance, if a developer proposes a use from Group A as Phase 1, the PSDP shall include a the most intense use from Group B. Or, if a developer proposes a use from Group A.
  - c. No single non-residential use shall be less than 2,500 sq. ft. in building space.
- 1.5 Buildings containing Non-residential uses shall be of a residential character in their design. At a minimum, the buildings shall be subject to the below:
  - a. Architecturally finished on all sides. Cladded in brick, stucco, or wood siding. Paint shall not constitute an architectural finish.
  - b. Pitched roofs, if provided, shall be a minimum of 4 to 12 in pitch.
  - c. Flat roofs shall provide a cornice at least 12 inches high and projected at least 2 inches.
  - d. Windows facing roads (external/internal) shall include a trim consistent with the architectural style of the building.
  - e. At least 50 percent of the facades area facing the Boyette Rd. shall consist of windows, awnings, entrances, columns, porches, stoops, pilasters, or similar features.
- 2. Development standards shall be as indicated in the General Site Development Plan and as follows:

ZHM HEARING DATE: January 17, 2023

BOCC LUM MEETING DATE: March 7, 2023

Case Reviewer: Israel Monsanto

2.1 Single Family attached units in Parcel 1:

Maximum building height 35 feet/2 stories

Minimum front yard setback 20 feet

Minimum side yard setback 20 feet (between buildings)

Minimum rear yard setback 10 feet to PD lines

Along the east PD line, a minimum of 35 feet of building

setback shall be maintained.

Maximum impervious area 75%

2.4 Non-Residential Uses in Parcel 2:

In accordance with the CN zoning district development standards (see condition 11 for right-of-way preservation). Buildings shall be limited to one story.

- 3. Open space and Community Gathering Areas shall be provided for the residential project and subject to LDC Sec 6.02.18.
- 4. Buffer and screening between adjacent parcels shall be as depicted in the General Site Plan. Existing vegetation in lieu of the required plantings shall be permitted, subject to Natural Resources approval. A 10-foot buffer and Type B screening with a 6-foot high solid fence (non-white Trex style) shall be maintained along the east PD line in Parcel 1, as shown on the General Site Plan. The fence shall be installed at least 10 feet from the PD line.
- 5. The additional 2 feet of building setback required for every foot of building height over 20 feet in accordance with LDC 6.01.01 footnote 8 shall not apply to west PD line, in Parcel 1.
- 6. The site is subject to the requirements of LDC Sec. 6.06.03.1.2.b. Scenic Corridor Easement.
- 7. The developer shall be permitted one (1) full connection to Boyette Road.
- 8. The unutilized driveway aprons shall be removed; and curbing and grass strip restored to meet typical standards.
- 9. Notwithstanding anything herein these conditions or on the PD site plan to the contrary, bicycle and pedestrian access may be permitted anywhere along the PD boundary.
- 10. The developer shall extend the existing eastbound left turn lane into the project on Boyette Rd with the initial increment of development.
- 11. As Boyette Road is included in the Hillsborough County Corridor Preservation Plan as a future 6-lane improvement, the developer shall designate 8 feet of right of way preservation along the project frontage on Boyette Road. Building setbacks shall be calculated from the future right-of-way line.
- 12. The floodplain compensation area's 4:1 slope shall be planted with native species on 3-foot centers for herbaceous ground cover, 5-foot centers for shrubs, and 10-foot centers for trees where feasible and subject to review and approval by the County's Stormwater Review staff.
- 123. Approval of this zoning petition by Hillsborough County does not constitute a guarantee that the Environmental Protection Commission of Hillsborough County (EPC) approvals/permits necessary for the development as

proposed will be issued, does not itself serve to justify any impact to wetlands, and does not grant any implied or vested right to environmental approvals.

Case Reviewer: Israel Monsanto

- 134. The construction and location of any proposed wetland impacts are not approved by this correspondence, but shall be reviewed by EPC staff under separate application pursuant to the EPC Wetlands rule detailed in Chapter 1-11, Rules of the EPC, (Chapter 1-11) to determine whether such impacts are necessary to accomplish reasonable use of the subject property.
- 14<u>5</u>. Prior to the issuance of any building or land alteration permits or other development, the approved wetland / other surface water (OSW) line must be incorporated into the site plan. The wetland/OSW line must appear on all site plans, labeled as "EPC Wetland Line", and the wetland must be labeled as "Wetland Conservation Area" pursuant to the Hillsborough County Land Development Code (LDC).
- 156. Final design of buildings, stormwater retention areas, and ingress/egresses are subject to change pending formal agency jurisdictional determinations of wetland and other surface water boundaries and approval by the appropriate regulatory agencies.
- 167. Water distribution system improvements will need to be completed prior to connection to the County's water system. No building permits that would create demand for water service shall be issued until the completion by the County of funded Capital Improvement Program projects C32001 South County Potable Water Repump Station Expansion and C32011 Potable Water In-Line Booster Pump Station, and the projects are put into operation.
- 178. If the notes and/or graphic on the site plan are in conflict with specific zoning conditions and/or the Land Development Code (LDC) regulations, the more restrictive regulation shall apply, unless specifically conditioned otherwise. References to development standards of the LDC in the above stated conditions shall be interpreted as the regulations in effect at the time of preliminary site plan/plat approval.
- 19. The Development of the project shall proceed in strict accordance with the terms and conditions contained in the Development Order, the General Site Plan, the land use conditions contained herein, and all applicable rules, regulations, and ordinances of Hillsborough County.

## SITE, SUBDIVISION AND BUILDING CONSTRUCTION IN ACCORDANCE WITH HILLSBOROUGH COUNTY SITE DEVELOPMENT PLAN & BUILDING REVIEW AND APPROVAL.

Approval of this re-zoning petition by Hillsborough County does not constitute a guarantee that the project will receive approvals/permits necessary for site development as proposed will be issued, nor does it imply that other required permits needed for site development or building construction are being waived or otherwise approved. The project will be required to comply with the Site Development Plan Review approval process in addition to obtain all necessary building permits for on-site structures.

#### AGENCY REVIEW COMMENT SHEET

REVIEW	ng Technician, Development Services Department /ER: Alex Steady, Senior Planner NG AREA: RV/South	DATE: 03/30/2022 AGENCY/DEPT: Transportation PETITION NO: PD 22-0075
	This agency has no comments.	
	This agency has no objection.	
X	This agency has no objection, subject to the listed or attach	ned conditions.
	This agency objects for the reasons set forth below.	

#### **CONDITIONS OF APPROVAL**

- The developer shall be permitted one (1) full connection to Boyette Road.
- The unutilized driveway aprons shall be removed; and curbing and grass strip restored to meet typical standards.
- Notwithstanding anything herein these conditions or on the PD site plan to the contrary, bicycle and pedestrian access may be permitted anywhere along the PD boundary.
- The developer shall extend the existing eastbound left turn lane into the project on Boyette Rd with the initial increment of development.
- As Boyette Road is included in the Hillsborough County Corridor Preservation Plan as a future 6-lane improvement, the developer shall designate 8 feet of right of way preservation along the project frontage on Boyette Road. Building setbacks shall be calculated from the future right-of-way line.

#### OTHER CONDITIONS:

 Prior to site plan certification, the applicant shall revise site plan to add a label along the project frontage on Boyette Road that states "+/-8 FEET OF ROW PRESERVATION TO BE PROVIDED ALONG BOYETTE ROAD PER HILLSBOROUGH COUNTY CORRIDOR PRESERVATION PLAN "

#### PROJECT SUMMARY AND ANALYSIS

The applicant is requesting to rezone the  $\pm$ -18-acre site from Agricultural (AR) to PD to construct 86 townhomes and a maximum of 20,000 square feet of Retail/Commercial and Office uses. The site currently operates as private multi-use recreational facility with a miniature golf course, driving range and batting cages. The site is located on Boyette Rd., approximately  $\pm$ -1,300 feet east of Carr Rd. The Future Land Use designation of the site is Residential – 4 (R-4).

## Trip Generation Analysis

The applicant submitted a trip generation and site access analysis as required by the Development Review Procedures Manual (DRPM). Staff has prepared a comparison of the trips potentially generated under the existing and proposed zoning designations, utilizing a generalized worst-case scenario. Data presented below is based on the Institute of Transportation Engineer's Trip Generation Manual, 10<sup>th</sup> Edition.

**Approved Zoning:** 

Zoning, Land Use/Size	24 Hour	Total Peak Hour Trips	
3,	Two-Way Volume	AM	PM
AR: Mini-Golf (ITE 431)	60*	0	6
AR: Golf Driving Range (ITE 432)	410	12	38
AR: Batting Cage (ITE 433)	160*	0	16
Total Trips	630	12	60

<sup>\*</sup>Estimated based on PM peak hour trips.

**Proposed Zoning:** 

Zoning, Land Use/Size, ITE Code	24 Hour	Total Peak Hour Trips	
ζ,	Two-Way Volume	AM	PM
PD: 5,000 sf Apparel Store (ITE 876)	332	5	21
PD:4,500 sf Fast Food Restaurant without Drive Through Window (ITE 933)	1,558	113	128
PD: 86 Town Homes (ITE 220)	630	40	48
PD: 100 Student Daycare (ITE 565)	409	78	79
Total Trips	2,929	236	276
Internal Capture	N/A	12	44
Pass-By Trips	N/A	2	0
Net Trips	2,929	224	232

**Trip Generation Difference:** 

	24 Hour Two-Way Volume	Total Peak Hour Trips	
		AM	PM
Difference (+/-)	+2,299	+212	+172

The proposed rezoning will result in an increase of trips potentially generated by 2,299 daily trips, 212 AM peak hour trips and 172 PM peak hour trips.

#### TRANSPORTATION INFRASTRUCTURE SERVING THE SITE

Boyette Rd. (between Balm Riverview Rd. and Bell Shoals Rd.) is a 4-lane, divided, collector roadway in good condition. Boyette Rd. is characterized by +/- 12-foot wide travel lanes lying within +/- 127ft of right-of-way. There are +/- 5-foot sidewalks and +/- 4-foot wide bicycle facilities along both sides of Boyette Rd. in the vicinity of the proposed project.

#### HILLSBOROUGH COUNTY CORRIDOR PRESERVATION PLAN

Boyette Rd. is shown on the Hillsborough County Corridor Preservation Plan as a future 6-lane roadway. The site plan indicates that the right of way on Boyette is 127 feet. According to the Hillsborough County Transportation Technical Manual, a TS-6 4 lane divided roadway with two 11-foot additional travel lanes would total 134 feet of right of way. Adding the existing right turn lane would total 143 feet required for the planned improvement. Subtracting out the existing roadway and dividing evenly for each side of the roadway, a total of 8 additional feet of ROW is required for preservation along the subject frontage on Boyette Road.

#### **SITE ACCESS**

The project has a single access on Boyette Rd at a signalized intersection aligning with Sedgebrook Drive and served by an existing 270ft left turn lane. The internal driveway serves the commercial neighborhood uses in Parcel 2. The residential tract is separated from the other uses by a +/-160 ft TECO easement that will remain undeveloped with the exception of the driveway access. The proposed gated entry option to the residential tract will be located outside of the TECO easement as shown on the PD site plan.

Based on the applicant's site access analysis, the existing eastbound left turn lane should be extended to 365 feet to accommodate the peak season plus project traffic. A westbound right turn lane is not warranted.

#### **LEVEL OF SERVICE (LOS)**

#### 1.0 APPLICATION SUMMARY

Applicant: Mattamy Tampa/Sarasota, LLC

FLU Category: RES-4

Service Area: Urban

Site Acreage: 18 +/-

Community Plan Area: Riverview

Overlay: None

Introduction Summary:

The applicant seeks to rezone a parcel zoned Agricultural Rural (AR) to Planned Development (PD) to allow for the development of a mixed-use project. The project is located on the north side of Boyette Road, 1/2 mile west of Bell Shoals Rd. in Riverview. A TECO easement runs east-west bisecting the parcel into two areas. The project will consist of 86 multifamily units (attached single-family) north of the TECO easement and up to 20,000 square feet of commercial, office, residential support uses and/or a Community Residential Home Type C south of the TECO easement, along Boyette Road. The developer intends to utilize the Mixed Use Incentive program set forth in the Comprehensive Plan to achieve a density up to 6 du/acre on the site. The site will have one access points on Boyette Rd.

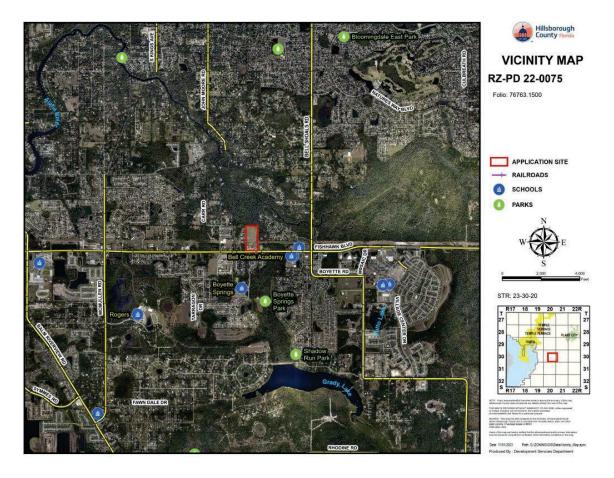

Zoning: Existing Prop	osed	
- District(s)	AR	- Planned Development
Typical General Use(s)	Single-Family Residential (Conventional/Mobile Home)	Multi-family Residential and Non-Residential
Acreage	18	18
Density/Intensity	1 unit per 5 acre (upland)	6 units per acre/0.20 FAR
Mathematical Maximum*	3 units	86 Res. Units / 20,000 sq ft

<sup>\*</sup>number represents a pre-development approximation

	_

## 2.0 LAND USE MAP SET AND SUMMARY DATA 2.1 Vicinity Map

## **Context of Surrounding Area:**

The project is located north of Boyette Road, between McMullen Rd. and Bells Shoals Rd. Area mostly consists of residential land. Some office uses are located to the west and east. Commercial uses are found further east, at the intersection of Boyette Rd and Bell Shoals Rd. Private schools and churches are also found in the area.

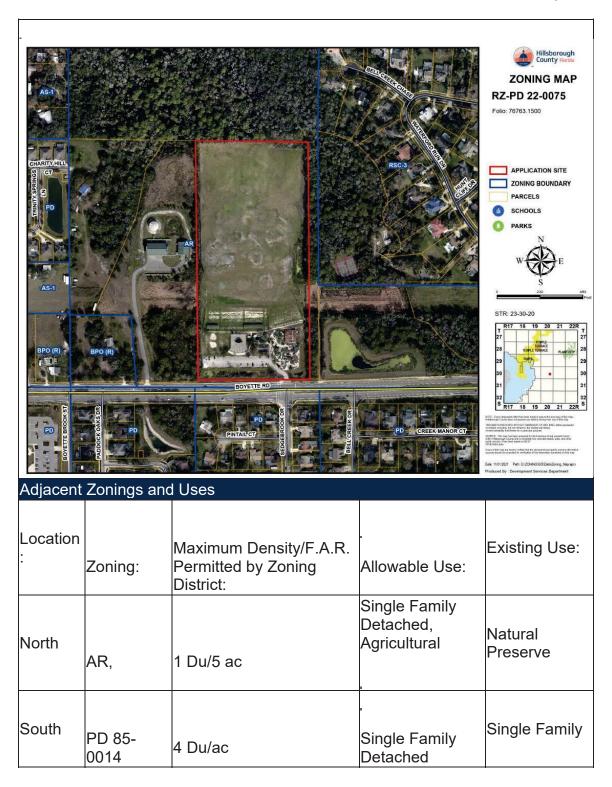

## 2.0 LAND USE MAP SET AND SUMMARY DATA 2.2 Future Land Use Map

Subject Site Future Land Use Category:	Residential - 4
Maximum Density/F.A.R.:	Up to a maximum of 4.0 dwelling units per gross acre. Alternative methods for calculating density of certain uses are specified in the land development regulations. Density bonuses and credits may be considered in this category and are described in the Plan. suburban scale neighborhood commercial, office, multi-purpose or mixed use projects limited to 175,000 sq. ft. or .25 FAR, whichever is less intense. Actual square footage limit is dependent on classification of roadway intersection where project is located.
	Residential, suburban scale neighborhood commercial, office uses, and multi-purpose projects. Nonresidential uses shall meet locational criteria for specific land use. Agricultural uses

may be permitted pursuant to policies in the agricultural objective areas of the Future Land Use Element.

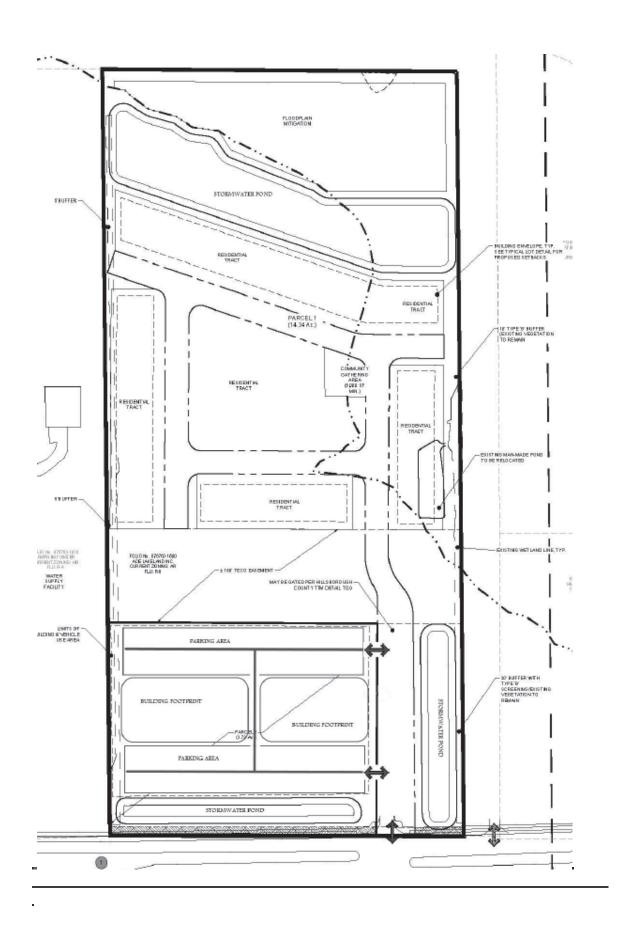

## 2.0 LAND USE MAP SET AND SUMMARY DATA 2.3 Immediate Area Map

#### 5.0 IMPLEMENTATION RECOMMENDATIONS

#### Remand

This case was presented at the July 25, 2022 Zoning Hearing Master hearing. In order to build more than 57 residential units and exceed the density of 4 DU/ac in Parcel 1, the applicant proposed a mixed use project. In conversations with Planning Commission staff, the applicant had proposed and committed to a timing mechanism that would guarantee the development of all proposed uses (residential in Parcel 1 and non-residential in Parcel 2) and comply with the mixed use Objectives and Policies from the Comprehensive Plan Objective 19 and Policy 19.2 for the integration of mixed-use developments. A condition was proposed stating that prior to the issuance of any Certificate of Occupancy for 58 or more residential units, two of the non-residential uses listed in the Group lists need be constructed with a Certificate of Occupancy issued. At the July hearing, the applicant submitted a modification to this condition to require that prior to the issuance of any building permits for 58 dwelling units or more, the road and utility infrastructure (North South Entry Road with sidewalks and pedestrian connections and utility stub outs necessary to service Parcel 2) to be constructed and Certificate of Completion issued. This modification of the condition would not require two of the non-residential uses listed in the Group lists to be constructed with a Certificate of Occupancy issued prior to the issuance of any Certificate of Occupancy for 58 or more residential units. Staff from the Planning Commission and Development Services could not amend the reports and the case remained scheduled for the BOCC Land Use Meeting. At the BOCC Land Use Hearing on October 11, 2022, the case was remanded to the Zoning Hearing Master hearing in order to allow the evaluation by staff of the proposed modification to the condition with the timing mechanism for the development of the two project Parcels.

#### 5.1 Compatibility

The property's existing use is a recreational golf course. The site is surrounded to the south, southeast, and southwest by single-family detached home sub. Further southwest is Saint Stephens Catholic Church and School. The parcel adjacent to the west contains the Hillsborough County South Central Water Pump Station. Further to the west is single-family detached housing. The adjacent parcel to the north and east is owned by the Tampa Bay Conservancy Inc. (Myron and Helen Gibbons Nature Preserve). Further to the northeast is the

western boundary of a large single-family detached home subdivision with frontage directly on Bell Shoals Road. To the east, along Boyette Rd., is land owned by Hillsborough County containing a large water retention pond.

The subject property is currently developed as a golf driving range. According to the project's narrative, this property is one of the last developable sites in the area, and with its direct access onto Boyette Road, a lighted intersection, and close proximately to Bell Shoals Road, it is a prime location for a mixed-use project. Boyette Road is a 4-lane collector road and existing land uses along this corridor range from commercial uses, private educational facilities, retail uses, residential uses, and preserved areas.

The request is to rezone the subject site from Agricultural Rural (AR) to Planned Development (PD) to allow up to 86 Townhomes (single-family attached) with a density bonus within Parcel 1 (north an existing TECO easement) and up to 20,000 sq. ft. of limited Commercial Neighborhood (CN) from three distinct use categories in Parcel 2 (south of the TECO easement, along Boyette Rd.). In order achieve 86 residential units (at 6 du/ac), the applicant is utilizing Policy 19.3 which provides incentives to encourage mixed-use development by providing at least 3 uses on site which in turn will permit density/FAR up to the next land use category, where 2 uses shall be non-residential uses. The non-residential uses have been classified into 3 Groups. The applicant met with staff and is proposing a list and size of development that could be considered, where at least 2 uses shall be developed in Parcel 2, one use from either Group, where no two uses are chosen from the same group. The applicant is also committed to limiting the height to one-story and architecturally finished on all four sides with a residential like appearance for the non-residential portion of the site.

The three use Groups are proposed as follows:

### **Group A – Retail – No drive-thru**

4,500 SF site down restaurant 2,500 SF coffee shop 5,000 SF Bank

4,000 SF Fitness Center 5,000 SF Brewery/Beer Garden 5,000 SF Retail limited to:

Apparel and Shoe Store
Appliance Stores, Small
Art Supply Store
Bicycle Sales/repair
Book/Stationary Store, New and Used Camera/Photography Store

Florist Shop Furniture/home furnishings General Business, Such as Retail Goods and Stores Jewelry Store (Watch, clock, Jewelry Repair)

**New Stand** 

Novelty and Souvenir Shop

Optician/Optical Supplies

Locksmith

Mail and Package Services

Mail Order Office

Mail Order Pickup Facilities

Pet shop (no outdoor rec area)

Sporting Goods Store

5,000 – 10,000 SF Specialty Food Store to include:

Bakery, Candies, & Nuts, Dairy, Delicatessens, Meat Seafood and Produce

### Group B - Office - No drive-thru

10,000 SF limited to:

Urgent Care (no 24 hour operation)

Outpatient Surgical Center (no 24 hour operation) Employment Services Government Office

Health Practitioner's Office

Medical Offices or Clinics with scheduled or Emergency Services by Physicians (No 24 hr use) Professional Office
Professional Services

### **Group C – Residence Support - No drive-thru**

10,000 SF limited to:

Day Care (child / pet)

Community Residential Home/Memory Care (maximum 125 beds)

No drive thru facilities will be permitted to prevent intense uses from developing on site.

A waiver to the additional 2-foot setback for every foot above 20-feet in height, per LDC Section 6.01.01. endnote 8 is being requested only on the west side of the site. The 2:1 requirement is to address potential compatibility issues however; the adjacent use is TBW water facility. There is a 5-foot buffer proposed along the western PD boundary. The eastern boundary will maintain the "2:1" requirement although the closest single- family development is located 500 feet to the east with heavy vegetation functioning as a buffer between both uses. The LDC requires a 5-foot buffer with a Type A screening between the

proposed residential use and the adjacent AR zoning along the east/north. With the required 5-foot buffer and building height of 35-feet, an additional 30-foot setback is required (35'- 20'= 15' X 2 = 30' + 5' buffer). The total required setback is 35 feet. Furthermore, the applicant is committed to include a 6-foot fence with a10-foot buffer / type B screening.

Commercial development standards will be of the Commercial Neighborhood (CN) standards, single story structures.

As part of this remand, the condition pertaining to the timing mechanism for the development of the Parcel 1 (residential) will require that prior to the issuance of any building permits for 58 dwelling units or more, the road and utility infrastructure (North South Entry Road with sidewalks and pedestrian connections and utility stub outs necessary to service Parcel 2) will need to be constructed and Certificate of Completion issued.

The new condition will still require that Parcel 2 be developed with two non-residential uses from two different use Groups. Each use will have a minimum of 2,500 square feet of building space.

Additionally, the applicant commits that in order to demonstrate that Parcel 2 will have adequate land area to accommodate two non-residential uses and related parking, open space, etc., if Parcel 2 is developed in more than one phase, a Preliminary Site Development Plan (PSDP) will be required to be submitted for site development review and approval. The PSDP will need to include the use proposed as Phase 1 along with the most intense use from a different Group list as Phase 2. For instance, if a developer proposes a use from Group A as Phase 1, the PSDP shall include a the most intense use remaining in Group B or C (10K sq ft Medical / Health Practitioner's Office). If a developer proposes a use from Group B as Phase 1, the PSDP shall include the most intense use remaining in Group A or C (4,500 sq ft Sit Down Restaurant).

Planning Commission and Development Services staff have reviewed the change in the conditions and has found them acceptable. The condition will still ensure that the project be developed with three different uses and be reviewed in accordance with site development regulations established by the Land Development Code.

The applicant also proposes to provide landscaping and native species vegetation along the floodplain compensation slope areas, subject to review and approval by the County Stormwater review section.

Staff has received letters of concerns and opposition from area residents, the Tampa Bay Conservancy and Sierra Club. The letters expressed concerns with traffic generated by the proposed development, school capacity, noise, impacts to the nature preserve, increase in density, introduction of commercial uses in the

area, impacts to water supply and reduction of setbacks/buffer from the natural preserve along the east. The applicant has amended the application and reduced the intensity of the non-residential uses, restricted square footage of the day care, eliminated school uses, and will maintain the required buffer/setback along the east in accordance with the Land Development Code. The project will maintain a minimum of 35 feet of building setback along the east, meeting the requirement of the Code. In addition, a 20-foot buffer, with Type B screening will be in place for the residential portion. Per LDC Sec. 6.06.06, the proposed project would require at least 5 feet of buffer between residential uses (Parcel 1) and AR zoning with Type A screening. The Type A screening requires plantings or a solid fence. The applicant proposes 20 feet of buffer with Type B screening. Existing vegetation will be allowed to remain in lieu of required landscaping and trees, subject to approval by Natural Resources. The additional landscaping (Type B) consists of a row of evergreen shade trees which are not less than ten feet high at the time of planting, a minimum of two-inch caliper, and are spaced not more than 20 feet apart. The trees are to be planted within ten feet of the property line. The solid fence will also be placed at least 10 feet from the parcel line, away from existing vegetated areas. Between Parcel 2 (non-residential uses) and the nature preserve site along the east, the applicant proposes a 30foot buffer with Type B screening. The Code requires at least 20 feet of buffer and Type B screening. Per the submitted site plan, retention ponds will be placed along the east, adjacent to the nature preserve, and vegetation will be preserved subject to Natural Resources review and approval. As part of the site development review process, the developer is required to provide wildlife and environmental studies in accordance with the Land Development Code. The project will be conditioned requiring that water distribution system improvements will need to be completed prior to connection to the County's water system by this future development. No building permits that would create demand for water service will be issued until the completion of two County funded Capital Improvement Program projects in South County are put into operation. Stormwater design and construction will be subject to review and approval by the site development review section as established in the Land Development Code to ensure the project will capture all stormwater onsite. The proposed PD plan shows areas for future retention ponds. Comments from the School Board state that a school concurrency review will be issued PRIOR TO preliminary plat or site plan approval. The School Board also indicated that at this time, additional capacity at the middle and high school levels exists in adjacent service areas to accommodate the proposed project, and capacity exists in the Elementary School level for this area.

Although cross access to adjacent parcels is encouraged, the existing adjacent uses restricts this. The Tampa Bay Water supply facility is located to the west with its own access fenced with a 6-foot chain link fence with electrical wires to prevent trespassing. The Gibbon Nature Preserve is located to the north and east of the subject site and future development of this site is unlikely.

The is located between a water supply facility to the west and a storm water pond and recreation land/preserve to the east and to the north. Residential subdivisions surround this area to the north, northeast and south. Other residential projects are located further to the west. The site is also bisected by the 150-foot wide TECO easement creating two distinct areas for commercial use along Boyette Road and the residential component internal to the site, adjacent to the preserve. The TECO easement functions as buffer between both uses, however the site will be interconnected by vehicular and pedestrian access.

There are wetlands present on the site. The Environmental Protection Commission, EPC, reviewed the proposed Site Plan and does not object. No impacts to wetlands or setbacks are shown on the proposed Plan. The Conservation and Environmental Lands Management reviewed this rezoning petition and has no comments. Transportation staff does not object to this request and proposes conditions for site access and road improvements along Boyette Rd.

The area is a mix of mostly residential single family-detached, and low scale commercial, and office uses. Residential support uses (schools and churches) are also commonly found in the area. The proposed project scale and design would ensure that is compatible with the surrounding development pattern and land uses. Intensive uses are being eliminated from the proposed development. The project will maintain the required setbacks along the east, where the adjacent nature preserve is located, as required per the LDC. The applicant, however, will provide additional buffer and screening more than what the Code requires. The non-residential component will be limited to 1-story buildings with a residential design. Compared to the initial proposal by the applicant, the project has been scaled down, more restrictions have been proposed, and compliance with provision from the Code has been maintained. Staff from the Planning Commission has evaluated the request and has found it Consistent. Objective 19 and Policy 19.2 indicates that a mixed-use development must be integrated. Policy 16.2 requires the gradual transition between uses. The applicant's site plan shows the commercial buildings are in the southern portion of the property facing south towards Boyette Road. The proposed site plan shows an integrated design to the residential located on the northern portion of the property and a gradual transition from the natural preservation area to the north and east, consistent with policy direction. To ensure the project will be developed in accordance with the objectives and policies above, a timing mechanism for the development of the mix of uses is being proposed requiring the construction of the access road and infrastructure serving the project and the non-residential uses in Parcel 2 to be completed before more than 57 residential units can be issued building permits. Planning Commission staff also sees no compatibility issues as the adjacent use is public institutional. Lastly, a waiver to the Commercial Locational Criteria (CLC) has been requested, and Planning Commission staff recommends approval of the waiver.

### 5.2 Recommendation

Based on the above considerations, staff recommends approval with conditions.

Zoning conditions, which were presented Zoning Hearing Master hearing, were reviewed and are incorporated by reference as a part of the Zoning Hearing Master recommendation.

### SUMMARY OF HEARING

THIS CAUSE came for hearing before the Hillsborough County Land Use Hearing Officer on January 17, 2023. Mr. Brian Grady of the Hillsborough County Development Services Department introduced the petition. He stated that Mr. Cameron Clark of the County Attorney's Office would make a brief statement regarding the application prior to the applicant's presentation.

Mr. Cameron Clark of the County's Attorney's Office stated that there was a letter in the record that was submitted on the day of the Zoning Hearing Master (ZHM) hearing from Attorney Jane Graham who is objecting to the ZHM hearing going forward and wished to address that objection at the start of the ZHM hearing. He added that he understood that Ms. Graham was present at the hearing and is representing opponents. Mr. Clark stated that when he looked at the reasons behind the objection, the substantive one was the allegation that the ZHM hearing initially violated the six month window where the application has to go to a hearing within the first six months on the initial hearing date or its withdrawn. In conferring with staff, Mr. Clark testified that did not happen. The initial hearing date was set for January 18, 022 and Ms. Graham concluded that the application should have been withdrawn by June. He added that it was actually five months as July would be six months from the hearing date. The application was heard in July of 2022 and staff determined that it was in order to be heard. The application went to the Board of County Commissioners and it was remanded which resets the six month window for withdrawal. Mr. Clark stated that there was also an objection that the Planning Commission and Development Services staff changed their recommendations but there is nothing in the Land Development Code that requires the reports after a remand be the same. Staff can always reanalyze the application and there is not a final decision until they go to the Board and are voted on at that time. Mr. Clark concluded his comments by stating that he did not see any reason for anything to be heard prior to the hearing and that Ms. Graham would be able to testify at the appropriate time during the ZHM hearing.

Ms. Kami Corbett testified on behalf of MattMattamy Homes. She stated that the application had been remanded at the request of the applicant. She added that a full presentation including transportation and environmental was made at the prior ZHM hearing and those sections will not be repeated. This issue for the remand pertains to the condition which included a timing mechanism associated

with providing three land uses. The condition proposed at the prior hearing did not capture the spirit of the providing the uses therefore the applicant requested a remand to work with staff on a revised condition. Conditions 1.4 and 1.5 in the staff report have been revised and is supported by the applicant. A condition regarding additional wetland plantings has been proposed. Ms. Corbett stated that those are the only changes to the application since the last hearing. There are additional letters in opposition from citizens regarding generalized concerns about traffic but not specific to the development itself. She stated that Ms. Graham submitted a letter asserting that the rezoning was inconsistent with the Riverview Community Plan which specifically addresses densities along the Alafia River. Ms. Corbett testified that the subject property is not along the Alafia River therefore the policy is not applicable. She added that County staff accurately analyzed this issue in their staff report.

Mr. Israel Monsanto, Development Services Department testified regarding the County's staff report and the remand. Mr. Monsanto stated that in order to build more than 57 residential units and exceed the density of four dwelling units per acre in Parcel 1, the applicant has proposed a mixed use project. The applicant committed to a timing mechanism that would guarantee the development of all proposed uses, residential in Parcel 1 and non-residential in Parcel 2, and comply with the mixed use objectives from Comprehensive Plan Objective 19 and Policy 19.2 for the integration of mixed use development. Mr. Monsanto testified that a zoning condition was proposed stating that prior to the issuance of any Certificate of Occupancies for 58 or more residential units, two of the nonresidential uses listed in the Group lists need to be constructed with a Certificate of Occupancy issued. Mr. Monsanto summarized the condition and circumstances that followed at the prior ZHM hearing which led to the staffs not supporting the revised condition. Subsequent to the remand, the applicant worked with staff to draft a condition that requires Parcel 2 to be developed with two non-residential uses from two different use Groups with each use having a minimum of 2,500 square feet of building space. The applicant has committed submit a Preliminary Site Development plan for review and approval to ensure that there is adequate land area to accommodate two non-residential land uses and the associated parking, open space and other requirements. Mr. Monsanto concluded his presentation by stating that the Planning Commission has found the request consistent with the Comprehensive Plan. The applicant proposes to provide landscaping and native species vegetation along the floodplain compensation slope area subject to the review and approval of the Stormwater review section.

Ms. Jillian Massey of the Planning Commission staff testified that the property is designated Residential-4 and located within the Urban Service Area and the Riverview Community Planning Area. The proposed density of six dwelling units per acre exceeds the density permitted under the RES-4 Future Land Use category however, a density bonus is proposed as outlined in Policy 19.3. She added that a zoning condition is proposed to ensure all three uses are developed to comply with the density bonus criteria. Neighborhood Commercial land uses

are proposed for the non-residential portion of the site. Planning Commission staff worked with the applicant to limit the possible Neighborhood Commercial uses to help protect the surrounding residential and preservation land uses. The request is consistent with Objective 16 and Policy 16.3 regarding compatibility. A waiver of commercial locational criteria is supported by staff as the project is a mixed use development with limited Neighborhood Commercial land uses. Ms. Massey testified that the request meets Goal One of the Riverview Community Plan which strives to achieve better design and densities compatible with the Riverview vision. In closing, Ms. Massey stated that the Planning Commission staff finds the request consistent with the Comprehensive Plan subject to the proposed conditions.

Hearing Master Finch asked audience members if there were any proponents of the application. No one replied.

Hearing Master Finch asked audience members if there were any opponents of the application.

Ms. Jane Graham testified on behalf of Mr. James Anderson who resides at 10514 Sedbrook Drive. She stated that Mr. Anderson opposes the application and requests that it be denied. She referred to her letter objecting to the remand of the rezoning application and entered it into the record. Ms. Graham stated that several people will speak in opposition and explain why the application fails to meet the rezoning criteria under Land Development Code Section 10.03.03.E. The application is inconsistent with the Comprehensive Plan Goal 6 which intends to reduce density along the Alafia River. The rezoning requests to increase density. Ms. Graham testified that Bell Creek is a tributary of the Alafia River and is only a number of feet away on the norther border of the subject property. She concluded her comments by stating that the request is incompatible with the surrounding uses.

Mr. James Anderson 105146 Brook Drive Riverview testified in opposition. Ms. Graham asked Mr. Anderson if he had taken the pictures that were shown during his presentation. Mr. Anderson replied yes. He described the traffic that comes from Boyette Elementary and the backups that are existing which effectively block parts of Boyette Road when the school dismisses students in the afternoon. Ms. Graham asked Mr. Anderson if agreed that the traffic congestion is existing and could be further aggravated. Mr. Anderson replied that it will and stated that the addition of 2,299 cars coming from Sedbrook Drive which is where Boyette Elementary is will make the traffic worse. Ms. Graham asked Mr. Anderson to describe the next photo. Mr. Anderson stated that it is a photo of the property and shows that there is about 50 to 60 feet between the Ace Golf facility and Bell Creek. A bridge goes across Bell Creek which is connected to the Alafia River. Ms. Graham showed several other photos of the subject property. Mr. Anderson discussed a photo of the power lines that go across the Ace Golf property and stated that the proposed townhome location will require residents to go under the power line as they leave the property. He added that

there are also pipelines including ammonia and water that are existing. Ms. Graham submitted photos and letters of objection into the record.

Ms. Ethel Hammer 19825 Angel Lane Odessa testified in opposition. Ms. Hammer stated that she was representing the Tampa Bay Conservancy and that their Board of Directors had voted unanimously to oppose the application as submitted. Ms. Hammer continued by stating that the objection is based on the density and intensity of the project including the proposed waivers. She added that the Conservancy does not object to the development of the site as long as it would be within the parameters of the RES-4 Future Land Use category. Ms. Hammer stated that the waiver to commercial locational criteria is not justified as commercial land uses are inconsistent with the surrounding land use pattern. There is single-family residential to the north, south, east and west. County staff mentioned the presence of a school nearby but that is a residential support use which should not be used to justify commercial development. She discussed the existing commercial to the east of Bell Shoals and also to the west and stated that is where the commercial development belongs. The approval of commercial on the subject property would serve as a precedent for other vacant parcels along Boyette Road. Ms. Hammer stated that not only is the developer asking for a waiver, but also to develop four times the amount of square footage that would be permitted if the site met commercial locational criteria. She stated that if the property met the criteria, it would only be permitted to develop 5,000 square feet. Instead, the rezoning requests 20,000 square feet which is four times more. Goal 1 of the Riverview Community Plan strongly encourage the avoidance of strict commercial. Goal 6 of the Riverview Plan directs the protection of the Alafia River watershed. She stated that it is her opinion that the word watershed is more than just the properties that are immediately adjacent. A portion of the subject property fronts Bell Creek and the property is also located in the Coastal High Hazard Area. Ms. Hammer concluded her presentation by stating that the Tampa Bay Conservancy objects to the granting of the density bonus as the waiver of commercial locational criteria. Ms. Graham submitted a copy of Ms. Hammer's written statement and resume into the record.

Mr. Gary Gibbons 800 29<sup>th</sup> Avenue North St. Petersburg testified in opposition and on behalf of the Gibbons family. Mr. Gibbons stated that the preserve is named after his mother. He detailed his family's ownership of land in the area and stated that the property is located in the Coastal High Hazard Area and has significant wildlife habitat. He discussed Goal 6 of the Riverview Community Plan and the reduction of densities and intensities to protect the environment and wildlife along the Alafia River and surrounding watershed. Mr. Gibbons summed up his comments by stating that the Alafia River is the primary source of drinking water for Tampa Bay Water which serves the entire region and that the project is incompatible with the surrounding properties.

Mr. Ryan Brooks 12714 Shadowcrest Court testified in opposition and stated that he was speaking both as a private resident and as Vice President of the Boyette Springs Homeowners Association. He filed their objection into the record. Mr.

Brooks described the existing traffic generated by the school and stated that the additional project traffic will result in cars blocking the entrances to the subdivision. He stated that he has witnessed several accidents at the neighboring intersections.

Ms. Jennifer Miller 13317 Waterford Run Drive testified in opposition and stated that he is the Waterford on the Alafia Homeowners Association President. She added that she was speaking on behalf of everyone in the Waterford community. A letter of opposition was sent to County staff in January of 2022. Ms. Miller stated that she met with representatives of the Mattamy group to discuss their opposition and sent pictures of Bell Creek flooding to the County. The pictures were shown at the ZHM hearing and Ms. Miller stated that they show that the Creek overflows not only during hurricanes but also where there is severe rain for more than two days. She described the traffic generated by the school and concluded her comments by stating that the rezoning does not fit into the area.

Ms. Prather attempted to virtually testify in opposition but had technical issues such that she could not be heard or understood.

Ms. Graham asked if she could call Ms. Prather as she could be seen to ensure compliance with County policy. Ms. Prather could not be heard via Ms. Graham's cell phone.

