## **5.0 IMPLEMENTATION RECOMMENDATIONS**

## 5.1 Compatibility

The property in question is primarily zoned CG. By rezoning the portion of the property zoned ASC-1 to CG it will allow full use of the property in a commercial capacity. Development of the site will require compliance with all CG zoning district standards, which includes minimum setbacks, provision of buffering and screening, and height maximums.

A review of historical zoning maps does not indicate the split zoning recognizing differing parcels and uses. Rather, the zoning line appears to reflect the angle of US Hwy 92.

## 5.2 Recommendation

## **Staff Analysis of Goals, Objectives and Policies:**

The  $1.14 \pm$  acre subject site is south of East US Highway 92 and west of North Kingsway Road. The subject sit is in the Urban Service Area and is within the limits of the Seffner-Mango Community Plan. The applicant is requesting a rezoning from Commercial General (CG) and Agricultural Single Family Conventional (ASC-1) to CG.

The subject site is in the Urban Service Area where, according to Objective 1.1 of the Future Land Use Section (FLUS), 80 percent of the county's growth is to be directed. Policy 3.1.3 requires all new developments to be compatible with the surrounding area, noting that "compatibility does not mean "the same as." Rather, it refers to the sensitivity of development proposals in maintaining the character of existing development." Vacant land occupies the subject site and the area immediately east across North Kingsway Road. To the north, across East U.S. Highway 92, lies Burnett Middle School, with additional public, quasi-public, institutional, and single-family residential uses extending north, south, and west of the site. Further single-family residential development is located to the east. A mobile home park is situated to the south and east of the subject property. Light commercial uses are present to both the east and west, while heavy commercial uses are located directly east. Light industrial uses are found to the west. Taken together, these surrounding development patterns support the conclusion that the proposal is consistent with FLUS Objective 1.1 and FLUS Policy 3.1.3.

RZ 25-1418 2

Consistent with Objective 2.2, the Future Land Use categories establish the maximum allowable intensity or density, as well as the range of permitted uses within each category. Table 2.2 further defines the character, intent, and development parameters associated with each Future Land Use designation. The subject site is designated Residential-4 (RES-4) on the Future Land Use Map. The RES-4 category permits consideration of agricultural and residential uses, as well as neighborhood commercial, office, and multipurpose developments. It allows a residential density of up to four dwelling units per gross acre or a maximum nonresidential intensity of 0.25 Floor Area Ratio (FAR).

The Comprehensive Plan requires that all development meet or exceed the land development regulations in Hillsborough County (FLUS Objective 4.1, FLUS Policy 4.1.1 and FLUS Policy 4.1.2). However, at the time of uploading this report, Transportation comments were not yet available in Optix and thus were not taken into consideration for analysis of this request.

The subject site meets the Commercial Locational Criteria (CLC) established in FLUS Objective 4.7. FLUS Policy 4.7.2 allows neighborhood-serving commercial uses, including office uses, up to the maximum FAR permitted within the applicable Future Land Use category when certain locational standards are satisfied. Specifically, at least 50% of the site must front a roadway designated as Suburban Commercial, Suburban Town, or Urban General on either the Hillsborough County or Florida Department of Transportation Context Classification Maps, or be located within 1,000 feet of an intersection where both roadways are classified as collectors or arterials on the Hillsborough County Functional Classification Map. Additionally, a minimum of 75% of the subject property must lie within the required 1,000-foot radius of the qualifying intersection. All measurements are taken from the edge of the roadway right-of-way and the area within this distance, measured along both roadways, forms the applicable quadrant. The nearest qualifying intersection to the subject site is East U.S. Highway 92, a State Principal Arterial roadway, and North Kingsway Road, a County Collector roadway. As the site is located 490 feet away from the intersection, it is within the required distance and therefore meets Commercial Locational Criteria.