Ms. Graham asked the Hearing Master if she could submit additional evidence from Ms. Prather after the hearing due to the technical audio difficulties.

Mr. Clark of the County Attorney's Office stated that the virtual participation in the hearing is an option and does not preclude the fact that there may be audio difficulties. He added that additional evidence is rarely approved and stated that it would be unlikely for this circumstance. Mr. Clark stated that if Ms. Prather was on the adjacent property owner mailing list, she would be able to come to the Board. Hearing Master Finch asked Mr. Clark if she had already affirmed that. Mr. Clark replied that she had but that he had not confirmed it.

Ms. Graham asked if Ms. Prather could submit her comments after the hearing. Hearing Master Finch replied no as the hearing would be closed and documents are to be submitted at the hearing into the record as Ms. Graham had done with Ms. Hammer's report at the ZHM hearing.

Ms. Prather resolved her audio issues and began her testimony in opposition.

Ms. Sabine Prather 1601 Bentwood Drive Sun City Florida testified and stated that she had signed off on a letter that Attorney Graham proposed in November about the project's consistency with the community planning. She added that two of the parcels are located in a flood zone. Ms. Prather stated that she is very concerned with climate change and the weather changes that are going on. She expressed concerns regarding flooding and the impact of insurance companies leaving Florida that may make it impossible for new residents to obtain insurance

in flood zones.

County staff did not have additional comments.

Ms. Corbett testified during the rebuttal period and asked Mr. Henry to testify regarding traffic issues and then Abbey Naylor will address the environmental concerns.

Mr. Steve Henry 5023 West Laurel testified on behalf of the applicant regarding transportation issues. Mr. Henry stated that the school hours are from 7:40 am to 1:55 pm. The traffic counts conducted incorporated the am peak hours and show that the intersection operates at an acceptable level of service. He added that he suspects that there may be some operational issues with the school drop off and pick up. But from a capacity standpoint, the intersection currently operates at an acceptable level of service and continues that acceptable level with the project traffic. County staff stated in their staff report that Boyette Road operates at Level of Service C. Mr. Henry concluded his comments by submitting the County's Level of Service report documenting Boyette Road's Level of Service C status into the record.

Ms. Abbey Naylor 14706 Tudor Chase Drive testified on behalf of the applicant regarding environmental issues. Ms. Naylor stated that the nature preserve is important and offers a good habitat for wildlife. Ms. Naylor showed a graphic to discuss the proposed development plan. She stated that there is proposed flood mitigation on the northern and eastern sides of the preserve. To the south will be a storm water management pond and then south of the pond will be the beginning of the building area. On the west side of the preserve is 194 feet of buffer area between the adjacent parcel and the start of the subject development. There is 343 feet of buffer on the eastern side which is farther away than the length of a football field. The floodplain mitigation area will include native vegetation which will be coordinated with the County at the time of development. No wetlands will be impacted and the floodplain mitigation area will essentially become a wetland by design. Regarding the concerns stated by the opposition that development is intended to be reduced adjacent to the Alafia River, Ms. Naylor testified that the Alafia River watershed is 118 square miles in size. The Goal stated in the Comprehensive Plan is intended to reduce the density and intensity directly adjacent to the Alafia River, i.e. river front properties thereby protecting the surrounding watershed. She added that she did not believe the intent of the goal was to reduce the density and intensity of 118 square miles. Ms. Naylor described other examples of projects adjacent to preserves in Hillsborough County such as the Fish Hawk Nature Preserve. She concluded her comments by stating that there is an apartment complex abutting the Bell Creek preserve to the south.

Mr. Trent Stephenson 505 East Jackson testified on behalf of the applicant and stated that he is the civil engineer for the project. He discussed the proposed encroachment into the flood plain and stated that there will be a compensation

area which is required by the County and that includes not having any adverse impacts to the neighbors. Mr. Stephenson stated that the area is a sensitive basin that the County has identified as having low flooding and limits the project to a discharge rate of the mean annual storm event which is a 2.33 year storm versus the 25 year storm. Therefore restrictions are in place to try to reduce the flooding situation in the area.

Ms. Corbett continued the applicant's rebuttal and stated that the subject property is an existing golf driving range. She added that it is not a vacant environmentally sensitive piece of property. There are TECO and gas lines onsite that were acknowledged by the opposition that have an equal or more detrimental potential for environmental impacts than the proposed project. She concluded her testimony by stating that the traffic concerns have been addressed as has the environmental compatibility.

The hearing was then concluded.

### **EVIDENCE SUBMITTED**

\*Mr. Anderson submitted copies of site and surrounding area photographs into the record.

\*Ms. Graham submitted copies of letters in opposition to the Hearing Master, Ms. Lundgren and Mr. Tschantz of the County Attorney's Office, Mr. Monsanto of the Development Services Department and a copy of Ms. Hammer's planning analysis of the rezoning application into the record.

\*Mr. Gibbons submitted a copy of his written presentation and aerial photographs and a Hillsborough County map into the record.

\*Mr. Brooks submitted a copy of a letter in opposition from the Boyette Springs Homeowners Association into the record.

\*Ms. Miller submitted a copy of a letter and photographic exhibits in opposition from the Waterford on the Alafia Homeowners Association into the record.

\*Ms. Corbett submitted a site plan depicting the proposed location of the flood plain mitigation and storm water pond, and graphics showing development adjacent to other nature preserves into the record.

\*Mr. Henry submitted a copy of the 2020 Hillsborough County Level of Service report into the record.

### **PREFACE**

All matters that precede the Summary of Hearing section of this Decision are hereby incorporated into and shall constitute a part of the ensuing Findings of Fact and Conclusions of Law.

### **REMAND FINDINGS OF FACT**

- 1. The subject site is 17.67 acres in size and is zoned Agricultural Rural (AR) and designated Residential-4 (RES-4). The property is located in the Urban Service Area and the Riverview Community Planning Area.
- 2. The purpose of the rezoning from AR to Planned Development (PD) is to permit the development of a maximum of 86 townhomes and up to 20,000 square feet of commercial, office, residential support uses and/or a Type C Community Residential Home.
- 3. The rezoning application was remanded to the Zoning Hearing Master hearing at the request of the applicant to revise a zoning condition pertaining to the timing of the development of Phase I which is the residential portion of the project. Additionally, a zoning condition has been added to require additional plantings in the floodplain compensation area.
- 4. The PD includes a request to utilize Policy 19.3 of the Comprehensive Plan's Future Land Use Element which states that projects with three or more land uses may utilize the density of the next higher land use category which in this case would be the RES-6 Future Land Use category.
- 5. The applicant has requested a waiver to the additional two-to-one setback for buildings over twenty (20) feet in height on the western side of the project only.
  - The waiver is justified as the adjacent use along the entire western boundary is a Tampa Bay Water supply facility (the Hillsborough County South Central Water Pump Station). The applicant is providing a five (5) foot buffer along the western PD boundary.
- 6. No Planned Development Variations have been requested by the applicant.
- 7. The Planning Commission found the proposed density of six dwelling units per acre exceeds the density permitted under the RES-4 Future Land Use category however, a density bonus is proposed as outlined in Policy 19.3 which states that projects with three or more land uses may utilize the density of the next higher land use category which would be the RES-6 Future Land Use category. Staff testified that the revised zoning condition proposed to ensure all three uses are developed to comply with the density bonus criteria is supported by staff. The Planning Commission staff worked with the applicant to limit the possible Neighborhood Commercial uses to help protect the surrounding residential and preservation land uses. The request is consistent with Objective 16 and Policy 16.3 regarding compatibility. Staff stated that a waiver of commercial locational criteria is supported by staff as the project is a mixed use development with limited Neighborhood

- Commercial land uses. The Planning Commission found the rezoning request as reviewed prior to the Zoning Hearing Master hearing consistent with the Comprehensive Plan.
- 8. The Development Services Department staff testified that they found the request approvable and supports the revised zoning condition regarding the development timing mechanism.
- 9. The subject property is currently developed with a golf driving range facility which includes batting cages, a miniature golf course and associated retail land uses. The facility is lighted for operation at night and has been in existence for approximately twenty (20) years.
- 10. The subject property is bisected by a TECO easement that includes existing power lines which run east-west through the property. The Planned Development proposes to locate the townhomes north of the TECO easement (Parcel 1) and the non-residential land uses south of the TECO easement (Parcel 2) which fronts Boyette Road.
- 11. The area surrounding the subject property is developed with a water supply facility owned by Tampa Bay Water to the west, a 60-acre nature preserve with an ownership strip to the east and the majority of the preserve to the north and residential subdivisions across Boyette Road to the south. Hillsborough County owns a larger tract of land fronting Boyette Road to the east of the nature preserve property that includes a stormwater pond. Also to the east of the nature preserve property is a wooded tract that is owned by the homeowners association for the residential subdivision to the northeast. The tract appears to be developed with recreational amenities including a lighted tennis court that serve the residents of the subdivision.
- 12. The applicant proposes to provide the required floodplain mitigation compensation area with native plantings as well as the stormwater pond at the northern portion of the subject property to buffer the nature preserve to the north and northeast corner of the site from the proposed townhomes. Further, a stormwater pond is proposed to be located at the southeastern portion of the parcel to also buffer the non-residential development from the nature preserve property.

The applicant committed to a zoning condition which requires a 4:1 slope that will be planted with appropriate native species on three-foot centers for herbaceous ground cover, five-foot centers for shrubs and ten-foot center for trees.

13. Testimony in opposition was provided at the Zoning Hearing Master hearing and also submitted into the County's record prior to the hearing.

An attorney representing a neighbor submitted letters in opposition to the Zoning Hearing Master and the Development Services Department planner assigned to the rezoning case and letters requesting the County cancel the Zoning Hearing Master hearing to attorneys in the County Attorney's Office. The request to cancel the hearing was based on the alleged violation of the Land Development Code (LDC) section pertaining to the time in which an application must be heard at a public hearing. It is noted that the Assistant County Attorney at the Zoning Hearing Master hearing addressed the request and found the application had met the requirements of the LDC and therefore the application could proceed and be heard.

The President of the Tampa Bay Conservancy who owns the nature preserve to the east and north testified in opposition at the Zoning Hearing Master hearing. A planning analysis was submitted into the record. The objections were based on the proposed density and intensity of the project including the proposed waivers and a concern that approving the project would provide precedent for future development. Further, opposition to the waiver of commercial locational criteria was expressed as commercial land uses are inconsistent with the surrounding land use pattern. The Conservancy representative stated that the intensity bonus equates to four times the square footage permitted under the Future Land Use designation. Objections to the rezoning were also cited in conflict with the Goal 1 of the Riverview Community Plan which strongly encourages the avoidance of strict commercial and Goal 6 encouraging the reduction of densities and intensities along the Alafia River.

A family member of the Gibbons Nature Preserve testified in opposition and expressed concerns regarding the property's location in the Coastal High Hazard Area, incompatibility with the Comprehensive Plan and Riverview Community Plan and possible effects to the County's drinking water given the parcel's proximity to the Alafia River.

Two citizens from neighboring Homeowner's Associations testified in opposition. The first was a representative of the Boyette Springs Homeowners Association who stated that the existing traffic generated by the school and additional project traffic will result in cars blocking the entrances to the subdivision. The second citizen was a representative of the Waterford on the Alafia Homeowners Association who had concerns regarding traffic and flooding.

14. A non-residential land use has operated on the subject property for almost twenty (20) years. The existing golf driving range, miniature golf course and batting cages land use includes a lighted field and parking lot area as well as

- accessory retail sales. The impacts to the surrounding parcels from the existing use are similar in nature to similarly sized commercial land uses.
- 15. The development of Parcel 2 with limited Commercial Neighborhood land uses is appropriate along the frontage of Boyette Road which is a four-lane collector roadway.
- 16. The proposed land use of single-family attached dwelling units (townhomes) is consistent with the development pattern in the area and serves to provide an alternative housing option to the community. The requested density bonus to achieve a maximum of 86 dwelling units is appropriate given the required mixed use development and the timing mechanism which requires that the road and utility infrastructure be constructed and Certificates of Occupancy issued prior to any building permits being issued after the 57<sup>th</sup> dwelling unit.
- 17. Opposition to the rezoning request included concerns regarding the possible negative impact to the transportation network in the area as traffic is currently congested given the school in the area. The applicant's professional engineer testified that the traffic counts conducted for the project incorporated the existing school traffic and resulted in an acceptable level of service both before the development and after with the project traffic. Further, County staff stated in their staff report that Boyette Road operates at Level of Service C. County Transportation staff had no objection to the rezoning request subject to the proposed zoning conditions.
- 18. Testimony from the opposition addressed the rezoning request's conflict with certain environmental policies in the Comprehensive Plan including Goal 6 of the Riverview Community Plan which seeks to protect properties along the Alafia River. The Planning Commission stated in their staff report that the Alafia River does not abut the subject property. Further, Planning Commission staff stated that a small portion in the northeast corner of the subject property is located in the Coastal High Hazard Area and no development will occur in this area.
- 19. The design of the site plan with the floodplain mitigation and stormwater ponds adjacent to the nature preserve both to the north and east as well as along the Boyette Road frontage mitigates the impacts of the project to the surrounding area. The delineation of the land uses north and south of the TECO easement with a connecting access road provides a gradual transition of land uses from the preserve to Boyette Road.

20. The rezoning to Planned Development with the zoning conditions as prepared by the Development Services Department for 86 townhomes and up to 20,000 square feet of commercial, office, residential support uses and/or a Type C Community Residential Home is an appropriate mixed-use project. The site plan and associated zoning conditions result in a project that is compatible with the surrounding land uses in the area and consistent with the Comprehensive Plan.

# FINDINGS OF COMPLIANCE/NON-COMPLIANCE WITH THE HILLSBOROUGH COUNTY COMPREHENSIVE PLAN

The rezoning request is in compliance with and does further the intent of the Goals, Objectives and the Policies of the Future of Hillsborough Comprehensive Plan unless zoning condition 1.4 is revised as presented by the applicant's representative at the Zoning Hearing Master hearing.

### **CONCLUSIONS OF LAW**

Based on the Findings of Fact cited above, there is substantial competent evidence to demonstrate that the requested Planned Development rezoning is in conformance with the applicable requirements of the Land Development Code and with applicable zoning and established principles of zoning law unless zoning condition 1.4 is revised as presented by the applicant's representative at the Zoning Hearing Master hearing.

### **SUMMARY**

The request is to rezone 17.67 acres from AR to PD to permit the development of a maximum of 86 townhomes and up to 20,000 square feet of commercial, office, residential support uses and/or a Type C Community Residential Home.

The rezoning application was remanded to the Zoning Hearing Master hearing at the request of the applicant to revise a zoning condition pertaining to the timing of the development of Phase I which is the residential portion of the project. Additionally, a zoning condition has been added to require additional plantings in the floodplain compensation area.

The PD includes a request to utilize Policy 19.3 of the Comprehensive Plan's Future Land Use Element which states that projects with three or more land uses may utilize the density of the next higher land use category which in this case would be the RES-6 Future Land Use category. The applicant has requested a waiver to the additional two-to-one setback for buildings over twenty (20) feet in height on the western side of the project only. The waiver is justified as the adjacent use along the entire western boundary is a Tampa Bay Water supply facility (the Hillsborough County South Central Water Pump Station). The applicant is providing a five (5) foot buffer along the western PD boundary.

Testimony in opposition was provided at the Zoning Hearing Master hearing and also submitted into the County's record prior to the hearing. The concerns expressed pertained to compatibility with the surrounding area, the increase in density and intensity of the project and its possible effects on the transportation network and environmental features. An attorney representing a property owner requested to cancel the hearing based on the alleged violation of the Land Development Code (LDC) section pertaining to the time in which an application must be heard at a public hearing. The Assistant County Attorney at the Zoning Hearing Master hearing addressed the request and found the application had met the requirements of the LDC and therefore the application could proceed and be heard. The opposition addressed the rezoning request's conflict with Goal 6 of the Riverview Community Plan which seeks to protect properties along the Alafia River. The Planning Commission stated in their staff report that the Alafia River does not abut the subject property and concluded that the project is in accordance with the Riverview Community Plan. Further, Planning Commission staff stated that a small portion in the northeast corner of the subject property is located in the Coastal High Hazard Area and no development will occur in this area. Specific concern was noted by the opposition regarding the possible negative impact to the transportation network in the area as traffic is currently congested given the school in the area. The applicant's professional engineer testified that the traffic counts conducted for the project incorporated the existing school traffic and resulted in an acceptable level of service both before the development and after with the project traffic. Further, County staff stated in their staff report that Boyette Road operates at Level of Service C. County Transportation staff had no objection to the rezoning request subject to the proposed zoning conditions.

A non-residential land use has operated on the subject property for almost twenty (20) years. The existing golf driving range, miniature golf course and batting cages land use includes a lighted field and parking lot area as well as accessory retail sales. The impacts to the surrounding parcels from the existing use are similar in nature to similarly sized commercial land uses. The design of the site plan with the floodplain mitigation and stormwater ponds adjacent to the nature preserve both to the north and east as well as along the Boyette Road frontage is considerate to the surrounding area. The delineation of the land uses north and south of the TECO easement with a connecting access road provides a gradual transition of land uses from the preserve to Boyette Road.

The rezoning to Planned Development with the zoning conditions as prepared by the Development Services Department for 86 townhomes and up to 20,000 square feet of commercial, office, residential support uses and/or a Type C Community Residential Home is an appropriate mixed-use project. The site plan and associated zoning conditions result in a project that is compatible with the surrounding land uses in the area and consistent with the Comprehensive Plan.

### **RECOMMENDATION**

Based on the foregoing, this recommendation is for **APPROVAL** of the Planned Development rezoning request as indicated by the Findings of Fact and Conclusions of Law stated above subject to the zoning conditions prepared by the Development Services Department.

February 7, 2023

Susan M. Finch, AICP Land Use Hearing Officer

Sum M. Fine

Date

Unincorporated Hillsborough County Rezoning			
Hearing Date: January 17, 2023  Report Prepared: January 5, 2023	Petition: PD 22-0075  12910 Boyette Road  North of Boyette Road, east of Carr Road, west of Bell Shoals Road, and south of the Alafia River		
Summary Data:			
Comprehensive Plan Finding:	CONSISTENT		
Adopted Future Land Use:	Residential-4 (4 du/ga; 0.25 FAR)		
Service Area	Urban		
Community Plan:	Riverview		
Requested Zoning:	Agricultural Rural (AR) to Planned Development (PD) to allow for 86 Townhomes with a density bonus and 20,000 sq. ft. of limited Commercial Neighborhood (CN) from two distinct use categories		
Parcel Size (Approx.):	17.66 +/- acres		
Street Functional Classification:	Carr Road - Local Boyette Road - County Arterial Bell Shoals Road - County Collector		
Locational Criteria	Does not meet; waiver requested		
Evacuation Zone	None		

Plan Hillsborough planhillsborough.org planner@plancom.org 813 - 272 - 5940 601 E Kennedy Blvd 18<sup>th</sup> floor Tampa, FL, 33602

### **Context**

- The 17.66 acre subject site is located at 12910 Boyette Road, north of Boyette Road and east of Carr Road, west of Bell Shoals Road and south of the Alafia River.
- The subject site is in the Urban Service Area (USA) and is within the limits of the Riverview Community Plan.
- The subject site is in the Residential-4 (RES-4) Future Land Use (FLU) Category. The RES-4 FLU surrounds the property and allows residential, suburban scale neighborhood commercial, office uses, and multi-purpose projects. Non-residential uses will need to meet locational criteria for specific land uses and agricultural uses may be permitted pursuant to policies in the agricultural objective areas of the Future Land Use Element. The RES-4 FLU category allows up to a maximum of four (4) dwelling units an acre and suburban scale neighborhood commercial, office, multi-purpose or mixed-use projects are limited to 175,000 sq. ft. or 0.25 FAR, whichever is less intense.
- The property currently has Agricultural Rural (AR) zoning. The AR zoning district is also found to the north, west and a portion to the east. Planned Development (PD04-1822) and the Agricultural Single-Family-1 (AS-1) zoning is found further to the west and northwest. To the southwest is Business Professional Office (BPO), Office Residential (OR), Commercial Neighborhood (CN) and PD 05-0107, approved for 15,000 sq. ft. of business-professional office. To the south and southeast is PD 19-0081, approved for 74 residential dwelling units on 5,000 sq. ft. lots. To the northeast is Residential Single-Family Conventional-3 (RSC-3).
- The property's existing use is a recreational golf course. To the south, southeast, and southwest are single-family detached homes. Further southwest is Saint Stephens Catholic Church and School. To the east is public/quasi-public institutions which contains the Hillsborough County South Central Water Pump Station. Further to the east is single-family detached housing. To the north of the property is the vacant land owned by the Tampa Bay Conservancy. Northeast is the western boundary of a large single-family detached home subdivision with frontage directly on Bell Shoals Road. To the east is public/quasi-public institutions which is owned by Hillsborough County and contains a large water retention pond.
- The applicant is requesting to rezone the subject site from Agricultural Rural (AR) to Planned Development (PD) to allow for 86 Townhomes with a density bonus and 20,000 sq. ft. of limited Commercial Neighborhood (CN) from two distinct use categories.
- The applicant is proposing to utilize bonus density for mixed-use developments that is outlined in FLUE Policy 19.3.

### **Compliance with Comprehensive Plan:**

The following Goals, Objectives, and Policies apply to this rezoning request and are used as a basis for a consistency finding.

### **FUTURE LAND USE ELEMENT**

### **Urban Service Area**

**Objective 1:** Hillsborough County shall pro-actively direct new growth into the urban service area with the goal that at least 80% of all population growth will occur within the USA during the

planning horizon of this Plan. Within the Urban Service Area, Hillsborough County will not impede agriculture. Building permit activity and other similar measures will be used to evaluate this objective.

**Policy 1.4:** Compatibility is defined as the characteristics of different uses or activities or design which allow them to be located near or adjacent to each other in harmony. Some elements affecting compatibility include the following: height, scale, mass and bulk of structures, pedestrian or vehicular traffic, circulation, access and parking impacts, landscaping, lighting, noise, odor and architecture. Compatibility does not mean "the same as." Rather, it refers to the sensitivity of development proposals in maintaining the character of existing development.

### Implementation of the Growth Management Strategy and Future Land Use Element

### Land Use Categories

**Objective 8:** The Future Land Use Map will include Land Use Categories which outline the maximum level of intensity or density and range of permitted land uses allowed and planned for an area. A table of the land use categories and description of each category can be found in Appendix A.

**Policy 8.1:** The character of each land use category is defined by building type, residential density, functional use, and the physical composition of the land. The integration of these factors sets the general atmosphere and character of each land use category. Each category has a range of potentially permissible uses which are not exhaustive, but are intended to be illustrative of the character of uses permitted within the land use designation. Not all of those potential uses are routinely acceptable anywhere within that land use category.

**Policy 8.2:** Each potential use must be evaluated for compliance with the goals, objectives, and policies of the Future Land Use Element and with applicable development regulations.

### Relationship to Land Development Regulations

**Objective 9:** All existing and future land development regulations shall be made consistent with the Comprehensive Plan, and all development approvals shall be consistent with those development regulations as per the timeframe provided for within Chapter 163, Florida Statutes. Whenever feasible and consistent with Comprehensive Plan policies, land development regulations shall be designed to provide flexible, alternative solutions to problems.

**Policy 9.1:** Each land use plan category shall have a set of zoning districts that may be permitted within that land use plan category, and development shall not be approved for zoning that is inconsistent with the plan.

**Policy 9.2:** Developments must meet or exceed the requirements of all land development regulations as established and adopted by Hillsborough County, the state of Florida and the federal government unless such requirements have been previously waived by those governmental bodies.

### Community Development and Land Uses

### Neighborhood/Community Development

**Objective 16: Neighborhood Protection:** The neighborhood is a functional unit of community development. There is a need to protect existing neighborhoods and communities and those that will emerge in the future. To preserve, protect and enhance neighborhoods and communities, all new development must conform to the following policies.

**Policy 16.2:** Gradual transitions of intensities between different land uses shall be provided for as new development is proposed and approved, through the use of professional site planning, buffering and screening techniques and control of specific land uses.

**Policy 16.3:** Development and redevelopment shall be integrated with the adjacent land uses through:

- a) the creation of like uses; or
- b) creation of complementary uses; or
- c) mitigation of adverse impacts; and
- d) transportation/pedestrian connections

**Policy 16.10:** Any density increase shall be compatible with existing, proposed, or planned surrounding development. Compatibility is defined as the characteristics of different uses or activities or design which allow them to be located near or adjacent to each other in harmony. Some elements affecting compatibility include the following: height, scale, mass and bulk of structures, pedestrian or vehicular traffic, circulation, access and parking impacts, landscaping, lighting, noise, odor and architecture. Compatibility does not mean "the same as." Rather, it refers to the sensitivity of development proposals in maintaining the character of existing development.

**Objective 17: Neighborhood and Community Serving Uses:** Certain non-residential land uses, including but not limited to residential support uses and public facilities, shall be allowed within residential neighborhoods to directly serve the population. These uses shall be located and designed in a manner to be compatible to the surrounding residential development pattern.

**Policy 17.7:** New development and redevelopment must mitigate the adverse noise, visual, odor and vibration impacts created by that development upon all adjacent land uses.

### Mixed Use Land Use Categories

**Objective 19:** All development in the mixed use categories shall be integrated and interconnected to each other.

**Policy 19.2:** In the mixed use land use categories, when two or more uses are required on the same project, then the development shall be implemented through a zoning district that demonstrates street connectivity, description of land uses, and site placement, access locations and internal connections at a minimum.

**Policy 19.3: Incentives for Mixed Use:** The following incentives are available to encourage mixed use and vertically integrated mixed use projects within the Urban Service Area:

 Parking structures shall not count towards the FAR for projects that include 3 or more land uses or vertically integrate two land uses.

PD 22-0075 4

- Projects that either include 3 or more land uses or vertically integrate two land uses may utilize a density bonus to the next higher land use category or the following FAR bonus:
  - Property with a Future Land Use Category of 35 units per acre and/or 1.00
     FAR and higher and within the USA – may increase up to 50 units and/or an
     additional .50 FAR
  - Property within a Future Land Use Category of 9 units per acre and/or .5 FAR and higher and within the USA – Increase in FAR by .25
  - Property within a Future Land Use Category of 4 units per acre and/or .25 FAR and higher and within the USA – Increase in FAR by .10
- When considering mixed use projects of 3 or more land uses, a different housing type (multi-family, attached single family or detached single family) may be considered as one of the uses.

### Commercial-Locational Criteria

**Objective 22:** To avoid strip commercial development, locational criteria for neighborhood serving commercial uses shall be implemented to scale new commercial development consistent with the character of the areas and to the availability of public facilities and the market.

**Policy 22.1:** The locational criteria for neighborhood serving non-residential uses in specified land uses categories will:

- provide a means of ensuring appropriate neighborhood serving commercial development without requiring that all neighborhood commercial sites be designated on the Future Land Use Map;
- establish a maximum square footage for each proposed neighborhood serving commercial intersection node to ensure that the scale of neighborhood serving commercial development defined as convenience, neighborhood, and general types of commercial uses, is generally consistent with surrounding residential character; and
- establish maximum frontages for neighborhood serving commercial uses at intersections ensuring that adequate access exists or can be provided.

**Policy 22.8:** The Board of County Commissioners may grant a waiver to the intersection criteria for the location of commercial uses outlined in Policy 22.2. The waiver would be based on the compatibility of the use with the surrounding area and would require a recommendation by the Planning Commission staff. Unique circumstances and specific findings should be identified by the staff or the Board of County Commissioners which would support granting a waiver to this section of the Plan. The Board of County Commissioners may reverse or affirm the Planning Commission staff's recommendation through their normal review of rezoning petitions. The waiver can only be related to the location of the neighborhood serving commercial or agriculturally oriented community serving commercial zoning or development. The square footage requirement of the plan cannot be waived.

### LIVABLE COMMUNITIES ELEMENT

### 1.0 Community and Special Area Studies

### Riverview Community Plan

### IV. Goals

The plan's vision is supported by the following thirteen goals (listed in priority order) with accompanying strategies:

### Goal 1 Achieve better design and densities that are compatible with Riverview's vision.

• Develop Riverview district-specific design guidelines and standards.

The standards shall build on recognizable themes and design elements that are reflective of historic landmarks, architecture and heritage of Riverview. The mixed-use, residential, non-residential and roadway design standards shall include elements such as those listed.

### Mixed Use-Commercial-Residential

- Incorporate traditional neighborhood development (TND) and Crime Prevention through Environmental Design (CPTED) techniques and principles in design standards.
- Develop visually pleasing sign standards that prohibit pole signs and require monument signs. It also is the desire of the community to limit or keep out any additional billboard signs.
- Avoid "strip" development patterns for commercial uses.
- Enhance the ability to walk or bike between adjoining commercial areas.
- Promote aesthetically pleasing subdivision entrances, formal and manicured landscapes and other amenities such as street furniture, public art, and creative paving techniques.
- Promote diversity in housing type and style to counter generic subdivision look.
- Provide appropriate and compatible buffers and transitions to existing, adjacent land uses particularly with agricultural operations and the lands acquired for preservation and/or open space.
- Require natural and attractive stormwater retention facilities, such as standards for gently sloping grass sides/banks and prohibiting hard (i.e. concrete, asphalt) surfaces and aeration techniques: screen and buffer ponds with natural vegetation or berms or at a minimum vinyl fencing with vines, prohibit plain exposed chain link fencing. Encourage master stormwater facilities.

### Transportation

- Develop distinctive roadway design and landscape standards for new developments and redevelopment projects that complement the community's uniqueness as well as encourage buffers to parking areas, water retention areas and sidewalks. Techniques may include landscaping, berming and median enhancements.
- Use standards for new and redeveloped projects that incorporate transit-friendly street design along bus routes (bus stops, bus bulges, bus lanes, etc.). such as those found in the Traditional Neighborhood Development (TND) Infill code.

### Miscellaneous

- Develop key design elements and landscape designs for local parks that would promote a unique sense of place and establish community landmarks.
- Improve drainage standards to enhance aesthetics and ensure adequate drainage prior to onsite development.
- In appropriate areas, as described in the District Map, identify and reduce residential densities in the Future Land Use Element.
- Consult with developers regarding residential site design and the creation of neighborhood character.
- Improve enforcement of all county land development codes.
- Goal 2 Reflect the vision of Riverview using the Riverview District Concept Map. The Riverview District Concept Map will illustrate the unique qualities and land uses related to distinct geographic areas identified as "districts".

The following specific districts are incorporated into the Riverview District Concept Map. Require future development and redevelopment to comply with the adopted Riverview District Concept Map.

- 1. **Hwy 301 Corridor** Provide a safe, attractive and efficient corridor system that contributes to the character and economic well-being of the community and provides a sense of arrival.
- 2. **Downtown** Focus and direct mixed-use development to create an aesthetically pleasing and pedestrian-friendly downtown.
- 3. **Riverfront** Recognize the historical, environmental, scenic, and recreational value of the Alafia River.
- 4. **Mixed Use** Focus and direct development toward walkable mixed-use town center locations throughout the community while respecting existing land use.
- 5. **Residential** Encourage attractive residential development that complements the surrounding character and promotes housing diversity.

PD 22-0075 7

- 6. **Industrial**—Attract employment centers and desirable industry with appropriate infrastructure in areas without conflicting with surrounding land use.
- 7. **Open Space** Build upon the county owned Boyette Scrub lands by acquiring lands from willing sellers.

## Goal 4 Provide safe, attractive, efficient multi-modal transportation, including vehicular, bicycle/pedestrian and transit.

- Protect the capacity of low-volume neighborhood and uncongested roads.
- Explore opportunities for constructing a bridge across the Alafia as an alternative north-south transportation route.
- Prioritize and improve major connector roadways and intersections to improve safety and efficiency concurrently as the community grows.
- Provide sidewalks, pedestrian crossings, bike lanes, and connections to the Hillsborough County Greenway and Trail Master Plan, and extend crossing signal times and use traffic calming techniques along major thoroughfares.
- Expand mass transit, such as more bus stops and routes and park and ride facilities.
- Diligently enforce traffic speed laws.
- Provide safe and efficient emergency evacuation routes.
- Continue to implement the Livable Roadways strategies and "Guidelines for Landscaping Hillsborough County Roadways" (or updated replacement documents) for enhancing the appearance of major roadways (such as Boyette Road, US 301, Riverview Drive and Balm-Riverview Road).
- Encourage increased participation in Keep Hillsborough County Beautiful Program (KHCB).
- Implement access management standards such as frontage roads, joint access points, rear lot access points, and managed turning movements.
- Discourage speeding and cut-through traffic by designing roadways with traffic calming measures and using appropriate design speeds to prevent implementation of reactive traffic calming techniques (i.e. speed humps) after construction).
- Coordinate with the Florida Department of Transportation and the County to ensure adequate notice, education and awareness of hazardous material truck and disposal routes and activities.
- Prepare and adopt a US Highway 301 Corridor Plan Overlay that also designates mixeduse town centers.

- Enhance the appearance of US Highway 301 with attractively landscaped medians, tree plantings, sidewalks and the provision of pedestrian-scale lighting.
- Establish east/west pedestrian crossings along US Highway 301 to facilitate access to retail opportunities and other destinations (i.e., library, school, neighborhoods). To this end, consider a pedestrian overpass and traffic calming techniques as options.
- Remove roadside vendors at busy intersections (Hwy. 301/Big Bend Road, Boyette Road and Balm Riverview Road).

# Goal 6 Prioritize the significance of improved quality, enjoyment, and protection of the Alafia River and other natural resources such as open space.

- Promote environmental education and awareness programs to promote water conservation, Florida Friendly landscaping techniques, and to protect water quality and environmental resources.
- Reduce to the extent possible Future Land Use Map densities and intensities along the Alafia River to maintain, preserve, and protect the environmental quality and wildlife habitat of the Alafia River and surrounding watershed.
- Protect the water quality and wildlife habitat associated with the Alafia watershed.

Support environmental agencies such as the Southwest Florida Water Management District and the Department of Environmental Protection in protecting and restoring shoreline integrity and river ecosystems.

### Staff Analysis of Goals, Objectives and Policies:

The 17.66 ± acre subject site is located at 12910 Boyette Road, north of Boyette Road and east of Carr Road, west of Bell Shoals Road and south of the Alafia River. The subject site is in the Urban Service Area (USA) and is within the limits of the Riverview Community Plan. The applicant is requesting to rezone the subject site from Agricultural Rural (AR) to Planned Development (PD) to allow 86 Townhomes and 20,000 sq. ft. of limited Commercial Neighborhood (CN) uses from distinct use categories.

The request complies with Future Land Use Element (FLUE) Objective 1, which requires development to be directed into the Urban Service Area. Objective 8 emphasizes consistency with the maximum permitted density and intensity per the future Land Use category and consistency with the character of each land use category. The subject site is in the Residential-4 (RES-4) Future Land Use (FLU) Category. The RES-4 FLU surrounds the property and allows residential, suburban scale neighborhood commercial, office uses, and multi-purpose projects. Non-residential uses will need to meet locational criteria for specific land uses and agricultural uses may be permitted pursuant to policies in the agricultural objective areas of the Future Land Use Element. The RES-4 FLU category allows up to a maximum of four (4) dwelling units an acre and suburban scale neighborhood commercial, office, multi-purpose or mixed-use projects are limited to 175,000 sq. ft. or 0.25 FAR, whichever is less intense.

The area is mostly composed of residential single-family. However, there are a few parcels with office and residential support uses at the northwest, northeast and south of the Carr Road and Boyette Road intersection. The property's existing use is a recreational golf

course. To the south, southeast, and southwest are single-family detached homes. Further southwest is Saint Stephens Catholic Church and School. To the east is public/quasi-public institutions which contains the Hillsborough County South Central Water Pump Station. Further to the east is single-family detached housing. To the north of the property is the vacant land owned by the Tampa Bay Conservancy. Northeast is the western boundary of a large single-family detached home subdivision with frontage directly on Bell Shoals Road. To the east is public/quasi-public institutions which is owned by Hillsborough County and contains a large water retention pond.

The proposed development is consistent with Policy 1.4 and Policy 8.1, which requires compatibility with the surrounding uses. The request is surrounded by detached residential to the northeast and southeast, and a large preservation area is located to the north. A school is located directly across the street on the south side of Boyette. Directly abutting the site to the west is a Public Institutional use that borders a large portion of the subject site on the western boundary.

Policy 9.1 indicates that a proposed zoning must be consistent with the Future Land Use category. The PD zoning district is intended for design flexibility in cases where standard district regulations are inadequate to protect surrounding property. The intent of these districts is to encourage creative, innovative, and/or mixed-use development, and to ensure and promote land use compatibility and harmony for land that is to be planned and developed in a single development operation or a programmed series of development phases.

The proposed development is consistent with FLUE Objective 8, which requires consistency with the Future Land categories maximum densities and intensities. The applicant's site plan indicates a Floor Area Ratio (FAR) of 0.19, which is below the maximum 0.25 FAR per the RES-4 FLU category. The applicant's proposed density of six (6) dwelling units to the acre (du/ac), exceeds that permitted of the RES-4 FLU category. However, the applicant is proposing a mixed-use development that will utilize bonus density outlined in FLUE Policy 19.3. A condition has been placed on the proposed development to ensure all three uses are developed to comply with the bonus density criteria. FLUE Policy 16.10 refers to the compatibility of density increases, and Goal 6 of the Riverview Community plan seeks to protect the Alafia River. The Alafia River is to the north of the property, adjacent to the preservation area and does not abut the property. The property does contain a small portion of Coastal High Hazard Area (CHHA) in the northeast corner and no development is proposed in this location. Commercial neighborhood (CN) uses have been proposed for the non-residential portion of the development, to help meet the density bonus provisions under FLUE Policy 19.3. The applicant proposes to limit the CN uses to help achieve consistency with FLUE Policy 16.3 by protect the surrounding residential and natural preservation use. Furthermore, nonresidential is limited to the southern portion of the property as depicted on the proposed site plan. Residential is limited to the northern portion of the property and no setback reductions have been proposed adjacent to the natural preservation areas.

The proposed request is consistent with Objective 16 and Policy 16.3 which refers to the protection of existing neighborhoods protection. As previously mentioned, the area is mostly single-family detached residential with residential support uses and a preserve area. The proposed mix of uses will complement the area and blend architecturally. The applicant is committed to limiting the height to one-story and to an architectural finish on all four sides with a residential like appearance. The applicant has stated in the narrative

that the minimum lot size for the townhomes will be 1,620 square feet, with a maximum height of 35 feet. A waiver to the setback is requested only on the west side of the property and Planning Commission staff sees no compatibility issues as the adjacent use is public institutional. No other setbacks reductions have been requested.

The subject site does not meet the Commercial Locational Criteria (CLC) of Objective 22 and FLUE Policies 22.1 and 22.8. The site is located west and approximately 2,500 linear feet from the intersection of Boyette Road and Bell Shoals Road, the nearest qualifying intersection. The applicant has requested a waiver to CLC with an accompanying justification. The applicant states that the proposed commercial uses are part of a mixed-use development and the proposed CN uses are limited. Furthermore, the applicant proposes to limit the size of each use to no greater than 5,000 sq. ft. for most uses and up to 10,000 sq. ft. for specific uses such as medical office or a specialty food store. The proposed list of uses has been thoroughly reviewed and selected to help compliment the surrounding area, it is not intended to introduce intensive retail uses. Staff recommends approval of the waiver to CLC.

The Community Design Component (CDC) in the Future Land Use Element of the Comprehensive Plan contains policy direction about designing developments that relate to the predominant character of the surroundings (CDC Goal 12). It further states that new developments should recognize the existing community and be designed in a way that is compatible with the established character of an area (CDC Objective 12-1). A recent site visit indicates that this area is low-density in nature and commercial is concentrated the intersection of Boyette Road and Carr Road. However, the proposed uses are relatively passive commercial uses that would not intensify the area.

Objective 19 and Policy 19.2 indicates that a mixed-use development must be integrated. Policy 16.2 requires the gradual transition between uses. The applicant's site plan shows the commercial buildings are in the southern portion of the property facing south towards Boyette Road. The proposed site plan shows an integrated design to the residential located on the northern portion of the property and a gradual transition from the natural preservation area to the north and east, consistent with policy direction.

The request also meets Goal 1 of the Riverview Community Plan, which strives to achieve better design and densities compatible with Riverview vision. The intent of this policy is to avoid commercial strip patterns, require and maintain appropriate buffering to preservation and open space none of which the proposed request accomplishes. Furthermore, Goal 4 refers to the protection and maintain of low volume roads. The proposed mix-use development with the limited CN uses would complement the area and could provide residential support uses.

### Recommendation

Based upon the above considerations, the Planning Commission staff finds the proposed Planned Development **CONSISTENT** with the *Hillsborough County Comprehensive Plan*, subject to the conditions proposed by the Development Services Department.

### AGENCY REVIEW COMMENT SHEET

REVIEW	ng Technician, Development Services Department /ER: Alex Steady, Senior Planner NG AREA: RV/South	DATE: 03/30/2022 AGENCY/DEPT: Transportation PETITION NO: PD 22-0075
	This agency has no comments.	
	This agency has no objection.	
X	This agency has no objection, subject to the listed or attached conditions.	
	This agency objects for the reasons set forth below.	

### **CONDITIONS OF APPROVAL**

- The developer shall be permitted one (1) full connection to Boyette Road.
- The unutilized driveway aprons shall be removed; and curbing and grass strip restored to meet typical standards.
- Notwithstanding anything herein these conditions or on the PD site plan to the contrary, bicycle and pedestrian access may be permitted anywhere along the PD boundary.
- The developer shall extend the existing eastbound left turn lane into the project on Boyette Rd with the initial increment of development.
- As Boyette Road is included in the Hillsborough County Corridor Preservation Plan as a future 6-lane improvement, the developer shall designate 8 feet of right of way preservation along the project frontage on Boyette Road. Building setbacks shall be calculated from the future right-of-way line.

### OTHER CONDITIONS:

 Prior to site plan certification, the applicant shall revise site plan to add a label along the project frontage on Boyette Road that states "+/-8 FEET OF ROW PRESERVATION TO BE PROVIDED ALONG BOYETTE ROAD PER HILLSBOROUGH COUNTY CORRIDOR PRESERVATION PLAN "

### PROJECT SUMMARY AND ANALYSIS

The applicant is requesting to rezone the  $\pm$ -18-acre site from Agricultural (AR) to PD to construct 86 townhomes and a maximum of 20,000 square feet of Retail/Commercial and Office uses. The site currently operates as private multi-use recreational facility with a miniature golf course, driving range and batting cages. The site is located on Boyette Rd., approximately  $\pm$ -1,300 feet east of Carr Rd. The Future Land Use designation of the site is Residential – 4 (R-4).

## Trip Generation Analysis

The applicant submitted a trip generation and site access analysis as required by the Development Review Procedures Manual (DRPM). Staff has prepared a comparison of the trips potentially generated under the existing and proposed zoning designations, utilizing a generalized worst-case scenario. Data presented below is based on the Institute of Transportation Engineer's Trip Generation Manual, 10<sup>th</sup> Edition.

Approved Zoning:

Zoning, Land Use/Size	24 Hour	Total Peak Hour Trips	
3,	Two-Way Volume	AM	PM
AR: Mini-Golf (ITE 431)	60*	0	6
AR: Golf Driving Range (ITE 432)	410	12	38
AR: Batting Cage (ITE 433)	160*	0	16
Total Trips	630	12	60

<sup>\*</sup>Estimated based on PM peak hour trips.

**Proposed Zoning:** 

Zoning, Land Use/Size, ITE Code	24 Hour	Total Peak Hour Trips	
ζ,	Two-Way Volume	AM	PM
PD: 5,000 sf Apparel Store (ITE 876)	332	5	21
PD:4,500 sf Fast Food Restaurant without Drive Through Window (ITE 933)	1,558	113	128
PD: 86 Town Homes (ITE 220)	630	40	48
PD: 100 Student Daycare (ITE 565)	409	78	79
Total Trips	2,929	236	276
Internal Capture	N/A	12	44
Pass-By Trips	N/A	2	0
Net Trips	2,929	224	232

**Trip Generation Difference:** 

	24 Hour	Total Peak	Hour Trips
	Two-Way Volume	AM	PM
Difference (+/-)	+2,299	+212	+172

The proposed rezoning will result in an increase of trips potentially generated by 2,299 daily trips, 212 AM peak hour trips and 172 PM peak hour trips.

#### TRANSPORTATION INFRASTRUCTURE SERVING THE SITE

Boyette Rd. (between Balm Riverview Rd. and Bell Shoals Rd.) is a 4-lane, divided, collector roadway in good condition. Boyette Rd. is characterized by +/- 12-foot wide travel lanes lying within +/- 127ft of right-of-way. There are +/- 5-foot sidewalks and +/- 4-foot wide bicycle facilities along both sides of Boyette Rd. in the vicinity of the proposed project.

#### HILLSBOROUGH COUNTY CORRIDOR PRESERVATION PLAN

Boyette Rd. is shown on the Hillsborough County Corridor Preservation Plan as a future 6-lane roadway. The site plan indicates that the right of way on Boyette is 127 feet. According to the Hillsborough County Transportation Technical Manual, a TS-6 4 lane divided roadway with two 11-foot additional travel lanes would total 134 feet of right of way. Adding the existing right turn lane would total 143 feet required for the planned improvement. Subtracting out the existing roadway and dividing evenly for each side of the roadway, a total of 8 additional feet of ROW is required for preservation along the subject frontage on Boyette Road.

#### **SITE ACCESS**

The project has a single access on Boyette Rd at a signalized intersection aligning with Sedgebrook Drive and served by an existing 270ft left turn lane. The internal driveway serves the commercial neighborhood uses in Parcel 2. The residential tract is separated from the other uses by a +/-160 ft TECO easement that will remain undeveloped with the exception of the driveway access. The proposed gated entry option to the residential tract will be located outside of the TECO easement as shown on the PD site plan.

Based on the applicant's site access analysis, the existing eastbound left turn lane should be extended to 365 feet to accommodate the peak season plus project traffic. A westbound right turn lane is not warranted.

#### **LEVEL OF SERVICE (LOS)**

Level of Service (LOS) information is reported below.

FDOT Generalized Level of Service

REOUESTED ZONING: PD	REQUESTED ZONING: PD				

FINDINGS

WETLANDS PRESENT
YES

SITE INSPECTION DATE
NA

WETLAND LINE VALIDITY
NA

WETLANDS VERIFICATION (AERIAL PHOTO, SOILS SURVEY, EPC FILES)

Ditch near eastern boundary and wetland along northern boundary.

The EPC Wetlands Division has reviewed the proposed rezoning. In the site plan's current configuration, a resubmittal is not necessary. If the zoning proposal changes and/or the site plans are altered, EPC staff will need to review the zoning again. This project as submitted is conceptually justified to move forward through the zoning review process as long as the following conditions are included:

- Approval of this zoning petition by Hillsborough County does not constitute a guarantee that the Environmental Protection Commission of Hillsborough County (EPC) approvals/permits necessary for the development as proposed will be issued, does not itself serve to justify any impact to wetlands, and does not grant any implied or vested right to environmental approvals.
- The construction and location of any proposed wetland impacts are not approved by this correspondence, but shall be reviewed by EPC staff under separate application pursuant to the EPC Wetlands rule detailed in Chapter 1-11, Rules of the EPC, (Chapter 1-11) to determine whether such impacts are necessary to accomplish reasonable use of the subject property.
- Prior to the issuance of any building or land alteration permits or other development, the approved wetland / other surface water (OSW) line must be incorporated into the site plan. The wetland/ OSW line must appear on all site plans, labeled as "EPC Wetland Line", and the wetland

must be labeled as "Wetland Conservation Area" pursuant to the Hillsborough County Land Development Code (LDC).

• Final design of buildings, stormwater retention areas, and ingress/egresses are subject to change pending formal agency jurisdictional determinations of wetland and other surface water boundaries and approval by the appropriate regulatory agencies.

#### **INFORMATIONAL COMMENTS:**

The following specific comments are made for informational purposes only and to provide guidance as to the EPC review process. However, future EPC staff review is not limited to the following, regardless of the obviousness of the concern as raised by the general site plan and EPC staff may identify other legitimate concerns at any time prior to final project approval.

- The subject property contains wetland/OSW areas, which have not been delineated. Knowledge of the actual extent of the wetland and OSW are necessary in order to verify the avoidance of wetland impacts pursuant to Chapter 1-11. Prior to the issuance of any building or land alteration permits or other development, the wetlands/OSWs must be field delineated in their entirety by EPC staff or Southwest Florida Water Management District staff (SWFWMD) and the wetland line surveyed. Once delineated, surveys must be submitted for review and formal approval by EPC staff.
- The site plan depicts wetland impacts that have not been authorized by the Executive Director of the EPC. The wetland impacts are indicated for ponds. Chapter 1-11, prohibits wetland impacts unless they are necessary for reasonable use of the property. Staff of the EPC recommends that this requirement be taken into account during the earliest stages of site design so that wetland impacts are avoided or minimized to the greatest extent possible. The size, location, and configuration of the wetlands may result in requirements to reduce or reconfigure the improvements depicted on the plan. If you choose to proceed with the wetland impacts depicted on the plan, a separate wetland impact/mitigation proposal and appropriate fees must be submitted to this agency for review.
- The Hillsborough County Land Development Code (LDC) defines wetlands and other surface
  waters as Environmentally Sensitive Areas. Pursuant to the LDC, wetlands and other surface waters
  are further defined as Conservation Areas or Preservation Areas and these areas must be designated
  as such on all development plans and plats. A minimum setback must be maintained around the
  Conservation/Preservation Area and the setback line must also be shown on all future plan
  submittals.
- Any activity interfering with the integrity of wetland(s) or other surface water(s), such as clearing, excavating, draining or filling, without written authorization from the Executive Director of the EPC or authorized agent, pursuant to Section 1-11.07, would be a violation of Section 17 of the Environmental Protection Act of Hillsborough County, Chapter 84-446, and of Chapter 1-11.

## **Adequate Facilities Analysis: Rezoning**

**Date:** 1/6/2022 **Acreage:** 17.66 (+/- acres)

Jurisdiction: Hillsborough County Proposed Zoning: Planned Development

Case Number: RZ 22-0075 Future Land Use: Residential-4

HCPS #: RZ-419 Maximum Residential Units: 86 Units

Address: 12910 Boyette Rd., Riverview, 33569 Residential Type: Single-Family Attached

Parcel Folio Number(s): 076763-1500

School Data	Boyette Springs Elementary	Rodgers Middle	Riverview High
FISH Capacity  Total school capacity as reported to the Florida Inventory of School Houses (FISH)	1019	1207	2568
<b>2020-21 Enrollment</b> K-12 enrollment on 2021-22 40 <sup>th</sup> day of school. This count is used to evaluate school concurrency per Interlocal Agreements with area jurisdictions	754	1146	2516
Current Utilization Percentage of school capacity utilized based on 40 <sup>th</sup> day enrollment and FISH capacity	74%	95%	98%
Concurrency Reservations Existing concurrency reservations due to previously approved development. Source: CSA Tracking Sheet as of 1/6/2022	191	204	97
Students Generated Estimated number of new students expected in development based on adopted generation rates. Source: Duncan Associates, School Impact Fee Study for Hillsborough County, Florida, Dec. 2019	10	5	7
Proposed Utilization School capacity utilization based on 40 <sup>th</sup> day enrollment, existing concurrency reservations, and estimated student generation for application	94%	112%	102%

**Notes:** Rodgers Middle and Riverview High School are projected to be over capacity given current reservations and the estimated impact of the proposed development. In these cases, state law requires the school district to consider whether additional capacity exists in adjacent concurrency service areas (i.e., school attendance boundaries). At this time, additional capacity at the middle and high school levels exists in adjacent service areas to accommodate the proposed project.

This is an analysis for adequate facilities only and is NOT a determination of school concurrency. A school concurrency review will be issued PRIOR TO preliminary plat or site plan approval.

#### AGENCY COMMENT SHEET

TO: Zoning/Code Administration, Development Services Department

FROM: **Reviewer:** Carla Shelton Knight **Date:** January 9, 2023

**Agency:** Natural Resources **Petition #:** 22-0075

- ( ) This agency has **no comment**
- ( ) This agency has **no objections**
- (X) This agency has **no objections**, subject to listed or attached conditions
- ( ) This agency objects, based on the listed or attached issues.
- 1. An evaluation of the property supports the possibility that listed animal species may occur or have restricted activity zones throughout the property. Pursuant to the Land Development Code (LDC), a wildlife survey of any endangered, threatened or species of special concern in accordance with the Florida Fish and Wildlife Conservation Commission Wildlife Methodology Guidelines shall be required. This survey information must be provided upon submittal of the preliminary plans through the Land Development Code's Site Development or Subdivision process. Essential Wildlife Habitat as defined by the LDC must be addressed, if applicable, in consideration with the overall boundaries of this rezoning request. This statement should be identified as a condition of the rezoning.
- 2. The planting of required trees shall be sensitive to overhead electric utility lines. Trees that exceed a mature, overall height of 20 feet shall not be planted within 30 feet of an existing or proposed overhead electric utility line. This statement should be identified as a condition of the rezoning.
- 3. Wetlands or other surface waters are considered Environmentally Sensitive Areas and are subject to Conservation Area and Preservation Area setbacks. A minimum setback must be maintained around these areas which shall be designated on all future plan submittals. Proposed land alterations are restricted within the wetland setback areas. This statement should be identified as a condition of the rezoning.

- 4. Approval of this petition by Hillsborough County does not constitute a guarantee that Natural Resources approvals/permits necessary for the development, as proposed, will be issued, does not itself serve to justify any impacts to trees, natural plant communities, or wildlife habitat, and does not grant any implied or vested right to environmental approvals.
- 5. The construction and location of any proposed environmental impacts are not approved by this correspondence, but shall be reviewed by Natural Resources staff through the site and subdivision development plan process pursuant to the Land Development Code.
- 6. If the notes and/or graphics on the site plan are in conflict with specific zoning conditions and/or the Land Development Code (LDC) regulations, the more restrictive regulation shall apply unless specifically conditioned otherwise. References to development standards of the LDC in the above stated conditions shall be interpreted as the regulations in effect at the time of preliminary site plan/plat approval.

COMMENTS: The subject rezoning includes parcels that are within the Urban Service Area and would require connection to the County's potable water and wastewater systems

## Statement of Record

The South County service area (generally south of the Alafia River) has seen significant customer growth over the recent past. As new customers are added to the system there is an increased demand for potable water that is causing delivery issues during certain periods of the year. The greatest demand for water occurs during the spring dry season, generally the months of March through May. During the dry season of 2021 the Water Resources Department was challenged to deliver water to the southern portions of the service area to meet customer expectations for pressure and flow. While Levels of Service per the Comprehensive Plan were met, customers complained of very low pressure during early morning hours. Efforts to increase flow and pressure to the south resulted in unacceptably high pressures in the north portions of the service area. The Florida Plumbing Code limits household pressure to 80 psi to prevent damage to plumbing and possible injury due to system failure. The Department had to balance the operational challenges of customer demand in the south with over pressurization in the north, and as a result, water pressure and flow in the South County service area remained unsatisfactory during the dry period of 2021.

As a result of demand challenges, the Department initiated several projects to improve pressure and flow to the south area. Two projects currently under construction CIP C32001 - South County Potable Water Repump Station Expansion and CIP C32011 - Potable Water In-Line Booster Pump will increase the delivery pressure to customers.

These projects are scheduled to be completed and operational prior to the 2022 dry season, and must demonstrate improved water delivery through the highest demand periods before additional connections to the system can be recommended.

# VERBATIM TRANSCRIPT

HILLSBOROUGH COUNTY, FLORIDA BOARD OF COUNTY COMMISSIONERS
X ) IN RE: ) ZONE HEARING MASTER ) HEARINGS )X
ZONING HEARING MASTER HEARING TRANSCRIPT OF TESTIMONY AND PROCEEDINGS
BEFORE: SUSAN FINCH Land Use Hearing Master
DATE: Tuesday, January 17, 2023
TIME: Commencing at 6:04 p.m. Concluding at 11:35 p.m.
Reported via Cisco Webex Videoconference by: Diane DeMarsh, CER No. 1654

```
1
                         The first item is Agenda Item B.1 Rezoning
             MR. GRADY:
 2
    PD 22-0075. The applicant is MatMattamy Tampa/Sarasota, LLC.
    The request is to rezone from AR to a planned development.
 3
    was our case that was remanded and heard previously by you.
    Israel Monsanto will provide staff recommendation after
    presentation by the applicant. Before we go to applicant
    presentation, Cameron Clark with the County Attorney's Office
    just has a brief statement he'd like to make.
 8
              MR. CLARK: Yes. Madam Hearing Officer, there's a
 9
    letter in the record that was submitted just today from Attorney
10
    Jane Graham who is objecting to this hearing going forward and
11
    wished to address that objection at the start of today's
12
13
             It's understand Ms. Graham is here representing
14
    opponents.
15
              Looking at the reasons behind the objection, the
    substantive one was the allegation that the hearing initially
16
17
    violated the six monthly window where it has to go to hearing
18
    within the first six months of the initial hearing date or it's
    withdrawn. In conferring with staff, that did not in fact
19
20
    happen. Although I note in the record, that the initial hearing
21
    date was set January 18 of 22 and Ms. Graham concluded that it
22
    should have been withdrawn by June. That's actually five
23
    months, it would be July would be six months from the hearing
           It actually was heard in July of '22. Staff determined
24
    it was in order for that. It ultimately went back to the Board
25
```

and it was remanded, which resets the six month window for 1 2 withdrawal. There's also an objection of the fact that Planning 3 Commission Staff and Development Services Staff changed the recommendation in their reports, but there's nothing in the Land Development Code that requires the reports after a remand to be The staff can always reanalyze them. There's not a the same. final decision on these applications until they go to the Board 8 9 and they're voted on at that time. So that being said, I don't think there's any -- I've 10 looked at this and I don't find there's any reason for anything 11 12 to be heard before the hearing. On this, Ms. Graham, of course, is able to testify at the appropriate time during the hearing. 13 14 Thank you. 15 HEARING MASTER: All right. Thank you for that clarification. We'll call for the applicant. Good evening. 16 MS. CORBETT: Good evening. Kami Corbett with the law 17 firm of Hill, Ward and Anderson. And wow, it's good to be back. 18 19 It's been a long time. Nice to see everyone. I saw med people 20 for the first time this evening that -- I had seen on screen 21 only. 22 Representing Mattamy Homes this evening is -- staff 23 indicated this is a remanded application. It was remanded essentially at the request of the applicant, which the Board 24 granted as opposed to a remand that perhaps the Board heard and 25

wanted to remand back for additional information.

1

21

22

23

24

25

2 As you may recall, we presented our full planning presentation transportation environmental cases at that time. 3 We're not going to repeat that. All of that remains the same. The one thing that is different, as you recall, when we came and testified last time, we had a disagreement with Staff on the one of the -- one of the conditions relating to the timing mechanism associated with providing the three uses on the site. And we 8 actually came forward with a condition that didn't quite capture the spirit of that either. We took your comments to heart on 10 11 that and did decide to remand and work with Staff and come up with a condition. And in that conditions are reflected in 12 13 Condition 1.4 and 1.5 in the Staff Report. And we are in 14 agreement with them. We also codified our condition regarding 15 the wetlands planting, the additional wetlands plantings that we proffered at the last hearing. And are two -- only changes to 16 this applications since you last heard it, other than some 17 18 additional letters of opposition in the record from some people expressing generalized concerns about traffic, but not specific, 19 20 anything related specific to the development itself.

Ms. Graham also submitted into a -- the record a letter asserting that this rezoning was inconsistent with the Riverview Committee Plan, which specifically addresses densities along the Alafia River. This property is not along the Alafia River and therefore that policy is not applicable. And I

think Staff accurately analyze that in their Staff Report. 1 And with that, unless you have any questions of us, we're not going provide additional testimony or direct testimony 3 and we reserve any time for rebuttal. HEARING MASTER: No. No questions. I've read the Staff Report and the reasons as -- as well as your revised conditions, so thank you so much. If you could please sign in with the Clerk's office. Development Services. Good evening. MR. MONSANTO: Good evening. Israel Monsanto, 9 Development Services. As the applicant stated, this case was 10 11 presented at the July 23, 2022 Zoning Hearing Master Hearing. In order to build more than 57 residential units and exceed the 12 13 density of four dwelling units per the acre in Parcel 1, the 14 applicant proposed a mixed use project. In conversations with 15 Planning Commission staff, the applicant had proposed and 16 committed to a timing mechanism that would quarantee the 17 development of all proposed uses, residential in Parcel 1 and 18 non-residential in Parcel 2, and comply with the mixed use Objectives and Policies from -- from the Comprehensive Plan 19 20 Objective 19 and Policy 19.2 for the integration of mixed-use 21 developments. 22 A condition was proposed stating that prior to the 23 issuance of any Certificate of Occupancy for 50 -- for 58 or more residential units, two of the non-residential 24 uses listed in the Group lists need be constructed with a 25

Certificate of Occupancy issued. At the July hearing, the
applicant submitted a modification to this condition to require
that prior to the issuance of any building permits for 58
dwelling units or more, the road and utility infrastructure,
north south entry road with sidewalks and pedestrian connections
and utility stub outs necessary to service Parcel 2, to be
constructed and Certificate of Completion issued.

The applicant also proposed to remove the to use as being required from the two use groups and also the minimum size required for buildings from the non-residential parcel. This modification of the condition will not require two of the non-residential uses listed in Group lists to be constructed with a Certificate of Occupancy issued prior to the issuance of any Certificate of Occupancy for 58 or more residential units.

So Staff from the Planning Commission and Development
Services could not amend the reports of the hearing due to the
nature of the changes and the case remains scheduled for the
Board Land Use Meeting. Also, to clarify, Staff had filed a
report finding the case consistent and (inaudible) the
conditions. The new changes proposed by the applicant at that
Zoning Hearing Master in July would not be found consistent with
the Comprehensive Plan.

At the Board Land Use Hearing on October -- on October 11th, the case was remanded by -- to the Zoning Hearing Master hearing. This would allow the evaluation by Staff of the

proposed modification to the condition with the timing mechanism for the development of the two parcel -- two project Parcels.

As part of this remand, the condition pertaining to the timing mechanism for the development of the Parcel 1 will require, again, that prior to the issuance of any building permits for 58 dwelling units or more, the road and utility infrastructure going north south with the sidewalks and pedestrian connections and also utility stub outs serving -- serving Parcel 2 will have to be constructed and Certificate of Completion issued.

The new condition will still require that Parcel 2 be developed with two non-residential uses from two different use Groups and each -- each use will have a minimum of 2,500 square feet of building space. So that condition -- those two conditions remain in the proposed conditions.

Additionally, the applicant commits that in order to demonstrate that Parcel 2 will have adequate land area to accommodate two non-residential uses and related parking, open space, etcetera, if Parcel 2 is developed in more than one phase, a Prelim -- Preliminary Site Development Plan will be required to be submitted for site development review and approval. This plan will need to include the use -- the use proposed as Phase 1 along with the most intense use from a different Group list as Phase 2.

Planning Commission and Development Services Staff

have reviewed these changes in the conditions. The Planning 1 Commission -- I'm sorry, the condition will still ensure that 2 the project be developed with three different uses and be reviewed in accordance with site development regulations established by the -- established by the Land Development Code. Planning Commission has found then consistent with the 6 Comprehensive Plan. The applicant also proposes to provide landscaping and 8 native species vegetation along the floodplain compensation 9 slope areas, subject to review and approval by the County 10 Stormwater review section. All other conditions have remained 11 the same. No changes to the -- to the design, the building 12 13 design. We received no objection from other reviewing agencies. 14 And I'm available if you have any questions. 15 HEARING MASTER: No questions. I appreciate the clarification in this Staff Report regarding the remand. Thank 16 17 you so much. 18 MR. MONSANTO: Thank you. HEARING MASTER: All right. Planning Commission. 19 20 MS. MASSEY: Good evening Madam Hearing Officer. This 21 is Jillian Massey with the Planning Commission Staff. 22 The subject property is located in the Residential-4 23 Future Land Use category. It's in the urban service area and within the limits of the Riverview Community Plan. The subject 24 site is surrounded by Residential-4 Future Land Use category on 25

all sides and allows consideration of up to four dwelling units 1 per acre. Suburban scale neighborhood commercial office, multi-purpose and mixed-use projects, which are limited to a 3 175,000 square feet or 0.25, whichever is less intent. The applicant site plan indicates a floor area ratio of 0.19, which is below the maximum of 0.25 FAR per their Residential-4 Future Land Use category. The applicants proposed density of six dwelling units to the acre exceeds the 8 permitted -- permitted of the Residential-4. However, the 9 applicant is proposing a mixed use development that will utilize 10 the -- the density bonus outlined in the Future Land Use Element 11 Policy 19.3. 12 13 Commercial neighborhood uses have been proposed for 14 the non-residential portion of the development to help meet the 15 density bonus provisions under the Policy 19.3. The applicant proposes to limit the commercial neighborhood uses to help 16 17 achieve consistency with this -- with the Policy 16.3 by 18 protecting the surrounding residential and natural preservation Furthermore, non-residential is limited to the southern 19 use. 20 portion of the property as depicted on the proposed site plan. 21 Residential is limited to the northern portion of the property and no setback reductions have been proposed adjacent to the 22 23 natural preservation areas. The site does not meet commercial locational criteria 24 25 of Objective 22 of the Future Land Use Element. The site is

located west in approximately 2,500 linear feet from the 1 intersection of Boyette Road and Bell Shoals Road, nearest qualifying intersection. However, the applicant has requested a waiver of the commercial locational criteria within a company justification. The proposed list of uses has been thoroughly reviewed and selected to help complement the surrounding area and it is not intended to introduce intensive retail uses. Staff 8 recommends approval of the waiver to the commercial locational 9 Objective 19 and Policy 19.2 states that a mixed use 10 11 development must be integrated. Policy 16.2 requires a gradual 12 transition between uses. The proposed site plan shows an 13 integrated design to the residential located on the northern 14 portion of the property and a gradual transition from the 15 natural preservation area to the north and east consistent with 16 this policy direction. 17 The request also meets Goal One of the Riverview 18 Community Plan which strives to achieve better design and densities compatible with the Riverview vision. And based upon 19 these considerations, the Planning Commission Staff finds the 20 21 proposed land development consistent with the Unincorporated 22 Hillsborough County Comprehensive Plan subject to the conditions 23 proposed by the Development Services Department. 2.4 HEARING MASTER: Thank you so much. I appreciate it. 25 All right. We'll go to proponents. Is there anyone who would

like to speak in favor of this application, either in the room 1 or online? I see no one. No one online. Okay. Opponents, how many people would like to speak? If you could just raise your hand. So I have four people in the room. Is there anyone online that would like to speak? UNIDENTIFIED SPEAKER: Yes, we do have one online. HEARING MASTER: One online. So let's say we'll do three and a half minutes each. To try to keep it fair, Michael, if you could divide the time, the 15 minutes. 9 UNIDENTIFIED SPEAKER: I apologize, we have two 10 11 online. Two online. HEARING MASTER: All right. So we're down to three. 12 13 Let's do three minutes a piece. And if you could try to keep 14 your comments to that, I'd appreciate it. 15 Let's start with those in the room, if you wanted to speak first. And if you could start by giving us your name and 16 address please. Good evening. 17 18 MS. GRAHAM: Good evening, Ms. Finch. My name is 19 Jane Graham. I'm an attorney at Sunshine City Law. I represent Mr. James Anderson, an effective party who lives at 10514 20 21 Sedbrook (Phonetically) Drive. He opposes this application and 22 requests that you deny it. First, and I won't get into this, I 23 do have a letter explaining the objection, as to the remand. I'd like to enter that into the record. 24 Tonight, we -- you're going to hear from a number of 25

people that will explain why this application fails to meet the 1 rezoning criteria with competent substantial evidence under 10.03.03.E. Notably, and this was already referenced, comprehensive -- in the Comprehensive Plan, it's inconsistent. Goal 6 intends to reduce density along the Alafia River. is actually asking to increase it. Bell Creek is a tributary of the Alafia River, which is only a number of feet away on the northern border of this property. And you will see photographic 8 evidence tonight from people that will show that. 9 You will also hear from people who will speak to the 10 11 incompatibility of the surrounding neighboring uses, speaking to specific observations of traffic and specific observations as to 12 13 the -- the Land Use compatibility and area. I'd like to call up 14 Mr. James Anderson, who can provide some photos into the record, 15 if I may. 16 HEARING MASTER: Absolutely. 17 MS. GRAHAM: Thank you. Thank you. Good evening. 18 Could you please state your name for the record? 19 Sure. My name is James Anderson. MR. ANDERSON: 20 have a voice disorder. My address is 105146 Brook Drive and 21 it's in Riverview, Florida --22 MS. GRAHAM: Thank you. 23 MR. ANDERSON: -- 33569. MS. GRAHAM: And you took these -- is there a way to 24 share these pictures? 25

HEARING MASTER: Yes. Right next to you is an 1 2 overhead. 3 MS. GRAHAM: Oh. You took this picture? MR. ANDERSON: I did. So what we have is traffic 4 coming from Boyetta Elementary School. In the morning, it comes out Boyette on Tarragon. In the evening, it backs up on Boyette all the way to Saint Stephens Catholic Church, sometimes further, which effectively blocks parts of Boyette when the 8 schools release. 9 MS. GRAHAM: Okay. And so when you say that it's 10 11 already an issue that could get further aggravated? MR. ANDERSON: It will. So the additional traffic of 12 13 2,299 cars coming out accross from Sedbrook Drive, which is 14 where Boyetta Elementary is, is just going to make that traffic 15 a lot worse. It's already there. 16 MS. GRAHAM: And James, what is this photo? 17 MR. ANDERSON: Okay. That's a photo -- there's a 18 distance at that location of about 50 or 60 feet from the Ace Golf to Bell Creek. 19 20 Ms. GRAHAM: Okay. 21 MR. ANDERSON: And the bridge is the bridge that goes across Bell Creek. 22 23 MS. GRAHAM: And that is connected to the Alafia River? 2.4 25 MR. ANDERSON: Correct.

MS. GRAHAM: Okay. And what is that? 1 MR. ANDERSON: Okay. That's Bell Creek. And that's 2 3 directly down from Ace Golf whre the development will happen. 4 MS. GRAHAM: And over here? MR. ANDERSON: And that's the spot where I assumed is about as close as possible from Bell Creek to the Ace Golf. that's about halfway in between that's one of the walkways. This is the preserve that's immediately adjacent to 8 Ace Golf. 9 10 MS. GRAHAM: Okay. 11 MR. ANDERSON: Okay. So the powerlines go across Ace Golf Property. So if the townhouses are built, everyone going 12 13 home or leaving their townhouses are going to have to go 14 underneath the Tampa electric powerlines. That's why I took 15 pictures of that. There's also pipelines that run that run through there, an ammonia pipeline, water pipeline. And I think 16 17 a few. 18 MS. GRAHAM: Thanks. So I -- the only other thing 19 that I would say is that I have some information by our expert who we'd actually like to go next. Her name is Ethel Hammer. 20 21 And I have her -- her report, which I'd like to submit by proxy for the record. 22 23 HEARING MASTER: Certainly. 2.4 MS. GRAHAM: And then so I have these photos is --25 HEARING MASTER: You could hand them to the Clerk's

office. 1 MS. GRAHAM: Okay. And then also, just the -- the 3 letters that state these objections. 4 HEARING MASTER: Yes. Everything goes to the Clerk's office and then it'll be a part of the record. MS. GRAHAM: Thank you very much. 6 HEARING MASTER: All right. And you mentioned Ms. Hammer would like to go next? 8 MS. GRAHAM: Yes. 9 HEARING MASTER: Correct. All right. Good evening, 10 11 Ms. Hammer. MS. HAMMER: Good evening. My name is Ethel Hammer. 12 13 My address is 19825 Angel Lane, Odessa. I am here this evening 14 representing the Tampa Bay Conservancy. The Conservancy's Board 15 of Directors reviewed this application and unanimously voted to oppose it as submitted. 16 17 We object to the density and intensity of the 18 application, specifically, objecting to the granting of the 19 waivers that are being requested. The Conservancy Board does 20 not object to the development of the site, as long as it would 21 be within the parameters of the Residential-4 Land Use category. 22 First, I'd like to address the waiver to locational 23 criteria. This location does not justify commercial development. It -- excuse me, the commercial is inconsistent 24 with the surrounding land use pattern. This rounding 25

neighborhood is single-family residential to the north, to the
east, to the south and to the west. Staff mentions the presence
of the school near the subject property. But if that is
mentioned the justification, a school is a residential support
use and should never be used as justification for commercial
development.

There's existing commercial (inaudible) to the east of Bell Schoals and one to the west at (inaudible). That is where the commercial development belongs. There are numerous other vacant parcels along Boyette and upper properties available for redevelopment that this approval would set a precedent for development at unsanctioned intersections or nodes.

2.4

Not only is the developer asking for a waiver, but the request is essentially four times the amount of square footage that would be permitted if this met locational criteria. And by that I mean, if this were a major local road on a four-lane roadway, it would only be permitted 5,000 square feet. Instead, this request is for 20,000, which is four times what would normally be permitted at this type of location.

Goal 1 of the Riverview Community Plan strongly encourages the avoidance of strict commercial. Permitting non-residential development at locations that don't meet locational criteria encourages the opposite. It encourages strict commercial.

Goal 6 of the Riverview Plan directs the protection of

the Alafia River watershed. It encourages reduction of the city 1 in the watershed and not just for properties that are immediately adjacent to the river. And it usees the word "watershed" and it is my opinion that that intent is for more than just the singular properties immediately adjacent. portion of the front plain for Bell Creek is actually on the subject property. It's also within a coastal high hazard area. So my inclusion of a part of the Bell Creek front 8 plain on its property and its adjacency to Bell Creek, it 9 encourages or substantiates the argument that the density on 10 11 this property should not be increased. 12 The Tampa Bay Conservancy objects to the granting of 13 the density bonus and we object to the granting of the waiver to the locational criterial. Lower densities and no commercial 14 15 development will result in lower impacts to the preserve. provide production to (inaudible) Preserve, the Conservancy 16 requests that Goal 6 of the Riverview Community Plan be 17 18 implemented. And I've asked Jane Graham to submit my written 19 statement and my resume into the record. Thank you. 20 HEARING MASTER: Thank you, Ms. Hammer. I appreciate 21 your testimony. All right. Good evening, sir, next. 22 MR. GIBBONS: My name is Gary Gibbons. I am -- my 23 address is 800 29th Avenue North in Saint Petersburg. I'm here to represent the Gibbons family. 24 25 THE CLERK: Could you repeat your name into the

microphone? I didn't catch that. 1 MR. GIBBONS: Gary Gibbons. I'm here to represent my 2 97 year old mother, Helen Gibbons, since the preserve is named 3 after, as well as my four -- her four children, nine grandchildren and 12 great grandchildren. My father bought this property at a 60 acre track back in 1960s. And it has been un -- unimproved the whole time since then and continues that way as a preserve today. The only thing that we ever built were 8 two bridges, one of which is -- this is the second bridge. first one was washed away in a flood. This bridge crosses Bell 10 11 Creek. 12 Bell Creek is in the -- there's Bell Creek. And it's 13 in the -- the coastal high hazard area. And this is all 14 significant wildlife habitat area. The preserve is a 15 significant wildlife habitat and Bell Creek is -- is designated 16 in the coastal high hazard area. It's the exact kind of 17 property intended to be protected under Goal 6 of the Riverview 18 Community Plan. The Community Plan clearly states that densities and intensities are to be reduced, not increased, in 19 20 order to maintain preserve and protect the environmental quality and of the wildlife habitate of the Alafia River and the 21 22 surrounding watershed. 23 This rezoning application violates Goal 6 by seeking to intensify development by adding commercial uses that were 24 never contemplated under the current zoning and then trying to 25

leverage that intents to commercial use to increase the density 1 right next to the watershed and significant wildlife habitate This -- the Alafia River is a primary source of drinking water for Tampa Bay water, which serves the entire region. project is totally incompatible with the surrounding properties and for that reason, we object. HEARING MASTER: Thank you so much. Sir, if you could please sign in with the Cler's office. Next please. Good 8 evening. 9 MR. BROOKS: Good evening. Ryan Brooks. 12714 10 11 Shadowcrest Court. I am here both as a private resident and as 12 the vice president of Boyette Springs Homeowners Association. 13 We want to enter in our record and our objection as well. 14 may seem like everyone else, I don't know all the laws and 15 everything else. I just like everyone else in my neighborhood, want to be able to drive into my neighborhood. And as it 16 17 currently stands, that is not possible during the school time. 18 And based on 2,300 more cars coming to and from, I think that breaks down to several per minute. And it will expand to the 19 20 point to where all entrances into the subdivision are blocked 21 off or significant traffic. I've witnessed several accidents 22 through these intersections and myself and everyone in our 23 neighborhood, all we want to do is just go on. And with that, we object and want to enter this into the record from the 24 25 Homeowners Association.

1 Thank you so much. I appreciate your HEARING MASTER: 2 testimony. You can submit it, as well as sign in. Is there anyone else in the room that would like to 3 speak in opposition? I think we have one more online. 5 MR. ALI: We have two more online. HEARING MASTER: Oh, two more. Okay. 6 MR. ALI: We have Sabine and we have Jennifer. HEARING MASTER: Yes. One. Whichever one would like 8 to go first. It's Ms. Prather we're having difficulty hearing 9 10 her. 11 MS. PRATHER: (Inaudible). 12 HEARING MASTER: The volume is very low. Is there --13 MR. ALI: Sabine, we -- we can't hear you. If you 14 speak, you may need to project a little more. 15 MS. PRATHER: (Inaudible). My name is Sabine. I live at 1601 Bentwood Drive, Sun City Center. (Inaudible). 16 17 MR. ALI: Sabine, I'm sorry. Stand by. We can't hear 18 you. 19 HEARING MASTER: Let's go to the other speaker and we'll come back to her. 20 21 MS. MILLER: Are you ready for me. 22 HEARING MASTER: Yes, ma'am. 23 MS. MILLER: Okay. Hi. My name is Jennifer Miller. I'm at 13317 Waterford Run Drive. I'm an HOA president for 24 Waterford on the Alafie. I'm speak today on behalf of everyone 25

in the Waterford Community. The community is in opposition of 1 rezoning a -- application PD 22-0075. It has townhomes and 3 commercial property builds on Boyette Road. The HOA sent a letter of opposition to County Staff a year ago, January 2022. 5 We met with the Mattamy representatives to go over our opposition and we sent pictures of Bell Creek flooding to the County over the weekend. The pictures were taken by me and they're located east and southeast of the property under 8 rezoning review. I'm going to keep it short so that other 9 people can speak, but I would like to say that we hope that you 10 take both of our letters into consideration for fully 11 considering this application. 12 13 Personally, there's -- thank you. There's the 14 flooding pictures of Bell Creek. So you can see that the Creek 15 does overflow. And it does overflow not only during hurricanes, but when it has severe rain. So if we have rain for more than 16 17 two days in a row, that's what we get. And you can see there 18 that where the pictures were taken in -- in proximity to it's based off. 19 20 I'd like to say in closing that -- or for someone who 21 lives in this area, has lived in this area for the past 20 22 years, I see the traffic that is coming out here and the school 23 traffic that we're having to deal with out here, is bringing this town to an area where there's single-family residential 24 homes, just does not think to fit into the plan. I would hope 25

```
that you would take into consideration of that because we live
 1
    here and if we're having to deal with this versus just whatever
    the Hillsborough County Plan requires to be set for. Thank you.
 3
              HEARING MASTER: Thank you for your testimony. Were
    we able to get Ms. Prather with her volume situation corrected?
              MR. ALI: I can walk her through turn on the audio.
 6
   Ms. Sabine, if you see on the bottom left where it says mute,
    there should be a dropdown arrow, if you click that dropdown
 8
    arrow, you should see audio settings near the bottom. And if
 9
    you click on that, you should be able to turn your microphone
10
11
    all the way up. Right now, you're muted.
              MS. PRATHER: (Inaudible) muted.
12
13
              MR. ALI: Okay. Then I can hear you, but your audio
14
    still sounds the same.
15
              HEARING MASTER: Ms. Prather, have you submitted
    written comments into the record previously for this file?
16
17
              MS. PRATHER: (Inaudible response.)
18
             HEARING MASTER: All right. Are you -- are you
    able -- well, you have testified here.
19
              Mr. Clark, in that she is having technical difficulty
20
21
    and there were some -- we obvious can see her face, we have a
    visual --
22
23
              MR. CLARK: Is she -- ma'am, are you on the mailing
    list? Were you on the notice list? She's nodding yes.
24
              HEARING MASTER: Yes.
25
```

MR. CLARK: Well, if she was on the mail list for 1 notice, then she's able to speak before the Board. 2 As far as speaking, I mean -- unfortunately for 3 purposes of this right now, it's almost like she's in the gallery, but not saying anything. I mean, she's present, but we can't make out any of the argument. But if she's on the mailing list, provided that she's on the mailing list for this hearing, then she would be able to speak before the Board. 9 HEARING MASTER: All right. MR. ALI: Madam Chair, I can suggest if she wants to 10 11 call in with her phone, I can also stay on the line with her Webcam, she can do it that way. The audio might be better. 12 HEARING MASTER: Okay. 13 14 MR. ALI: I would have to give her the number to -- to 15 call in. 16 HEARING MASTER: All right. We'll do that. We -- we 17 not only allow public comment, but we give technical support as 18 well. We're here to help you however we can. Ms. Prather, are 19 you going to call in? 20 MR. ANDERSON: It looks like she's looking for the 21 number. 22 HEARING MASTER: Can -- can we just -- can you just 23 give her the number? MR. ALI: Yes. I -- I -- I believe she was attached 24 to the email. The email has the number, if she can go to that 25

email. I can send it to her real guick, but I'm pretty sure she 1 should have the email from us that she's able to enter this 3 meeting. HEARING MASTER: I mean, we have we see or speak on camera while she's playing. MS. GRAHAM: Madam Officer, if I may, I could try 6 calling her on my phone really quickly. HEARING MASTER: I mean, we have a -- we'll see her 8 speak on camera while she's playing the -- if that's okay with 9 you, it works for me. 10 11 THE CLERK: As long as the record can capture it. 12 HEARING MASTER: Yeah. You think you can do that? 13 UNIDENTIFIED SPEAKER: As long as I can pick it up on 14 the audio. 15 HEARING MASTER: Sure. All right. We'll try it. 16 MS. GRAHAM: Trouble shooting. 17 HEARING MASTER: I appreciate it. Is this your last 18 speaker, by the way? 19 MS. GRAHAM: Yes. 20 HEARING MASTER: Okay. 21 Thank you for your patience. MS. GRAHAM: HEARING MASTER: Oh, thank you for trying. I 22 23 appreciate it. MS. GRAHAM: Hi Sabine. Yeah, can you hear -- can you 24 25 hear us?