The proposal satisfies the intent of FLUS Objective 4.4 and FLUS Policy 4.4.1, which require new development to be compatible with the surrounding neighborhood. In this case, the area is characterized by a mix of land uses, with commercial development prominently present in the immediate vicinity. FLUS Policy 4.4.1 specifies that any increase in density or intensity must be compatible with existing, proposed, or planned development, and that development or redevelopment should be integrated with adjacent uses through the establishment of like or complementary uses, mitigation of adverse impacts, provision of transportation and pedestrian connections, and a gradual transition of intensity. The proposed rezoning aligns with these principles, complements the surrounding development pattern, and is consistent with FLUS Objective 4.4 and FLUS Policy 4.4.1.

The subject site lies within the boundaries of the Seffner–Mango Community Plan. Goal 3 of the plan directs commercial development toward the U.S. 92 and Martin Luther King Jr. Boulevard corridors, recognizing their established commercial character within the Urban Service Area. The plan further encourages the revitalization and redevelopment of older commercial areas and existing commercial uses. In this context, the proposed rezoning from CG and ASC-1 to CG is consistent with the intent and strategies of the Seffner–Mango Community Plan as articulated in the Livable Communities Element.

Overall, staff finds that the proposed rezoning is compatible with the existing development pattern found within the surrounding area and supports the vision of the Seffner-Mango Community Plan. The proposed

RZ 25-1418

rezoning would allow for development that is consistent with the Goals, Objectives, and Policies of the *Unincorporated Hillsborough County Comprehensive Plan*.

## Recommendation

Based upon the above considerations and the following Goals, Objectives and Policies, Planning Commission staff finds the proposed rezoning **CONSISTENT** with the *Unincorporated Hillsborough County Comprehensive Plan*.

## **FUTURE LAND USE SECTION**

## **Urban Service Area**

**Objective 1.1:** Hillsborough County shall pro-actively direct new growth into the urban service area with the goal that at least 80% of all population growth will occur within the USA during the planning horizon of this Plan. Within the Urban Service Area, Hillsborough County will not impede agriculture. Building permit activity and other similar measures will be used to evaluate this objective.

## **Compatibility**

**Policy 3.1.3:** Compatibility is defined as the characteristics of different uses or activities or design which allow them to be located near or adjacent to each other in harmony. Some elements affecting compatibility include the following: height, scale, mass and bulk of structures, pedestrian or vehicular traffic, circulation, access and parking impacts, landscaping, lighting, noise, odor and architecture. Compatibility does not mean "the same as." Rather, it refers to the sensitivity of development proposals in maintaining the character of existing development.

## Land Use Categories

**Objective 2.2:** The Future Land Use Map (FLUM) shall identify Land Use Categories summarized in the table below, that establish permitted land uses and maximum densities and intensities.

**Policy 2.2.1:** The character of each land use category is defined by building type, residential density, functional use, and the physical composition of the land. The integration of these factors sets the general atmosphere and character of each land use category. Each category has a range of potentially permissible uses which are not exhaustive, but are intended to be illustrative of the character of uses permitted within the land use designation. Not all of those potential uses are routinely acceptable anywhere within that land use category.

## Relationship to Land Development Regulations

**Objective 4.1:** All existing and future land development regulations shall be made consistent with the Comprehensive Plan, and all development approvals shall be consistent with those development regulations as per the timeframe provided for within Chapter 163, Florida Statutes. Whenever feasible and

RZ 25-1418 4

consistent with Comprehensive Plan policies, land development regulations shall be designed to provide flexible, alternative solutions to problems.

**Policy 4.1.1:** Each land use plan category shall have a set of zoning districts that may be permitted within that land use plan category, and development shall not be approved for zoning that is inconsistent with the plan.

**Policy 4.1.2:** Developments must meet or exceed the requirements of all land development regulations as established and adopted by Hillsborough County, the state of Florida and the federal government unless such requirements have been previously waived by those governmental bodies.

## Neighborhood/Community Development

**Objective 4.4: Neighborhood Protection** – The neighborhood is the functional unit of community development. There is a need to protect existing, neighborhoods and communities and those that will emerge in the future. To preserve, protect, and enhance neighborhoods and communities, all new development must conform to the following policies.