MS. PRATHER: Can you guys hear me now? 1 MS. GRAHAM: 2 Yes. 3 MS. PRATHER: Okay. Okay. Thanks. I'm sorry, I don't know what the problem is. 5 My name is Sabine Prather. I reside at 1601 Bentwood Drive, Sun City Center and I'm speaking on behalf of (inaudible) Tampa Bay. And I (inaudible). I also just wanted 8 to say that --MS. GRAHAM: Sabine, we can't hear. You keep going in 9 10 and out. 11 MS. PRATHER: Okay. 12 MS. GRAHAM: You need to mute your audio. 13 MS. PRATHER: Oh. Okay. Hold on. Okay. hear me better now? 14 15 MS. GRAHAM: Yeah. Yeah, we can. MS. PRATHER: Okay. I also just wanted to say that 16 two of the residential (inaudible). 17 18 MS. GRAHAM: You know, Sabine, we -- we can't hear 19 you. 20 MR. GRADY: Could -- could she just not use the 21 speaker on her phone? 22 MS. GRAHAM: Yeah, could you hold it up to your ear? 23 (Simultaneous conversation.) MS. PRATHER: Okay. Speaker. Okay --24 25 MS. GRAHAM: It is, but try just holding -- talking

into it. 1 MS. PRATHER: Okay. So I was -- I was doing that. Sounds a little better. I wanted to say (inaudible). 3 4 HEARING MASTER: We can't hear that. MS. GRAHAM: You know what, Sabine, we're going to cut this off. So this is what I'd like to suggest, I apologize for the technical difficulties. I'd like to suggest is I know that there is that section of the Code that says that for in kind of 8 usual circumstances, he can bring in new evidence in front of 9 the County Commission. So I'd like to suggest that she does 10 11 that. 12 MR. CLARK: So she's talking about the additional 13 evidence rule. The virtual reservation is an option option, but 14 it doesn't preclude the fact that you may have some difficulty 15 with audio. In fact, I -- I can't understand why her audio's not working on her end anyway. I would find unlikely that 16 you're going to get a -- I don't make that determination, but 17 18 it's a very rare thing that gets approved and I would find it unlikely if it gets granted on that basis. 19 I would say this, if she is on the mailing list for 20 21 this rezoning, the -- the (inaudible) mailing list went out from 22 the applicant (inaudible), she's able to come to the Board just 23 on that basis. I don't know, I haven't looked at the list to see if she is, but if she is, she doesn't even have to submit 24 evidence at this level. She can because she's on the mailing 25

list. 1 HEARING MASTER: And -- excuse me. And Mr. Clark, didn't she already affirm? 3 MR. CLARK: She said she was. I'm just saying from my end, I haven't looked at the list to confirm it. She's saying that she was. If that's the case, she could speak at the Board meeting. 8 MS. GRAHAM: Given the extenuating circumstances if she would be able to submit her -- her comments in writing after to this Board, would that be possible? 10 HEARING MASTER: I don't believe so. No. Once the 11 hearing is closed, it's closed. And that's why the documents 12 13 have to be submitted into the record. You can't -- that's why 14 you submitted Ms. Hammer's report physically into the record. 15 MR. ALI: Madam Chair, I did just now email her the -the call in number to WebEx if -- if you want her to try and 16 The audio should be much clearer. 17 call in. 18 HEARING MASTER: If she can. I really need to wrap this up and keep moving. This is the very first case in a long 19 20 agenda of people that would like to speak and I think we have 21 really, really tried to take her testimony. So we will do this 22 one last try for her to participate. And I hope -- I genuinely 23 hope that she's able to do it. 2.4 MR. ALI: Okay. She's trying now. 25 HEARING MASTER: Thank you.

```
MR. ALI: All right. It looks like she just called
 1
        Sabrine, can you hear us? All right. Hang on a second.
    All right. I just want you to -- go ahead. Yeah, go ahead and
    speak normal in the mic. Put the phone up to your ear.
    you go.
             MS. PRATHER: Good evening (inaudible).
 6
             MR. ALI: Go ahead and start over.
             MS. PRATHER: Okay. I'll start over. My -- my name
 8
    is Sabine Prather. I live at -- I lie at 1601 Bentwood Drive in
 9
    Sun City Center, Florida. And I'm speaking on behalf of the
10
11
    (inaudible) Tampa Bay and I want to say that we have signed off
    in the letter that Attorney Graham proposed in November about
12
13
    the -- the consistency with the community planning. I also want
14
    to say that two of the parcels that residential parcels are in a
15
    flood zone. And because of the (inaudible) is very concerned
    with climate change and -- and the weather changes that is going
16
17
        We are concerned with the appropriate (inaudible). We're
18
    concerned with flooding and now with the insurance company
19
    leaving Florida, it may be impossible for new residents to
20
    obtain insurance in the flood zones. And that is the extent of
21
    my comment.
22
             HEARING MASTER: All right. Well, thank you for
23
    those. We -- we waited for them and I appreciate you giving
    them, so thank you so much.
24
             All right. So that -- with that, we'll close
25
```

opposition testimony. We'll go back to Development Services. 1 2 Mr. Grady, is there anything further? 3 MR. GRADY: Nothing further. HEARING MASTER: All right. And then the applicant has the last word. You have five minutes for rebuttal. MS. CORBETT: We had actually reserved 13 minutes of 6 time for rebuttal. Hopefully, we don't need 18 minutes. We'll 8 be brief and be on the point -- on point too. I will --9 HEARING MASTER: MS. CORBETT: -- stay within the five minutes. 10 11 HEARING MASTER: -- I will extend it because we went a 12 little over obviously on the opposition, so I will allow it. 13 MS. CORBETT: Okay. And I would like at this time to 14 ask -- since we ended on -- kind of talking about traffic, I'd 15 like to have Steve Henry to address traffic and then Abbey Naylor will address the environmental issues. Thank you. 16 17 HEARING MASTER: Good evening. MR. HENRY: Good evening. Steve Henry, Link and 18 Associates, 5023 West Laurel, Tampa 33607. So we did the 19 traffic analysis for the project. One, the -- the school is 20 21 open from 7:40 and then gets out at 1:55. So our counts do 22 incorporate the a.m. peak hours, which does show that the 23 intersection operates at an acceptable level of service. We suspect that there may be some operational issues with the 24 25 school drop off and pick up. But as far as a capacity

standpoint, can the intersection operates a simple level of 1 2 service today and also operates -- will operate at the level of service with this project traffic. In addition to that, you'll see in the Staff Report that staff looked at the Boyette Road and operates a level of service C. And I'll also enter into the record the level of service report for Hillsborough County also shows that Boyette Road operates the level of service C. So that concludes my presentation unless you got any 8 questions. 9 HEARING MASTER: No questions at this time. If you 10 11 could please sign in. Thank you. Good evening. MS. NAYLOR: Hi. Good evening. Abbey Naylor. Naylor 12 13 and Barmel Solutions, 14706 Tudor Chase Drive, Tampa, Florida 14 33626. 15 So I wanted to speak to the environmental comments that were made. You know, particularly as it relates to the 16 17 nature preserve. We absolutely acknowledge the major preserve 18 is important and does offer a good habitat and -- and wildlife 19 habitat. So knowing that we -- that -- that is the case, we 20 really did design the site plan to buffer from the preserve, 21 really above and beyond what's required by the Land Development Code. 22 23 So this graphic is just a really basic development It's probably hard to see, but you know, on the north and 24 plan. the east side where we do -- we are adjacent to the preserve, 25

there's a flood mitigation area that's directly adjacent to the
preserve. South of that is our storm water management pond and
then south of that would be the -- the beginning of what would
be impervious or -- development and building. A little hard to
see, but on the -- the west side, we have 194 feet of -- of
buffer between the adjacent parcel and the start of development.
And then on the east side, we have 343 feet. And just for a
point of reference, that's farther than the length of a football
field.

We have offered, and it is included now in the
conditions that the floodplain mitigation or the floodplain

We have offered, and it is included now in the conditions that the floodplain mitigation or the floodplain mitigation area, we are going to plan with native vegetative species. We'll work with the county to select those at the time of development. We are not impacting any wetlands on the project site and the flood claim mitigation area will -- really will essentially become at wetland area you know, by design. So we do feel like we really addressed the -- the fact that the nature of preserve is there and designed it to -- to really protect that -- that system.

There was also a comment regarding the -- the rule about reducing development adjacent to -- about reducing development adjacent to the Alafia River. And first of all, the Alafia River watershed is 418 square miles. So it's -- it's massive. And the goal of that rule is really to reduce the density and intensity directly adjacent to the Alafia River,

```
i.e., like riverfront parcels. So in doing so, that would
 1
    protect the surrounding watershed. So you know, clearly, I
    don't think the rule is written that the density and intensity
    of 118 square miles is the intent of that rule. So we really do
    feel like we're -- we're meeting that rule and we -- we're not
    a -- a parcel that abuts the -- the Alafia River.
             Lastly, I mentioned that you know, really that there
    are a lot of preserves in Hillsborough County, which is -- which
 8
    is wonderful. There are a lot of other -- it's not
    unprecedented to have development adjacent and there are other
10
11
    developments adjacent to -- to other preserve in -- in
    Hillsborough County. There's -- this is Bell Creek Nature
12
13
    Preserve. You can see you know, the amount of development that
14
    surround it and I'm sure that there are buffering requirements
15
    when this list was put in, but just some precedent of having
16
    development. Here's Fish Hawk Nature Preserve. Again, there is
17
    development that does abut major preserves in the county.
18
             Lastly, Alafia's a nature preserve. And these are all
    located in the Riverview Lithia area. There's an apartment
19
20
    complex that abuts that just directly south. So that concludes
21
    my -- my rebuttal. If you have any questions.
22
             HEARING MASTER: No questions at this time. If you
23
    can sign in. Thank you. Good evening,
             MR. STEPHENSON: Good evening.
                                             Trent Stephenson,
24
    LevelUp Consulting, 505 East Jackson. I have been sworn.
25

I'm the civil engineer for the project. A couple of items address regarding of the floodplain encroachment. Yes, there are encroachments to the floodplain. But as having showed in the plan, we have provided a compensation area, which is a requirement of the County. So we had to adhere and we can't have any adverse impacts to our neighbors. Additionally, this is a sensitive basin. So the County has identified low flooding here, the sensitive basin will limit us to a discharge rate of the mean annual storm events, which is a 2.33 year storm versus -- and the pre-development versus the 25 year storm. So we -- we have restrictions in place to try and reduce and help out the situation of flooding in the area. That's it. Thank you. HEARING MASTER: Thank you. Appreciate it. MS. CORBETT: Kami Corbett again for the record. just wanted to point out, and I think you're aware of this because you reviewed the record, but for people who might be watching and not understand, the subject property that we're talking about here is an existing commercial golfing range, golf -- golf range. And for the record, he's golfed several times by the opposition. It's not a vacant environmentally sensitive piece of property. It is in use for commercial use There are also to teco transition lines and gas lines and other things that are happening on this site that were

acknowledged by the opposition that have equal or more

detrimental potential detrimental environmental impact than the 1 2 proposed development. So I just wanted to point those things out and make 3 sure that it -- we're not talking about this particular property that's being rezoned, it does have some floodplain area on it, but it's not a vacant preserved property. And with that, we will rest on our previous presentation. All of the issues with respect to compatibility and consistency with the comprehensive 8 plan as well as -- can you give me one moment? 9 HEARING MASTER: It seems that we have another moment, 10 Okay. Go ahead. 11 yes. MS. CORBETT: Sorry. And so -- I lost my place. 12 13 Where was I? We were talking -- oh resting on our case with 14 consistency and compatibility. We talked about traffic. 15 Mr. Henry's addressed that in the prior hearing. He suggested 16 it here. Environmental compatibility was addressed at the last 17 hearing and we've addressed it here. The only new argument that 18 appears to have surfaced is this argument with respect to reviewing community plan. And I think you heard plenty of 19 20 testimony and evidence on that. 21 And with that, we respectfully request your approval. HEARING MASTER: All right. Thank you so much. 22 23 with that we'll close Rezoning PD 22-0075 and go to the next 2.4 case.

Page 74 MR. GRADY: The next item is agenda item 1 2 D-1, Rezoning-PD 22-0075. The applicant is Mattamy Tampa Sarasota, LLC. 4 The request is to rezone from AR to Planned 5 Development. Israel Monsanto will provide staff 6 recommendation after presentation by the applicant. 7 HEARING MASTER FINCH: All right. Is the 8 applicant here? Good evening. 9 MS. CORBETT: Good evening. Kami Corbett with the law firm of Hill, Ward, and Henderson. 10 We do have a lot of information to go through this 11 12 evening. So I'm going to go ahead and turn it over 13 to Ms. Isabelle Albert for the presentation. 14 HEARING MASTER FINCH: Thank you so much. 15 Good evening. 16 MS. ALBERT: Thank you. Good evening. 17 Isabelle Albert with Halff Associates, 1000 North 18 Ashley Drive, Suite 900. Next, please. 19 So what we have before you tonight is a 20 rezoning to Planned Development. The site is 21 the -- you may know it as the Ace Golf range. 22 off of Boyette Road and Bell Shoals Road. It is in 23 the Riverview Area and the Urban Service Area. 24 The properties surround us -- to the east, 25 we have some residential development about 200 feet

away, and then we also have a stormwater pond that
is the result of the expansion of Boyette Road. To
the west, we have a Hillsborough County pump
station, and then to the south we have some

So just to give you an overall look of the area, we have -- our site is dissected by

residential. Next, please.

160-foot-wide TECO easement, and so that kind of
forces the development along Boyette Road to be
nonresidential on the north side of the Boyette

Road as seen here. It's either commercial or we

12 have some churches. There's BPO and Commercial

Neighborhood uses there.

On the south side, there's some older residential development that's existing, but also we have the St. Stephens Catholic school church there, as well as commercial uses along Bell Shoals Road. Next, please.

So this is just in general. The surrounding residential is Residential-4 for Future Land Use and the Planned Development and the Commercial and BPO uses along Boyette Road as described and then a residential development with the RSC-3 and larger lot on the north side of Boyette Road of the TECO easement. Next, please.

5

11

14

15

16

17

18

19

20

21

22

23

24

So this is just to give you an idea since

2 2004. This is around the area where the golf range

3 came in and did the development. You see the

4 existing residential to the south, to the

5 northeast, and then we have all along the west -
6 we have the existing residential.

You'll also see the parcel St. Stephens starting to develop to do their -- to do their school. Now, if you go further to most recently, which you'll see on the next slide, please, really not much has been occurring since then.

And you'll see only at St. Stephens. We have the Hillsborough County pump station located just adjacent to us. We also have the new church uses and the school's also on the south side of Boyette Road.

The only residential in the area has been developed really is just to the north of the TECO easement. Area shown in the yellow. And this is -- if you go to the next slides, please.

You'll see if you look at the bigger picture Boyette is really the main east-west arterial, you know, on I-75, 301, Bell Shoals, and Lithia. Bell Shoals and 301 are really the only two streets that go all the way north to Bloomingdale.

In looking at it, you know, we have the

Alafia River that kind of separates us from this

area from the rest of the -- you know, from the

rest of the development in the area. We have a lot

of natural resources. The Alafia River, as you can

see in the green, and other nature preserve in the

area. Next, please.

The one thing that's -- that's major that was changed back in 2010 -- this is an aerial from 2010 on the upper side. It's a two-lane roadway.

Boyette was a two-lane roadway.

Our site was there, and there was like a -some -- a turn lane. So you really only had three
lanes there, but since then, this area has been
developed as a lighted intersection. It's now a
four-lane. It has additional three turn lanes.

So this is an ideal site to be developed more than what it could be today, and so looking at that, we came up with this concept. Next, please.

We looked at it also in the bigger area, and really it's the one last piece that can be developed -- that can be well developed for this area. It's sort of like an infill development for residential and commercial opportunities, and it's providing different types of -- we thought we could

provide it different types of housing -- housing types for new homeowners. Next, please.

And so with that, we came with this concept. This concept has provided to have townhomes on the north side of the TECO easement, as it was seen in the other development area around us. And on the south side is just maintaining the existing commercial building, commercial development that's there.

The Ace Golf range, it is a recreational area, but it really functions as a commercial business. And people are familiar with that site as a commercial business, and therefore, we -- looking at the development overall, in the Residential-4 Future Land Use, we wanted to have a density bump up to the Residential-6 to be able to develop a proper townhome development.

But by doing that, we use the density bonus request, and for that, we need to have like three uses. So three nonresidential -- two nonresidential uses and one residential use. By adding or by reintroducing the commercial and the office, we also had to request a waiver to commercial location criteria.

And so by working with staff for over six

months now, we've been working a lot with staff in order to come up with some -- some development that they felt would be comfortable for the area considering it did not meet commercial locational criteria, but they also recognize that Boyette Road is an active node at this area.

There's an existing commercial use there, and therefore, that was restricted commercial uses.

As you can see, they would be able to support -- find this site supportable.

Part of that also looking at it, we will introduce conditions -- additional conditions. One of them was just to specify the type of fencing on the north side of the TECO easement.

We heard from the neighbors that they do not want a pure white PVC fence considering the existing vegetation in the area, which I do have to point out -- and I'm sorry, I failed to say that -- to the north side of us and to the east side of us we have a preserved area.

On the east side, we have a 50-foot easement preserved area from the preserve access to the area on the north side of us. And so with that natural vegetation, we felt that, you know, their concern about having a white PVC fence was -- was

understandable and therefore, we're going to introduce a condition that's going to be like a nonwhite trek style 6-foot fence.

So we did -- we're going to be submitting that, and we also had the restriction to the development height and the style with additional architectural features.

Part of the density bonus to have the three uses, staff and -- in discussion with staff,

Planning Commission staff wanted some kind of time mechanism, which is not something that is typically found in the Comprehensive Plan for a density bonus, but they wanted to assure that the development the commercial was going to be happening.

And understanding what they want, we are going to propose a different condition that has been proposed in the past -- has been supported in the past, and it's specifically the idea making sure that the development of the commercial site that's existing, but the redevelopment of a commercial site is going to occur.

Now, I'm just presenting because this is something we wanted to present to the Board, but I'm just going to enter that into the record just

Page 81 to be considered. 1 HEARING MASTER FINCH: Is that something that's proposed -- I have a revised staff report. 4 Is that something --5 MS. ALBERT: That is not (overlapping 6 talk) --HEARING MASTER FINCH: So are you going to 8 explain how that works, the timing of it? 9 MS. ALBERT: I will explain -- well, explain the timing of it, basically, the Planning 10 Commission's position was that, that you have to 11 12 have a percentage of housing units to -- I believe 13 the top of my head was like 56 or 58. 14 And after that, anything -- the commercial 15 had to be developed, built and developed. Our 16 proposed was to have the residential developed, and 17 then the commercial portion of it was going to be 18 basically pad ready. 19 Have the utilities, have the access -- main 20 access, have the parking area, the ponds, all of 21 that. But just to be ready for a commercial or 22 business or to be interested to come and see how 23 it's ready.

all 86 townhomes would be built and the

HEARING MASTER FINCH: So you're saying that

24

Page 82 infrastructure would be in place but not -- it 1 wouldn't be vertical in any way? MS. ALBERT: Correct. Correct. HEARING MASTER FINCH: I see. And the 4 Planning Commission has accepted that? 6 MS. ALBERT: No, they have not. And this is what -- something that we're going to be presenting. I understand the Planning Commission -- what's currently in the record is --10 I was going to talk about that at the next slide, but --11 12 HEARING MASTER FINCH: Okay. 13 MS. ALBERT: We can go just to the next 14 slide. 15 HEARING MASTER FINCH: Sure. 16 MS. ALBERT: Obviously, the Planning 17 Commission is supporting the application that is in 18 front of you, with the conditions that are in front 19 of you. 20 I understand we all talked about it, but we 21 feel like it's actually a better proposition of 22 condition that feels that would work better for the 23 site, and these conditions, I will enter them into 24 the record. I will give you a copy of it. 25 HEARING MASTER FINCH: Okay. So you have

Executive Reporting Service

Page 83 this drafted, this proposed condition? 1 MS. ALBERT: Correct. 3 HEARING MASTER FINCH: Okay. 4 MS. ALBERT: Correct. 5 HEARING MASTER FINCH: All right. Remind me how the condition reads now in terms of -- is there 6 a timing mechanism? 8 MS. ALBERT: If you look at 1.4, Condition 1.4 it talks about --HEARING MASTER FINCH: I see. 10 MS. ALBERT: And for such a small site, it's 11 12 a bit difficult to do so. But however, we feel --13 we understand the concerns of Planning Commission, 14 and we're proposing an alternate condition that we 15 feel still would meet the intent. 16 The goal is to develop the commercial --17 make sure the commercial is developed that is not 18 always going to stay vacant. And knowing the site, 19 knowing how the site is already used as a 20 commercial, the demand for it, we feel that having 21 a site ready, pad ready site is better and provides 22 more opportunities for different developers. 23 As we could see, we have all these different 24 conditions -- you know, 2,500 square feet of blah, 25 blah, blah. If we build it already, we already

Page 84 limit a lot of our end users. And so by having it 1 pad ready; that showing them, hey, we can work with you, we would have a lot more options of interest for commercial nonresidential development. 4 5 HEARING MASTER FINCH: Was the Planning Commission aware of this condition before tonight's 6 hearing? MS. ALBERT: We submitted it -- we -- we just submitted it at 4:00 o'clock, and the Planning 9 Commission has informed me that they were not 10 supporting that condition. 11 12 HEARING MASTER FINCH: I see. 13 MS. ALBERT: We understood that. This is 14 something we wanted to have it into the record in 15 order to be able to discuss it. 16 HEARING MASTER FINCH: Okay. All right. 17 Does that complete your presentation? 18 MS. ALBERT: That completes my presentation. 19 We have next presenter too. 20 HEARING MASTER FINCH: Can I just ask you 21 one question before you leave, because it's a land 22 use question? 23 MS. ALBERT: Sure. 24 HEARING MASTER FINCH: The -- the existing 25 golf course driving range, just give me a snapshot

Executive Reporting Service

Page 85 of the uses. It's not just a driving range is my 1 understanding. MS. ALBERT: There's retail -- there's retail there. I mean, it's like a traditional when 4 5 you walk in, and the owner is here and he will be 6 speaking. 7 HEARING MASTER FINCH: How long has that use 8 been there approximately? 9 MS. ALBERT: When I look at it, he could be 10 a better person to answer that, but --11 HEARING MASTER FINCH: I'm just looking for 12 a year, approximately. 13 MS. ALBERT: Twenty. 2003. 14 HEARING MASTER FINCH: 2003. 15 MS. ALBERT: My aerial was 2005. 16 HEARING MASTER FINCH: And it has lighting 17 that operates at night? 18 MS. ALBERT: Yes. 19 HEARING MASTER FINCH: Okay. All right. 20 That's the ending of my questions. Thank you. If 21 you could please sign in with the clerk's office. 22 Thank you. 23 MS. ALBERT: Thank you. 24 HEARING MASTER FINCH: Good evening. 25 MS. NAYLOR: Hi. Good evening. Abbey

Executive Reporting Service

- Naylor, 14706 Tudor Chase Drive, Tampa. 1
- I am with Naylor Environmental Solutions.
- I'm the environmental consultant on the project.
- It should be the same -- I think they are next
- 5 slides. Thank you.

6 So I just wanted to discuss the environmental considerations for the project. It being an active 8 driving range, there aren't much in terms of wetlands on the site. There are some right along

the fringe. They'll be completely avoided.

11 We've completed a protected species survey on-site, and there will be no protected species 12 13 impact associated with the proposed plan. As 14 discussed, the current condition is an active 15 driving range, and within that surrounding, you 16 know, the limits of the driving range, I just 17 wanted to show you kind of a picture perspective.

18 It's what you would expect kind of a mode -- a mode 19 driving range. Next slide, please.

> What I wanted to address, as, you know, we are aware that there is a preserve adjacent to the site. There's an access road that runs along the east side of the -- the east driving range and then predominantly the preserve is located north of the driving range.

25

10

20

21

22

23

Knowing the sensitivity of this preserve area and its importance to Hillsborough County, we've incorporated into the design to have the floodplain mitigation compensation area directly adjacent to that preserve. And then proposing to actually plant that floodplain area with native species where feasible.

In addition to that, there's even additional buffer. Obviously, we need stormwater associated with the development, and we've located that stormwater adjacent to the floodplain compensation.

So any pervious, impervious surface would be quite a distance on the existing preserve on the west side, approximately 213-foot buffer and then on the east side, 340 feet. You know, a football field is, including the end zones is 360 feet.

So that's a pretty, you know, significant buffer from the existing preserve, you know, knowing just how to separate those townhomes from that habitat to the north.

Knowing what the existing condition is being the driving range, I see that floodplain mitigation area and stormwater really being a net improvement in terms of what's occurring adjacent to the preserve at this time. That's all I have. Any

Page 88 1 questions? HEARING MASTER FINCH: No, not at this time but thank you. If you could, please, sign in. Ms. Corbett, does that complete your 5 presentation? MS. CORBETT: Kami Corbett for the record. 6 Yes, it does. HEARING MASTER FINCH: Okay. Thank you so 9 much. We'll go to Development Services. 10 MR. MONSANTO: Good evening. Israel 11 12 Monsanto, Development Services. 13 The property's existing use is a 14 recreational golf course. Uses in the surroundings 15 today consist of residential detached homes. 16 Residential support uses, such as churches and 17 schools, a water pump station adjacent to the west, 18 and a nature preserve known as the Myron and Helen Gibbons Nature Preserve. 19 20 Further along the east is land owned by 21 Hillsborough County containing a larger water 22 retention pond. 23 The request tonight is to rezone the subject 24 site from Agricultural Rural to a Planned

Executive Reporting Service

Development to allow up to 86 townhomes,

single-family attached with a density bonus within Parcel 1 of the provided site plan. This Parcel 1 is located north of an existing TECO easement and also up to 20,000 square feet of limited Commercial Neighborhood from three distinct use categories in Parcel 2, which is south of the TECO easement.

This parcel is along Boyette Road. In order to achieve 86 residential units, which is at six dwelling units per the acre, the applicant is utilizing Policy 19.3 which provides incentives to encourage mixed-use development by providing at least three uses on-site, which in turn will permit density and floor area ratios up to the next land use category where two uses will be nonresidential uses.

The nonresidential use have been classified into three groups as noted in the staff report.

The applicant met with staff and is proposing a list of size and development that could be considered where at least two uses shall be developed in Parcel 2; one use from either group where no two uses are chosen from the same group.

The applicant is also committed to limiting the height to one-story and architecturally finished on all four sides with a residential-like

Page 90 appearance for the nonresidential portion of the 1 site. The uses proposed by the applicant are low scale neighborhood commercial, office professional 4 5 and medical, assisted living facilities and daycare 6 or pet care. The uses are broken into three groups. 8 Group A which generally consists of retail commercial with no drive-through. This arranging from 2500 square feet to 10,000 square feet of 10 maximum building space. 11 12 Group B consisting of office limited to 13 10,000 square feet and no 24-hour operations, and 14 then the Group C, which is residential support, is 15 limited to 10,000 square feet. In this case, a 16 daycare or pet care and a community residential 17 home and memory care Type C. 18 The applicant requested a waiver to the 19 additional 2-foot of building setback for every 20 foot above 20 feet in height per the Land 21 Development Code Section 6.01.01 end note No. 8. 22 This is only along the west where the adjacent use 23 is the Tampa Bay water facility. 24 The staff finds the request is preferable 25 since there is no compatibility concerns with that

adjacent use. The applicant is not requesting the required additional setback for the proposed structure on the east to be waived adjacent to the nature reserve and will maintain a total of 35 feet of setback.

Along the east in Parcel 1, where the project will provide 10 feet of buffer with Type B screening and a solid fence where 5 feet of buffer with Type A screening is required by the Code.

Parcel 2 contains the nonresidential uses will conform with the development standards of Commercial Neighborhood standards with single-story structures.

The applicant is also committed to a timing mechanism as stated by the applicant and as noted in Condition 1.4 that would guarantee the development of all proposed uses and comply with the mixed-use objective and policies from Comprehensive Plan.

Staff has received letters of concerns and opposition from area residents, the Tampa Bay Conservancy and the Sierra Club. The letters expressed concerns with traffic generated by the proposed development, school capacity, noise, impacts to the nature preserve, increase in

density, introduction of commercial uses in the area, impacts to water supply, and reduction of setbacks/buffer from the natural preserve along the east.

The applicant has amended this application compared to the original request and reducing the intensity of the nonresidential uses, restricted square footage of the daycares and other uses, eliminated school uses, and will maintain the required buffer setback along the east, which is actually more than what the Land Development Code requires.

Per the submitted site plan, retention ponds will be placed along the east in Parcel 2 and also along the north in Parcel 1 and is adjacent to the preserve. And vegetation will be preserved subject to Natural Resources' review and approval along the eastern side and north.

As part of the Site Development Review process, the developer is required to provide wildlife environmental studies in accordance with the Land Development Code.

The project will be conditioned as requiring that water distribution system improvements will need to be completed prior to connection to the

County's water system by future -- by this future development.

No building permits that would create a demand for water service will be issued until the completion of two County Funded Capital Improvement Programs projects in south county are put into operation.

Stormwater design and construction will be subject to review and approval by the site development review section as established in the Land Development Code to ensure the project will capture all stormwater on-site only.

The proposed Planned Development plan shows areas where future retention ponds. Comments from the school board state that a school concurrency review will be issued prior to preliminary plat or site plan approval.

The school board also indicated that at this time additional capacity at the middle and high school level exists in adjacent service areas to accommodate the proposed project, and capacity exists in the elementary school level for this area.

There are wetlands present on the site.

However, the Environmental Protection Commission

1 review the proposed site plan and does not object.

No impacts to wetlands or setbacks are shown on the

B proposed plan.

Conservation and Environmental Lands

Management reviewed this rezoning petition and has
no comments. Transportation Staff does not object
to this request and proposes conditions for site
access and road improvements along Boyette -Boyette Road.

The areas is a mix of mostly residential single-family detached and low scale commercial and office uses. Residential support uses such as schools and churches are also commonly found in this area.

The proposed project scale and design would ensure that it's compatible with the surrounding development pattern and land uses. Intensive uses are being restricted from the proposed development.

The staff from the Planning Commission has evaluated this request and has found it consistent and sees no compatibility issues of the adjacent use is probably institutional.

However, to the commercial locational criteria has been requested and Planning Commission staff recommends approval of the waiver. Based on

Page 95 the above consideration, the staff recommendations 1 approval with conditions, and this is based on the conditions that we have submitted on the record already. And Planning Commission will speak to 5 that proposed changes. I need to note also that there is also a 6 staff report correction that has been handed to you, I believe. There is a typo on Condition No. 4. The buffer along the east in Parcel 1 10 should be 10 feet as proposed by the applicant and also as noted in the site plan on the record. 11 12 right now it states 20 feet; so it should be 10 feet. 13 14 HEARING MASTER FINCH: On Condition No. 4 15 you said? 16 MR. MONSANTO: Correct. 17 HEARING MASTER FINCH: I see that 18 correction. Okay. Mr. Monsanto, I had a question 19 about Ms. Albert's testimony and the submittal of 20 this revised Condition 1.4. Are you aware of this? 21 Have you seen it? 22 MR. MONSANTO: Yes. We received it today as Ms. Albert stated, around four today. And we -- we 23 24 have concerns with that proposed change because our 25 reports are -- have been filed on that -- that

Page 96 condition was predicated on basically the 1 conversation with Planning Commission and that's the requirement to this project to have the bonus density and also to ensure that the three uses will be in place when all is developed. HEARING MASTER FINCH: Does the -- because 6 as you're aware, the revised condition takes out that timing altogether. Does that change the Development Services recommendation for this application? 10 MR. MONSANTO: Yes. If we -- if that 11 12 condition is removed, then Development Services 13 staff has concerns because that's not -- that's not 14 consistent with what was proposed and also not 15 consistent with the Comprehensive Plan. 16 HEARING MASTER FINCH: All right. Anything 17 further, Mr. Grady, you wanted to add? 18 MR. GRADY: Nothing further. I think, 19 again -- and the Planning Commission can address 20 this. I think that was an issue for consistency to 21 obtain the density bonus. 22 And, again, if Planning Commission were not 23 to recommend approval of the -- the infill density 24 bonuses, then, you know, obviously, staff would 25 likewise not be supportive of this. Again, it goes

Page 97 back to, you know, what's necessary for purposes of 1 meeting the intent of the density bonus, which again the Planning Commission addressed further. I would also note, I think just a 4 clarification regarding the proposed Condition 4. 5 Collectively, on our end, staff feels I think there 6 might be a typo. They may have meant to say 8 non-white Trex style, E accents e-k. 9 And if that's the case, we believe what the intent is, is that if that type of style provides 10 for us even though it's not a wood fence or it's --11 12 it has a look of a natural look -- natural wood 13 look. 14 So we would propose that it's a Trex style 15 which provides for a natural look of wood, just to 16 clarify what the intent of that is. So it's on 17 rebuttal I would ask the applicant to clarify that 18 and see if they have any concerns with that 19 provision. 20 HEARING MASTER FINCH: Okay. We'll come 21 back to them at the end. Fair enough. All right. 22 Mr. Monsanto, that completes your 23 presentation. Correct? 24 MR. MONSANTO: Yes. Correct. 25 HEARING MASTER FINCH: All right. Thank you

- 1 so much for that. I appreciate it.
- We'll go to the Planning Commission.
- 3 MS. MASSEY: Hi. This is Jillian Massey

4 with the Planning Commission staff.

The site is in the Residential-4 Future Land Use Category. It's in the Urban Service Area and within the limits of the Riverview Community Plan.

The Residential-4 Future Land Use Category surrounds the property and allows residential, suburban scale, neighborhood, commercial, office uses, and multipurpose projects. Nonresidential uses to meet locational criteria for specified land uses.

The applicant's site plan indicates a floor area ratio of 0.19, which is consistent with Future Land Use Element Objective 8. The proposed density of six dwelling units to the acre exceeds that permitted Residential-4 Future Land Use Category.

However, the applicant is proposing a mixed-use development that would utilize a bonus density outlined in Future Land Use Element Policy 19.3.

A condition has been placed on the proposed development to ensure all three uses are developed to comply with the bonus density criteria. Future

Page 99 Land Use Element Policy 16.10 refers to the 1 compatibility of density increases and Goal 6 of the Riverview Community Plan seeks to protect the Alafia River. 5 The Alafia River is to the north of the 6 property adjacent to the preservation area, and the property contains a small portion in the Coastal 8 High-Hazard Area in the northeast corner. Commercial Neighborhood uses have been 9 proposed for the nonresidential portion of the 10 development in order to meet the density bonus 11 12 provisions under Future Land Use Element 19.3. 13 The staff has worked with the applicant to 14 limit the Commercial Neighborhood uses to help 15 protect the surrounding residential and Natural 16 Preservation use, consistent with Future Element --17 Future Land Use Element Policy 16.3. 18 Furthermore, nonresidential is limited to 19 the southern portion of the property as depicted on 20 the proposed site plan. Residential is limited to 21 the northern portion of the property, and no 22 setback reductions have been proposed on the 23 northern property boundary adjacent to the Natural 24 Preservation areas. 25 The proposed request is consistent with

Page 100 Objective 16 and Policy 16.3, which refers to the 1 production of existing neighborhoods. previously mentioned, the area is mostly single-family detached residential with residential 5 support uses and a preserved area. 6 The proposed mix of uses will complement the area and blend architecturally. The subject site does not meet commercial locational criteria in accordance with Objective 22 and Policies 22.1 and 22.8. 10 11 The site is located west in approximately 2500 linear feet away from the node of Boyette Road 12 13 and Bell Shoals Road, the nearest qualifying 14 intersection. A waiver to the commercial 15 locational criteria has been requested, and staff 16 recommends approval of the waiver. 17 One of the reasons being proposed by -- to 18 that commercial -- excuse me, one of the reasons 19 the proposed commercial uses is a part of the 20 mixed-use development and the proposed uses are 21 limited to specific Commercial Neighborhood uses. 22 The size of each use has been limited to no 23 greater than 5,000 square feet for most uses and up 24 to 10,000 square feet for specified uses, such as 25 medical office or specialty food store.

The proposed list of uses has been thoroughly reviewed and selected to help complement the surrounding area and is not intended to introduce intensive retail uses.

Objective policy -- excuse me, Objective 19 and Policy 19.2 indicates that a mixed-use development must be integrated. Policy 16.2 requires the gradual transition between uses.

The applicant's site plan shows the commercial buildings are in the southern portion of the property facing south towards Boyette Road.

The proposed site plan shows an integrated design to the residential located on the northern portion of the property and a gradual transition from the Natural Preservation area to the north, east consistent with policy direction.

I just wanted to note for the record previous discussions regarding the conditions of approval. Planning Commission staff, we filed our report with the understanding of the agreed upon conditions of approval including Condition 1.4.

And this is mutually agreed upon between

Planning Commission staff and the County and the

applicant's representative. Changing that

condition would -- it undermines a connection

Executive Reporting Service

between the proposed mixed-use density bonus and the required three uses to achieve this bonus.

This is a substantial change to the project.

It's not supported by Planning Commission staff.

The support of the mixed-use density bonus is contingent on that condition and as it is worded by the Development Services Department.

So with that being said, the Planning

Commission staff does find the -- the application

consistent with the Comprehensive Plan but subject

to the conditions proposed by Development Services,

particularly the wording of condition of approval

1.4 which creates a clear nexus between the

Comprehensive Plan policy direction under

Objective 19 in the Future Land Use Element and the

applicant's request for a mixed-use density bonus.

The proposed mixed-use density bonus is contingent on that condition as written by the County and changing that condition would result in the application being found inconsistent with the Comprehensive Plan. And that concludes my testimony.

HEARING MASTER FINCH: Ms. Massey, just to make sure I understood it. There was a little breakup in the end of your presentation. So if --

Page 103 if the proposed 1.4 condition is changed to what 1 2 the applicant submitted this evening, then the Planning Commission then would find the rezoning 4 inconsistent with the Comprehensive Plan; is that 5 correct? 6 MS. MASSEY: That is correct. That the 7 finding of consistent is based upon the agreed upon 8 condition of approval and the way that it is currently worded. 9 10 HEARING MASTER FINCH: All right. 11 Understood. Thank you for that. I appreciate it. 12 I think you covered it. I was going to ask you 13 more about the Policy 19.3 and the three land uses, 14 but I think you explained that adequately for the 15 record. Thank you for that. I appreciate it. 16 All right. We'll turn to anyone who would 17 like to speak in support? Anyone in favor? How 18 many do we have? I see one coming who would like 19 to speak to. Anyone online? Okay. Good. One in 20 opposition. But nobody online in support? Okay. 21 If you want to -- were you going to show If you'd 22 those or you're just submitting them? 23 like to show them, we have an overhead over here. 24 And then at the end, you can hand them to her and

they'll be a part of the record.

Page 104 If you could start by giving us your name 1 2 and address, please. MR. PLACE: William Place, 610 Garrison Cove 4 Lane, Tampa, Florida 33602. 5 And I'm here with my wife, Su Lee. We are 6 the property owners. We built the Ace Golf range site in 2003 and have operated it for almost 8 20 years now. 9 I'm mainly here to talk about that condition, the timing condition, which I believe 10 has some very unintended consequences and is not --11 12 certainly not in the public benefit. 13 I understand that this condition has gone 14 into some other projects -- large projects where 15 the builders actually didn't build a commercial. 16 They were building hundreds of homes. And at the 17 very end didn't build the commercial piece and they 18 were in violation of that -- of the condition. 19 This is a 17-acre project. Okay. It can 20 only succeed if all parts of it are built, and I'd 21 like to tell you why and what our interest is in 22 this. 23 First of all, I'd like to point out, you 24 know, we have operated this as a commercial 25 business. We do have a retail shop in there,

miniature golf course, batting cages, driving range. The County put in -- go to the next slide, please. Of course, they four-laned the road here since we built up the driving range.

And that light that you can see right there was put in as well as the left turn lane partially due because of the amount of traffic that we have coming in and out of our facility, which has particularly been substantially even since COVID.

It's now as you can see a very prime commercial site. It's nicely buffered. You can see that wall across this -- the four-lane highway. That's the subdivision there. They have a nice wall that separates them, and of course, the preserve that surrounds the property.

And I might add nobody ever goes into this preserve. It's -- it's wet. It is very difficult to access. It has no parking. We had offered parking to them as part of this project, and they did not want it. So while it's a very beautiful area, it is never visited. We've enjoyed it as a nice buffer for our property. Next slide, please.

And I'd like to point out that one of the letters in opposition was from the community that's there in the upper right. I believe they're called

1 Waterford.

And the point of this slide is to show you we have 500 feet -- actually 495 feet on that yellow line that shows from our property line to the nearest home. And that's through thick woods.

And they actually opposed our initial request to go in on the site. They said our lighting would shine in their windows, and the birds fly into the nets and be killed and so forth. And none of that has ever materialized.

We even had opposition across the street from the residents there, and following our approval, they requested a crosswalk be put in so they could get over to our site.

I understand there are some who are opposing us leaving now, as many did when we were asking to go in from this site. We're planning to retire after 20 years. So we're looking at options to —to sell this property for our retirement.

There's a lot of costs if it were to stay as a driving range because 20 years old, it would need a lot of investment. We had a lot of builders contact us wanting just to put townhomes on the entire site -- Pulte, DR Horton, and others.

And we turned that down because it never

reached the figure that made sense given the investment we have in the golf range. So we've also had a lot of commercial -- offers for commercial development.

At one point we were under contract with a developer that was going to put in a Walmart neighborhood store. So that kind of gives you an idea of how, you know, commercial developers look at this.

If Walmart's interested in it, it's got to be a pretty viable site. They have actually ended up rethinking their brick and mortar strategy and they backed out of the deal. But we've also had doggy daycare, self-storage. We had a school.

We even had a restaurant that was interested, but because of the condition of no drive-throughs, they decided not to pursue. So what I'm trying to say is there is no chance that this is not going to be developed.

So we would truly meet all the County conditions without having this requirement that all the commercial has to be built and CO'd before the additional density is provided.

That's an -- you know, in hundred -- many hundreds of home project, it's an inconsequential

Page 108 condition. But when you're only building 84 1 2 townhomes, you can't mobilize twice. You can't -you got a chicken and the egg thing here where, you know, residential attracts the commercial. 4 5 And additionally, the builder is going to 6 prepare all the commercial site, do all the utility stub-outs to it; and so the chances of us saying, 8 okay, we're going to put all that in, but then we're not going to build it. Is it just -- it 9 just -- I'm sorry, it just doesn't make sense. 10 11 I understand why in a large project, 12 perhaps, it does because, you know, people do bad 13 things. But in any case, you know, I understand, 14 too, for a builder to have to mobilize twice. 15 So if you think about this, that condition 16 says, okay, all the commercial has to go in and 17 actually be CO'd before the builder can then build 18 his remaining 30 townhomes. 19 A builder is not going to do 54 and wait, 20 you know, do 30 later, and then we wait for all of 21 that before -- you know, for the commercial to be 22 all developed before he can do all his project. 23 also drives the cost of the homes up. And this 24 is -- this is affordable housing townhomes. And 25 it -- it unnecessarily would delay the project as

well for quite -- quite some time.

Now, my interest, I want to get it all

developed. I want -- I want to get out of our

investment here. So we've actually retained a firm

called Alliant Partners, a fourth generation firm

out of Ybor City, who is going to do the commercial

development.

And I'd like to present a letter for the record of their position on that condition.

10 HEARING MASTER FINCH: You've got about
11 seven minutes left.

MR. PLACE: I'll try to be quicker. That eliminates a lot of the presentation. They're not here to state that. So I just want to say that, you know, this project would make no sense without the commercial.

It doesn't make sense to withhold the -- the residential until all the commercial is built. It will actually be far easier to find the best commercial uses, and we've been restricted pretty heavily as to what those uses can be. They need to be, you know, fit very well in the neighborhood, neighborhood commercial uses.

So that condition also kind of goes against enabling us to find the best uses; uses that

23

24

Page 110 residents -- we polled the residents. 1 So these are uses that the residents want. But again, it throws the timing off. It can actually kill the project. 4 Sometimes there's unintended consequences of 5 conditions. And just to give you another example, 6 I mean, we also have a condition that no drive-throughs can go in on the commercial. But it 8 seems odd right now with what we've gone through 9 with the pandemic that, you know, people are demanding drive-throughs. They don't want to go 10 into crowded buildings. They want their food to 11 12 go. 13 So we've actually had to turn down 14 commercial users. I know of a large sit-down 15 restaurant that wanted to have a to-go 16 drive-through because of the amount of to-go orders 17 they have. We can't accommodate them now because 18 of that condition. 19 So I'm afraid that sometimes in trying to do 20 some good things we're also kind of hurting 21 ourselves, and by saying no drive-throughs, you're 22 restricting who can go in there and -- and actually 23 kind of going against the social norm at this 24 point. 25 Anyhow, we'd like to ask that staff

Page 111 reconsider that timing condition. Any questions? 1 HEARING MASTER FINCH: My only question is, I see in the -- in the draft conditions that it 4 contemplates the interim use of the current golf 5 driving range. And so what is the timing of that? 6 I understand you're the seller of the property. 7 So if this were to be approved, are you 8 planning to operate it until -- you know, do you have some time frame for that like, perhaps, simultaneous with the residential construction 10 11 or --12 MR. PLACE: We would be operating up until 13 the time that -- well, of course, there's permitting and so forth, the rest of the rezoning. 14 15 We're anticipating maybe another year of operation 16 until the residential builder has all those 17 permits. 18 As soon as they would need to start 19 construction, of course, they're putting in the 20 entry road that the commercial piece uses and of 21 course, all the commercial stub-outs. So probably 22 a year's time, but we would operate right up to 23 that moment where they said, okay, it's now time to 24 build. 25 HEARING MASTER FINCH: Understood.

Page 112 That was my only question. Thank you for your 1 2 testimony. I appreciate it. If you like to submit those into the record, they'll be part of it. You can both sign in if you like. 4 5 MR. PLACE: Thank you. HEARING MASTER FINCH: Thank you for that. 6 7 All right. Seeing that that was the only 8 person to speak in support; is that correct? All 9 right. We'll go to testimony in opposition. 10 you want to speak in opposition? Okay. And I have 11 12 one other person online. So we'll take you, sir, 13 first because it's a maximum of 15 minutes. We'll 14 give you -- Rabi, if you can put it for seven and a 15 half minutes to divide the time. 16 MR. ANDERSON: I'll be as quick as I can. 17 HEARING MASTER FINCH: I appreciate that. 18 MR. ANDERSON: My name is James Anderson. Ι 19 have a voice disability. It's called laryngeal 20 dystonia. 21 HEARING MASTER FINCH: Give us your address, 22 please. I'm sorry. 23 MR. ANDERSON: It's 10514 Sedgebrook Drive 24 in Riverview. 25 HEARING MASTER FINCH: Thank you so much.

MR. ANDERSON: My wife and I had a home

built in 1999 on Sedgebrook Drive. I've lived in

the home for four years. I do actually use a

preserve that was talked about. I walk my dogs to

Bell Creek, and before my older dog got old, I

walked to the Alafia River.

It was mentioned affordable housing. I'm not sure what that means. There's not a lot of affordable housing in Riverview. I'm a retired firefighter. If you think of fire, police, teachers, they're not really going to be able to afford this.

Just going through the Planning Commission report, it doesn't meet the location criteria. On Policy 16.10, any density increase shall be compatible with existing surrounding development.

If you look to the north, south, east, and west, none of the areas are anywhere close to this. They're asking for six units per acre. The community that I'm in we have springs.

It's four units per acre, and the others, if you look at page 4 of the application, the other densities are one dwelling unit for 5 acres to the north, four dwelling units per acre to the south.

That's my community. One dwelling unit for 5 acres

Executive Reporting Service

Page 114 to the east. One dwelling unit for 5 acres to the 1 2 west. And that's on page 4 of the application. If you go to page 7 of the planning report, 4 goal No. 2, item No. 4, mixed-use, focus in direct 5 development toward walkable mixed-use town center. 6 This is not a town center. This has a preserve to the right, and then 8 as I said, a drainage pond to the left is the county facility. It's not a town center. Across 9 the street is a community that's been there -- that 10 11 part of the community was probably built about 30 years ago. My brother first moved into the 12 13 community in '98. So that part was already built. They would be using the same traffic light 14 15 as Boyette Springs. And Boyette Springs, later on 16 in the report, it says there's a school right 17 across the street. The schools in Boyette Springs 18 is on Sedgebrook Drive. 19

So the traffic backs up at this school every morning and every afternoon, and it backs up all the way out on to Boyette. So that light is already restricted from school traffic in the morning and in the afternoon.

The proposed density -- I'm on page 10 -- of 6 dwelling units per acre, in my opinion, it's just

20

21

22

23

24

Page 115 1 too dense for this area. And, again, I already 2 mentioned on page 10. It says on the document from the planning the school is located directly across the street on the south side of Boyette. No. 5 located on Sedgebrook Drive. 6 Okay. Next item, the subject site does not meet commercial location criteria, CLC, 8 Objective 22 and FLU Policies 22.1 and 22.8. And a waiver has been requested but hasn't been 10 authorized. The development should wait for the waiver. 11 12 And it is mixed-use development going in 13 right across -- I understand there's a wall there, 14 but it's going right across my residential 15 community. And, of course, the applicant's site 16 plan shows commercial buildings on the southern 17 parts or directly across from Boyette Springs. If they're going to allow the mixed-use, it 18 19 should be some written proviso requiring no 20 variances for the businesses. Buffers on Boyette 21 Road for Boyette Springs. That wall isn't a complete buffer. 22 23 If you have commercial areas over there and 24 there's a variance issued in later years, who knows 25 what's going to go in there. Nobody does. And,

Page 116 again, the commercial area is using the same 1 2 traffic light as Boyette Springs and Boyette Springs Elementary. 4 The density is currently three units for the 5 18 acres. They're going to six units. So going from a total of three to a total of 86. 6 That's a huge increase across from a residential 8 neighborhood. And the traffic that's going to come from 9 10 this, if you look at the presentation, the document, you already have Boyette listed as level 11 12 of service D as in dog. You're adding 22 according 13 to your document -- 2209 more cars. When I -- most of my turns are at that 14 15 traffic light across from this development going to 16 the right on Boyette. If I try to do that in the 17 evening, the traffic is a stand still. It's a 18 stand still now, and you're going to add 2299 more 19 two-way volumes every day to that. 20 HEARING MASTER FINCH: You got about a minute left. 21 22 Okay. Again, I'd just like MR. ANDERSON: 23 to highlight the four surrounding properties; one 24 dwelling unit for 5-acre, four dwelling units per 25 acre, one dwelling unit for 5 acres, and one

	Page 117
1	dwelling unit for 5 acres in the amount of
2	additional daily trips 2299. I think that is it.
3	Any questions?
4	HEARING MASTER FINCH: I don't have any
5	questions, but I appreciate you coming down and
6	your testimony. If you could please sign in with
7	the clerk's office, if you'd like to submit
8	anything, you're more than welcome to.
9	All right. Seeing no one else in the room
10	in opposition, we'll go to the person online.
11	MR. LAMPE: Ethel, I believe you have to
12	enable your camera.
13	MS. HAMMER: Good evening. My name is Ethel
14	Hammer. My address is 19825 Angle Lane, Odessa,
15	Florida 33556.
16	And I'm here this evening representing the
17	Tampa Bay Conservancy, and I am currently serving
18	as the president of that organization. The
19	Conservancy is a nonprofit organization that owns
20	the 60-acre parcel of land that is adjacent and
21	immediately to the north of this rezoning request.
22	That property known as the Myron and Helen
23	Gibbons Nature Preserve is a pristine riverine
24	habitat on Bell Creek and the Alafia River.
25	Recently, we were privileged to have this property

Page 118 nationally recognized as a growth for us by the Old 1 Growth Forest Network. It is our premier property in Hillsborough County. It's a highly sensitive habitat with over 4 5 120 different species. It's a refuge for wildlife, and it contributes to the protection of water 6 quality in the Alafia River. 8 I wanted to make a couple of comments about some of the statements that the owner of the 9 adjacent property said. We do have parking. 10 have that 50-foot access strip into the preserve 11 12 that affords quite a bit of parking for our 13 visitors. 14 We are not all wet. We wouldn't have been 15 designated as an Old Growth Forest if we were all 16 wet. The -- he made the statement that it's never visited. 17 18 We have organized groups that come to the 19 preserve. We collaborate with the Boy Scouts and 20 the Girl Scouts for educational visits. Last year, we hosted -- we were one of the sites that hosted 21 22 the Florida Birding Festival. 23 So we do have invited visitors to our 24 preserve. The board of the Conservancy reviewed 25 this rezoning application and voted unanimously to

Page 119 oppose it as presented. The basis for our 1 objection is the intensity of the project and the potential impacts to the preserve. Both the increased density over what the Comp Plan permits and the introduction of 6 commercial into the area would be objectionable, and we feel would not be appropriate at this location. The introduction of commercial is not compatible with the surrounding residential 10 development, nor is it compatible with the pristine 11 12 environment of our preserve. 13 Both the commercial and the increased density have the potential to bring increased 14 15 unwanted foot traffic into the preserve which could 16 result in very negative impacts, and we've recently 17 experienced vandalism to some of the structures in 18 the preserve. 19 We also would be concerned about the 20 potential for increased noise that will result from 21 the increased density of development. Basically, 22 it is our position that the more intense the project, the more incompatible it will be to the 23 24 preserve. 25 We ask that you recommend denial of this

	Page 120
1	application as submitted to protect the
2	neighborhood and to protect the environmental
3	treasure that we have in the Gibbons preserve.
4	Thank you.
5	HEARING MASTER FINCH: Thank you,
6	Ms. Hammer, for your testimony. I appreciate it.
7	All right. Just one final check of anyone
8	else that would like to speak in opposition?
9	Seeing none, we'll close that portion of the
10	hearing. We'll go back to Development Services.
11	Mr. Grady, anything further?
12	MR. GRADY: Nothing further, unless you have
13	questions.
14	HEARING MASTER FINCH: Just to go back to
15	the question of the Planning Commission and the
16	change in their finding, if the proposed condition
17	were to be implemented as part of the application
18	and, therefore, that would change Development
19	Services's position as well; is that correct?
20	MR. GRADY: Correct. Also, just to ask the
21	applicant to clarify about the fencing condition I