**Policy 4.4.1:** Development and redevelopment shall be integrated with the adjacent land uses through:

- a) the creation of like uses; or
- b) creation of complementary uses; or
- c) mitigation of adverse impacts; and
- d) transportation/pedestrian connections

## Commercial-Locational Criteria

**Objective 4.7:** To meet the daily shopping and service needs of residents, only neighborhood-serving commercial uses will be permitted within land use categories that are primarily residential or agricultural in nature. Intensive commercial uses (uses allowed within the Commercial Intensive zoning district) shall not be considered neighborhood-serving commercial. Such developments do not require a Future Land Use Map Amendment to a non-residential category provided they meet the criteria established by the following policies and all other Goals, Objectives and Policies in the Comprehensive Plan. The frequency and allowance of neighborhood-serving commercial uses will be different in the Urban Service Area than in the Rural Area due to the population density, scale and character of the areas.

**Policy 4.7.2:** In the above land use categories, neighborhood-serving commercial uses, including office uses, can be considered to the maximum FAR permitted in each Future Land Use category in the following locations:

- 50% of the site must front along a roadway with a context classification of suburban commercial, suburban town or urban general context classification in the Hillsborough County Context Classification Map or the Florida Department of Transportation Context Classification Map; or
- Within 1,000 feet of the intersection of roadways both functionally classified as a collector or arterial per the Hillsborough County Functional Classification Map. At least 75% of the subject property must fall within the specified distance (1,000 feet) from the intersection. All measurements should begin at the edge of the road right-of-way. The land area within this distance, as measured along both roadways, makes a quadrant

RZ 25-1418 5

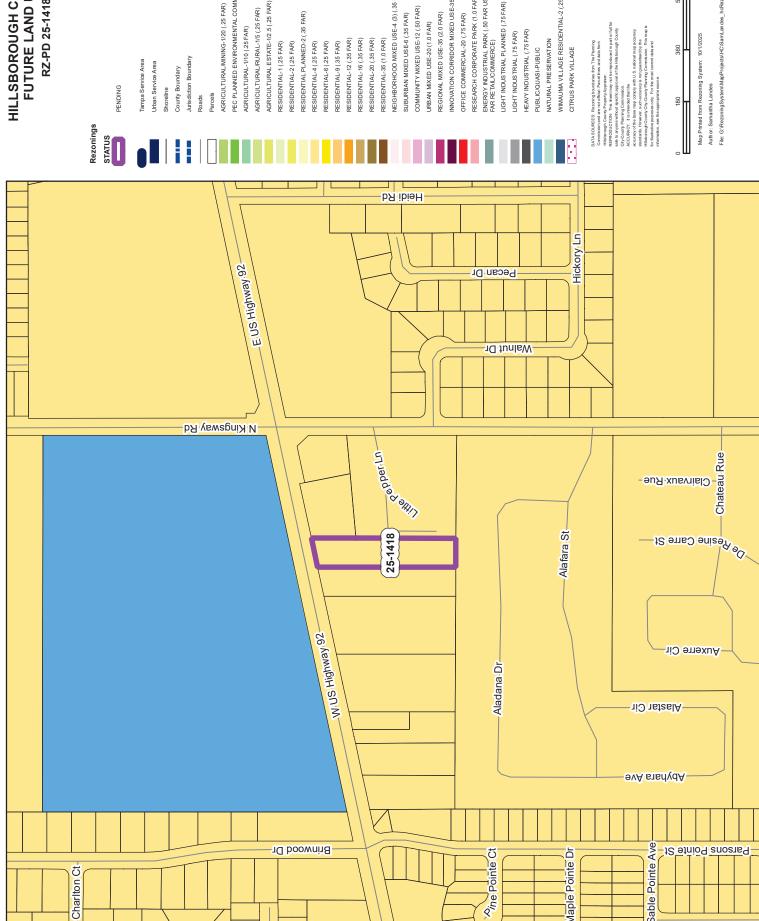

# LIVABLE COMMUNITIES ELEMENT: SEFFNER-MANGO

**3. Goal:** Commercial development should be directed to the US 92 and Martin Luther King Boulevard corridors.

# Strategies:

- Recognize the commercial character of US 92 and Martin Luther King Boulevard within the Urban Service Area.
- Encourage revitalization and redevelopment of older existing commercial areas and uses.