22	spoke of earlier.
23	HEARING MASTER FINCH: All right. Will do.
24	All right. We'll close that and we'll go to
25	rebuttal. Ms. Corbett.

	Page 121
1	MS. CORBETT: Yes. If I could briefly ask
2	Ms. Naylor to come back to the podium. And just
3	ask you a question, in your professional opinion
4	and do we have your resumé on file?
5	MS. NAYLOR: I have a copy.
6	MS. CORBETT: Could you qualify yourself?
7	And in your professional opinion, is this
8	development incompatible with the nature preserve
9	to the north?
10	MS. NAYLOR: I don't see that this
11	development is incompatible.
12	MR. GRADY: Ma'am, we need your name and
13	address for the record.
14	MS. NAYLOR: I'm sorry. Abbey Naylor, 14706
15	Tudor Chase Drive, Tampa, Florida.
16	I don't see that this development is
17	incompatible with the adjacent land use given the
18	amount of additional buffer we're providing to that
19	preserve.
20	In the design, it was we heard and saw
21	the comments back from the Sierra Club and the
22	Tampa Bay Conservancy and do recognize that that is
23	a beautiful property and a valuable preserve for
24	the area providing that floodplain compensation and
25	stormwater management that's directly adjacent

Page 122 providing a buffer from impervious development in 1 2 the narrowest part of 213 feet and at the furthest distance 340 feet. 4 I do believe that is a very compatible transition for the project. 5 6 HEARING MASTER FINCH: All right. Thank you 7 so much. If you'd like to submit your resumé into 8 the record, you're more than welcome to. 9 MS. CORBETT: And just briefly, obviously, the gentleman that was reading from staff report, 10 the conclusion of the staff report is that this 11 12 development is compatible and consistent. So I 13 would like to just state that. 14 Speaking to -- I just want to clarify 15 something about the change to Condition 1.4 and 16 kind of how we got here. That policy 17 interpretation of 19.3 and the timing mechanism 18 that either does or doesn't exist in the 19 Comprehensive Plan has been evolving over the last 20 several years. 21 The condition that we are proposing tonight 22 is consistent with conditions proposed in other 23 developments that have been approved. There was a 24 recent -- probably within the last six months --25 zoning that I actually handled for another client

that was on Simmons Loop and 301, which is a large multifamily 464-unit development.

And at the Board hearing, the conditions of the zoning didn't have a timing mechanism at all. But the same thing, we were relying on the third use to do a density bump.

And they -- at the Board hearing, that client was asked by one of the Board members, would you agree to a condition that would limit the development of the density beyond the density bump and condition on a CO to the day care, which was our proposed use?

And for that client who was the developer of the multifamily and the daycare, they were able to agree to a condition that they would not CO anything until the daycare was done because that worked for them. They were going to pull all the permits of the multifamily.

And so now here we find ourselves with staff now taking that condition from that zoning is now being the new guidepost as to when the timing mechanism should be in place.

And so that's why our client Mattamy and the property owner here were somewhat caught off guard because in previous interpretations of Policy 19.3,

Page 124 what we are proposing for our timing mechanism was 1 2 acceptable. And so, yes, we're here -- we're seeking a recommendation of approval from you, and if the only way that you feel comfortable doing 5 that is based on the staff reports, we would ask 6 that you do so. But the only way we could present our case 8 to the Board of County Commissioners was to present this issue to you this evening. HEARING MASTER FINCH: Understood. 10 11 understand your point. I just want to ask the 12 proposed condition, which completely eliminates the 13 timing as well as the commitment for the three 14 uses, because if you eliminate that, it reads 15 condition No. 1 just talks about it's a mixed-use 16 project, and here's what you can do. But there's 17 no commitment to actually developing the three 18 uses. 19 MS. CORBETT: The intent is that there would 20 have to be three uses. So we couldn't just do one 21 use and then two uses from one use group. We 22 understand that that is the language doesn't -- on 23 that is not clear.

Executive Reporting Service

We understand that there do need to be three

uses that are not trying to be cute and get out of

24

1 that requirement.

HEARING MASTER FINCH: Okay. You understand
as it's drafted that the elimination of that
requirement is gone with the proposed draft in my
opinion. But be that, I understand your intent in
presenting the issue as it -- as it's unfolded
tonight.

And you understand the Planning Commission's testimony and then the corresponding Development Services change and recommendation if that were to go forward?

MS. CORBETT: Yes.

13 HEARING MASTER FINCH: All right. Is there
14 anything else you want --

MS. CORBETT: I think we had some housekeeping with conditions. Defense -- I didn't hear what you were saying the seeking of clarification.

MR. GRADY: We think there's a typo because the collective understanding of staff on our end is you meant white Trex as a X not K?

MS. CORBETT: And nonwhite, yes.

MR. GRADY: And then some -- we think it's appropriate to add an explanation of what that intent of that -- and our understanding is Trex

17

18

19

20

21

22

23

24

Page 126 style is sort of like it provides for a natural 1 look of wood. And so I think that explanation needs to be in the condition to sort of understand the intent is that it's not a wood or natural 4 5 fence, but it's a material that has a look of wood. 6 So it's not a white PVC fence because they didn't want --MS. CORBETT: Correct. 9 MR. GRADY: -- so that was my understanding. MS. CORBETT: In the record there are 10 11 actually two photographs that were submitted into 12 the record where someone who is in opposition 13 specifically requested that nonwhite Trex-style 14 fence, and there are two photographs. 15 And so we wouldn't have any objection to 16 somehow incorporating those either in the site plan 17 in some manner. 18 MR. GRADY: Yes. We just need -- I think 19 that kind of clarification is what is intended by 20 that so any reviewers will understand what is intended. 21 22 MS. CORBETT: Yes. We can provide that 23 clarification. And then also in the proposed 24 conditions that Ms. Albert submitted, she did not 25 speak about the -- our offer to -- for the

	Page 127
1	floodplain compensation area, have a 4-to-1 slope
2	be planted with appropriate native species on
3	3-foot centers for herbaceous ground cover and
4	5-foot centers for shrubs and 10-foot centers for
5	trees. And we also offering that condition. I
6	just want to make sure that that was said into the
7	record.
8	HEARING MASTER FINCH: Okay. Understood.
9	All right. Does that complete your rebuttal
10	testimony?
11	MS. CORBETT: If I could have 30 seconds for
12	Mr. McGraw?
13	HEARING MASTER FINCH: Sure. You have a
14	minute and a half. Good evening.
15	MR. MCGRAW: Hi. My name is Mac McGraw.
16	I'm with the applicant Mattamy Homes. My address
17	is 3000 West San Nicholas Street in Tampa, Florida.
18	So one thing I want to correct that
19	Mr. Place said, I think he was trying to say that
20	our townhomes are priced relative to single-family
21	development at a discount. A significant discount.
22	We're not building affordable homes. I just
23	want to make sure that's clear so I don't read that
24	in the paper tomorrow.
25	Also, on the timing mechanism, we're talking

Page 128 about 88 townhomes or 86 townhomes. The prices 1 stop at 56 and wait for the commercial to come online. It's an extreme burden for us because we have to build this infrastructure up front and then 5 we have to maybe possibly wait. In this situation we're not -- we're 6 partnering with Bill in the sense that he's going 8 to be continuing to market the property while we're 9 in there selling homes, and so we're not -- we don't control that component of the development. 10 So it's very -- it'd be hard for us to 11 12 possibly do this if we have to stop and wait for 13 him to complete before we go back in there and 14 finish 20, 30 more townhomes. So we just want to 15 make sure that's explained. And I think that's it. 16 Thank you. 17 HEARING MASTER FINCH: All right. Thank you 18 for your testimony. If you could please sign in with the clerk's office. 19 All right. Anything else, Ms. Corbett? 20 21 Okay. 22 Then with that, we will close 23 Rezoning 22-0075. 24 It is a little after -- I have 8:07. I 25 think it's appropriate to take a five-minute break

### 1.0 APPLICATION SUMMARY

Applicant: Mattamy Tampa/Sarasota, LLC

FLU Category: RES-4

Service Area: Urban

Site Acreage: 18 +/-

Community Plan Area: Riverview

Overlay: None

### Introduction Summary:

The applicant seeks to rezone a parcel zoned Agricultural Rural (AR) to Planned Development (PD) to allow for the development of a mixed-use project. The project is located on the north side of Boyette Road, ½ mile west of Bell Shoals Rd. in Riverview. A TECO easement runs east-west bisecting the parcel into two areas. The project will consist of 86 multifamily units (attached single-family) north of the TECO easement and up to 20,000 square feet of commercial, office, residential support uses and/or a Community Residential Home Type C south of the TECO easement, along Boyette Road. The developer intends to utilize the Mixed Use Incentive program set forth in the Comprehensive Plan to achieve a density up to 6 du/acre on the site. The site will have one access points on Boyette Rd.

Zoning:	Existing	Proposed	
District(s)	AR	Planned Development	
Typical General Use(s)	Single-Family Residential (Conventional/Mobile Home)	Multi-family Residential and Non-Residential	
Acreage	18	18	
Density/Intensity	1 unit per 5 acre (upland)	6 units per acre/0.20 FAR	
Mathematical Maximum*	3 units	86 Res. Units / 20,000 sq ft	

<sup>\*</sup>number represents a pre-development approximation

Development Standards: Existing		Proposed	
District(s)	AR	PD	
Lot Size / Lot Width	5 Ac / 150'	1,620 sq ft / 18'	
Setbacks/Buffering and Screening	50' Front 50' Rear 15' Sides	Residential 20' Front 10' Rear (35' east) 10' Sides (35' east)	Non-Residential 20' Front 20' Rear 20' Sides
Height	50'	35'	35'

Additional Information:						
PD Variation(s)	None requested as part of this application					
Waiver(s) to the Land Development Code	To Section 6.01.01.01 Footnote 8.  Reduce the required building setback for building height over 20 feet (west).					

Planning Commission Recommendation:	Development Services Recommendation:				
Consistent	Approvable, subject to proposed conditions				

ZHM HEARING DATE: BOCC LUM MEETING DATE: July 25, 2022 September 13, 2022

Case Reviewer: Israel Monsanto

### 2.0 LAND USE MAP SET AND SUMMARY DATA

# 2.1 Vicinity Map

# Context of Surrounding Area:

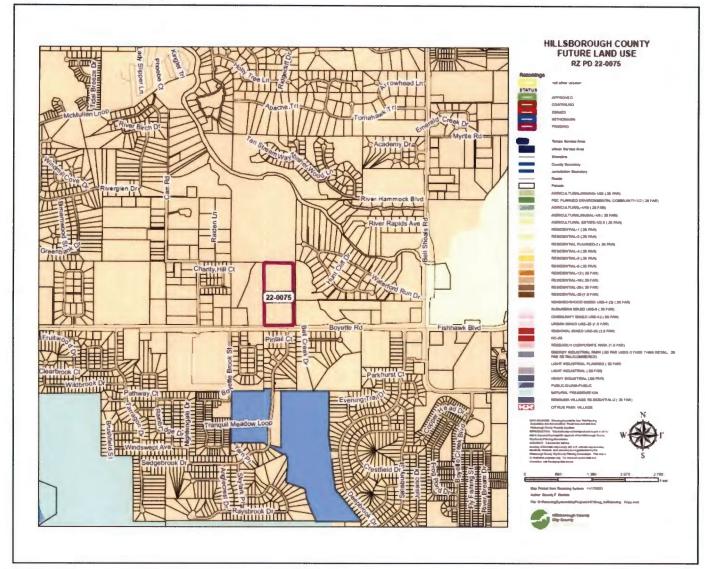

The project is located north of Boyette Road, between McMullen Rd. and Bells Shoals Rd. Area mostly consists of residential land. Some office uses are located to the west and east. Commercial uses are found further east, at the intersection of Boyette Rd and Bell Shoals Rd. Private schools and churches are also found in the area.

ZHM HEARING DATE: BOCC LUM MEETING DATE: July 25, 2022 September 13, 2022

Case Reviewer: Israel Monsanto

### 2.0 LAND USE MAP SET AND SUMMARY DATA

### 2.2 Future Land Use Map

Subject Site Future Land Use Category:	Residential - 4
Maximum Density/F.A.R.:	Up to a maximum of 4.0 dwelling units per gross acre. Alternative methods for calculating density of certain uses are specified in the land development regulations. Density bonuses and credits may be considered in this category and are described in the Plan. suburban scale neighborhood commercial, office, multi-purpose or mixed use projects limited to 175,000 sq. ft. or .25 FAR, whichever is less intense. Actual square footage limit is dependent on classification of roadway intersection where project is located.
Typical Uses:	Residential, suburban scale neighborhood commercial, office uses, and multi-purpose projects.  Nonresidential uses shall meet locational criteria for specific land use. Agricultural uses may be permitted pursuant to policies in the agricultural objective areas of the Future Land Use Element.

Case Reviewer: Israel Monsanto

ZHM HEARING DATE: July 25, 2022 BOCC LUM MEETING DATE: September 13, 2022

### 5.0 IMPLEMENTATION RECOMMENDATIONS

### 5.1 Compatibility

The property's existing use is a recreational golf course. The site is surrounded to the south, southeast, and southwest by single-family detached home sub. Further southwest is Saint Stephens Catholic Church and School. The parcel adjacent to the west contains the Hillsborough County South Central Water Pump Station. Further to the west is single-family detached housing. The adjacent parcel to the north and east is owned by the Tampa Bay Conservancy Inc. (Myron and Helen Gibbons Nature Preserve). Further to the northeast is the western boundary of a large single-family detached home subdivision with frontage directly on Bell Shoals Road. To the east, along Boyette Rd., is land owned by Hillsborough County containing a large water retention pond.

Case Reviewer: Israel Monsanto

The subject property is currently developed as a golf driving range. According to the project's narrative, this property is one of the last developable sites in the area, and with its direct access onto Boyette Road, a lighted intersection, and close proximately to Bell Shoals Road, it is a prime location for a mixed-use project. Boyette Road is a 4-lane collector road and existing land uses along this corridor range from commercial uses, private educational facilities, retail uses, residential uses, and preserved areas.

The request is to rezone the subject site from Agricultural Rural (AR) to Planned Development (PD) to allow up to 86 Townhomes (single-family attached) with a density bonus within Parcel 1 (north an existing TECO easement) and up to 20,000 sq. ft. of limited Commercial Neighborhood (CN) from three distinct use categories in Parcel 2 (south of the TECO easement, along Boyette Rd.). In order achieve 86 residential units (at 6 du/ac), the applicant is utilizing Policy 19.3 which provides incentives to encourage mixed-use development by providing at least 3 uses on site which in turn will permit density/FAR up to the next land use category, where 2 uses shall be non-residential uses. The non-residential uses have been classified into 3 Groups. The applicant met with staff and is proposing a list and size of development that could be considered, where at least 2 uses shall be developed in Parcel 2, one use from either Group, where no two uses are chosen from the same group. The applicant is also committed to limiting the height to one-story and architecturally finished on all four sides with a residential like appearance for the non-residential portion of the site.

The three use Groups are proposed as follows:

### Group A - Retail - No drive-thru

4,500 SF site down restaurant

2,500 SF coffee shop

5,000 SF Bank

4,000 SF Fitness Center

5,000 SF Brewery/Beer Garden

5,000 SF Retail limited to:

Apparel and Shoe Store

Appliance Stores, Small

Art Supply Store

Bicycle Sales/repair

Book/Stationary Store, New and Used

Camera/Photography Store

Florist Shop

Furniture/home furnishings

General Business, Such as Retail Goods and Stores

Jewelry Store (Watch, clock, Jewelry Repair)

**New Stand** 

Novelty and Souvenir Shop

Optician/Optical Supplies

**APPLICATION NUMBER:**

Locksmith

Mail and Package Services

Mail Order Office

Mail Order Pickup Facilities

Pet shop (no outdoor rec area)

**Sporting Goods Store** 

5,000 – 10,000 SF Specialty Food Store to include:

Bakery, Candies, & Nuts, Dairy, Delicatessens, Meat Seafood and Produce

### Group B - Office - No drive-thru

10,000 SF limited to:

Urgent Care (no 24 hour operation)

Outpatient Surgical Center (no 24 hour operation)

**Employment Services** 

**Government Office** 

Health Practitioner's Office

Medical Offices or Clinics with scheduled or Emergency Services by Physicians (No 24 hr use)

Case Reviewer: Israel Monsanto

Professional Office

**Professional Services** 

### Group C-Residence Support - No drive-thru

10,000 SF limited to:

Day Care (child / pet)

Community Residential Home/Memory Care (maximum 125 beds)

No drive thru facilities will be permitted to prevent intense uses from developing on site.

A waiver to the additional 2-foot setback for every foot above 20-feet in height, per LDC Section 6.01.01. endnote 8 is being requested only on the west side of the site. The 2:1 requirement is to address potential compatibility issues however, the adjacent use is TBW water facility. There is a 5-foot buffer proposed along the western PD boundary. The eastern boundary will maintain the "2:1" requirement although the closest single-family development is located 500 feet to the east with heavy vegetation functioning as a buffer between both uses. The LDC requires a 5-foot buffer with a Type A screening between the proposed residential use and the adjacent AR zoning along the east/north. With the required 5-foot buffer and building height of 35-feet, an additional 30-foot setback is required (35' - 20' = 15' X 2 = 30' + 5' buffer). The total required setback is 35 feet. Furthermore, the applicant is committed to include a 6-foot fence with a 10-foot buffer / type B screening.

Commercial development standards will be of the Commercial Neighborhood (CN) standards, single story structures. The applicant is committed to a timing mechanism that would guarantee the development of all proposed uses and comply with the mixed use Objectives and Policies from the Comprehensive Plan. Prior to the issuance of any Certificate of Occupancy for 58 or more residential units, two of the non-residential uses listed in the Group lists above will need be constructed with a Certificate of Occupancy issued.

Staff has received letters of concerns and opposition from area residents, the Tampa Bay Conservancy and Sierra Club. The letters expressed concerns with traffic generated by the proposed development, school capacity, noise, impacts to the nature preserve, increase in density, introduction of commercial uses in the area, impacts to water supply and reduction of setbacks/buffer from the natural preserve along the east. The applicant has amended the application and reduced the intensity of the non-residential uses, restricted square footage of the day care, eliminated school uses, and will maintain the required buffer/setback along the east in accordance with the Land Development Code. The project will maintain a minimum of 35 feet of building setback along the east, meeting the requirement of the Code. In

APPLICATION NUMBER: PD 22-0075

ZHM HEARING DATE: July 25, 2022 BOCC LUM MEETING DATE: September 13, 2022

er 13, 2022 Case Reviewer: Israel Monsanto

addition, a 20-foot buffer, with Type B screening will be in place for the residential portion. Per LDC Sec. 6.06.06, the proposed project would require at least 5 feet of buffer between residential uses (Parcel 1) and AR zoning with Type A screening. The Type A screening requires plantings or a solid fence. The applicant proposes 210 feet of buffer with Type B screening. Existing vegetation will be allowed to remain in lieu of required landscaping and trees, subject to approval by Natural Resources. The additional landscaping (Type B) consists of a row of evergreen shade trees which are not less than ten feet high at the time of planting, a minimum of two-inch caliper, and are spaced not more than 20 feet apart. The trees are to be planted within ten feet of the property line. The solid fence will also be placed at least 10 feet from the parcel line, away from existing vegetated areas. Between Parcel 2 (non-residential uses) and the nature preserve site along the east, the applicant proposes a 30-foot buffer with Type B screening. The Code requires at least 20 feet of buffer and Type B screening. Per the submitted site plan, retention ponds will be placed along the east, adjacent to the nature preserve, and vegetation will be preserved subject to Natural Resources review and approval. As part of the site development review process, the developer is required to provide wildlife and environmental studies in accordance with the Land Development Code. The project will be conditioned requiring that water distribution system improvements will need to be completed prior to connection to the County's water system by this future development. No building permits that would create demand for water service will be issued until the completion of two County funded Capital Improvement Program projects in South County are put into operation. Stormwater design and construction will be subject to review and approval by the site development review section as established in the Land Development Code to ensure the project will capture all stormwater onsite. The proposed PD plan shows areas for future retention ponds. Comments from the School Board state that a school concurrency review will be issued PRIOR TO preliminary plat or site plan approval. The School Board also indicated that at this time, additional capacity at the middle and high school levels exists in adjacent service areas to accommodate the proposed project, and capacity exists in the Elementary School level for this area.

Although cross access to adjacent parcels is encouraged, the existing adjacent uses restricts this. The Tampa Bay Water supply facility is located to the west with its own access fenced with a 6-foot chain link fence with electrical wires to prevent trespassing. The Gibbon Nature Preserve is located to the north and east of the subject site and future development of this site is unlikely.

The is located between a water supply facility to the west and a storm water pond and recreation land/preserve to the east and to the north. Residential subdivisions surround this area to the north, northeast and south. Other residential projects are located further to the west. The site is also bisected by the 150-foot wide TECO easement creating two distinct areas for commercial use along Boyette Road and the residential component internal to the site, adjacent to the preserve. The TECO easement functions as buffer between both uses, however the site will be interconnected by vehicular and pedestrian access.

There are wetlands present on the site. The Environmental Protection Commission, EPC, reviewed the proposed Site Plan and does not object. No impacts to wetlands or setbacks are shown on the proposed Plan. The Conservation and Environmental Lands Management reviewed this rezoning petition and has no comments. Transportation staff does not object to this request and proposes conditions for site access and road improvements along Boyette Rd.

The area is a mix of mostly residential single family-detached, and low scale commercial, and office uses. Residential support uses (schools and churches) are also commonly found in the area. The proposed project scale and design would ensure that is compatible with the surrounding development pattern and land uses. Intensive uses are being eliminated from the proposed development. The project will maintain the required setbacks along the east, where the adjacent nature preserve is located, as required per the LDC. The applicant, however, will provide additional buffer and screening more than what the Code requires. The non-residential component will be limited to 1-story buildings with a residential design. Compared to the initial proposal by the applicant, the project has been scaled down, more restrictions have been proposed, and compliance with provision from the Code has been maintained. Staff from the Planning Commission has evaluated the request and has found it Consistent. Objective 19 and Policy 19.2 indicates that a mixed-use development must be integrated. Policy 16.2 requires the gradual transition between uses. The

APPLICATION NUMBER: PD 22-0075

ZHM HEARING DATE: July 25, 2022 BOCC LUM MEETING DATE: September 13, 2022

applicant's site plan shows the commercial buildings are in the southern portion of the property facing south towards Boyette Road. The proposed site plan shows an integrated design to the residential located on the northern portion of the property and a gradual transition from the natural preservation area to the north and east, consistent with policy direction. To ensure the project will be developed in accordance with the objectives and policies above, a timing mechanism for the development of the mix of uses is being proposed requiring the construction and certificates of occupancies for two non-residential uses to be issued before the additional residential units can be constructed. Planning Commission staff also sees no compatibility issues as the adjacent use is public institutional. Lastly, a waiver to the Commercial Locational Criteria (CLC) has been requested, and Planning Commission staff recommends approval of the waiver.

Case Reviewer: Israel Monsanto

### 5.2 Recommendation

Based on the above considerations, staff recommends approval with conditions.

### 6.0 PROPOSED CONDITIONS

Prior to PD Site Plan Certification, the applicant shall revise the PD General Site Plan:

1. Prior to site plan certification, the applicant shall revise site plan to add a label along the project frontage on Boyette Road that states "+/-8 FEET OF ROW PRESERVATION TO BE PROVIDED ALONG BOYETTE ROAD PER HILLSBOROUGH COUNTY CORRIDOR PRESERVATION PLAN "

**Approval** - Approval of the request, subject to the conditions listed below, is based on the general site plan submitted July 5, 2022.

1. The project shall be limited to a Mixed-Use project with up to 86 multifamily (attached single-family) units in Parcel 1 and up to 20,000 sq. ft. of non-residential uses in Parcel 2. Interim agricultural or current mini-golf (golf driving range) recreational uses shall be permitted until the site is developed in accordance with the conditions contained herein.

Development of Parcel 2 shall be limited to the following:

1.1 Group A – Retail/commercial – No drive-thru

4,500 SF site down restaurant

2,500 SF coffee shop

5,000 SF Bank

4,000 SF Fitness Center

5,000 SF Brewery/Beer Garden

5,000 SF Retail limited to:

Apparel and Shoe Store

Appliance Stores, Small

Art Supply Store

Bicycle Sales/repair

Book/Stationary Store, New and Used

Camera/Photography Store

Florist Shop

Furniture/home furnishings

General Business, Such as Retail Goods and Stores

Jewelry Store (Watch, clock, Jewelry Repair)

**New Stand** 

Novelty and Souvenir Shop

Optician/Optical Supplies

1.3 Group C – Residence Support - No drive-thru

10,000 SF limited to:

Day Care (child / pet)

Or a Community Residential Home Type C/Memory Care (standards and maximum number of beds in accordance with LDC 6.11.28)

- 1.4 Prior to the issuance of any Certificate of Occupancy for 58 or more residential units, two of the non-residential uses listed in the Group lists above shall be constructed with a Certificate of Occupancy issued. Additionally:
  - a. The developer shall pick/develop the required two uses from different Groups.
  - b. No single non-residential use shall be less than 2,500 sq. ft. in building space.
- 1.5 Buildings containing Non-residential uses shall be of a residential character in their design. At a minimum, the buildings shall be subject to the below:
  - a. Architecturally finished on all sides. Cladded in brick, stucco, or wood siding. Paint shall not constitute an architectural finish.
  - b. Pitched roofs, if provided, shall be a minimum of 4 to 12 in pitch.
  - c. Flat roofs shall provide a cornice at least 12 inches high and projected at least 2 inches.
  - d. Windows facing roads (external/internal) shall include a trim consistent with the architectural style of the building.
  - e. At least 50 percent of the facades area facing the Boyette Rd. shall consist of windows, awnings, entrances, columns, porches, stoops, pilasters, or similar features.
- 2. Development standards shall be as indicated in the General Site Development Plan and as follows:
  - 2.1 Single Family attached units in Parcel 1:

APPLICATION NUMBER:	PD 22-0075	
ZHM HEARING DATE: BOCC LUM MEETING DATE:	July 25, 2022 September 13, 2022	Case Reviewer: Israel Monsanto
Maximur	n building height	35 feet/2 stories
Minimum	n front yard setback	20 feet
Minimum	n side yard setback	20 feet (between buildings)
Minimum	rear yard setback	10 feet to PD lines
		Along the east PD line, a minimum of 35 feet of building
		setback shall be maintained.
Maximun	n impervious area	75%

2.4 Non-Residential Uses in Parcel 2:

In accordance with the CN zoning district development standards (see condition 11 for right-of-way preservation). Buildings shall be limited to one story.

- 3. Open space and Community Gathering Areas shall be provided for the residential project and subject to LDC Sec 6.02.18.
- 4. Buffer and screening between adjacent parcels shall be as depicted in the General Site Plan. Existing vegetation in lieu of the required plantings shall be permitted, subject to Natural Resources approval. A 210-foot buffer and Type B screening with a 6-foot high solid fence shall be maintained along the east PD line in Parcel 1, as shown on the General Site Plan. The fence shall be installed at least 10 feet from the PD line.
- 5. The additional 2 feet of building setback required for every foot of building height over 20 feet in accordance with LDC 6.01.01 footnote 8 shall not apply to west PD line, in Parcel 1.
- 6. The site is subject to the requirements of LDC Sec. 6.06.03.1.2.b. Scenic Corridor Easement.
- 7. The developer shall be permitted one (1) full connection to Boyette Road.
- 8. The unutilized driveway aprons shall be removed; and curbing and grass strip restored to meet typical standards.
- 9. Notwithstanding anything herein these conditions or on the PD site plan to the contrary, bicycle and pedestrian access may be permitted anywhere along the PD boundary.
- 10. The developer shall extend the existing eastbound left turn lane into the project on Boyette Rd with the initial increment of development.
- 11. As Boyette Road is included in the Hillsborough County Corridor Preservation Plan as a future 6-lane improvement, the developer shall designate 8 feet of right of way preservation along the project frontage on Boyette Road. Building setbacks shall be calculated from the future right-of-way line.
- 12. Approval of this zoning petition by Hillsborough County does not constitute a guarantee that the Environmental Protection Commission of Hillsborough County (EPC) approvals/permits necessary for the development as proposed will be issued, does not itself serve to justify any impact to wetlands, and does not grant any implied or vested right to environmental approvals.
- 13. The construction and location of any proposed wetland impacts are not approved by this correspondence, but shall be reviewed by EPC staffunder separate application pursuant to the EPC Wetlands rule detailed in Chapter 1-11, Rules of the EPC, (Chapter 1-11) to determine whether such impacts are necessary to accomplish reasonable use of the subject property.

APPLICATION NUMBER:	PD 22-0075	
ZHM HEARING DATE:	July 25, 2022	
BOCC LUM MEETING DATE:	September 13, 2022	Case Reviewer: Israel Monsanto

- 14. Prior to the issuance of any building or land alteration permits or other development, the approved wetland / other surface water (OSW) line must be incorporated into the site plan. The wetland/OSW line must appear on all site plans, labeled as "EPC Wetland Line", and the wetland must be labeled as "Wetland Conservation Area" pursuant to the Hillsborough County Land Development Code (LDC).
- 15. Final design of buildings, stormwater retention areas, and ingress/egresses are subject to change pending formal agency jurisdictional determinations of wetland and other surface water boundaries and approval by the appropriate regulatory agencies.
- 16. Water distribution system improvements will need to be completed prior to connection to the County's water system. No building permits that would create demand for water service shall be issued until the completion by the County of funded Capital Improvement Program projects C32001 South County Potable Water Repump Station Expansion and C32011 Potable Water In-Line Booster Pump Station, and the projects are put into operation.
- 17. If the notes and/or graphic on the site plan are in conflict with specific zoning conditions and/or the Land Development Code (LDC) regulations, the more restrictive regulation shall apply, unless specifically conditioned otherwise. References to development standards of the LDC in the above stated conditions shall be interpreted as the regulations in effect at the time of preliminary site plan/plat approval.
- 18. The Development of the project shall proceed in strict accordance with the terms and conditions contained in the Development Order, the General Site Plan, the land use conditions contained herein, and all applicable rules, regulations, and ordinances of Hillsborough County.

Zoning Administrator Sign Off:

J. Brian Grady Sun Jul 17 2022 08:30:10

SITE, SUBDIVISION AND BUILDING CONSTRUCTION IN ACCORDANCE WITH HILLSBOROUGH COUNTY SITE DEVELOPMENT PLAN & BUILDING REVIEW AND APPROVAL.

Approval of this re-zoning petition by Hillsborough County does not constitute a guarantee that the project will receive approvals/permits necessary for site development as proposed will be issued, nor does it imply that other required permits needed for site development or building construction are being waived or otherwise approved. The project will be required to comply with the Site Development Plan Review approval process in addition to obtain all necessary building permits for on-site structures.

### AGENCY REVIEW COMMENT SHEET

TO: Zoning Technician, Development Services Department REVIEWER: Alex Steady, Senior Planner PLANNING AREA: RV/South		DATE: 03/30/2022 AGENCY/DEPT: Transportation PETITION NO: PD 22-0075	
	This agency has no comments.		
	This agency has no objection.		
X	This agency has no objection, subject to the listed or attached conditions.		
This agency objects for the reasons set forth below.			

### **CONDITIONS OF APPROVAL**

- The developer shall be permitted one (1) full connection to Boyette Road.
- The unutilized driveway aprons shall be removed; and curbing and grass strip restored to meet typical standards.
- Notwithstanding anything herein these conditions or on the PD site plan to the contrary, bicycle and pedestrian access may be permitted anywhere along the PD boundary.
- The developer shall extend the existing eastbound left turn lane into the project on Boyette Rd with the initial increment of development.
- As Boyette Road is included in the Hillsborough County Corridor Preservation Plan as a future 6-lane improvement, the developer shall designate 8 feet of right of way preservation along the project frontage on Boyette Road. Building setbacks shall be calculated from the future right-of-way line.

### OTHER CONDITIONS:

 Prior to site plan certification, the applicant shall revise site plan to add a label along the project frontage on Boyette Road that states "+/-8 FEET OF ROW PRESERVATION TO BE PROVIDED ALONG BOYETTE ROAD PER HILLSBOROUGH COUNTY CORRIDOR PRESERVATION PLAN "

### PROJECT SUMMARY AND ANALYSIS

The applicant is requesting to rezone the  $\pm$ -18-acre site from Agricultural (AR) to PD to construct 86 townhomes and a maximum of 20,000 square feet of Retail/Commercial and Office uses. The site currently operates as private multi-use recreational facility with a miniature golf course, driving range and batting cages. The site is located on Boyette Rd., approximately  $\pm$ -1,300 feet east of Carr Rd. The Future Land Use designation of the site is Residential  $\pm$  4 (R-4).

### Trip Generation Analysis

The applicant submitted a trip generation and site access analysis as required by the Development Review Procedures Manual (DRPM). Staff has prepared a comparison of the trips potentially generated under the existing and proposed zoning designations, utilizing a generalized worst-case scenario. Data presented below is based on the Institute of Transportation Engineer's Trip Generation Manual, 10<sup>th</sup> Edition.

**Approved Zoning:** 

Zoning, Land Use/Size	24 Hour	Total Peak Hour Trips	
	Two-Way Volume	AM	PM
AR: Mini-Golf (ITE 431)	60*	0	6
AR: Golf Driving Range (ITE 432)	410	12	38
AR: Batting Cage (ITE 433)	160*	0	16
Total Trips	630	12	60

<sup>\*</sup>Estimated based on PM peak hour trips.

**Proposed Zoning:** 

Zoning, Land Use/Size, ITE Code	24 Hour	Total Peak Hour Trips	
Zoming, Eand Goodles, The Code	Two-Way Volume	AM	PM
PD: 5,000 sf Apparel Store (ITE 876)	332	5	21
PD:4,500 sf Fast Food Restaurant without Drive Through Window (ITE 933)	1,558	113	128
PD: 86 Town Homes (ITE 220)	630	40	48
PD: 100 Student Daycare (ITE 565)	409	78	79
Total Trips	2,929	236	276
Internal Capture	N/A	12	44
Pass-By Trips	N/A	2	0
Net Trips	2,929	224	232

**Trip Generation Difference:** 

	24 Hour	Total Peak Hour Trips		
	Two-Way Volume	AM	PM	
Difference (+/-)	+2,299	+212	+172	

The proposed rezoning will result in an increase of trips potentially generated by 2,299 daily trips, 212 AM peak hour trips and 172 PM peak hour trips.

### TRANSPORTATION INFRASTRUCTURE SERVING THE SITE

Boyette Rd. (between Balm Riverview Rd. and Bell Shoals Rd.) is a 4-lane, divided, collector roadway in good condition. Boyette Rd. is characterized by +/- 12-foot wide travel lanes lying within +/- 127ft of right-of-way. There are +/- 5-foot sidewalks and +/- 4-foot wide bicycle facilities along both sides of Boyette Rd. in the vicinity of the proposed project.

### HILLSBOROUGH COUNTY CORRIDOR PRESERVATION PLAN

Boyette Rd. is shown on the Hillsborough County Corridor Preservation Plan as a future 6-lane roadway. The site plan indicates that the right of way on Boyette is 127 feet. According to the Hillsborough County Transportation Technical Manual, a TS-6 4 lane divided roadway with two 11-foot additional travel lanes would total 134 feet of right of way. Adding the existing right turn lane would total 143 feet required for the planned improvement. Subtracting out the existing roadway and dividing evenly for each side of the roadway, a total of 8 additional feet of ROW is required for preservation along the subject frontage on Boyette Road.

### **SITE ACCESS**

The project has a single access on Boyette Rd at a signalized intersection aligning with Sedgebrook Drive and served by an existing 270ft left turn lane. The internal driveway serves the commercial neighborhood uses in Parcel 2. The residential tract is separated from the other uses by a +/-160 ft TECO easement that will remain undeveloped with the exception of the driveway access. The proposed gated entry option to the residential tract will be located outside of the TECO easement as shown on the PD site plan.

Based on the applicant's site access analysis, the existing eastbound left turn lane should be extended to 365 feet to accommodate the peak season plus project traffic. A westbound right turn lane is not warranted.

### **LEVEL OF SERVICE (LOS)**

Level of Service (LOS) information is reported below.

FDOT Generalized Level of Service				
Roadway	From	То	LOS Standard	Peak Hr Directional LOS
BOYETTE RD	BALM RIVERVIEW RD	BELL SHOALS RD	D	С

Re: 12910 Boyette Road, Riverview, FL 33569

The subject property is 17.6 commercial acres at a traffic signal on a 4-lane road. This is not farm land or a large master planned community where the retail could be treated as an afterthought and put on the shelf. Based on cell tower data, this property currently generates more traffic than some of the largest drive thru food users. Ace Range is a large commercial operation.

We have been very active in this area for the last several decades (Alliant Partners and the Radiant Group) and we want to curate the right mixed-use retail here in the event Mattamy is able to set the ground work with residential on approx. 80% of the site. We need them to go first as they are providing the infrastructure and utilities to the remaining 20% of the site that we would ultimately develop into retail, which is much less acreage being used for retail than is the case today.

We are here to express our frustration with the timing requirements around the bonus density for the residential portion, which equates to only 30 more townhomes. Requiring all the commercial to be built and CO'd before the full 84 townhomes may be built is overly restrictive and does not make sense for this site. As we all know, we have a housing supply problem in the Tampa Bay Area and restricting how to legally add some more units is only exasperating it.

Given all of the restrictions being asked of us on the future retail portion, curating the right retail mix is going to take much longer than the residential which will only prevent Mattamy from doing their part in providing more attainable housing now. Please note: If the laundry list of use restrictions were not placed on us, timing would not be a problem. Many users want to be here that are currently being restricted.

One of the few allowed uses currently is a governmental office building. I am not sure how many people here have privately developed a public office building; but it can take 1-3 years to secure just a lease, let alone to build the building. We cannot be expected to have this at the time of permitting a new townhome.

Residential is built and then tenants come. High quality retail is the opposite. It is contingent on the boards of companies in very long-drawn-out timelines to agree to deals, at which time we can finance them and tailor the design appropriately.

This site deserves the best-in-class retail and not forcing a convenient deal in order to please a one-off scenario. With the timing as currently being asked of us, we won't be able to have the best retailers here. We will be forced to design a shirt around a button. The neighborhood deserves better.

Please let all of the townhomes happen first so we can then design the best retail to follow. New roof tops always lead retailer growth and location decisions.

Thank you,

Spencer Muratides

Bachelor of Science, Urban & Regional Planning & Co-op Program

University of Waterloo

Hire Date: 10/12/15

### Registrations

American Institute of Certified Planners

### **Professional Societies**

- · American Planning Association
- Leader of Girls Scouts Troop
- International Council of Shopping Centers

Isabelle Albert has 20 years of experience with urban planning, zoning, and the public hearing process. She provides professional services related to land use issues, special and conditional uses, as well as zoning, community planning, subdivision regulations, and growth management regulations. Her previous experience as Principal Planner for Hillsborough County provides a unique understanding of local planning issues.

### **Experience:**

• Firestone/Bloxham Redevelopment • Tallahassee, FL

Coordinated redevelopment project for the 5.3-acre site mixed-use development (residential, commercial, hotel). Required master plan and form-base site design.

• Pinecrest Land Property • Tampa, FL

Coordinated redevelopment project for a +/-164-acre residential development in Hillsborough County. Required master plan, companion plan and zoning amendments.

• Brandon Main Street • Tampa, FL

Coordinated redevelopment project for a +/-56-acre site mixed-use development (residential, commercial, open space) – required master plan and zoning amendment including crafting Traditional Neighborhood Design guidelines.

• Westshore Medical/Professional Development Due Diligence • Tampa, FL

Prepared Due Diligence report for the Zoning and Land Use component, including pertaining regulations of the Westshore Overlay District, and Development of Regional Impact requirements.

Van Dyke Road and Old Tobacco Road Plan Amendment, ROW Vacation and Rezoning
 Lutz, FL

Coordinated redevelopment project for a 25+ acre Mixed-Use project in Hillsborough County. Project includes retail, medical office and multi-family development. Required master plan, ROW vacation, and companion plan and zoning amendments.

- Fisher Pumps Land Use Plan Amendment/ Comprehensive Plan Amendment Tampa, FL Coordinated redevelopment project for redevelopment of a 3+ acre heavy commercial project in Hillsborough County. Required companion plan and zoning amendments.
- Gunn Highway Comprehensive Plan Amendment and Rezoning Tampa, FL Coordinated redevelopment project for 13+ acre medium density residential project in Hillsborough County. Required master plan and companion plan and zoning amendments.
- During her tenure as Principal Planner at the Hillsborough County Government, she was

### responsible for the following:

- o Managing land applications for zoning and subdivision review
- o Preparing Land Development Code text amendments
- o Making presentations at public hearings on land use related matters

### • Previous experience includes:

- o Working at the Planning Office of the Metropolitan Area of San Salvador, El Salvador, identifying new corridors between urban parks
- o Internship at the Bauhaus Academy working with architects and land planners on identifying and redesigning new public spaces from existing spaces

### PROPOSED CONDITIONS

### Revisions to existing condition #4:

4. Buffer and screening between adjacent parcels shall be as depicted in the General Site Plan. Existing vegetation in lieu of the required plantings shall be permitted, subject to Natural Resources approval. A 10-foot buffer and Type B screening with a 6-foot high solid fence (non-white TREK style) shall be maintained along the east PD line in Parcel 1, as shown on the General Site Plan. The fence shall be installed at least 10 feet from the PD line.

### Proposed condition in lieu of proposed condition # 1.4

- 1.4 Prior to the issuance of any Certificate of Occupancy for 58 or more residential units, two of the nonresidential uses listed in the Group lists above shall be constructed with a Certificate of Occupancy issued. Additionally:
  - a. The developer shall pick/develop the required two uses from different Groups.
  - b. No single non-residential use shall be less than 2,500 sq. ft. in building space.
- 1.4 Construction plans for Parcel 1 shall include Parcel 2 with utilities connection on site, stormwater, driveway access, and drive-aisle between Parcel 1 and 2.

### New condition:

<u>The floodplain compensation area's 4:1 slope will be planted with appropriate native species on 3-foot</u> centers for herbaceous ground cover, 5-foot centers for shrubs, and 10-foot centers for trees.

Name: Abbey Naylo

Entered at Public Hearing: ZMM

Exhibit # Date: 7/25/22

Abbey Naylor
Principal Ecologist

Abbey Naylor is owner and Principal Ecologist of Naylor Environmental Solutions LLC with a B.S. in Marine Biology. She has over 20 years of experience in the environmental industry in Florida, with focused interest in the greater Tampa Bay area. Her specialties include local, state, and federal environmental permitting, environmental site assessments including protected species surveys, wetland jurisdictional determinations, permit compliance and project management; She has extensive experience working on commercial, large scale residential, and mixed-use projects. She has also worked in other areas including utility pipelines, marinas, parks, and airports. Ms. Naylor can offer a thorough understanding of local, state, and federal issues as they relate to environmental regulatory concerns. She has worked with regulatory agencies at all levels. She is familiar with project due diligence requirements and the steps necessary to take a project from conception to final build-out. She has also provided expert witness testimony and litigation support.

## **Expertise**

- Environmental Permitting for Wetlands and Protected Species
  - o U.S. Army Corps of Engineers Section 404 and Section 10
  - Water Management Districts
  - o Florida Department of Environmental Protection/State 404 Program
  - o Florida Fish and Wildlife Conservation Commission
  - o U.S. Fish and Wildlife Service
  - o Local Government Environmental Agencies
- Wetland Delineation, Habitat Assessments, and Protected Species Surveys throughout Florida
- Wetland and Protected Species Mitigation Solutions
- Environmental Monitoring
- Due Diligence Support
- Expert Witness Testimony

#### Ms. Naylor's Highlighted Project Experience

#### **Due Diligence Review**

Project: Various

Key Locations: Hillsborough, Pinellas, Manatee, Lee, Sarasota, Hernando, Polk, Charlotte, and Pasco

Counties

Description: Performed numerous due diligence reviews for potential project sites over the last 18 years throughout the state of Florida with a focus in central and south Florida; focused on wetlands and protected species, environmental permitting feasibility, mitigation options and cost. Worked with developers and engineers to gain an understanding of development potential prior to site purchase.

#### **Commercial Development**

Project: Market at Mirada

Location: SR 52 & Clinton Ave Extension, Pasco County, FL

Description: Conducted a wetland delineation and protected species survey for a 15.46-acre property at

the future location of a Publix. Prepared environmental reports for use in permit applications.

Project: Wawa and Tommy's Car Wash

Location: W. Waters Ave. and N. Dale Mabry, Tampa, FL

Description: Secured environmental permits for a 5-acre site. Coordinated mitigation with USACE,

SWFWMD, and EPC.

Project: Rolling Oaks Commons - Shopping Plaza

Location: Rolling Oaks Blvd. Kissimmee, FL

Description: Secured environmental permits for a 70-acre shopping plaza with a Target anchor that had multiple protected species present including gopher tortoises and sand skinks. Coordinated with the USFWS and FWC to secure permits and provide species and wetland mitigation.

Project: Marketplace at Citrus Park

Location: Sheldon and Linebaugh, Westchase, FL

Description: Played an integral role in securing USACE, SWFWMD, and EPC environmental permits for a 32-acre project which includes a Costco and multiple outparcels. Wetland impacts were in excess of 5 acres and a combination of onsite and offsite mitigation was developed to satisfy permitting requirements.

#### **Residential Development**

Project: Blue Heron Lakes Location: Bradenton, FL

Description: Secured a USACE permit and SWFWMD ERP modifications for the construction of an apartment complex on 117-acres. Updated protected species surveys and agency coordination. Oversaw the onsite mitigation which includes the restoration of a 1.30-acre wetland. Supporting in the HUD process and PDP Amendments for the development.

**Project: Wellington Estates** 

Location: Oldsmar, FL

Description: Secured a USACE permit and modification to a SWFWMD permit for the construction of a residential subdivision. The project included assessing the site for wetland and protected species impacts. The schedule for obtaining permits was extremely tight, and Ms. Naylor helped facilitate timely issuance of permits for construction.

Project: Fountains at Falkenburg

Location: Hillsborough County, FL

Description: Secured entitlements for an affordable housing development with a commercial development outparcel located at the corner of south Falkenburg Road and Camden Field Parkway. The project involved wetland jurisdictional determination, listed species survey, justification of wetland impacts and extensive coordination with EPC in demonstrating reasonable use of the property. Permits were obtained from EPC, USACE, and SWFWMD.

Project: Belmond Reserve

Location: Riverview, Hillsborough County, FL

Description: Secured EPC, SWFWMD, and USACE permits for a 188-acre residential development. Conducted protected species surveys and secured a Biological Opinion from USFWS. Received a gopher

tortoise conservation permit from FWC and oversaw the relocation of over 120 burrows to an offsite recipient location.

#### Industrial

Project: Augusta Chemical Location: Augusta, GA

Description: Secured a USACE Section 404 Nationwide permit for the implementation of a site-wide corrective action plan at the former Augusta Chemical Plant. The project included providing protective cover of soil contaminants by covering the area with clean soil until such a time that the area could be remediated. Effort included a wetland delineation, protected species survey and completed the permitting and agency coordination with the USACE for authorization of wetland impacts.

Project: Foley Cellulose Effluent Pipeline

Location: Perry, FL

Description: As a project manager, was responsible for overseeing the request for a permit extension from the USACE for a 15.3-mile effluent pipeline for the Foley Cellulose Kraft pulp mill. The USACE had previously issued a permit and provided several extensions, however due to the change in regulations and amount of time that had passed since original issuance, the USACE required significant updates to the permit in order to issue the extension. Responsible for overseeing the re-delineation of wetlands and reviewing the pipeline route for threatened and endangered species. The revisions are also requiring revisiting seagrass monitoring requirement subsequent to the NPDES permit being issued. Required the resubmittal of all permit drawings, revised UMAM forms and revised mitigation. The extension request was issued in early 2018.

#### **Expert Witness Testimony/Litigation**

Project: **Confidential** Location: Wellington, FL

Description: Provided expert witness testimony and litigation support for a large development project in South Florida. Providing expert opinions on environmental resource permitting, wetlands ecology, and protected species. Participated in depositions and documentation to support appeal of an ERP.

**Project: Clearwater Christian Easter Mitigation Bank** 

Location: Clearwater, FL

Description: Provided expert witness testimony to the Clearwater Community Develop Board regarding mitigation of impacts via establishment of the mitigation bank. Demonstrated the preferred method is the approval of the mitigation bank since it would provide the greatest benefit to the City. Discussed how the mitigation bank aimed to restore tidal flow, nutrients and therefore wildlife to the habitat.

#### **Other Project Experience**

Project experience also includes restoration, mitigation banking, linear projects including energy, utilities, and local government roads, parks and recreation, airports, and marine and seagrass projects.

#### **Prior Work Experience**

Position: Vice President, Birkitt Environmental Services, Inc., 2008-2019

Location: Tampa, FL

Description: Provided environmental consulting services to a variety of industries and clients, both public

and private.

Position: Director Environmental Services, AVID Group, 2006-2008

Location: Palm Harbor, FL

Descriptions: Provided environmental consulting services for commercial and residential development

clients.

Position: Environmental Scientist, Birkitt Environmental Services, Inc., 2003-2006

Location: Tampa, FL

Description: Provided environmental consulting services to a variety of industries and clients, both public

and private.

Position: Environmental Specialist at Florida Department of Environmental Protection – Submerged Lands and Environmental Resource Program 2002-2003

Location: Fort Meyers and Punta Gorda, FL

Description: Permitted a variety of projects utilizing Florida Administrative Codes and Florida Statues in wetlands and surface waters, including OFW's and aquatic preserves. Types of projects permitted include seawalls, docks, linear utility projects, shoreline stabilization projects, single-family, waterway dredging, among others. Performed field verification of permittee submitted survey results. Worked with applicants to avoid or minimize impacts and assisted in identify mitigation to offset unavoidable impacts. Worked in Charlotte, Highlands, Lee, and Collier Counties. Participated in annual seagrass monitoring at 50 transect locations throughout the Charlotte Harbor Aquatic Preserve. Recorded seagrass type, health, and density as well as water quality parameters. Coordinated with FWC on protected species review for projects.

Position: Fisheries Biologist - Mote Marine Laboratory, 2001-2002

Location: Sarasota, FL

Description: Conducted stock enhancement research in coastal and offshore essential fish habitat. Conducted fish releases of aquaculture raised Red Snapper and Snook populations, and surveyed and monitored the populations in order to identify success of stocking efforts. Work also included extensive scientific diving, artificial reef construction and deployment, and aquatic ID and taxonomy.

#### JANUARY 17, 2023 - ZONING HEARING MASTER

The Zoning Hearing Master (ZHM), Hillsborough County, Florida, met in Regular Meeting, scheduled for Tuesday, January 17, 2023, at 6:00 p.m., in the Boardroom, Frederick B. Karl County Center, Tampa, Florida, and held virtually.

Susan Finch, ZHM, calls the meeting to order, leads in the pledge of allegiance to the flag, and introduces Development Services.

#### A. WITHDRAWALS AND CONTINUANCES

- Brian Grady, Development Services, introduces staff and reviews changes/withdrawals/continuances.
- Susan Finch, ZHM, overview of ZHM process.
- Cameron Clark, Senior Assistant County Attorney, overview of oral argument/ZHM process.
- Susan Finch, ZHM, Oath.

#### B. REMANDS

# B.1. RZ 22-0075

- Brian Grady, Development Services, calls RZ 22-0075.
- Cameron Clark, Senior Assistant County Attorney, statement for record.
- Kami Corbett, applicant rep, presents testimony.
- Israel Monsanto, Development Services, staff report.
- Jillian Massey, Planning Commission, staff report.
- Susan Finch, ZHM, calls proponents/opponents
- ▶ Jane Graham, opponent, presents testimony.
- James Anderson, opponent, presents testimony.
- Ethel Hammer, opponent, presents testimony.
- Gary Gibbons, opponent, presents testimony.
- Ryan Brooks, opponent, presents testimony.

- Sabine Prather, opponent, technical difficulties.
- Jennifer Miller, opponent, presents testimony.
- Susan Finch, ZHM, questions to opponent and County Attorney.
- Cameron Clark, Senior Assistant County Attorney, answers ZHM questions.
- Sabine Prather, opponent, technical difficulties.
- Jane Graham, opponent, questions to County Attorney.
- Cameron Clark, Senior Assistant County Attorney, answers opponent questions.
- Jane Graham, opponent, questions to ZHM.
- Susan Finch, ZHM, answers opponent questions.
- Sabine Prather, opponent, presents testimony.
- Susan Finch, ZHM, calls Development Services/applicant rep.
- ► Kami Corbett, applicant rep, provides rebuttal
- Steve Henry, applicant rep, provides rebuttal.
- Abbey Naylor, applicant rep, provides rebuttal.
- Trent Stephenson, applicant rep, provides rebuttal.
- Kami Corbett, applicant rep, continues rebuttal.
- Susan Finch, ZHM, closes RZ 22-0075.
- C. REZONING STANDARD (RZ-STD):

#### C.1. RZ 22-1591

- ▶ Brian Grady, Development Services, calls RZ 22-1591.
- Todd Pressman, applicant rep, presents testimony.
- Susan Finch, ZHM, questions to applicant rep and Development Services.

- Brian Grady, Development Services, answers ZHM questions.
- Todd Pressman, applicant rep, answers ZHM questions and continues testimony.
- Susan Finch, ZHM, questions to applicant rep.

- Susan Finch, ZHM, closes RZ 22-1387.

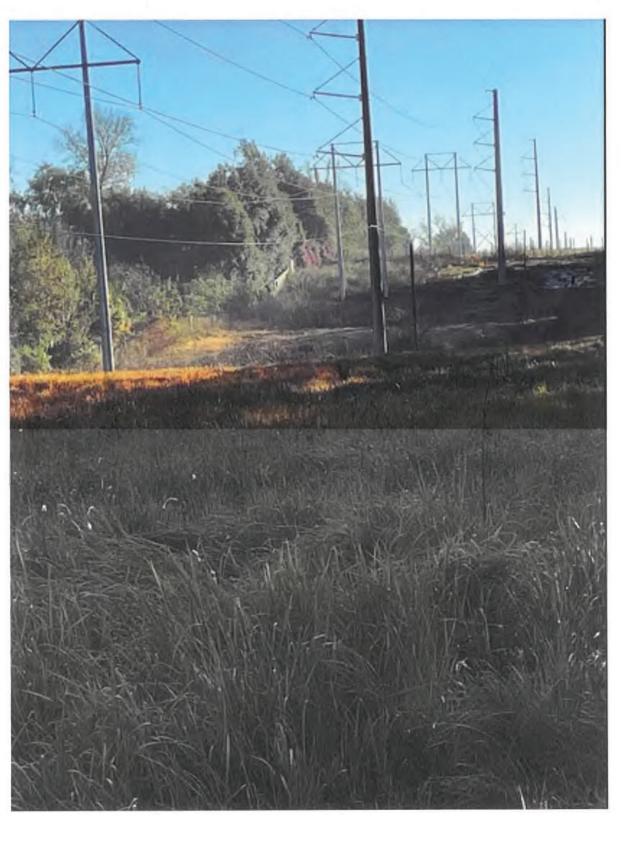

#### D.9. RZ 22-1499

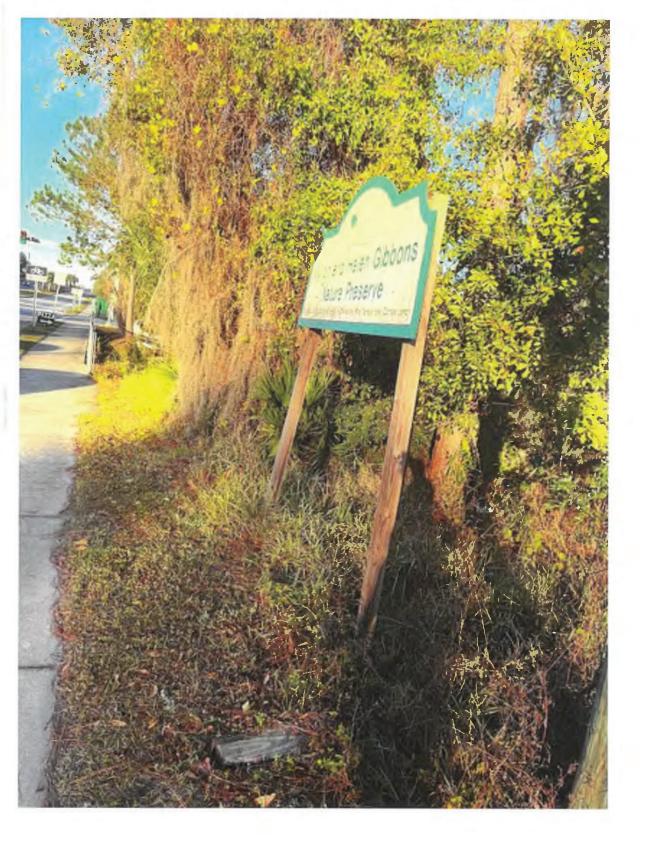

- ▶ Brian Grady, Development Services, calls RZ 22-1499.
- Addie Clark, applicant rep, presents testimony.
- Chris Grandlienard, Development Services, staff report.
- Jillian Massey, Planning Commission, staff report.

Susan Finch, ZHM, calls proponents/opponents/Development Services/applicant rep/closes RZ 22-1499.

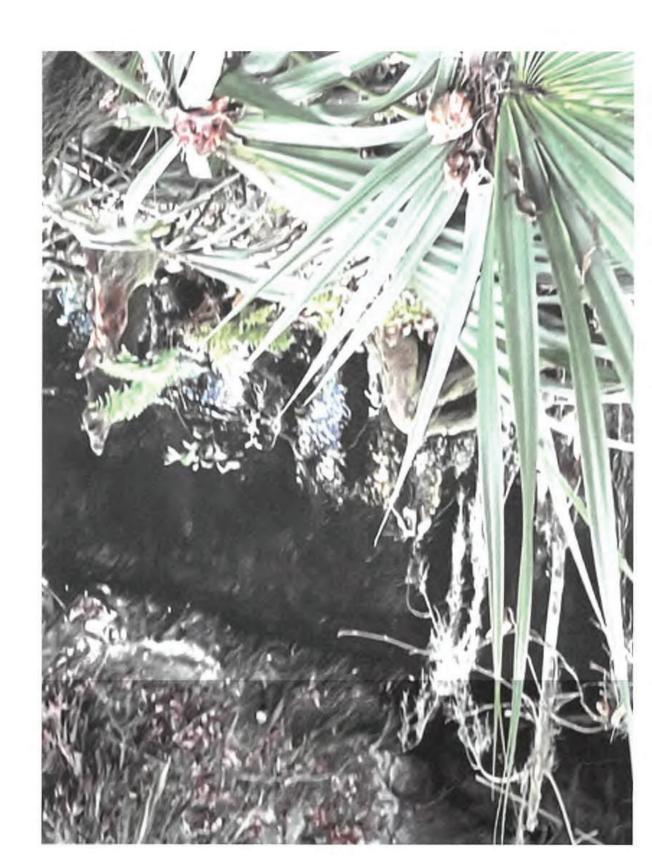

# ADJOURNMENT

Susan Finch, ZHM, adjourns meeting.

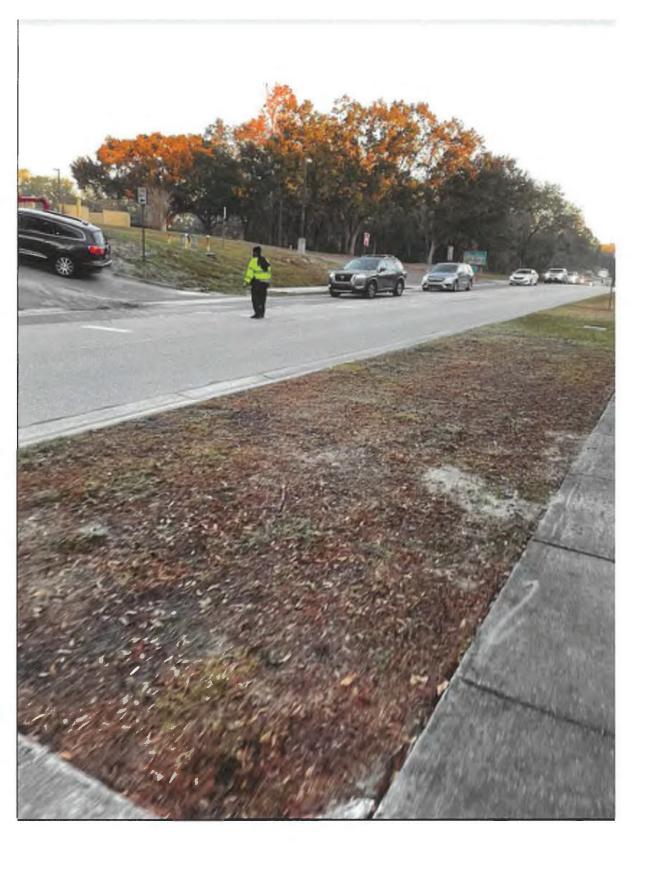

Jane Graham, Esq. 737 Main Street, Suite 100 Safety Harbor, FL 34695 (727) 291-9526

January 17, 2023

Zoning Hearing Master Hillsborough County 601 E Kennedy Blvd. Tampa, FL 33602

Re: Objection to Application #PD 22-0075

Dear Zoning Hearing Master:

I represent Mr. James Anderson who opposes Mattamy Tampa/Sarasota LLC's request to rezone the property at 12910 Boyette Road, Application No. RZ PD 22-0075. Mr. Anderson is an adversely affected party who owns the property at 10514 Sedgebrook Drive, Riverview, FL 33569. He attended and participated in the July 25, 2022 land use hearing officer public hearing.

Mr. Anderson respectfully restates his objection to Mattamy Tampa/Sarasota LLC's rezoning application for the property at 12910 Boyette Road (Application #PD 22-0075) to build 86 townhomes and 20,000 square feet of commercial space across from our neighborhood and incorporates herein his objections provided at the July 25, 2022 hearing. He also joins Ms. Ethel Hammer, Mr. Gary Gibbons, the Sierra Club, Boyette Springs HOA, and the Waterford HOA in their stated and written positions.

The Applicant fails to meet their burden to meet the criteria of LDC 10.03.03(E), specifically the following criteria:

# 3. The Comprehensive Plan/8. Applicable goals, objectives, and policies contained in the Comprehensive Plan.

a. Goal 6, Livable Communities Element:

Most notably, the Applicant's request for a density bonus is inconsistent with Goal 6, Livable Communities Element which requires the reduction of future land use map density and intensity along the Alafia River. Goal 6 states:

Prioritize the significance of improved quality, enjoyment, and protection of the Alafia River and other natural resources such as open space.

Jane Graham, Esq. 737 Main Street, Suite 100 Safety Harbor, FL 34695 (727) 291-9526

\* \* \*

• Reduce to the extent possible Future Land Use Map densities and intensities along the Alafia River to maintain, preserve, and protect the environmental quality and wildlife habitat of the Alafia River and surrounding watershed.

Planning Commission staff previously acknowledged in their July 13, 2022 report that Goal 6 as relevant, stating:

...Goal 6 of the Riverview Community plan seeks to protect the Alafia River. The Alafia River is to the north of the property, adjacent to the preservation area and the property contains a small portion in the Coastal High Hazard Area (CHHA) in the northeast corner.

Based on Goal 6 of the Livable Communities Element, the Applicant cannot increase density or intensity by the Alafia River. Density is supposed to be reduced, not increased on this property. However, the Application is proposing to increase density through a density bonus, based on FLU Policy 19.3, Incentives for Mixed Use.

Bell Creek is a tributary of the Alafia River and clearly within its watershed. The banks of Bell Creek are within fifty steps of the northern border of this property, and the Coastal High Hazard Area associated with Bell Creek extends on to this property directly. The intent of Goal 6 is to not increase density in the environmentally sensitive area.

# 2. Various FLU goals and objectives:

FLU Objective 16: Neighborhood Protection The neighborhood is the functional unit of community development. There is a need to protect existing, neighborhoods and communities and those that will emerge in the future. To preserve, protect, and enhance neighborhoods and communities, all new development must conform to the following policies.

FLU Policy 16.1: Established and planned neighborhoods and communities shall be protected by restricting incompatible land uses through mechanisms such as: locational criteria for the placement of non-residential uses as identified in this Plan.

FLU Policy 16.10: Any density increase shall be compatible with existing, proposed, or planned surrounding development. Compatibility is defined as the characteristics of different uses or activities or design which allow them to be located near or adjacent to each other in harmony. Some elements affecting compatibility include the following: height, scale, mass and bulk of structures, pedestrian or vehicular traffic, circulation, access and parking impacts, landscaping, lighting, noise, odor and architecture. Compatibility does not mean "the same as." Rather, it refers to the sensitivity of development proposals in maintaining the character of existing development.

A density increase to allow a commercial and residential development conflicts with the prevailing land use pattern of open green space and homes with larger lots. The traffic and circulation will be affected, and is already under stress. See attached photos by James Anderson.

# 6. Physical characteristics of the subject parcel and surrounding lands/ 10. Nature of and impacts on surrounding land use/ 11. Environmental impact of the use.

The Gibbons Preserve is directly beside this property. This property is surrounded on almost all sides by open space, with significant wildlife habitat both extending north along the Alafia River and south to Boyette Springs Park, and Bell Creek. See the attached maps.

#### 7. Impact on the surrounding transportation network.

School traffic on Sedgebrook Drive is already problematic and the addition of 2,299 daily trips will further escalate the gridlock. Attached please find photos taken by Mr. Anderson. Boyette Springs Elementary School is on Sedgebrook Drive. During school pick-up and dropoff, traffic backs up on Boyette Road almost to Tarragon Drive. There are frequently accidents on Boyette Road and the new project will likely exacerbate it. Kids walk on the side of the road.

### **Conclusion**

Mr. Anderson urges you to deny this proposal which is incompatible with Comprehensive Plan and fails to meet the criteria required for a rezoning. It is incomptible with the surrounding neighborhood filled with open space and single-family homes on large lots. Mattamy Homes should develop this property based on the existing laws and not ask for more.

Thank you for your concern. My client appreciates the opportunity to participate in the process. Please let me know if there is any additional information I can provide.

Sincerely,

Jane Graham, Esq., B.C.S.

Sunshine City Law

January 17, 2023

Re: Legal Objections to Misstatement in Staff Report and Remand for January 17, 2023 Item B(1): RZ PD 22-0075, 12910 Boyette Road and Request for Cancellation of Hearing

Dear Ms. Lundgren:

I represent Mr. James Anderson, who opposes Mattamy Tampa/Sarasota LLC's request to rezone the property at 12910 Boyette Road, Application No. RZ PD 22-0075. Mr. Anderson is an adversely affected party who owns the property at 10514 Sedgebrook Drive, Riverview, FL 33569. He attended and participated in the July 25, 2022 land use hearing officer public hearing.

This item is scheduled to be heard at the Zoning Hearing Master tonight at 6:00 P.M. based on a "remand" from the Board of County Commissioners. This remand is inappropriate in light of the serious discrepancy in the record vs. misstatements in tonight's staff report regarding Mattamy's requested change to the timing mechanism for condition 1.4, and non-conformance with the County's remand procedures. This case should be deemed withdrawn and tonight's hearing should be cancelled.

The Land Use Hearing Officer's Findings of Fact dated July 25, 2022 at pg. 30 state:

20. If the Planned Development were to proceed with the revised zoning condition 1.4 which eliminates the requirement for three land uses as well as the timing mechanism that ensures that a portion of the non-residential land uses are completed prior to the completion of the townhome project, then the project is not eligible for the requested density bonus. The Planning Commission testified that the change to the zoning condition would be a substantial change to the project and would not be supported by Planning Commission staff and would result in a finding of inconsistency with the Comprehensive Plan. The Development Services Department testified that if the Planning Commission did not support the rezoning, then staff would also not support the request.

The Land Use Hearing Officer recommended approval of the Application with the requirement that original zoning condition 1.4 remain in place as originally discussed and approved by staff. Pg. 32. The Applicant's revised version of condition 1.4 was rejected.

However, the January 17, 2023 staff report mischaracterizes and rewrites the record, stating:

This modification of the condition (1.4) would not require two of the non-residential uses listed in the Group lists to be constructed with a Certificate of Occupancy issued prior to the issuance of any Certificate of Occupancy for 58 or more residential units. Staff from the Planning Commission and Development Services could not amend the reports and the case remained scheduled for the BOCC Land Use Meeting. At the BOCC Land Use Hearing on October 11, 2022, the case was remanded to the Zoning Hearing Master hearing in order to allow the evaluation by staff of the proposed modification to the condition with the timing mechanism for the development of the two project Parcels.

(Staff Report at 8).

Tonight's staff report conspicuously omits the Land Use Hearing Officer's finding of fact that the proposed modification was in fact presented at the July 2022 Land Use Hearing and rejected by the Planning Commission staff, Development Services Staff, and the Land Use Hearing Officer. The proposed modification was already considered and summarily rejected.

The LDC provides no procedure where an applicant can request a last-minute modification which is rejected by Planning Commission staff, Development Services Staff, and a Land Use Hearing Officer, and then allowed a second bite at the apple to reargue the same revised condition at a second Land Use Hearing. The correct procedure would have been for Applicant to present their case in front of the BOCC, win or lose, and appeal if needed.

The Hillsborough LDC provides for situations where the BOCC may remand a proceeding back to the Land Use Hearing Officer, and this is not one of them. Section 10.03.04(e)(3), Land Development Code states:

... if the Board finds that oral argument has raised issues that require further Land Use Hearing Officer review, then the Board reserves the right to remand the proceedings to the Land Use Hearing Officer. If the

Board decides to remand the proceedings, then the Board shall establish a date for said hearing.

Section 10.03.05(A) provides:

If the Administrator finds, based upon the nature of the requested modification, the review criteria contained in 10.03.03.E above, and County staff comment that additional review is required, then the Administrator shall establish a continuance date for the public hearing. During the interim, appropriate staff shall have an opportunity to review said application as modified and submit recommendations.

However, the Board never discussed this application or any reason to remand it. There was no oral argument regarding this application on October 11, 2022 at all. Instead, the record of the October 11, 2022 BOCC Land Use Hearing reflects the applicant's request for a remand with no discussion by the Board. Staff Report, pg. 39. ("The next change in the agenda item 14, F3, 00275. Applicant is requesting a remand of this application December 12th, 2022 zoning hearing master hearing."). Moreover, at the July 2022 hearing, it was clear that no additional review of the revised Condition 1.4 was required. Staff outright rejected it.

The LDC provides no mechanism by which Mattamy Homes can get a second chance at a Land Use Hearing five months later to reargue a condition which has already been rejected.

Additionally, as previously advised, this Application already violated Hillsborough County's continuance requirements last July. Section 10.03.02(C)(2), Hillsborough Land Development Code states:

(I)n no case shall the public hearing be continued to a hearing date that is more than six months after the originally scheduled hearing date. If a public hearing is not held on the application within the required time frame, the application shall be withdrawn from processing by the Zoning Administrator.

The original zoning hearing date was January 18, 2022, which was then continued to February 14, 2022, and then several times again until it was finally heard on July 25, 2022, over six months after the originally scheduled hearing date. The application should have been deemed withdrawn as of on June 18, 2022.

Based on the foregoing, the January 17, 2023 hearing in front of the Zoning Hearing Master should be cancelled.

Please confirm receipt and advise how the County intends to proceed. My client appreciates the opportunity to participate in the process as an affected party. I look forward to working with you to promptly resolve this matter. Please let me know if I can provide any additional information.

Sincerely

Re: RZ PD 22-0075, 12910 Boyette Road

Dear Mr. Monsanto:

The undersigned parties of record request that Hillsborough Planning Staff finds PD 22-0075, Mattamy Tampa/Sarasota LLC's rezoning application for the property at 12910 Boyette Road ("Application") inconsistent with the Hillsborough County Comprehensive Plan. The Applicant's request for a density bonus is inconsistent with Goal 6, Livable Communities Element which requires the reduction of future land use map density and intensity along the Alafia River.

Goal 6 of the Livable Communities Element of the Hillsborough County Comprehensive Plan states:

Prioritize the significance of improved quality, enjoyment, and protection of the Alafia River and other natural resources such as open space.

\* \* \*

• Reduce to the extent possible Future Land Use Map densities and intensities along the Alafia River to maintain, preserve, and protect the environmental quality and wildlife habitat of the Alafia River and surrounding watershed.

Planning Commission staff previously acknowledged in their July 13, 2022 report that Goal 6 as relevant, stating:

...Goal 6 of the Riverview Community plan seeks to protect the Alafia River. The Alafia River is to the north of the property, adjacent to the preservation area and the property contains a small portion in the Coastal High Hazard Area (CHHA) in the northeast corner.

Based on Goal 6 of the Livable Communities Element, the Applicant cannot increase density or intensity by the Alafia River. Density is supposed to be reduced, not increased on this property. However, the Application is proposing to increase density through a density bonus, based on FLU Policy 19.3, Incentives for Mixed Use. The July 13 Report omitted any discussion of the prohibition on density increases along the Alafia River.

When comparing broader policies like FLU Policy 19.3 with more specific policies for communities like the Riverview Plan, Goal 6, the more specific policy controls. The Livable Communities Element, 1.0 states:

Community and Special Area Studies are intended to be extensions and refinements of the County's Comprehensive Plan. The studies should discuss the special and unique characteristics of the areas under study and examine the issues and problems facing the areas and provide strategies for solutions...The Comprehensive Plan is general in nature and provides guidance on an issue county-wide. A community or special area study is more detailed in nature and is intended to provide specific recommendations on issues in a particular area of the county.

Likewise, FLU Policy 18.1 states:

Cc:

Johanna Lundgren

The community plans will be adopted as part of the Comprehensive Plan in the Livable Communities Element; these more restrictive community specific policies will apply in guiding the development of the community.

As such, Goal 6 controls. This Application is inconsistent with the Comprehensive Plan because it requests a density bonus when no such increase in density can occur. Please confirm receipt and advise how the County intends to proceed. The undersigned appreciate the opportunity to participate in the process as an affected parties and look forward to working with you to through the process.

September 30, 2022

Re: RZ PD 22-0075, 12910 Boyette Road

Dear Mr. Tschantz:

I have been retained as legal counsel by Mr. James Anderson regarding his opposition to Mattamy Tampa/Sarasota LLC's request to rezone the property at 12910 Boyette Road, Application No. RZ PD 22-0075. Mr. Anderson is an adversely affected party who owns the property at 10514 Sedgebrook Drive, Riverview, FL 33569. He attended and participated in the July 25, 2022 land use hearing officer public hearing.

Based on my review of the record, it appears the July 25, 2022 hearing for this item violated Hillsborough County's continuance requirements. Section 10.03.02(C)(2), Hillsborough Land Development Code states:

(I)n no case shall the public hearing be continued to a hearing date that is more than six months after the originally scheduled hearing date. If a public hearing is not held on the application within the required time frame, the application shall be withdrawn from processing by the Zoning Administrator.

The original zoning hearing date was January 18, 2022, which was then continued to February 14, 2022, and then several times again until it was finally heard on July 25, 2022, over six months after the originally scheduled hearing date (See Composite Exhibit "A").

The application should have been withdrawn on June 18, 2022. It was improper that the item was heard on July 25, 2022. To cure this defect, the Applicant should resubmit the application and be heard in front of the Land Use Hearing Officer again, before the Board of County Commissioners hears this item. The October 11, 2022 hearing in front of the Board of County Commissioners should be cancelled.

Please confirm receipt and advise how the County intends to proceed. My client appreciates the opportunity to participate in the process as an affected party. I look forward to working with you to promptly resolve this matter. Please let me know if I can provide any additional information.

### Planning Analysis for RZ Petition PD22-0075

Application No. Illumer

Name: Ehe Hammer

Entered at Public Hearing: Zhh

Exhibit # 2 Date: 1/17/2623

#### **Ethel Hammer**

Rezoning Petition PD 22-0075 is located on the north side of Boyette Road, immediately adjacent to the Gibbons Preserve, an approximate 60 acre parcel of land owned by the Tampa Bay Conservancy. The Conservancy Board of Directors has reviewed the subject rezoning petition for its consistency with the Future Land Use Element of the Comprehensive Plan, and for its potential impact to the nature preserve known as the Myron and Helen Gibbons Nature Preserve.

The application as presented is not consistent with the Comprehensive Plan. The applicant has requested two waivers to the Comprehensive Plan to permit the uses and intensity as proposed. The first waiver is a request to increase the density of the project from four units per acre to six units per acre. The increased density is eligible for consideration under the Mixed-Use provision of the Future Land Use Element. To provide three uses, the applicant is proposing multifamily residential, and two different types of non-residential. Because the property does not meet Locational Criteria as set forth in the Comprehensive Plan, a waiver to the locational criteria must also be approved.

#### Locational Criteria

The Planning Commission staff is recommending approval to the Locational Criteria waiver. The rationale for granting the waiver is that the applicant is proposing a Mixed Use development. This is circular logic. The Planning Commission staff recommends approval for commercial, because the applicant is proposing commercial as part of the development. The second basis for their recommendation was that the applicant would agree to limit the intensity of uses. Policy 22.8 of the Future Land Use Element states "The waiver would be based on the compatibility of the use with the surrounding area". It further states, "Unique circumstances and specific findings should be identified by the staff or the Board of County Commissioners which would support granting a waiver". No planning analysis was provided for the appropriateness of commercial at this location, such as compatibility with surrounding land uses, transportation impact, and the appropriateness of a commercial development at a "mid-block" location. No unique circumstances have been identified to justify the granting of this waiver, as required by Policy 22.8. Recommending a waiver to Locational Criteria because the applicant is proposing a Mixed-Use project, i.e., adding commercial to a residential project, is not justification and provides no planning basis for approval of the request.

The appropriate intensity of commercial development at various categories of intersections is outlined in Policy 22.2 of the Future Land Use Element. Limitations on square footage are imposed to permit development in scale and harmony with the intensity of the intersection and the surrounding land uses. If this property were located at an intersection meeting the criteria for commercial development as defined by Policy 22.2, it would be most similar to the lowest intensity intersection of a Major Local/4 Lane Road. That type of intersection is permitted a maximum of 5,000 square feet of non-residential development. This property is not located at an intersection, and is requesting four times the amount of non-residential development, or 20,000 square feet, that would be permissible at a similar location that meets the criteria. No justification is provided by staff for recommending approval of 20,000 square

feet of non-residential development at a substandard location and at an intensity far exceeding what would be permissible if it met the locational criteria .

Policy 22.1 states the locational criteria establishes a maximum square footage for each proposed neighborhood serving commercial intersection node to ensure that the scale of the non-residential uses is generally consistent with the surrounding residential character. A project of 20,000 square feet at this location is not consistent with the residential character and scale of the surrounding land uses.

#### Riverview Community Plan

Goal 1 of the Riverview Community Plan states "Avoid strip development patterns for commercial uses". Permitting the development of non-residential development at locations that do not meet the Locational Criteria encourages strip commercial development. PD22-0075 is inconsistent with Goal 1 of the Community Plan. Commercial development of this magnitude is inconsistent with the development pattern along this segment of Boyette Road, which is predominantly residential and residential-support uses. The subject property is located between the existing commercial nodes at Bell Shoals to the east, and McMullen Road to the west. Based on the existing land use pattern, there are numerous parcels of land, either vacant or available for redevelopment, between these two nodes. A waiver of locational criteria between the two nodes would establish a precedent for further commercialization of this corridor. Commercial development should be restricted to nodes as established by Policy 22.2, unless unique circumstances exist.

Goal 6 of the Riverview Community Plan provides strong direction for the protection of the Alafia River watershed. The goal states 'Reduce to the extent possible Future Land Use Map densities and intensities along the Alafia River to maintain, preserve, and protect the environmental quality and wildlife habitat of the Alafia River and <u>surrounding watershed</u>." Goal 6 suggests that existing densities be *reduced*. This rezoning application requests that densities be *increased*, which is directly inconsistent with the intent of the Community Plan goal.

Staff has suggested that this Goal applies only to properties immediately adjacent to and fronting on the Alafia River. The staff interpretation ignores the reference in the Goal to the River and its surrounding watershed. If the Goal referred only to those properties abutting the Alafia River, inclusion of the term "surrounding watershed" would be meaningless. The language of Goal 6 strives to protect the River and its surrounding watershed by reducing densities and intensities within that watershed. Assuming this goal refers only to densities along a narrow strip of land abutting the Alafia River will not achieve the goal of protecting the riverine habitat.

#### Proposed Staff Conditions of Development

The applicant is requesting a density bonus based on the development of a Mixed-Use project, consisting of three distinct uses. The original staff report required that the developer construct the two non-residential uses prior to the development of more than 57 residential units. In other words, the density bonus can only be realized if the two non-residential uses are developed. The developer objected to this condition, and submitted substitute language to the staff. The staff has now incorporated that substitute language into a revised staff report, with no explanation why this meaningless language has been adopted by staff. The developer's language would permit the 86 units

to be constructed if the roadways and utility lines are stubbed out to the non-residential parcels. This requirement does not guarantee that anything will be developed on the frontage or when it might be developed. Stubbing utilities to outparcels is normal development practice, and is typically done at the time of overall site development. Based on this revised language, the County has no guarantee of either or both of the non-residential uses being developed, while the developer constructs 86 units on the property. The Conservancy objects to a waiver of the locational criteria and the subsequent development of commercial uses on the frontage of this property; therefore, this condition is unnecessary if the waiver is not granted.

The Transportation staff requested that an eight (8) foot strip of land be reserved for future right-of-way along Boyette Road. This request appeared as part of Condition 1 on the original staff report, but was struck through on the current staff report. Because of future transportation needs, the Conservancy requests that the appropriate amount of future right-of-way be reserved.

#### Tampa Bay Conservancy Recommendation

The Tampa Bay Conservancy objects to the granting of the density bonus, and objects to the granting of the waiver to the Locational Criteria. Lower densities and no commercial development will result in less impacts to the Preserve. To provide protection to the Gibbons Preserve, the Conservancy requests that Goal 6 of the Riverview Community Plan be implemented, which will ensure protection of the environmental quality and wildlife habitat of the Alafia River watershed.

# Ethel D. Hammer

Ethel D. Hammer has over thirty-five years of experience in the field of land use planning and public administration. She has been qualified as an expert in numerous courts and quasi-judicial proceedings throughout Florida, providing expert witness testimony on land planning and development matters.

### Professional Experience

- President, Engelhardt, Hammer & Associates, Inc., Tampa, Florida Project management and client representation of land use, environmental, litigation and eminent domain matters handled by firm.
- **Director of Planning, Taub & Williams, P.A., Tampa, Florida -** Responsible for the coordination and project management of land development matters, including rezoning petitions, site plans, and Developments of Regional Impact.
- Principal Planner and Senior Planner, Hillsborough County Department of Development Coordination, Tampa, Florida Responsible for short-range planning in Hillsborough County. Supervised and coordinated the planning analyses of rezoning petitions, subdivision plats, site plans, and other land development proposals. Supervised a staff of nine professional and technical employees.
- Environmental Planner, Hillsborough County Planning Commission, Tampa, Florida Provided environmental review of applications for subdivisions, site plans, and rezoning petitions. Reviewed phosphate mining activities. Reviewed all Tampa Port Authority permit applications. Served as official Development of Regional Impact Coordinator for the Planning Commission and conducted environmental reviews of all DRI applications.

#### **Expert Witness Testimony/Eminent Domain**

Ms. Hammer has been the land planning expert witness in hundreds of cases or projects. She has provided expert witness services in over 500 eminent domain cases, representing either the condemning authority or the landowner. She has testified in numerous trials, including eminent domain and land use litigation cases. Ms. Hammer has been qualified as an expert in many courts throughout Florida, including Hillsborough, Polk, Pasco, Manatee, Pinellas, Miami-Dade, Duval, Broward, Lee, Brevard, Washington and Orange Counties and has provided expert opinions on cases in numerous other counties throughout the State of Florida. Ms. Hammer has also testified in administrative law hearings and tax valuation hearings. Representative clients include the Florida Department of Transportation, Florida Turnpike, Tampa Bay Water Authority, Southwest Florida Water Management District, Hillsborough County, Pinellas County, Lee County, Florida Power and Light, Florida Power and many private law firms representing hundreds of landowners.

#### Land Use Regulatory Approvals

Ms. Hammer has provided land use permitting and regulatory approval services to numerous private clients for over twenty-five years. These services include rezonings, comprehensive land use plan amendments, Developments of Regional Impact, master planning, variances, and permitting for residential, commercial, industrial, and phosphate mining projects and clients. Representative clients include Lowe's Home Improvement, Kash n' Karry, Cargill, US Home, Winn Dixie, and CF Industries.

Application No. R.2. 22-63/75
Name: Gary Gibbons
Entered at Public Hearing: ZHM
Exhibit # 3 Date: [[17] 222]

January 17, 2023

Zoning Hearing Master Hillsborough County 601 E Kennedy Blvd. Tampa, FL 33602 Application No. R 2 22 - 6675

Name: Ryon Broks

Entered at Public Hearing: ZHM

Exhibit # 4 Date: 1/17/2023

Re: Objection to Application #PD 22-0075

Dear Zoning Hearing Master:

On behalf of the Boyette Springs Homeowners Association, we respectfully state our objection to Mattamy Tampa/Sarasota LLC's rezoning application for the property at 12910 Boyette Road (Application #PD 22-0075) to build 86 townhomes and 20,000 square feet of commercial space across from our neighborhood.

This project is incompatible with the traffic and safety in the neighborhood and must be denied.

There are already traffic backups on Boyette Road, Sedgebrook Drive, and Bell Creek Drive. The proposed project will add 2,299 daily trips to an already extremely strained area for traffic. Our neighborhood can't tolerate further backups, and the developer isn't proposing anything to fix it.

Boyette Springs Elementary School is on Sedgebrook Drive. During school pick-up and drop-off, traffic backs up on Boyette Road almost to Tarragon Drive. Adding over two thousand daily trips, including an extra 200 plus trips during the morning, will make this situation worse. There are frequently accidents on Boyette Road and we as a community are concerned that the new project will exacerbate it. Kids walk on the side of the road and the extra traffic will put their safety at risk. Or, parents won't want them to walk and drive them instead. As a result, there will be even more cars on the road.

We are also concerned that the proposal will change the safety and character of our neighborhood and reduce property values. Our single-family home community is surrounded by a nature preserve, parks, and a driving range. Adding retail, other commercial uses, and 86 townhomes directly across the street changes the character of our peaceful neighborhood and may bring safety issues like break-ins in the neighborhood.

We enjoy the natural environment in our neighborhood by Bell Creek, a tributary of the Alafia River, and close walking distance to the Gibbons Nature Preserve. The Hillsborough Comprehensive Plan (Goal 6, Riverview Plan) requires you to reduce the number of homes and square footage of commercial space along the river, not increase it.

We urge you to deny this proposal which is incompatible with our neighborhood, based on Comprehensive Plan FLU Policy 1.4. Mattamy Homes should develop this property based on the existing laws and not ask for more.

Sincerely, Ryn BNUS BSHOA UP

Boyette Springs Homeowners Association

Application	n No. 🌡	12 26	2-60	75
	lennit		liller	2
Entered at 1	Public F	Hearing:	ZH	M
Exhibit #_	5	Date:	1/17	12027

Hello,

My name is Jennifer Miller, HOA President for Waterford on the Alafia. We have already sent a letter of opposition (*emailed to County staff on Jan. 17, 2022*) for application <u>PD</u> <u>22-0075</u> but we wanted to provide some pictures regarding the flooding we mentioned in our park and of Bell Creek.

To put this into perspective, the people with houses on Bell Creek can never see the water from their backyard. You can see from Google Maps the creek is far from their properties. Pictures 4 and 5 are taken from their immediate backyard and/or pool area.

Pictures 1-3 are of the community park. When the park floods, we can't even get to the parking lot (picture 3). You would need a small boat to get from the parking lot to the tennis courts (picture 2).

The green line shows the width after it floods. The small red line inside is the normal size of the creek. This doesn't just happen when we have a hurricane, this happens with several days of heavy rain and no hurricane.

Waterford's concern is that the developments retention ponds could overflow into our already flooded area. Having an Engineer create a drainage plan for a new community is one thing but letting the Engineer see the below flooding pictures to see what happens at least once a year and not just a 100 yr. floodplain, is another.

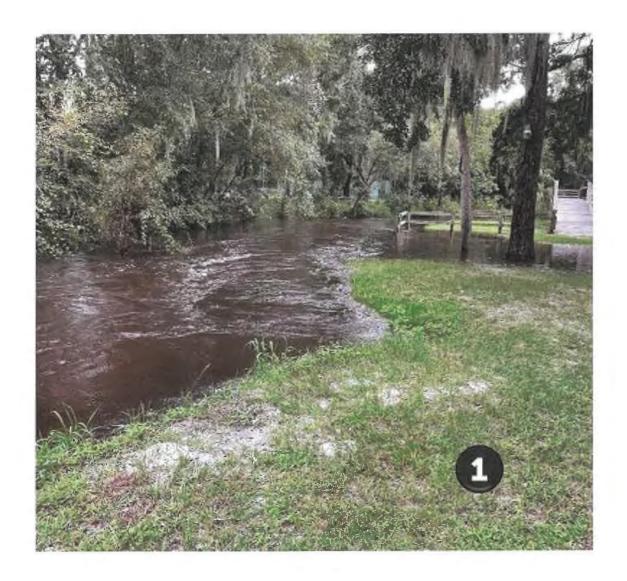

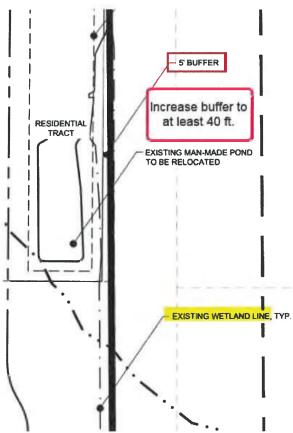

Hello,

My name is Jennifer Miller and I'm the HOA President for Waterford on the Alafia (a community located to the East of the proposed rezoning). I am writing on behalf of our community regarding application number <u>PD 22-0075</u> – Rezoning to a Planned Development.

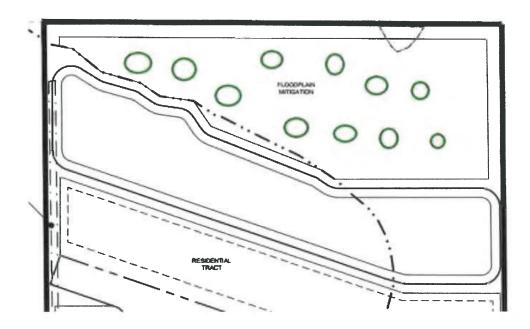

Our community would like to pass along our concerns to County Staff regarding the proposed rezoning for 12910 Boyette Rd. Riverview, FL 33569.

- We are opposed to the developers request for an increase in density (existing plan allows 4 units per acre, proposed is 6 units per acre).
  - We feel the area resources are already being strained from other developments around us and from the South County area. Currently, properties South of the Alafia River are subject to temporary one day a week irrigation from Jan. 4, 2021 – Dec. 31, 2022.
  - According to the EPA, the average person uses 82 gallons of water per day. By reducing the number of townhomes, it could save thousands of gallons of water per day on an already strained water table.
  - Schools in this area are full. We have 2 charter schools across the street from each other (a 0.6 mile walk from the proposed townhomes) and both schools have a waiting list to get in. Does the impact study address this?
  - o Traffic on Boyette, FishHawk and Bell Shoals is strained already at rush hour.
- We are concerned that the buffer zone of 5 ft. is insufficient and will result in destruction of a wildlife migration trail. We would like to see a 40 ft. buffer along Tampa Bay Conservancy (East side). We would also like to ensure there are plenty of trees, whether that is keeping the ones there or planting new ones to keep the area looking natural.

• We would like to keep as many of the current trees at the rear of the community and add some new trees to keep that area looking natural.

- We would like a copy of the environmental study that was done showing there will be no adverse impact to the surrounding properties.
- We would like to have access to the Engineer drawings for this community's drainage and the floodplain survey to ensure no flooding will happen on any surrounding properties. Our park already floods due to Bell Creek being narrow and random releases of water from the Dam located in Shadow Run for Lake Grady.
  - O Where will the street and surface water be drained to?
- We would like a 6 ft. tall Trex style fence as that looks more natural (a white PVC fence, is not acceptable). It should run from the road along the side of the property facing our sub-division (see photo below, orange squiggly line).
  - This would protect the townhome residents from coyote and bobcat coming in from the preserve.

 We would prefer the community lighting be low, so it doesn't shine into the preserve or our backyards.

- Is there anything in writing stating how many investors can or can't purchase in the community? If so, what is the Investor to homeowner ratio?
- We would like the Community Gathering area moved so we don't hear the potential noise from gatherings.

- We are opposed to the public parking lot.
  - We are concerned that if there are trash cans or dumpsters in the area, it will impact the wildlife looking for an easy meal.
  - Current wildlife that has been seen within our community in the last year: deer, red fox, bobcat, coyote, boar, gopher turtles, raccoon, gators, raccoons, peacock's, osprey and several other bird species.

We are opposed to any type of school or daycare going in front of the townhomes (parcel 2 -3.72 acres) because we have so many in the area already. We have a lot of noise from the charter schools now, as well as traffic issues due the number of schools in the area. We are not opposed to professional office space.

PROPOSED LAND USE PARCEL 1 (14.34 Ac.)

**86 SINGLE FAMILY TOWNHOUSES** (6 DU/Ac Applying Policy 19.3)

PARCEL 2 (3.72 Ac.)

UP TO 30,000 SF OF RESIDENTIAL SUPPORT, BPO, & COMMERCIAL NEIGHBORHOOD USES WITH **EXCEPTIONS (NO DRIVE-THRUS & NO** CONVENIENCE STORES -WITH OR WITHOUT GAS PUMPS)

### Rezoning

My name is Gary Gibbons. I am here to represent the Gibbons Family (my 97-year old mother, Helen Gibbons, my 3 siblings who among us have 9 children, who have blessed our mother with 12 great grandchildren, 2 of whom have been born since this Petition was filed).

My father bought what is now the 60-acre Helen and Myron Gibbons Nature Preserve in the early 1960's and he always wanted the land to stay undeveloped—which it did until the time that it was donated to the Tampa Bay Conservancy who has continued his wishes. The Preserve has been designated as an Old Growth Forrest and the County recognizes it as a Significant Wildlife Habitat.

My mother, on behalf of her children, grandchildren and great-grandchildren has filed a letter in opposition to this Rezoning Request as being too intensive and not being compatible with surrounding properties—Her objection letter is in the record.

# Show map on the Elmo:

As you can see, Bell Creek abuts the Applicant's property and runs through the Preserve. Bell Creek floods frequently, and has since the 1960's. We had a footbridge over the creek that washed away in a previous flood.

Bell Creek is a major tributary of the Alafia River—which is a major source of drinking water for Tampa Bay Water, which provides drinking water for the entire region.

The Preserve is a Significant Wildlife Habitat Area, and Bell Creek is a Coastal High Hazard Area. It is the exact kind of property intended to be protected under Goal 6 of the Riverview Community Plan.

That Community Plan clearly states that densities and intensities are to be REDUCED, not INCREASED in order to maintain, preserve and protect the environmental quality and wildlife habitat of the Alafia River and its surrounding watershed.

This rezoning application violates Goal 6 by seeking to intensify development by adding commercial uses that were never contemplated under the current zoning -and then trying to leverage that intensive commercial use to INCREASE THE Offer the maps into evidence in the record.

DENSITY right next to the watershed and a Significant Wildlife Habit Area. That should never be allowed.

Offer the maps into evidence in the record.

This project is totally incompatible with the surrounding properties.  $\leftarrow$ 

For protection of this critical watershed, this Application should be denied.

HILLSBOROUGH COUNTY 2020 LOS REPORT

### PARTY OF RECORD

### Dear Commissioner.

I live in the Boyette Springs neighborhood at 10619 Deep brock Tobject to Mattamy Tampa/Sarasota LLC's rezoning application for the property at 12910 Boyette Road (Application #PD 22-0075) to build 86 townhomes and 20,000 square feet of commercial space across from my neighborhood.

This project is incompatible with the traffic and safety in the neighborhood and must be denied.

There are already traffic backups on Boyette Road, Sedgebrook Drive, and Bell Creek Drive. (Insert specific observation/story/add photo of bad traffic). The proposed project will add 2,299 daily trips to an already extremely strained area for traffic. Our neighborhood can't tolerate further backups, and the developer isn't proposing anything to fix it.

Boyette Springs Elementary School is on Sedgebrook Drive. During school pick-up and drop-off, traffic backs up on Boyette Road almost to Tarragon Drive. Adding over two thousand daily trips, including an extra 200 plus trips during the morning, will make this situation worse. There are frequently accidents on Boyette Road and I am concerned this will exacerbate it. (Insert specific story/photo/details here). Kids walk on the side of the road (include photos!) and adding this extra traffic will put them at risk. Or, parents won't want them to walk and drive them instead. As a result, there will be even more cars on the road.

I am also concerned that the proposal will change the safety and character of my neighborhood and reduce property values. We live in a single-family community surrounding by a nature preserve, parks, and a driving range. Adding retail, other commercial uses, and 86 townhomes directly across the street changes the character of our peaceful neighborhood and may bring safety issues like break-ins in the neighborhood.

I urge you to deny this proposal which is incompatible with my neighborhood, based on Comprehensive Plan FLU Policy 1.4. Mattamy Homes should develop this property based on the existing laws and not ask for more.

Sincerely.

Happy Benson

Zoning Hearing Master Hillsborough County 601 E. Kennedy Blvd. Tampa, FL, 33602

Re: RZ22-0075 (12910 Boyette Road, Riverview, FL)

Dear Zoning Hearing Master:

I am writing this letter on behalf of the Gibbons family, who for many years owned the property next door to the property which is proposed to be rezoned and developed. My four children told me about what is proposed on the property next door. My children and my 9 grandchildren and 10 great-grandchildren all join with me in objecting to the rezoning of this property.

My husband purchased this property in the early 1960s. Other than building a wooden bridge over Bell Creek so that we could walk on a trail that meanders through the property and along the Alafia River and Bell Creek, we never took any action to disturb the land or change it from its pristine state. As a result, the property which is now owned by the Tampa Bay Conservancy and is a nature preserve (graciously named after my husband and me) has been designated as a unique biological site and one of the few Old Growth Forests remaining in this area.

Needless to say, there have been unbelievable changes in the area since we first started enjoying our property in the 1960s, but this property has always been zoned as Agricultural Residential, and with that designation, it was intended that there would be minimal impacts on the surrounding land, especially the Preserve. The planning for this area never contemplated that there would be 86 townhomes and a huge grocery store, and a large day care center on this property. At most, there would be agricultural uses and one single-family residence on a 5-acre lot.

The Preserve has limited parking which restricts the numbers of people who can visit at any one time, and it has helped to "preserve the Preserve," so to speak. Having the Preserve become a private park for new residents of 86 townhomes, grocery store customers and employees, and all of the day care customers will have huge adverse impacts on the Preserve.

I do not understand how the developers can say with a straight face that the proposed development is "compatible" and that there will be no impacts on surrounding properties.

The last thing that is needed on this property is an intrusive development of this magnitude. Please deny this rezoning request.

Stelen C. Geboons

**Subject:** RE: PD 22-ed, Ace Golf Rezoning 22-0075

**Attachments:** PGM Store Tutorial.pdf

Good afternoon Ms. Graham,

Our department just received updated information earlier this afternoon for PD RZ 22-0075. Zoning Intake staff will be uploading the files received later today to the PGM Store (online permit system) to be available to the public.

### **PGM Store Instructions:**

For your convenience, application records may be viewed directly on our website. We have attached the instructions to access the PGM Store. To review all application records on our website please turn off your Pop-Up Blocker before you log in. Click on the following link

https://www.hillsboroughcounty.org/en/businesses/permits-and-records/permits/plans-and-permit-information-pgm-store

To enter the PGM Store. Click on ENTER PGM STORE. The username and password are public. Double click on Document Repository. To access the information, please enter the tracking number in the box that reads APP/Permit/Tracking #, or by address or folio #, then click Query. A blue bar will pop up with the Application number, Folio ID, Permit type & Current Status. Double click on the bar to access the documents. Scroll down the page and you will find all the documents you are looking for. The Tracking, in this case, would be 22-0075.

Please feel free to email me if questions.

Regards,

Ms. Graham,

As to the portion of your question regarding participation by objectors, there is no deadline to "register" to participate in the hearing. An objector may submit documentary evidence either in person or by proxy during the Zoning Hearing Master hearing, or by submitting documentary evidence to the master file two business days prior to the hearing. See Sec. 10.03.06 of the LDC.

Good afternoon,

As of today, has your department received any site plan revisions for this application? If so, how might we access them? What is the deadline for someone to register as an interested party? Is there a deadline for an objector to submit information?

Thanks and happy Thanksgiving.

Sincerely,

Subject: RE: PD 22-ed, Ace Golf Rezoning

Hi Jane,

This case was remanded to the December 12 ZHM. Deadline to submit site plan revisions is November 22.

Our department has not received updated materials yet.

Regards,

**Israel Monsanto**

Hi Johanna,

Hope you are doing well. Are there any updates on the status of this application?

Is there a deadline to submit additional comments?

Thanks.

Best,

Jane

Ms. Graham,

Yes, the statements in your below email are accurate, and the remand hearing will not be limited to specific issues.

Thanks for letting me know. I appreciate it.

So I am clear about the Dec 12 hearing we spoke about earlier today (and this could help resolve our question/objection), could you please confirm that the remand request will bring PD-22-0075 back to the Land Use Hearing Officer hearing, where:

- 1) The hearing will not be limited to a specific issue on remand but will be a fresh hearing where everything relating to the application will be open for discussion from the beginning;
- 2) New parties of record, including those who did not participate in the July 25 hearing, may participate;
- 3) New evidence will be accepted from the applicant, proponents, and opponents; and
- 4) Public comment time (the cumulative total of 15 min) will be open, available to both people who participated in the July 25 hearing and those who did not.

If so, could you confirm by email and ensure this is in the record during the remand discussion tomorrow?

Also, Ms. Corbett shared with me the Oct. 11 BOCC Changes/Corrections/Additions document which states that the request is for a remand of the application, without specifying any specific conditions/corrections/new evidence. I understand this to mean the entire application is to be remanded, without limitation. Is that your interpretation as well?

Thanks again.

Sincerely,

Jane Graham, Esq.

Ms. Graham,

The Board does not typically take public testimony or comment on the Changes portion of the agenda, which is the point in the meeting at which the Board will consider and vote on the remand. For this reason, there is not a separate form for a request to speak on the remand request.

Hi Johanna,

It was great to speak with you today.

I want to let you know that I intend to make a legal/procedural objection during tomorrow's meeting relating to the requested remand. I will be there in person to make this objection.

I previously submitted a form for comment for agenda item itself (F.3). Do I need to submit an additional form specifically relating to the requested remand?

Thanks and I will see you tomorrow.

Best, Jane

Ms. Graham,

Yes, I have been advised of the remand request for RZ 22-0075.

The Board will take up the request for remand at the beginning of the meeting, when the BOCC takes a vote on the requested continuances and changes to the agenda. While the BOCC has discretion as to the decision to remand, assuming the Board grants the request, the case will not be heard by the Board tomorrow and would be scheduled for a remand hearing on the Zoning Hearing Master hearing date requested by the applicant (December 12, 2022 at 6 PM).

Dear Ms. Lundgren,

I represent Mr. Anderson in PD 22-0075. Yesterday, we were forwarded the below email from Ms. Kami Corbett, stating that the Applicant Mattamy Homes will be requesting a remand. Have you heard anything about this? What would the procedure be for this? Is it possible that the Board of Commissioners would refuse their request and move forward with the hearing anyway?

Please advise asap.

Sincerely,

Subject: Ace Golf Rezoning - PD 22-0075 [IWOV-FirmLive.FID1739201]

### Good Afternoon -

I am the representative for Mattamy Homes, the Applicant for the above referenced rezoning. I am reaching out to you because each of you have expressed concerns about the proposed rezoning. I realize that this application has been in process for some time and has changed several times and the community did not get an opportunity to meet with the Applicant to understand the changes and discuss whether there were any other conditions or mitigating measures Mattamy could undertake help alleviate your concerns.

Upon review of the comments in the record and the last minute changes to the conditions that were presented to the ZHM, but not vetted by staff, Mattamy intends to request a remand of this case to allow us an opportunity to have staff review the conditions and to re-engage with the community.

If you know of others who have an interest in this case who would like to be part of this discussion, please feel free to share this email with them.

Subject: RE: PD 22-ed, Ace Golf Rezoning 22-0075

Good afternoon Ms. Graham,

Our department just received updated information earlier this afternoon for PD RZ 22-0075. Zoning Intake staff will be uploading the files received later today to the PGM Store (online permit system) to be available to the public.

### **PGM Store Instructions:**

For your convenience, application records may be viewed directly on our website. We have attached the instructions to access the PGM Store. To review all application records on our website please turn off your Pop-Up Blocker before you log in. Click on the following link

https://www.hillsboroughcounty.org/en/businesses/permits-and-records/permits/plans-and-permit-information-pgm-store

To enter the PGM Store. Click on ENTER PGM STORE. The username and password are public. Double click on Document Repository. To access the information, please enter the tracking number in the box that reads APP/Permit/Tracking #, or by address or folio #, then click Query. A blue bar will pop up with the Application number, Folio ID, Permit type & Current Status. Double click on the bar to access the documents. Scroll down the page and you will find all the documents you are looking for. The Tracking, in this case, would be 22-0075.

Please feel free to email me if questions.

Regards,
Israel Monsanto

### Ms. Graham

As to the portion of your question regarding participation by objectors, there is no deadline to "register" to participate in the hearing. An objector may submit documentary evidence either in person or by proxy during the Zoning Hearing Master hearing, or by submitting documentary evidence to the master file two business days prior to the hearing. See Sec. 10.03.06 of the LDC.

Good afternoon,

As of today, has your department received any site plan revisions for this application? If so, how might we access them? What is the deadline for someone to register as an interested party? Is there a deadline for an objector to submit information? Thanks and happy Thanksgiving.

Sincerely,

Jane Graham, Esq.

Subject: RE: PD 22-ed, Ace Golf Rezoning

Hi Jane,

This case was remanded to the December 12 ZHM. Deadline to submit site plan revisions is November 22.

Our department has not received updated materials yet.

Regards,

Israel Monsanto

Hi Johanna,

Hope you are doing well. Are there any updates on the status of this application?

Is there a deadline to submit additional comments?
Thanks.
Best,
Jane

Thanks for letting me know. I appreciate it.

So I am clear about the Dec 12 hearing we spoke about earlier today (and this could help resolve our question/objection), could you please confirm that the remand request will bring PD-22-0075 back to the Land Use Hearing Officer hearing, where:

- 1. The hearing will not be limited to a specific issue on remand but will be a fresh hearing where everything relating to the application will be open for discussion from the beginning;
- 2. New parties of record, including those who did not participate in the July 25 hearing, may participate;
- 3. New evidence will be accepted from the applicant, proponents, and opponents; and
- 4. Public comment time (the cumulative total of 15 min) will be open, available to both people who participated in the July 25 hearing and those who did not.

If so, could you confirm by email and ensure this is in the record during the remand discussion tomorrow?

Also, Ms. Corbett shared with me the Oct. 11 BOCC Changes/Corrections/Additions document which states that the request is for a remand of the application, without specifying any specific conditions/corrections/new evidence. I understand this to mean the entire application is to be remanded, without limitation. Is that your interpretation as well?

Thanks again.

Sincerely,

Jane Graham, Esq.

Ms. Graham,

The Board does not typically take public testimony or comment on the Changes portion of the agenda, which is the point in the meeting at which the Board will consider and vote on the remand. For this reason, there is not a separate form for a request to speak on the remand request.

Hi Johanna,

It was great to speak with you today.

I want to let you know that I intend to make a legal/procedural objection during tomorrow's meeting relating to the requested remand. I will be there in person to make this objection.

I previously submitted a form for comment for agenda item itself (F.3). Do I need to submit an additional form specifically relating to the requested remand?

Thanks and I will see you tomorrow.

Best,

Jane

Ms. Graham,

Yes, I have been advised of the remand request for RZ 22-0075.

The Board will take up the request for remand at the beginning of the meeting, when the BOCC takes a vote on the requested continuances and changes to the agenda. While the BOCC has discretion as to the decision to remand, assuming the Board grants the request, the case will not be heard by the Board tomorrow and would be scheduled for a remand hearing on the Zoning Hearing Master hearing date requested by the applicant (December 12, 2022 at 6 PM).

Dear Ms. Lundgren,

I represent Mr. Anderson in PD 22-0075. Yesterday, we were forwarded the below email from Ms. Kami Corbett, stating that the Applicant Mattamy Homes will be requesting a remand. Have you heard anything about this? What would the procedure be for this? Is it possible that the Board of Commissioners would refuse their request and move forward with the hearing anyway?

Please advise asap.

Sincerely,

Jane Graham, Esq.

Subject: Ace Golf Rezoning - PD 22-0075 [IWOV-FirmLive.FID1739201]

# Good Afternoon -

I am the representative for Mattamy Homes, the Applicant for the above referenced rezoning. I am reaching out to you because each of you have expressed concerns about the proposed rezoning. I realize that this application has been in process for some time and has changed several times and the community did not get an opportunity to meet with the Applicant to understand the changes and discuss whether there were any other conditions or mitigating measures Mattamy could undertake help alleviate your concerns.

Upon review of the comments in the record and the last minute changes to the conditions that were presented to the ZHM, but not vetted by staff, Mattamy intends to request a remand of this case to allow us an opportunity to have staff review the conditions and to re-engage with the community.

If you know of others who have an interest in this case who would like to be part of this discussion, please feel free to share this email with them.

Subject: RE: PD 22-ed, Ace Golf Rezoning 22-0075

Good afternoon Ms. Graham,

Our department just received updated information earlier this afternoon for PD RZ 22-0075. Zoning Intake staff will be uploading the files received later today to the PGM Store (online permit system) to be available to the public.

### **PGM Store Instructions:**

For your convenience, application records may be viewed directly on our website. We have attached the instructions to access the PGM Store. To review all application records on our website please turn off your Pop-Up Blocker before you log in. Click on the following link

https://www.hillsboroughcounty.org/en/businesses/permits-and-records/permits/plans-and-permit-information-pgm-store

To enter the PGM Store. Click on ENTER PGM STORE. The username and password are public. Double click on Document Repository. To access the information, please enter the tracking number in the box that reads APP/Permit/Tracking #, or by address or folio #, then click Query. A blue bar will pop up with the Application number, Folio ID, Permit type & Current Status. Double click on the bar to access the documents. Scroll down the page and you will find all the documents you are looking for. The Tracking, in this case, would be 22-0075.

Please feel free to email me if questions.

Regards,

Ms. Graham,

As to the portion of your question regarding participation by objectors, there is no deadline to "register" to participate in the hearing. An objector may submit documentary evidence either in person or by proxy during the Zoning Hearing Master hearing, or by submitting documentary evidence to the master file two business days prior to the hearing. See Sec. 10.03.06 of the LDC.

Good afternoon,

As of today, has your department received any site plan revisions for this application? If so, how might we access them? What is the deadline for someone to register as an interested party? Is there a deadline for an objector to submit information?

Thanks and happy Thanksgiving.

Sincerely,

Jane Graham, Esq.

Hi Johanna,

Hope you are doing well. Are there any updates on the status of this application?

Is there a deadline to submit additional comments?

Thanks.

Best,

Jane

Ms. Graham.

Yes, the statements in your below email are accurate, and the remand hearing will not be limited to specific issues.

Thanks for letting me know. I appreciate it.

So I am clear about the Dec 12 hearing we spoke about earlier today (and this could help resolve our question/objection), could you please confirm that the remand request will bring PD-22-0075 back to the Land Use Hearing Officer hearing, where:

- 1) The hearing will not be limited to a specific issue on remand but will be a fresh hearing where everything relating to the application will be open for discussion from the beginning;
- 2) New parties of record, including those who did not participate in the July 25 hearing, may participate;
- 3) New evidence will be accepted from the applicant, proponents, and opponents; and
- 4) Public comment time (the cumulative total of 15 min) will be open, available to both people who participated in the July 25 hearing and those who did not.

If so, could you confirm by email and ensure this is in the record during the remand discussion tomorrow?

Also, Ms. Corbett shared with me the Oct. 11 BOCC Changes/Corrections/Additions document which states that the request is for a remand of the application, without specifying any specific conditions/corrections/new evidence. I understand this to mean the entire application is to be remanded, without limitation. Is that your interpretation as well?

Thanks again.

Sincerely,

Jane Graham, Esq.

Ms. Graham,

The Board does not typically take public testimony or comment on the Changes portion of the agenda, which is the point in the meeting at which the Board will consider and vote on the remand. For this reason, there is not a separate form for a request to speak on the remand request.

Hi Johanna,

It was great to speak with you today.

I want to let you know that I intend to make a legal/procedural objection during tomorrow's meeting relating to the requested remand. I will be there in person to make this objection.

I previously submitted a form for comment for agenda item itself (F.3). Do I need to submit an additional form specifically relating to the requested remand?

Thanks and I will see you tomorrow.

Best,

Jane

Ms. Graham,

Yes, I have been advised of the remand request for RZ 22-0075.

The Board will take up the request for remand at the beginning of the meeting, when the BOCC takes a vote on the requested continuances and changes to the agenda. While the BOCC has discretion as to the decision to remand, assuming the Board grants the request, the case will not be heard by the Board tomorrow and would be scheduled for a remand hearing on the Zoning Hearing Master hearing date requested by the applicant (December 12, 2022 at 6 PM).

Dear Ms. Lundgren,

I represent Mr. Anderson in PD 22-0075. Yesterday, we were forwarded the below email from Ms. Kami Corbett, stating that the Applicant Mattamy Homes will be requesting a remand. Have you heard anything about this? What would the procedure be for this? Is it possible that the Board of Commissioners would refuse their request and move forward with the hearing anyway?

Please advise asap.

Sincerely,

Jane Graham, Esq.

Subject: Ace Golf Rezoning - PD 22-0075 [IWOV-FirmLive.FID1739201]

#### Good Afternoon -

I am the representative for Mattamy Homes, the Applicant for the above referenced rezoning. I am reaching out to you because each of you have expressed concerns about the proposed rezoning. I realize that this application has been in process for some time and has changed several times and the community did not get an opportunity to meet with the Applicant to understand the changes and discuss whether there were any other conditions or mitigating measures Mattamy could undertake help alleviate your concerns.

Upon review of the comments in the record and the last minute changes to the conditions that were presented to the ZHM, but not vetted by staff, Mattamy intends to request a remand of this case to allow us an opportunity to have staff review the conditions and to re-engage with the community.

If you know of others who have an interest in this case who would like to be part of this discussion, please feel free to share this email with them.

December 2, 2022

Re: RZ PD 22-0075, 12910 Boyette Road

Dear Mr. Monsanto:

The undersigned parties of record request that Hillsborough Planning Staff finds PD 22-0075, Mattamy Tampa/Sarasota LLC's rezoning application for the property at 12910 Boyette Road ("Application") inconsistent with the Hillsborough County Comprehensive Plan. The Applicant's request for a density bonus is inconsistent with Goal 6, Livable Communities Element which requires the reduction of future land use map density and intensity along the Alafia River.

Goal 6 of the Livable Communities Element of the Hillsborough County Comprehensive Plan states:

Prioritize the significance of improved quality, enjoyment, and protection of the Alafia River and other natural resources such as open space.

\* \* \*

 Reduce to the extent possible Future Land Use Map densities and intensities along the Alafia River to maintain, preserve, and protect the environmental quality and wildlife habitat of the Alafia River and surrounding watershed.

Planning Commission staff previously acknowledged in their July 13, 2022 report that Goal 6 as relevant, stating:

...Goal 6 of the Riverview Community plan seeks to protect the Alafia River. The Alafia River is to the north of the property, adjacent to the preservation area and the property contains a small portion in the Coastal High Hazard Area (CHHA) in the northeast corner.

Based on Goal 6 of the Livable Communities Element, the Applicant cannot increase density or intensity by the Alafia River. Density is supposed to be reduced, not increased on this property. However, the Application is proposing to increase density through a density bonus, based on FLU Policy 19.3, Incentives for Mixed Use. The July 13 Report omitted any discussion of the prohibition on density increases along the Alafia River.

### Tampa Bay Conservancy \* Gibbons Family \* Boyette Springs Homeowners Association \* James Anderson

When comparing broader policies like FLU Policy 19.3 with more specific policies for communities like the Riverview Plan, Goal 6, the more specific policy controls. The Livable Communities Element, 1.0 states:

Community and Special Area Studies are intended to be extensions and refinements of the County's Comprehensive Plan. The studies should discuss the special and unique characteristics of the areas under study and examine the issues and problems facing the areas and provide strategies for solutions...The Comprehensive Plan is general in nature and provides guidance on an issue county-wide. A community or special area study is more detailed in nature and is intended to provide specific recommendations on issues in a particular area of the county.

# Likewise, FLU Policy 18.1 states:

The community plans will be adopted as part of the Comprehensive Plan in the Livable Communities Element; these more restrictive community specific policies will apply in guiding the development of the community.

As such, Goal 6 controls. This Application is inconsistent with the Comprehensive Plan because it requests a density bonus when no such increase in density can occur. Please confirm receipt and advise how the County intends to proceed. The undersigned appreciate the opportunity to participate in the process as an affected parties and look forward to working with you through the process.

# Sincerely,

Cc: Planning Commission

Subject: RE: PD 22-ed, Ace Golf Rezoning 22-0075

Good afternoon Ms. Graham,

Our department just received updated information earlier this afternoon for PD RZ 22-0075. Zoning Intake staff will be uploading the files received later today to the PGM Store (online permit system) to be available to the public.

#### **PGM Store Instructions:**

For your convenience, application records may be viewed directly on our website. We have attached the instructions to access the PGM Store. To review all application records on our website please turn off your Pop-Up Blocker before you log in. Click on the following link

https://www.hillsboroughcounty.org/en/businesses/permits-and-records/permits/plans-and-permit-information-pgm-store

To enter the PGM Store. Click on ENTER PGM STORE. The username and password are public. Double click on Document Repository. To access the information, please enter the tracking number in the box that reads APP/Permit/Tracking #, or by address or folio #, then click Query. A blue bar will pop up with the Application number, Folio ID, Permit type & Current Status. Double click on the bar to access the documents. Scroll down the page and you will find all the documents you are looking for. The Tracking, in this case, would be 22-0075.

Please feel free to email me if questions.

Regards,

Ms. Graham,

As to the portion of your question regarding participation by objectors, there is no deadline to "register" to participate in the hearing. An objector may submit documentary evidence either in person or by proxy during the Zoning Hearing Master hearing, or by submitting documentary evidence to the master file two business days prior to the hearing. See Sec. 10.03.06 of the LDC.

Thanks for letting me know. I appreciate it.

So I am clear about the Dec 12 hearing we spoke about earlier today (and this could help resolve our question/objection), could you please confirm that the remand request will bring PD-22-0075 back to the Land Use Hearing Officer hearing, where:

- 1) The hearing will not be limited to a specific issue on remand but will be a fresh hearing where everything relating to the application will be open for discussion from the beginning;
- 2) New parties of record, including those who did not participate in the July 25 hearing, may participate;
- 3) New evidence will be accepted from the applicant, proponents, and opponents; and
- 4) Public comment time (the cumulative total of 15 min) will be open, available to both people who participated in the July 25 hearing and those who did not.

If so, could you confirm by email and ensure this is in the record during the remand discussion tomorrow?

Also, Ms. Corbett shared with me the Oct. 11 BOCC Changes/Corrections/Additions document which states that the request is for a remand of the application, without specifying any specific conditions/corrections/new evidence. I understand this to mean the entire application is to be remanded, without limitation. Is that your interpretation as well?

Thanks again.

Sincerely,

Jane Graham, Esq.

Hi Johanna,

It was great to speak with you today.

I want to let you know that I intend to make a legal/procedural objection during tomorrow's meeting relating to the requested remand. I will be there in person to make this objection.

I previously submitted a form for comment for agenda item itself (F.3). Do I need to submit an additional form specifically relating to the requested remand?

Thanks and I will see you tomorrow.

Best, Jane

Ms. Graham,

Yes, I have been advised of the remand request for RZ 22-0075.

The Board will take up the request for remand at the beginning of the meeting, when the BOCC takes a vote on the requested continuances and changes to the agenda. While the BOCC has discretion as to the decision to remand, assuming the Board grants the request, the case will not be heard by the Board tomorrow and would be scheduled for a remand hearing on the Zoning Hearing Master hearing date requested by the applicant (December 12, 2022 at 6 PM).

Dear Ms. Lundgren,

I represent Mr. Anderson in PD 22-0075. Yesterday, we were forwarded the below email from Ms. Kami Corbett, stating that the Applicant Mattamy Homes will be requesting a remand. Have you heard anything about this? What would the procedure be for this? Is it possible that the Board of Commissioners would refuse their request and move forward with the hearing anyway?

Please advise asap.

Sincerely,

Jane Graham, Esq.

Subject: Ace Golf Rezoning - PD 22-0075 [IWOV-FirmLive.FID1739201]

Good Afternoon -

I am the representative for Mattamy Homes, the Applicant for the above referenced rezoning. I am reaching out to you because each of you have expressed concerns about the proposed rezoning. I realize that this application has been in process for some time and has changed several times and the community did not get an opportunity to meet with the Applicant to understand the changes and discuss whether there were any other conditions or mitigating measures Mattamy could undertake help alleviate your concerns.

Upon review of the comments in the record and the last minute changes to the conditions that were presented to the ZHM, but not vetted by staff, Mattamy intends to request a remand of this case to allow us an opportunity to have staff review the conditions and to re-engage with the community.

If you know of others who have an interest in this case who would like to be part of this discussion, please feel free to share this email with them.

Subject: RE: PD 22-ed, Ace Golf Rezoning 22-0075

Good afternoon Ms. Graham,

Our department just received updated information earlier this afternoon for PD RZ 22-0075. Zoning Intake staff will be uploading the files received later today to the PGM Store (online permit system) to be available to the public.

## **PGM Store Instructions:**

For your convenience, application records may be viewed directly on our website. We have attached the instructions to access the PGM Store. To review all application records on our website please turn off your Pop-Up Blocker before you log in. Click on the following link

https://www.hillsboroughcounty.org/en/businesses/permits-and-records/permits/plans-and-permit-information-pgm-store

To enter the PGM Store. Click on ENTER PGM STORE. The username and password are public. Double click on Document Repository. To access the information, please enter the tracking number in the box that reads APP/Permit/Tracking #, or by address or folio #, then click Query. A blue bar will pop up with the Application number, Folio ID, Permit type & Current Status. Double click on the bar to access the documents. Scroll down the page and you will find all the documents you are looking for. The Tracking, in this case, would be 22-0075.

Please feel free to email me if questions.

Regards,

Ms. Graham,

As to the portion of your question regarding participation by objectors, there is no deadline to "register" to participate in the hearing. An objector may submit documentary evidence either in person or by proxy during the Zoning Hearing Master hearing, or by submitting documentary evidence to the master file two business days prior to the hearing. See Sec. 10.03.06 of the LDC.

Thanks for letting me know. I appreciate it.

So I am clear about the Dec 12 hearing we spoke about earlier today (and this could help resolve our question/objection), could you please confirm that the remand request will bring PD-22-0075 back to the Land Use Hearing Officer hearing, where:

- 1) The hearing will not be limited to a specific issue on remand but will be a fresh hearing where everything relating to the application will be open for discussion from the beginning;
- 2) New parties of record, including those who did not participate in the July 25 hearing, may participate;
- 3) New evidence will be accepted from the applicant, proponents, and opponents; and
- 4) Public comment time (the cumulative total of 15 min) will be open, available to both people who participated in the July 25 hearing and those who did not.

If so, could you confirm by email and ensure this is in the record during the remand discussion tomorrow?

Also, Ms. Corbett shared with me the Oct. 11 BOCC Changes/Corrections/Additions document which states that the request is for a remand of the application, without specifying any specific conditions/corrections/new evidence. I understand this to mean the entire application is to be remanded, without limitation. Is that your interpretation as well?

Thanks again.

Sincerely,

Jane Graham, Esq.

Ms. Graham,

The Board does not typically take public testimony or comment on the Changes portion of the agenda, which is the point in the meeting at which the Board will consider and vote on the remand. For this reason, there is not a separate form for a request to speak on the remand request.

Ms. Graham,

Yes, I have been advised of the remand request for RZ 22-0075.

The Board will take up the request for remand at the beginning of the meeting, when the BOCC takes a vote on the requested continuances and changes to the agenda. While the BOCC has discretion as to the decision to remand, assuming the Board grants the request, the case will not be heard by the Board tomorrow and would be scheduled for a remand hearing on the Zoning Hearing Master hearing date requested by the applicant (December 12, 2022 at 6 PM).

Dear Ms. Lundgren,

I represent Mr. Anderson in PD 22-0075. Yesterday, we were forwarded the below email from Ms. Kami Corbett, stating that the Applicant Mattamy Homes will be requesting a remand. Have you heard anything about this? What would the procedure be for this? Is it possible that the Board of Commissioners would refuse their request and move forward with the hearing anyway?

Please advise asap.

Sincerely,

Jane Graham, Esq.

Subject: Ace Golf Rezoning - PD 22-0075 [IWOV-FirmLive.FID1739201]

### Good Afternoon -

I am the representative for Mattamy Homes, the Applicant for the above referenced rezoning. I am reaching out to you because each of you have expressed concerns about the proposed rezoning. I realize that this application has been in process for some time and has changed several times and the community did not get an opportunity to meet with the Applicant to understand the changes and discuss whether there were any other conditions or mitigating measures Mattamy could undertake help alleviate your concerns.

Upon review of the comments in the record and the last minute changes to the conditions that were presented to the ZHM, but not vetted by staff, Mattamy intends to request a remand of this case to allow us an opportunity to have staff review the conditions and to re-engage with the community.

If you know of others who have an interest in this case who would like to be part of this discussion, please feel free to share this email with them.

Subject: RE: PD 22-ed, Ace Golf Rezoning 22-0075

Good afternoon Ms. Graham,

Our department just received updated information earlier this afternoon for PD RZ 22-0075. Zoning Intake staff will be uploading the files received later today to the PGM Store (online permit system) to be available to the public.

#### **PGM Store Instructions:**

For your convenience, application records may be viewed directly on our website. We have attached the instructions to access the PGM Store. To review all application records on our website please turn off your Pop-Up Blocker before you log in. Click on the following link

https://www.hillsboroughcounty.org/en/businesses/permits-and-records/permits/plans-and-permit-information-pgm-store

To enter the PGM Store. Click on ENTER PGM STORE. The username and password are public. Double click on Document Repository. To access the information, please enter the tracking number in the box that reads APP/Permit/Tracking #, or by address or folio #, then click Query. A blue bar will pop up with the Application number, Folio ID, Permit type & Current Status. Double click on the bar to access the documents. Scroll down the page and you will find all the documents you are looking for. The Tracking, in this case, would be 22-0075.

Please feel free to email me if questions.

Regards,

#### **Israel Monsanto**

Ms. Graham,

As to the portion of your question regarding participation by objectors, there is no deadline to "register" to participate in the hearing. An objector may submit documentary evidence either in person or by proxy during the Zoning Hearing Master hearing, or by submitting documentary evidence to the master file two business days prior to the hearing. See Sec. 10.03.06 of the LDC.

Thanks for letting me know. I appreciate it.

So I am clear about the Dec 12 hearing we spoke about earlier today (and this could help resolve our question/objection), could you please confirm that the remand request will bring PD-22-0075 back to the Land Use Hearing Officer hearing, where:

- 1) The hearing will not be limited to a specific issue on remand but will be a fresh hearing where everything relating to the application will be open for discussion from the beginning;
- 2) New parties of record, including those who did not participate in the July 25 hearing, may participate;
- 3) New evidence will be accepted from the applicant, proponents, and opponents; and
- 4) Public comment time (the cumulative total of 15 min) will be open, available to both people who participated in the July 25 hearing and those who did not.

If so, could you confirm by email and ensure this is in the record during the remand discussion tomorrow?

Also, Ms. Corbett shared with me the Oct. 11 BOCC Changes/Corrections/Additions document which states that the request is for a remand of the application, without specifying any specific conditions/corrections/new evidence. I understand this to mean the entire application is to be remanded, without limitation. Is that your interpretation as well?

Thanks again.

Sincerely,

Jane Graham, Esq.

Ms. Graham,

The Board does not typically take public testimony or comment on the Changes portion of the agenda, which is the point in the meeting at which the Board will consider and vote on the remand. For this reason, there is not a separate form for a request to speak on the remand request.

Hi Johanna,

It was great to speak with you today.

I want to let you know that I intend to make a legal/procedural objection during tomorrow's meeting relating to the requested remand. I will be there in person to make this objection.

I previously submitted a form for comment for agenda item itself (F.3). Do I need to submit an additional form specifically relating to the requested remand?

Thanks and I will see you tomorrow.

Best, Jane

Jane Graham, Esq. Florida Bar Board Certified Attorney in City, County, and Local Government Law Attorney and Founder Sunshine City Law 737 Main Street, Suite 100 Safety Harbor, FL 34695 (727) 291-9526 jane@sunshinecitylaw.com www.sunshinecitylaw.com

Ms. Graham,

Yes, I have been advised of the remand request for RZ 22-0075.

The Board will take up the request for remand at the beginning of the meeting, when the BOCC takes a vote on the requested continuances and changes to the agenda. While the BOCC has discretion as to the decision to remand, assuming the Board grants the request, the case will not be heard by the Board tomorrow and would be scheduled for a remand hearing on the Zoning Hearing Master hearing date requested by the applicant (December 12, 2022 at 6 PM).

Dear Ms. Lundgren,

I represent Mr. Anderson in PD 22-0075. Yesterday, we were forwarded the below email from Ms. Kami Corbett, stating that the Applicant Mattamy Homes will be requesting a remand. Have you heard anything about this? What would the procedure be for this? Is it possible that the Board of Commissioners would refuse their request and move forward with the hearing anyway?

Please advise asap.

Sincerely,

Jane Graham, Esq.

Subject: Ace Golf Rezoning - PD 22-0075 [IWOV-FirmLive.FID1739201]

#### Good Afternoon -

I am the representative for Mattamy Homes, the Applicant for the above referenced rezoning. I am reaching out to you because each of you have expressed concerns about the proposed rezoning. I realize that this application has been in process for some time and has changed several times and the community did not get an opportunity to meet with the Applicant to understand the changes and discuss whether there were any other conditions or mitigating measures Mattamy could undertake help alleviate your concerns.

Upon review of the comments in the record and the last minute changes to the conditions that were presented to the ZHM, but not vetted by staff, Mattamy intends to request a remand of this case to allow us an opportunity to have staff review the conditions and to re-engage with the community.

If you know of others who have an interest in this case who would like to be part of this discussion, please feel free to share this email with them.

Subject: RE: PD 22-ed, Ace Golf Rezoning 22-0075

Good afternoon Ms. Graham,

Our department just received updated information earlier this afternoon for PD RZ 22-0075. Zoning Intake staff will be uploading the files received later today to the PGM Store (online permit system) to be available to the public.

#### **PGM Store Instructions:**

For your convenience, application records may be viewed directly on our website. We have attached the instructions to access the PGM Store. To review all application records on our website please turn off your Pop-Up Blocker before you log in. Click on the following link

https://www.hillsboroughcounty.org/en/businesses/permits-and-records/permits/plans-and-permit-information-pgm-store

To enter the PGM Store. Click on ENTER PGM STORE. The username and password are public. Double click on Document Repository. To access the information, please enter the tracking number in the box that reads APP/Permit/Tracking #, or by address or folio #, then click Query. A blue bar will pop up with the Application number, Folio ID, Permit type & Current Status. Double click on the bar to access the documents. Scroll down the page and you will find all the documents you are looking for. The Tracking, in this case, would be 22-0075.

Please feel free to email me if questions.

Regards,

Subject: RE: PD 22-ed, Ace Golf Rezoning

Ms. Graham,

As to the portion of your question regarding participation by objectors, there is no deadline to "register" to participate in the hearing. An objector may submit documentary evidence either in person or by proxy during the Zoning Hearing Master hearing, or by submitting documentary evidence to the master file two business days prior to the hearing. See Sec. 10.03.06 of the LDC.

Thanks for letting me know. I appreciate it.

So I am clear about the Dec 12 hearing we spoke about earlier today (and this could help resolve our question/objection), could you please confirm that the remand request will bring PD-22-0075 back to the Land Use Hearing Officer hearing, where:

- 1) The hearing will not be limited to a specific issue on remand but will be a fresh hearing where everything relating to the application will be open for discussion from the beginning;
- 2) New parties of record, including those who did not participate in the July 25 hearing, may participate;
- 3) New evidence will be accepted from the applicant, proponents, and opponents; and
- 4) Public comment time (the cumulative total of 15 min) will be open, available to both people who participated in the July 25 hearing and those who did not.

If so, could you confirm by email and ensure this is in the record during the remand discussion tomorrow?

Also, Ms. Corbett shared with me the Oct. 11 BOCC Changes/Corrections/Additions document which states that the request is for a remand of the application, without specifying any specific conditions/corrections/new evidence. I understand this to mean the entire application is to be remanded, without limitation. Is that your interpretation as well?

Thanks again.

Sincerely,

Jane Graham, Esq.

Ms. Graham,

The Board does not typically take public testimony or comment on the Changes portion of the agenda, which is the point in the meeting at which the Board will consider and vote on the remand. For this reason, there is not a separate form for a request to speak on the remand request.

Hi Johanna,

It was great to speak with you today.

I want to let you know that I intend to make a legal/procedural objection during tomorrow's meeting relating to the requested remand. I will be there in person to make this objection.

I previously submitted a form for comment for agenda item itself (F.3). Do I need to submit an additional form specifically relating to the requested remand?

Thanks and I will see you tomorrow.

Best,

Jane

Ms. Graham,

Yes, I have been advised of the remand request for RZ 22-0075.

The Board will take up the request for remand at the beginning of the meeting, when the BOCC takes a vote on the requested continuances and changes to the agenda. While the BOCC has discretion as to the decision to remand, assuming the Board grants the request, the case will not be heard by the Board tomorrow and would be scheduled for a remand hearing on the Zoning Hearing Master hearing date requested by the applicant (December 12, 2022 at 6 PM).

Dear Ms. Lundgren,

I represent Mr. Anderson in PD 22-0075. Yesterday, we were forwarded the below email from Ms. Kami Corbett, stating that the Applicant Mattamy Homes will be requesting a remand. Have you heard anything about this? What would the procedure be for this? Is it possible that the Board of Commissioners would refuse their request and move forward with the hearing anyway?

Please advise asap.

Sincerely,

Jane Graham, Esq.

Subject: Ace Golf Rezoning - PD 22-0075 [IWOV-FirmLive.FID1739201]

#### Good Afternoon -

I am the representative for Mattamy Homes, the Applicant for the above referenced rezoning. I am reaching out to you because each of you have expressed concerns about the proposed rezoning. I realize that this application has been in process for some time and has changed several times and the community did not get an opportunity to meet with the Applicant to understand the changes and discuss whether there were any other conditions or mitigating measures Mattamy could undertake help alleviate your concerns.

Upon review of the comments in the record and the last minute changes to the conditions that were presented to the ZHM, but not vetted by staff, Mattamy intends to request a remand of this case to allow us an opportunity to have staff review the conditions and to re-engage with the community.

If you know of others who have an interest in this case who would like to be part of this discussion, please feel free to share this email with them.

Zoning Hearing Master Hillsborough County 601 E Kennedy Blvd Tampa, FL 33602

Re: RZ22-0075 (12910 Boyette Road, Riverview, FL)

Dear Zoning Hearing Master:

The Tampa Bay Conservancy owns the 60+ acre parcel of land immediately adjacent to this rezoning request. That property, known as the Myron and Helen Gibbons Nature Preserve, was donated to the Conservancy for permanent preservation of a pristine riverine habitat on Bell Creek and the Alafia River. The Preserve is frequented by numerous residents and organizations, who enjoy hiking the nature trails and seeing the native flora and fauna of the property. Last year it was a favorite destination for attendees at the Florida Birding Festival.

The Board of the Conservancy has reviewed the rezoning application, and unanimously voted to oppose the application as proposed. The application has requested an increase in density above what is permitted by the Comprehensive Plan category of Residential -4. No justification for the increased density was provided, other than financial gain for the developer/applicant. The Conservancy objects to the increased density, due to the impacts of urban scale development on the Gibbons Preserve.

The applicant is also requesting setback waivers adjacent to the Preserve. Rather than adhering to the required additional setback for structures over 20 feet in height, they are requesting a reduction to a setback of 10 feet on the eastern property boundary, immediately adjacent to the Preserve. The Conservancy objects to townhouse structures within 10 feet of the property line.

A waiver of Locational Criteria for the development of commercial on the property frontage is requested. The Conservancy objects to the introduction of retail commercial development at this location, which has the potential to introduce incompatible uses adjacent to the nature preserve.

The applicant states in their submittal narrative that "there is no compatibility issue." We could not disagree more. A development of this intensity will have impacts to the Gibbons Preserve. It is not simply a vacant piece of property. The Preserve has been nationally recognized as an Old Growth Forest habitat, and officially listed in the Old Growth Forest Network. As such, it is a special habitat that deserves well designed buffering and screening, with appropriate density and intensity levels to minimize impacts adjacent to its boundaries.

We appreciate the opportunity to provide input to this rezoning application. Thank you for your consideration of the issues that will permanently impact our nature preserve.

Respectfully

Ethel Hammer

Date and Time Submitted: Sep 2, 2022 4:18 PM

Name: Monica Messer

Address: 10122 Sedgebrook Dr

Riverview, FL 33569

Phone Number: (813) 672-0409

Email Address: mmesser2@verizon.net

**Subject**: Ace Golf Rezone: RZ 22-0075

**Message**: Stacy, HELP! The proposed rezoning and development of the Ace Golf parcel on Boyette Road is a potential disaster for our safety. Due to the cluster of schools on Boyette and the elementary school one block up on Sedgebrook, traffic is already snarled in that section of Boyette, extending up to Bell Shoals. We have had numerous events related to parents dropping off or picking up their kids in one of the three schools in this area when they try to evade normal traffic regulations to get ahead of other parents in the car lines. It is already a very unsafe and very congested area.

It seems the Commission has little power to protect us from development. This is a fight worth throwing your full weight into. Hundreds of children traverse this area to access their schools. It was borderline criminal to put the two Academies across Boyette from each other; now this proposal promises to be beyond criminal.

Please help stop the rezoning and development of Ace Golf parcel, we beg you!

Monica Messer

Treasurer- Frank Bragg

Member at Large- Josh Potter

Hello,

My name is Jennifer Miller and I'm the HOA President for Waterford on the Alafia (a community located to the East of the proposed rezoning). I am writing on behalf of our community regarding application number **PD 22-0075** – Rezoning to a Planned Development.

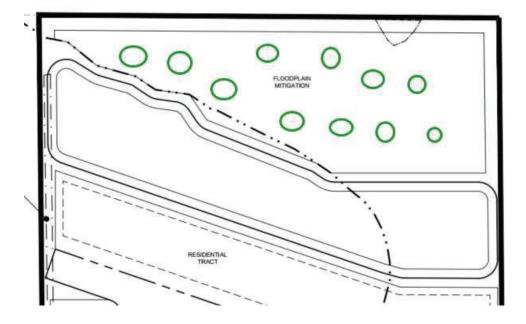

Our community would like to pass along our concerns to County Staff regarding the proposed rezoning for 12910 Boyette Rd. Riverview, FL 33569.

- We are opposed to the developers request for an increase in density (existing plan allows 4 units per acre, proposed is 6 units per acre).
  - We feel the area resources are already being strained from other developments around us and from the South County area. Currently, properties South of the Alafia River are subject to temporary one day a week irrigation from Jan. 4, 2021 – Dec. 31, 2022.
  - According to the EPA, the average person uses 82 gallons of water per day. By reducing the number of townhomes, it could save thousands of gallons of water per day on an already strained water table.
  - Schools in this area are full. We have 2 charter schools across the street from each other (a 0.6 mile walk from the proposed townhomes) and both schools have a waiting list to get in. Does the impact study address this?
  - o Traffic on Boyette, FishHawk and Bell Shoals is strained already at rush hour.
- We are concerned that the buffer zone of 5 ft. is insufficient and will result in destruction of a wildlife migration trail. We would like to see a 40 ft. buffer along Tampa Bay Conservancy (East side). We would also like to ensure there are plenty of trees, whether that is keeping the ones there or planting new ones to keep the area looking natural.

• We would like to keep as many of the current trees at the rear of the community and add some new trees to keep that area looking natural.

- We would like a copy of the environmental study that was done showing there will be no adverse impact to the surrounding properties.
- We would like to have access to the Engineer drawings for this community's drainage and the floodplain survey to ensure no flooding will happen on any surrounding properties. Our park already floods due to Bell Creek being narrow and random releases of water from the Dam located in Shadow Run for Lake Grady.
  - O Where will the street and surface water be drained to?
- We would like a 6 ft. tall Trex style fence as that looks more natural (a white PVC fence, is not acceptable). It should run from the road along the side of the property facing our sub-division (see photo below, orange squiggly line).
  - This would protect the townhome residents from coyote and bobcat coming in from the preserve.

 We would prefer the community lighting be low, so it doesn't shine into the preserve or our backyards.

- Is there anything in writing stating how many investors can or can't purchase in the community? If so, what is the Investor to homeowner ratio?
- We would like the Community Gathering area moved so we don't hear the potential noise from gatherings.

- We are opposed to the public parking lot.
  - We are concerned that if there are trash cans or dumpsters in the area, it will impact the wildlife looking for an easy meal.
  - Current wildlife that has been seen within our community in the last year: deer, red fox, bobcat, coyote, boar, gopher turtles, raccoon, gators, raccoons, peacock's, osprey and several other bird species.

We are opposed to any type of school or daycare going in front of the townhomes (parcel 2 - 3.72 acres) because we have so many in the area already. We have a lot of noise from the charter schools now, as well as traffic issues due the number of schools in the area. We are not opposed to professional office space.

### PROPOSED LAND USE

PARCEL 1 (14.34 Ac.)

86 SINGLE FAMILY TOWNHOUSES (6 DU/AC APPLYING POLICY 19.3)

PARCEL 2 (3.72 Ac.)

UP TO 30,000 SF OF RESIDENTIAL SUPPORT, BPO, & COMMERCIAL NEIGHBORHOOD USES WITH EXCEPTIONS (NO DRIVE-THRUS & NO CONVENIENCE STORES -WITH OR WITHOUT GAS PUMPS)

Riverview, FL 33569

Phone Number: (813) 677-6422

Email Address: <u>ifrank41@verizon.net</u>

**Subject**: Rezoning of Ace Driving Range from Agriculture to Planned Development

**Message**: This property was issued a "special use" permit against the objections of this area. Now they apply for a rezoning to add 80+ townhouses, 20,000 sq. ft. shopping and a 10,000 sq. ft. daycare. If this is allowed, it would be criminal. The property is located at the intersection of Sedgebrook Dr. and Boyette Rd. This is near three schools and the Fish Hawk/Boyette/Bell Shoals intersection. Traffic from the Boyette School is backed up into and onto Boyette rd. Traffic, during mornings and afternoons for the two other schools are backed up for a mile, intersections are blocked completely through light changes. The zoning/rezoning Dept. are making this neighbor unlivable. It should be your jobs as Commissioners to keep a neighbor from becoming like this. I am handicapped and cannot attend these meetings; this one has been postponed several times just to wear the people down and finally no one shows up and it slips through. I will bet you money that if/when they do a traffic count, they will say the road will accept the extra traffic. Is it any wonder the people are so disgusted by our government?

Email Address: <u>ifrank41@verizon.net</u>

**Subject**: Rezoning of Ace Driving Range from Agriculture to Planned Development

**Message**: This property was issued a "special use" permit against the objections of this area. Now they apply for a rezoning to add 80+ townhouses, 20,000 sq. ft. shopping and a 10,000 sq. ft. daycare. If this is allowed, it would be criminal. The property is located at the intersection of Sedgebrook Dr. and Boyette Rd. This is near three schools and the Fish Hawk/Boyette/Bell Shoals intersection. Traffic from the Boyette School is backed up into and onto Boyette rd. Traffic, during mornings and afternoons for the two other schools are backed up for a mile, intersections are blocked completely through light changes. The zoning/rezoning Dept. are making this neighbor unlivable. It should be your jobs as Commissioners to keep a neighbor from becoming like this. I am handicapped and cannot attend these meetings; this one has been postponed several times just to wear the people down and finally no one shows up and it slips through. I will bet you money that if/when they do a traffic count, they will say the road will accept the extra traffic. Is it any wonder the people are so disgusted by our government?

**Subject**: Zoning application no. RZ 22-0075

**Message**: I write to you in opposition to the above application. There are numerous objections. One, the extra traffic that this development would involve in. This is located very near three schools. When the schools start up in the mornings and let out in the afternoons, this area is totally saturated with vehicles. From the Catholic Church to the west, the Echo development, and Paddock Oaks Subdivision, all these vehicles must make a "U" turn through this intersection if going west. To the east of this intersection, you have the Bell Creek subdivision who must make "u" turns at the light to the east, if they are heading west. The county, through your unrelenting permits, rezoning, etc.; have created a dangerous situation. I live one block south of the Sedgebrook and Boyette intersection, which this development if approved, will be using. At times it takes me 20 minutes to get onto Boyette east bound and you can forget trying to go west on Boyette. If anyone says that Boyette will handle the increased traffic, they will be telling you a falsehood. You, as commissioners have degraded our quality of like to a miserable state, please do not do us more injustice by approving this rezoning. Thank you for your consideration.

Zoning Hearing Master Hillsborough County 601 E. Kennedy Blvd. Tampa, FL, 33602

Re: RZ22-0075 (12910 Boyette Road, Riverview, FL)

Dear Zoning Hearing Master:

The Executive Committee of the Tampa Bay Sierra Club has reviewed the above-referenced Rezoning Application, and has unanimously voted to send this letter opposing the proposed rezoning request.

The application has requested an increase in the density above what would be permitted under the Comprehensive Plan category of Residential – 4. Other than trying to fit more townhomes into the proposed development for additional financial gain, the applicant has not offered any justifiable explanation for the increased density, nor has the applicant established any justification for the requested property line setbacks from the adjacent Myron and Helen Gibbons Nature Preserve, or the waiver of height limitations under the development code.

Sierra Club also objects to the requested Waiver of Locational Criteria for the commercial development that is requested on that portion of the property which fronts on Boyette Road. Placing a 20,000 square foot grocery store and a 10,000 square foot day care center in this location is incompatible with the adjoining Nature Preserve, and will undoubtedly cause adverse impacts to the Preserve.

The Preserve has been designated as an Old Growth Forest, the only one designated in Hillsborough County. While all forests have important ecological roles, old-growth stage is especially important because of its unique structure. Various canopy layers and berry-producing plants are found in an old growth forest which are beneficial to wildlife, especially birds. Also, many old hollowed out trees in an Old Growth Forest provide irreplaceable habitat for many animal species.

The intensive development which is proposed would likely cause damage to this precious ecosystem during the construction process, and from increased foot traffic by all of the new residents and visitors who are presently unable to visit the Preserve in large numbers due to the lack of parking and access at the Preserve itself. If this Preserve becomes a backyard playground for the families who live in the new townhomes and others who park at the grocery store to gain access to the Preserve, it will suffer irreparable harm.

We strongly feel that the proposed development is inconsistent with the Comprehensive Plan, the development code and is incompatible with the neighboring properties. For these reasons, we respectfully request that the application for rezoning as a Planned Development and the waivers be denied.

Sincerely,

Rocky

December 2, 2022

Re: RZ PD 22-0075, 12910 Boyette Road

Dear Mr. Monsanto:

The undersigned parties of record request that Hillsborough Planning Staff finds PD 22-0075, Mattamy Tampa/Sarasota LLC's rezoning application for the property at 12910 Boyette Road ("Application") inconsistent with the Hillsborough County Comprehensive Plan. The Applicant's request for a density bonus is inconsistent with Goal 6, Livable Communities Element which requires the reduction of future land use map density and intensity along the Alafia River.

Goal 6 of the Livable Communities Element of the Hillsborough County Comprehensive Plan states:

Prioritize the significance of improved quality, enjoyment, and protection of the Alafia River and other natural resources such as open space.

\* \* \*

 Reduce to the extent possible Future Land Use Map densities and intensities along the Alafia River to maintain, preserve, and protect the environmental quality and wildlife habitat of the Alafia River and surrounding watershed.

Planning Commission staff previously acknowledged in their July 13, 2022 report that Goal 6 as relevant, stating:

...Goal 6 of the Riverview Community plan seeks to protect the Alafia River. The Alafia River is to the north of the property, adjacent to the preservation area and the property contains a small portion in the Coastal High Hazard Area (CHHA) in the northeast corner.

Based on Goal 6 of the Livable Communities Element, the Applicant cannot increase density or intensity by the Alafia River. Density is supposed to be reduced, not increased on this property. However, the Application is proposing to increase density through a density bonus, based on FLU Policy 19.3, Incentives for Mixed Use. The July 13 Report omitted any discussion of the prohibition on density increases along the Alafia River.

### Tampa Bay Conservancy \* Gibbons Family \* Boyette Springs Homeowners Association \* James Anderson

When comparing broader policies like FLU Policy 19.3 with more specific policies for communities like the Riverview Plan, Goal 6, the more specific policy controls. The Livable Communities Element, 1.0 states:

Community and Special Area Studies are intended to be extensions and refinements of the County's Comprehensive Plan. The studies should discuss the special and unique characteristics of the areas under study and examine the issues and problems facing the areas and provide strategies for solutions...The Comprehensive Plan is general in nature and provides guidance on an issue county-wide. A community or special area study is more detailed in nature and is intended to provide specific recommendations on issues in a particular area of the county.

# Likewise, FLU Policy 18.1 states:

The community plans will be adopted as part of the Comprehensive Plan in the Livable Communities Element; these more restrictive community specific policies will apply in guiding the development of the community.

As such, Goal 6 controls. This Application is inconsistent with the Comprehensive Plan because it requests a density bonus when no such increase in density can occur. Please confirm receipt and advise how the County intends to proceed. The undersigned appreciate the opportunity to participate in the process as an affected parties and look forward to working with you through the process.

# Sincerely,
